Re: The Court Annexed Arbitration Program - Certification Of Arbitrators

Dear Clerk Bloom:

You will find attached a list of two non-lawyer professionals who we are submitting to the Supreme Court of Nevada for certification to act as arbitrators under the The Court Annexed Arbitration Program. Michael C. Riley and Eric M. Teitelman are residents of Douglas County. Their resumes are attached.

We have reviewed the qualifications of each person. They have extensive experience in their respective fields of expertise. We have conducted a background check with the permission of each applicant. No negative factors were uncovered as a result of the records check.

Arbitration Commissioner Steve McMorris has advised Mr. Riley and Mr. Teitelman that they will be required to complete an orientation and training program as set forth in NAR 7(C) when the program is offered. Further, they have been advised that their participation in the program will include arbitrator appointments regarding actions in the First and Second Judicial Districts.

Please do not hesitate to call us if you have any questions or need additional information.

DATED this 19 day of April, 1999.

David R. Gamble

DAVID R. GAMBLE
District Court Judge

Michael P. Gibbons

MICHAEL P. GIBBONS
District Court Judge

ERIC M. TEITELMAN, P.E.

WORK EXPERIENCE:**"Engineering Manager/County Engineer", Douglas County; Minden, NV., 1997-Present**

Responsible for managing the engineering and construction division, including administration of engineering and construction contracts for roads, sewer, water, storm drainage, and solid waste infrastructure. Also, responsible for overseeing engineering review and construction inspection of private development activities.

"Transportation Division Manager", City of Albany Public Works; Albany, OR., 1995-1997

Responsible for creating a new Traffic and Transportation Division to manage the City's traffic engineering and transportation planning functions, and to manage and maintain its municipal airport and public transit system. Specific responsibilities were to: establishing a safety management program; preparing channelization and signing plans; inspecting traffic related construction activities; reviewing consultant design plans; overseeing development of city-wide transportation system plan; and updating city's development standards with respect to transportation.

"Assistant Traffic Engineer", Thurston County Road Department; Olympia, WA., 1993-95

Responsible for transportation engineering and planning functions for the County, and supervision of technical support staff. Specific duties included: coordinating traffic engineering studies; reviewing traffic impact studies, construction drawings and site plans for new developments; establishing and collecting roadway mitigation fees; reviewing traffic signal plans; overseeing roadway geometric designs, channelization, and signing plans; developing traffic and roadway safety design standards; preparing highway and intersection capacity studies, roadway safety studies, and collision diagrams; overseeing field layout of striping and signing plans; and inspecting construction of traffic signals.

"Transportation Engineer", Washington State DOT; Vancouver, WA., 1991-93

Responsible for design and administration of highway projects, including: preparation of roadway plan and profile drawings, superelevation diagrams, contour and grading plans, earthwork volume calculations, rockfall mitigation, traffic signal and illumination plans, channelization and signing plans, utility plans, storm drainage and hydrology calculations, design reports, and construction cost estimates.

Also worked for six-months in highway construction. Specific duties included: inspection of highway and bridge construction projects, construction staking and topographic surveying, and field engineering to accommodate changes in construction drawings.

"Solid Waste Engineer", Klienfelder, Inc.; Diamond Bar, CA., 1990-91

Responsible for development of solid waste management and recycling programs for public agencies, including: development of solid waste reduction alternatives; preparation of solid waste generation studies; review and interpretation of environmental documents; and review of landfill closure programs and landfill designs.
