TOTAL ACRES ALLOTTED																7.20	
After further investigation of the irrigation system, it was determined that only 7.20 acres can be irrigated by Unnamed Spring (A). This is further described as 7.20 acres west of Foothill Road going west to the ditch that runs in a southwesterly direction to the western extreme of the pond constructed in 1992. The land under the footprint of the pond was sub-irrigated marsh-land prior to the construction of said pond. Therefore, the water source that offsets evaporative loss from the pond is made up from the spring area that was excavated during construction. This area corresponds with the acreage claimed under Proof of Appropriation V-02856, filed on April 23, 1975.
