

09/18/2009).

**Hannes Vogel, M.D.** – Forensic Neuropathologist – Pathology # SHS-13-27335 – Is expected to provide testimony as a medical expert as to his opinions, findings and diagnoses regarding his Neuropathologic analysis pertaining to victim KHAYDEN QUISANO (DOB: 09/18/2009) under Coroner's Case # 13-05465. In addition, Dr. Vogel is expected to provide expert testimony concerning injury patterns, mechanisms of injury and causes of injury in general, as well as those specifically pertaining to KHAYDEN QUISANO as derived from his analysis.

**Meena P. Vohra, M.D.** – Treating Physician - Is expected to testify as a medical expert as to her opinions and findings pertaining to the examination, treatment, observations, diagnosis, mechanism of injury to victim KHAYDEN QUISANO (DOB 09/18/2009).

**Jimmy Wang, M.D.** – Radiologist - Is expected to testify as a medical expert as to his opinions and findings pertaining to the examination, treatment, observations, diagnosis, mechanism of injury to victim KHAYDEN QUISANO (DOB 09/18/2009).

**Lisa Wong, M.D.** – Radiologist - Is expected to testify as a medical expert as to her opinions and findings pertaining to the examination, treatment, observations, diagnosis, mechanism of injury to victim KHAYDEN QUISANO (DOB 09/18/2009).

These witnesses are in addition to those witnesses endorsed on the Information or Indictment and any other witnesses for which a separate Notice of Witnesses and/or Expert Witnesses has been filed

The substance of each expert witness' testimony and a copy of all reports made by or at the direction of the expert witness has been provided in discovery.

The substance of each expert witness' testimony and a copy of all reports made by or at the direction of the expert witness has been provided in discovery. A copy of each expert witness' curriculum vitae, if available, is attached hereto.

## CURRICULUM VITAE

### HANNES VOGEL, MD

#### HOME ADDRESS:

15990 Flintlock Road, Cupertino, CA 95014

#### BUSINESS ADDRESS:

Department of Pathology (Neuropathology)  
Stanford University Medical Center, R241  
300 Pasteur Drive  
Palo Alto, CA 94305  
(650) 723-9672  
hvogel@stanford.edu

#### EDUCATION:

|      |                                             |
|------|---------------------------------------------|
| 1975 | BA (Biology), Rice University, Houston, TX  |
| 1980 | MD, Baylor College of Medicine, Houston, TX |

#### INTERNSHIPS AND RESIDENCIES:

|           |                                                                                                                  |
|-----------|------------------------------------------------------------------------------------------------------------------|
| 1980-82   | Resident in Pediatrics, Baylor Affiliated Hospitals, Houston, TX                                                 |
| 1982-83   | Resident in Pediatrics, University of California, San Francisco, CA                                              |
| 1983-84   | Chief Resident, Pediatrics, University of California,<br>San Francisco, CA                                       |
| 1984-87   | Resident in Anatomic Pathology, Beth Israel Hospital/Harvard<br>Medical School, Boston, MA                       |
| 1987-89   | Resident in Neuropathology, Stanford University<br>Hospital/Stanford University School of Medicine, Stanford, CA |
| 2000-2001 | Resident in Pediatric Pathology, Texas Children's Hospital,<br>Houston, TX                                       |

#### LICENSURE AND CERTIFICATIONS:

CV - HANNES VOGEL, MD  
Revised 04/02/2014

|      |                                                                   |
|------|-------------------------------------------------------------------|
| 1980 | Texas License Registration No. F7269. Expiration 8-31-2002        |
| 1982 | California License Registration No. C040662. Expiration 5-31-2014 |
| 1986 | American Board of Pediatrics                                      |
| 1989 | American Board of Pathology: Combined Anatomic and Neuropathology |
|      | Board Eligible: Pediatric Pathology                               |

#### **PROFESSIONAL MEMBERSHIPS:**

United States and Canadian Academy of Pathology  
 American Association of Neuropathologists  
 Associate, American Academy of Neurology  
 German Association of Neuropathology and Neuroanatomy  
 California Society of Pathologists  
 South Bay Pathology Society  
 Baltic Association of Neuropathology

#### **ACADEMIC APPOINTMENTS:**

|           |                                                                                                                                                                |
|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1985-87   | Affiliate Staff Member, Department of Pediatrics, Carney Hospital/Tufts University School of Medicine, Boston, MA                                              |
| 1988-90   | Clinical Associate, Department of Pediatrics, University of California, San Francisco, CA                                                                      |
| 1989-90   | Physician Specialist and Clinical Instructor, Department of Pathology, Stanford University Hospital, Stanford, CA                                              |
| 1991-92   | Assistant Professor, Departments of Medical and Surgical Neurology, and Pathology, and Pediatrics, Texas Tech University - Health Sciences Center, Lubbock, TX |
| 1992-99   | Assistant Professor, Departments of Pathology and Pediatrics, Baylor College of Medicine, Houston, TX                                                          |
| 1997-2002 | Assistant Professor, Department of Pathology and Laboratory Medicine, Texas A&M University Health Science Center, Houston, TX                                  |

CV - HANNES VOGEL, MD  
 Revised 04/02/2014

- 1999-2002 Associate Professor, Departments of Pathology and Pediatrics, Baylor College of Medicine, Houston, TX
- 2001-2002 Director of Neuropathology, Texas Children's Hospital, Houston, TX
- 5/8/02 – Acting Associate Professor of Pathology, Stanford University  
5/31/02 School of Medicine, Stanford, CA
- 6/1/02 – Associate Professor of Pathology and Pediatrics (Medical Genetics)  
4/30/07 Stanford University School of Medicine, Stanford, CA
- 6/1/02 – Director of Neuropathology, Stanford University Medical Center,  
Stanford, CA
- 2005- Associate Chair of Neuropathology, as Member of the Department of  
Pathology Leadership Group, Stanford University, Stanford, CA
- 9/1/05- Associate Professor of Neurosurgery (by courtesy), Stanford University  
4/30/07 School of Medicine, Stanford, CA
- 5/1/07- Professor of Pathology and Pediatrics (Medical Genetics) and  
Neurosurgery (by courtesy), Stanford University School of Medicine,  
Stanford, CA
- 2008- Member, Stanford Cancer Center, Stanford University Hospital,  
Stanford, CA

## RESEARCH GRANTS:

### Past:

|           |                                                                                                                                                                                                                                                                                                             |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1988-90   | Collaborative research with Drs. Eugene Butcher and Louis Picker, Stanford University Medical School and Palo Alto Veteran's Administration Hospital: Expression of CD44 (HCAM) by human astrocytes, supported by American Heart Association, NIH grant AI19957, and an award from the Weingart Foundation. |
| 1992-1993 | Role of CD44 in astrocyte neoplasia, immunolocalization of CD44 in the central and peripheral nervous systems, CD44 as a astrocytic hyaluronate receptor. Supported by Baylor College of Medicine, Department of Pathology institutional grants, and the Moran Foundation.                                  |
| 1992-1994 | Collaboration with Drs. Phillip Soriano and Paul Stein: characterization of renal pathology in transgenic mice homozygous for deletion of tyrosine kinases fyn and yes, supported by the Howard Hughes Medical Institute.                                                                                   |
| 1992-1994 | Pilot project investigator in the role of astrocytic adhesion molecules in Alzheimer's disease. Alzheimer Disease Research Center, Baylor College of Medicine. NIH-AG08664.                                                                                                                                 |

CV - HANNES VOGEL, MD  
Revised 04/02/2014

- 1993-1995 Collaboration with Lawrence Donehower: characterization of neoplasia arising in p53- and Rb-deficient mice, supported by National Cancer Institute CA 54897.
- 1993-1997 Collaboration with Mark Perin: Immunohistochemical analysis of novel synaptic proteins, supported by National Institutes of Health. RO1 NS-30541.
- 1993-1997 Collaboration with Dr. Donald M. Marcus, Baylor College of Medicine, in the histopathological analysis of rat tissues in the study of an animal model of autoimmune neuropathy.
- 1995-1997 Collaboration with Dr. Russell Lebovitz, Department of Pathology, Baylor College of Medicine, in the analysis of the neuropathological abnormalities in mice deficient in superoxide dismutase 2.
- 1995-2002 Collaboration with Dr. Allan Bradley, Department of Molecular Genetics, in the analysis of tumorigenesis in transgenic mice lacking p53, mdm, blm.
- 1998-2003 Pathologist, NIH Program Project: Genetic Analysis of Mouse Chromosome 11. PI: Allan Bradley, Ph.D.
- Co-investigator, Pediatric Brain Tumor Clinical Trials Consortium.  
Granting agency: National Cancer Institute.
- 1999-2002 Consultant pathologist, Lexicon Genetics Inc.
- 1999-2002 Pathologist: "Inactivated p53 Gene in Mice" R01 CA54897-07/10 09/30/99 - 07/31/03.
- 2000-2002 New Investigator, Center for AIDS Research, Baylor College of Medicine.
- 2005-2007 Principal Investigator – Immunohistochemistry of mitochondrial respiratory chain complexes. Pediatric Health Research Fund Award.
- Present:
- 2002- Collaborator – Role of p63 in development and neoplasia. PI Alea Mills, Cold Spring Harbor Laboratory, NY.
- 2002- Collaborator – Neural Stem Cell Research. PI Theo Palmer, Department of Neurosurgery, Stanford University.

CV - HANNES VOGEL, MD  
Revised 04/02/2014

- 2002- Collaborator – Mouse model of spongiform degeneration. PI Greg Barsh, Stanford University.
- 2004- Collaborator – Role of defective chromosome repair in neoplasia. PI Guangbin Luo, Case Western University.
- 2004- Collaborator – Parkinson disease-related genes in genetically engineered drosophila. PI Bingwei Lu, Stanford University.
- 2004- Collaborator – Role of gigaxonin and other cytoskeletal proteins in axonal function. PI Yanmin Yang, Stanford University.
- 2005- Collaborator – Role of chromosome 1p in neoplasia, PI Alea Mills, Cold Spring Harbor Laboratory, NY.
- 2006- Collaborator – Role of Ku80 in medulloblastoma and senescence. PI Paul, D.V.M., Department of Molecular Medicine, University of Texas Health Science Center at San Antonio.
- 2007- Other Investigator – Pathophysiology of lysosomal free sialic acid storage disorders. NIH.
- 2007- Other Investigator – Immunology of neural stem cell fate and function. California Institute of Regenerative Medicine.
- 2008- Collaborator – Role of Beta-receptor signaling in cardiomyopathy. PI Daniel Bernstein, Cardiovascular Institute, Stanford School of Medicine.
- 2008- Principal Investigator – Genetic dissection of mitochondria and muscle maintenance. Palo Alto Institute for Research Education.
- 2008- Collaborator – Prognostic value of MRI and biomarker in comatose post-cardiac arrest patients. PI Christine Wijman, Stanford Stroke Center, Stanford School of Medicine.

#### TEACHING EXPERIENCE:

- 1983-84 Organization and presentation of clinical conferences, ward rounds, and grand rounds in general pediatrics, San Francisco General Hospital.
- 1985-87 Laboratory instructor general pathology, Harvard Medical School.
- 1987-90 Lecturer in medical school core curriculum neuropathology lectures; organization and presentation of monthly surgical and autopsy neuropathology conference, Department of Pathology, Stanford University School of Medicine.

CV - HANNES VOGEL, MD  
Revised 04/02/2014

- 1991-92      Organized comprehensive neuropathology training for neurology residents and core neuropathology curriculum Texas Tech University - Health Sciences Center medical students.
- 1992-      Lecturer in general and neuropathology for Baylor College of Medicine students, pathology residents, neurology residents, neuropathology fellows, neurosurgical conferences, monthly pediatric nerve and muscle pathology conference.
- 1994      Invited speaker First Annual J. Edward Stern, M.D. Neuroscience Symposium, Providence Memorial Hospital, El Paso, Texas. "Neuropathology of common neurological disorders: An update".
- 1995      Invited speaker, Annual meeting of the Texas Society for Histotechnology, Inc., Houston Texas. "Current concepts in processing nerve and muscle biopsies". Half-day Wet Workshop. April 9.
- 1995-2001      Invited lecturer. Topics in neuropathology, core curriculum in pathology. Texas A&M School of Medicine.
- 1995-1999      Invited lecturer. Topics in neuropathology. Texas Tech University School of Medicine.
- 2001      Faculty, After Dinner Seminar: "Pediatric Neuropathology". Annual meeting, American Academy of Neurology, Philadelphia, PA, May 7.
- Pathology department representative, selected to lecture to entering medical school class, Core Concepts Curriculum, Baylor College of Medicine.
- 2002-      Lecturer in neuropathology and pediatric neoplasia, Stanford University School of Medicine.

**POINTS AND AUTHORITIES**

**STATEMENT OF FACTS REGARDING DEATH OF KHAYDEN QUISANO**

Thursday, June 6, 2013, started out like a normal day; Christina Rodrigues woke up her two sons with the Defendant, Khayden and Khaysen Quisano, around 6:30 a.m., got ready for work and prepared the boys ready for their day. (PHT Vol. 1, 240:11-12). That morning both Khayden and Khaysen were acting normal; happy, smiling, watching television and getting dressed. (PHT Vol. 1, 240:20-24). Christina then took her boys to her grandmother Clara Rodrigues' house around 7:15 a.m., where they would stay until they were taken home to their father. (PHT, Vol. 1, 240:6-14) Christina then went to work, where she would work until approximately 5 p.m. (Vol 1, 240:14-15). While Christina was at work, her grandfather and grandmother dropped the boys off to Jonathan Quisano during the afternoon. (PHT Vol. 1, 239:19-23.) From there, Jonathan was solely responsible for the care of Khayden and Khaysen. (PHT Vol. 1, 239:24-240:2). Christina worked the entire day of June 6, 2013, without any phone calls or updates as to how the boys were doing. (PHT Vol. 1, 241:13-19.) Everything changed shortly after she clocked out of work. (PHT, Vol. 1, 241:20-24.)

Jonathan called Christina around 510 p.m., after she had clocked out of work and as

1 she was walking to her car to drive home. (PHT Vol. 1, 241:20-24.) During the call Jonathan  
2 asked Christina where she was and urged Christina to hurry home. (PHT, Vol. 1, 242:10-14.)  
3 Jonathan didn't tell her why she needed to hurry or describe anything as being wrong at the  
4 house. (PHT, Vol. 1, 242:20-24.) A few minutes later Jonathan called Christina a second time,  
5 again, asking Christina where she was and urging her to hurry home. (PHT, Vol. 1, 242:24-  
6 243:2.) Jonathan still didn't provide any information as to why she needed to hurry home, but  
7 rather, urged her to hurry home and then hung up the phone. (PHT, Vol. 1, 243:2-3.) Christina  
8 called Jonathan back a few minutes later asking why she needed to hurry home. (PHT, Vol. 1,  
9 243:3-5.) Christina wanted to know why Jonathan wanted her to hurry home. (PHT, Vol. 1,  
10 243:21-23.) Specifically and only in direct response to Christina's call and question, Jonathan  
11 said, "The boys were playing on the couch, and Khayden fell over, and I guess hit his head,  
12 and -- um -- he said he wasn't opening his eyes, and he tried to put water on him, he wasn't  
13 getting up." (PHT, Vol. 1, 244:9-13.)

14 After Jonathan explained what happened Christina asked Jonathan if he had called 9-  
15 1-1, but he hadn't done so and gave no explanation as to why not. (PHT, Vol. 1, 244:13-14,  
16 247:11, 17-20.) At that point Christina told Jonathan she was going to call 9-1-1 and this time  
17 she hung up on Jonathan. (PHT, Vol. 1, 247:21-24.) Armed only with the information Jonathan  
18 had provided, Christina called 9-1-1 right away. (PHT, Vol. 1, 248:4-5.) Christina advised the  
19 9-1-1 operator who she was, that she was driving home from work and that Jonathan told her  
20 the baby was playing on the couch and fell over. (PHT, Vol. 1, 248:8-11.)

21 Las Vegas City Fire Department responded to the family home around 5:56 or 5:58  
22 p.m. as a result of the 9-1-1 call. (PHT, Vol. 1, 153:3-5, 154:22-24.) The call was initially  
23 coded as a Bravo level response based on the information provided by Christina. (PHT, Vol.  
24 1, 153:5-14.) Upon arriving at the residence, Timothy Kline, a paramedic, was approached by  
25 a male who opened the front door holding a small child. (PHT, Vol. 1, 155:2-5.) That male  
26 was the only other adult at the home with the children. (PHT, Vol. 1, 214:22-25, 216:3-5.)  
27 Timothy Kline's first impression was that the patient was "lifeless...not  
28 breathing...cyanotic...meaning that their oxygen level has dropped and they've been not

1 breathing, or not breathing adequately for at least several minutes." (PHT, Vol. 1, 155:8-14.)  
2 Kline directed the male to place the child on a bench in the hallway so Kline could render care.  
3 (PHT, Vol. 1, 156:18-23.) Kline evaluated Khayden's eyes, noting the pupils were dilated,  
4 opened up and wide, nonresponsive and fixed in a wide position. (PHT, Vol. 1, 157:19-22.)  
5 Based on the child's condition, Kline noted the call was much more severe than a Bravo level  
6 response. (PHT, Vol. 1, 158:6-10.)

7 In an effort to treat the child, paramedic Kline asked the male who presented the child  
8 what had happened. (PHT, Vol. 1, 160:13-16.) Defendant told Kline that Khayden had fallen  
9 from a chair. (PHT, Vol. 1, 160:18.) For clarification Kline pointed or gestured to the two  
10 chairs he saw and asked, "Those chairs right there?" (PHT, Vol. 1, 161:5-5, 186:8-9.)  
11 Defendant replied, "Yes, those chairs." (PHT, Vol. 1, 161:5-6, 186:10-14.) Defendant further  
12 stated to Kline that the child had fallen out of the chair and hit his head on the floor, which  
13 appeared to be tile. (PHT, Vol. 1, 161:10-12.) Notably, Kline could only see two La-Z-Boy  
14 recliners from where he was positioned working on Khayden. (PHT, Vol. 1, 160:25-161:2,  
15 186:15-20.) Kline rushed to the ambulance with Khayden where treatment continued. (PHT,  
16 Vol. 1, 163:4-8.) The medical treatment included breathing for the child, including chest  
17 compressions and using a bag. (PHT, Vol. 1, 163:10-13, 177:23-12.) The child was also placed  
18 on an EKG to ascertain the presence of electrical heart pulses. (PHT, Vol. 1, 163:10-15.)

19 An American Medical Response (AMR) unit also responded to the residence shortly  
20 after Las Vegas City Fire Department. (PHT, Vol. 1, 206:4-24.) The child patient was already  
21 in the back of the Fire Department unit when AMR arrived. (PHT, Vol. 1, 207:1-5.) AMR  
22 emergency technician Patrick Burkhalter inquired separately of Jonathan as to what had  
23 caused Khayden's injuries to try to determine the nature of the fall. (PHT, Vol. 1, 208:21-25.)  
24 Defendant initially reported to Burkhalter that Khayden was playing on the back of a recliner  
25 type chair and fell off the back hitting his head on the floor. (PHT, Vol. 1, 210:1-3.) Defendant  
26 specifically said the child fell backwards. (PHT, Vol. 1, 211:18-23.)

27 Burkhalter spoke with the Defendant a second time in an attempt to clarify how the  
28 child fell off the chair. (PHT, Vol. 1, 212:18, 225:15-16.) Burkhalter made the second inquiry

1 because "the injuries that were sustained didn't - - um - - seem compatible to what we were  
2 dealing with." (PHT, Vol. 1, 225:15-16.) Defendant then told Burkhalter he actually hadn't  
3 seen the child fall, but, rather he saw Khayden playing on a chair, then turned around and when  
4 Defendant turned back Khayden was on the floor. (PHT, Vol. 1, 212:19-22, 213:11-22.)

5 Due to the quick pace at the house Fire Captain Mickey Pedrol, was unaware Defendant  
6 had already been asked what had happened to the child, so he, too, asked Defendant what had  
7 happened to Khayden. (PHT, Vol. 1, 181:15-25.) Defendant told Captain Pedrol that both of  
8 his sons had been playing on the bar and he turned around to see his son, Khayden, fall off of  
9 the bar and hit his head on the floor. (PHT, Vol. 1, 193:6-10.) Captain Pedrol made no further  
10 attempts to clarify Defendant's statement, as Defendant was getting into the driver's seat of an  
11 SUV to go to the hospital. (PHT, Vol. 1, 203:20-25.) Christina arrived at the family home  
12 sometime after the Fire Department and AMR arrived, though her primary focus was to rush  
13 in and get Khaysen and Jonathan to follow the ambulance to the hospital. (PHT, Vol. 1,  
14 249:14-20.)

15 Khayden was transported to University Medical Center ("UMC") as required by Fire  
16 Department Trauma Destination protocols arriving at approximately 623 p.m. (PHT, Vol. 1,  
17 168:2-21.) At the hospital, Khayden received treatment performed by and under the  
18 supervision of Michael Casey, M.D. (PHT, Vol. 1, 20:7-17.) The CT scan of Khayden's head  
19 revealed a linear skull fracture, extensive intracranial bleeding with a midline shift, and a  
20 tentorial shift caused by blood pushing the brain down. (PHT, Vol. 1, 27:4-7, 19-21.) The  
21 herniation of the brain caused Khayden's heart to stop during initial resuscitation, such that  
22 the herniation would have slowed his heart and caused the blood pressure to drop until the  
23 heart ultimately stopped working, though medical personnel restarted his heart. (PHT, Vol. 1,  
24 30:19-23, 31:8-11.) Dr. Casey concluded the injuries to the brain were caused by trauma.  
25 (PHT, Vol. 1, 28:23-29:2.) The child also had contusions or bruises developing in the lungs.  
26 (PHT, Vol. 1, 30:6-8.) Dr. Casey concluded the lung contusions were a different injury from  
27 the injuries to the head, and would not have been a result of the intubation process. (PHT, Vol.  
28 1, 65:18-22.)

1 Dr. Casey spoke with investigative personnel to try to determine the cause of  
2 Khayden's injuries for purposes of treatment. Based on the information provided to Dr. Casey,  
3 he ultimately concluded "The injury pattern [of Khayden] is not consistent with the height of  
4 the fall...in this particular child." (PHT, Vol. 1, 37:21-24.) Khayden ultimately succumbed to  
5 the injuries and was declared clinically brain dead. (PHT, Vol. 1, 38:3-6.)

6 At the preliminary hearing, Dr. Casey opined that Khayden's injuries would have  
7 required the reported fall to include some amount of rotational force that was not disclosed by  
8 Defendant. (PHT, Vol. 1, 143:24-144:6.)

9 Based on the information gleaned at the hospital, Las Vegas Metropolitan Police  
10 (LVMPD) detectives conducted a recorded interview with Jonathan Quisano at the family  
11 residence to find out what happened to Khayden. (PHT, Vol. 2, 75:24-76:2.) Defendant  
12 received Khayden and Khaysen from their caretaker around 4:30 p.m., at which time Khayden  
13 appeared fine and showed no signs of injury. (PHT, Vol. 2, 77:11-14, 20-24.) Defendant  
14 described Khayden playing on the couch with Khaysen while Defendant sat in a recliner in  
15 the living room. (PHT, Vol. 2, 78:16-23.) Defendant provided LVMPD detectives with  
16 different information as to whether or not he saw Khayden fall off the couch; at first stating  
17 he didn't see Khayden go over the couch, then stating he did. (PHT, Vol. 2, 81:11-18.) In the  
18 account where Defendant said he saw Khayden go over the couch he described looking over  
19 and seeing Khayden falling over the couch onto the floor. (PHT, Vol. 2, 78:23-79:4.)  
20 Defendant re-enacted the fall using the doll and showed LVMPD detectives Khayden was  
21 facing down, head first and demonstrated Khayden slipping over the back of the couch. (PHT,  
22 Vol. 2, 83:6-13; 92:2-5.) Defendant said and then demonstrated finding Khayden lying on his  
23 back parallel to the couch. (PHT, Vol. 2, 85:15-17.) Defendant did not mention Khayden  
24 jumping around on the couch or adopt jumping as part of the events leading up to Khayden's  
25 injuries, though detectives suggested jumping in the interview. (PHT, Vol. 2, 91:22-92:2.)

26 Defendant told LVMPD detectives that as soon as he picked up Khayden after the fall,  
27 Khayden was making noise and appeared frozen, which he demonstrated with his arms. (PHT,  
28 Vol. 2, 87:6-13.) Defendant reported splashing water on Khayden's face to try to wake him up

1 and also observing Khayden vomit. (PHT, Vol. 2, 87:25-88:18.) Defendant told LVMPD  
2 detectives that he tried to keep air in Khayden's lungs. (PHT, Vol. 2, 91:6-7.) Interestingly,  
3 Defendant placed tissues and other items he used to clean up Khayden in trash cans around  
4 the house before paramedics arrived. (PHT, Vol. 2, 97:5-15.) By his own admissions,  
5 Defendant waited to contact Christina and did not call 9-1-1 to summon assistance for  
6 Khayden.

7 Defendant stated he waited approximately ten minutes before calling his girlfriend,  
8 instead of calling 9-1-1. (PHT, Vol. 2, 88:25-89:14.) Defendant provided two different  
9 explanations as to why he called Christina rather than 9-1-1. First, Defendant stated he wanted  
10 Christina to come home first because she works in a doctor's office as a nurse. (PHT, Vol. 2,  
11 88:24-89:2.) During the initial call, Defendant curiously didn't tell Christina what was going  
12 on with Khayden stating he didn't want her to get into an accident. (PHT, Vol. 2, 89:2-7.)  
13 Defendant also explained to detectives that he didn't call 9-1-1 himself because "he gets  
14 nervous and he didn't know where to tell them to go." (PHT, Vol. 2, 92:24-93:4.)

15 Dr. Montes, a pediatric radiologist, reviewed the June 6, 2013 imaging of the Khayden  
16 from UMC and rendered his own opinions as to the findings contained therein. (PHT, Vol. 2,  
17 7:9-12.) Dr. Montes noted the chest CT revealed symmetric consolidation in the lungs, which  
18 he opined is evidence of a collapsed lung from lack of oxygen, not pulmonary contusions.  
19 (PHT, Vol. 2, 12:3-5, 12-22.) Dr. Montes noted in the abdominal CT that there appeared to  
20 be inflammation or fluid around the pancreas. (PHT, Vol. 2, 14:10-15.) Dr. Montes also  
21 reviewed the head CT that showed multiple injuries. (PHT, Vol. 2, 15:18-24.) Khayden  
22 suffered a subdural hemorrhage on the left side of his skull that extended along the whole side  
23 of the head from front to back. (PHT, Vol. 2, 17:4-7, 14-16.) The subdural hemorrhage was  
24 acute, in that it was less than 48 hours old, and the heterogeneous color indicated the bleeding  
25 was either active or not old enough to have started clotting. (PHT, Vol. 2, 17:21-18:1.) There  
26 was also a small amount of blood in the posterior region of the brain, which Dr. Montes  
27 associated with the stellate skull fracture. (PHT, Vol. 2, 18:2-19.) The point of impact causing  
28 the fracture would have been the center with the lines extending from the impact site in

1 multiple directions. (PHT, Vol. 2, 18:25-19:10.) Dr. Montes also noted a midline shift as a  
2 result of brain herniation. (PHT, Vol. 2, 19:23-20:3.) The CT of the brain also revealed diffuse  
3 cerebral edema signifying a global injury from either significant trauma or lack of oxygen.  
4 (PHT, Vol. 2, 22:7-12.) More significantly, Dr. Montes opined the injuries to Khayden's head,  
5 as depicted in the CT scan indicate he had suffered multiple injuries; one injury causing the  
6 fracture and blood localized to the fracture site, and a separate injury causing the left-side  
7 subdural hemorrhage and cerebral edema. (PHT, Vol. 2, 24:15-19; 25:14-19.)

8 Dr. Lisa Gavin performed the autopsy of Khayden Quisano on or about June 7, 2013.  
9 (PHT, Vol. 3, 6:12-14.) The majority of the injuries salient to the autopsy findings were located  
10 in the brain and skull. (PHT, Vol. 3, 11:8-14.) The injuries to the brain would have had to  
11 occur within hours of the time of death. (PHT, Vol. 3, 133:17-21.) On the back of the skull,  
12 Dr. Gavin located a stellate fracture and corresponding subgaleal hemorrhage. (PHT, Vol. 3,  
13 13:22-14:9.) There was also a subdural hemorrhage predominantly on the left side of the brain,  
14 though there was also some bleeding on the right side. (PHT, Vol. 3, 13:13-19.) The right side  
15 subdural hemorrhage was mostly at the back portion of the brain. (PHT, Vol. 3, 19:9-11.) Dr.  
16 Gavin noted the left side had a "great deal of hemorrhage" that extended along most of the left  
17 side of the brain from the back to the front. (PHT, Vol. 3, 19:11-14.) The brain was also very  
18 swollen, as indicated by the lack of prominent grooves. (PHT, Vol. 3, 22:3-7.) The eyes also  
19 had subdural hemorrhage present. (PHT, Vol. 3, 24:16-17.) At autopsy, the lungs were filled  
20 with blood, which could have obscured evidence of pulmonary contusions. (PHT, Vol. 3, 26:7-  
21 15, 108:9-17.)

22 The brain, spinal cord, and eyeballs were sent to a neuropathologist for further testing.  
23 (PHT, Vol. 3, 35:15-17.) The additional testing of the eyeballs revealed subdural  
24 hemorrhaging in the optic nerve sheaths, with more in the right side than the left. (PHT, Vol.  
25 3, 37:11-15.) The greater blood on the right side suggests more of an impact or focus of trauma  
26 on the right side versus the left. (PHT, Vol. 3, 38:5-9.) The testing of the brain revealed  
27 multiple findings. (PHT, Vol. 3, 39:1-4, 15-17.) One finding was diffuse cerebral edema, or  
28 swelling of the entire brain. (PHT, Vol. 3, 40:8-12.) The brain also revealed injury from

1 hypoxic ischemia, which appeared to be early in the process of oxygen deprivation causing  
2 damage to the brain. (PHT, Vol. 3, 40:19-41:14.) There was also diffuse axonal injury, which  
3 is damage to the axons of the brain cells. (PHT, Vol. 3, 41:19-25.) The axonal injuries were  
4 found in the deeper areas of the brain. (PHT, Vol. 3, 43:2-44:1.) Such injury occurs when the  
5 strands of the axon are torn or sheared, indicating the injury was caused by some sort of torsion  
6 or rotational force. (PHT, Vol. 3, 42:1-4, 58:1-19.) The neuropathologist noted the extent of  
7 the axonal injuries were caused by mixed etiologies, such that the injuries would have resulted  
8 from both rotational forces and hypoxic ischemia. (PHT, Vol. 3, 142:20-143:1.)

9 Based on the constellation of injuries, Dr. Gavin concluded the cause of Khayden's  
10 death was "acute brain injury due to the blunt force trauma." (PHT, Vol. 3, 53:5-9.) Dr. Gavin  
11 noted there were multiple areas of injury to the brain such that there could be more than one  
12 component involved in the case. (PHT, Vol. 3, 57:12-25.) Prior to making a determination as  
13 to manner of death, Dr. Gavin also reviewed the investigative statements of the Defendant to  
14 LVMPD and to the medical personnel who responded to the family home. (PHT, Vol. 3, 54:4-  
15 55:7.) Ultimately Dr. Gavin determined manner of death to be undetermined. (PHT, Vol. 3,  
16 56:5.) Dr. Gavin chose manner of death undetermined because she couldn't rule it an accident  
17 or a homicide. (PHT, Vol. 3, 55:21-56:2.) Notably, "in this case the information [revealed]  
18 from the investigation doesn't match the severity of the injury, and because of that it's  
19 undetermined in terms of what ended up causing this injury." (PHT, Vol. 3, 53:21-24.)

20 After the death of Khayden, Detectives conducted additional investigation obtaining  
21 records from Hawaii involving the death of an older sibling and additional non-accidental  
22 injuries suffered by Khayden in 2010. This resulted in greater scrutiny of the Defendant's  
23 versions of the events leading up to Khayden's injuries and the Defendant failure to summon  
24 medical assistance or render aid.

## 25 THE OTHER BAD ACTS

### 26 Death of Jayden Quisano

27 Detectives learned the Defendant and Christina Rodriguez actually had three children  
28 born to them. Christina told detectives during her interview their first child, Jayden Quisano,

1 died a few months after birth, reportedly suffering from pneumonia. In fact, Jayden was born  
2 December 15, 2007 and died February 8, 2008, in Hawaii. For reasons unspecified, Christina  
3 had taken Jayden to the doctor's office in the morning and was found to not be breathing when  
4 doctors checked him. Doctors transferred Jayden to the ER where he could not be revived.  
5 Records from Hawaii indicate Jayden's cause of death was secondary to pneumonia and a lack  
6 of medical attention. (Exhibit 1, Hawaii CPS Records (bates stamped DA - 000070-000079)  
7 at 75.) According to Christina, Jayden showed no signs of sickness or problems prior to going  
8 to the doctor's office. Even so, following the birth of Khayden and in light of the demise of  
9 Jayden, pediatrician Dr. Jason Ninomya urged Christina and Defendant to seek immediate  
10 medical attention should Khayden show conditions similar to Jayden when he presented before  
11 death. Id.

12 The death of Jayden Quisano and subsequent admonition by Dr. Ninomya had little to  
13 no effect on the Defendant or Christina as to when and under what circumstances to seek  
14 medical care of Khayden Quisano.

#### 15 2010 Fractures and Failure to Thrive of Khayden Quisano

16 On October 24, 2009, when Khayden was barely over one month old, Christina took  
17 Khayden to pediatrician Dr. Ninomya for coughing and congestion. (Exhibit 2, Hawaii  
18 Medical Records (bates stamped DA 000095-000135) at 105.) Dr. Ninomya ordered a chest  
19 x-ray, which revealed no apparent signs of injury. Id. Also, in October 2009, Khayden, though  
20 small, was following along the growth curve. Id. Everything changed after that appointment.

21 On January 4, 2010, Khayden presented to Dr. Ninomya as an ill child with Christina  
22 reporting Khayden had suffered the previous five days from a fever, cough and runny nose.  
23 Id. Dr. Ninomya, again, ordered a chest x-ray and Khayden returned home with his parents  
24 until Dr. Ninomya had the results of the x-ray. The January 4, 2010, x-ray revealed Khayden  
25 had multiple healing posterior rib fractures, on ribs four through seven. Id. at 99. The rib  
26 fractures were indiciative of non-accidental trauma and a squeezing mechanism. There was no  
27 report of known injury or trauma that would suggest the etiology of the fractures.

28 Khayden was sent to KAPIOLANI WOMEN & CHILDREN Hospital where he was

1 admitted and received additional evaluation and medical care. Additional testing revealed  
2 Khayden also suffered a metaphyseal fracture of the distal femur, which was in the healing  
3 stages. Id. at 106-107. Doctors noted the femur fracture resulted from a shearing force that  
4 was non-accidental in nature. Id. at 107. An ophthalmologic evaluation revealed Khayden also  
5 had a subconjunctival hemorrhage in his left eye that should resolve spontaneously. Id. at 104.  
6 In January 2010, Khayden was also diagnosed as failure to thrive, as he had fallen below the  
7 growth curve. Id. at 107. Neither the Defendant nor Christina had any insight as to how, when  
8 or what had happened to cause these non-accidental injuries to Khayden. Id. at 100. Notably,  
9 the medical records reveal doctors considered organic causes for Khayden's injuries, but  
10 ultimately concluded the injuries were non-accidental. Id. at 103.

11 Law Enforcement and the Department of Human Services, Social Services Division  
12 conducted investigations into Khayden's injuries. Ultimately, law enforcement could not  
13 determine who caused the injuries to Khayden, though the Defendant wasn't ruled out as a  
14 possible perpetrator. Notably, neither the Defendant nor Christina had an explanation for the  
15 injuries, could not pinpoint when the injuries occurred and blamed the most recent babysitter  
16 who law enforcement eliminated as a suspect. On the other hand, Social Services found both  
17 parents to be perpetrators of harm and removed Khayden from the care of his parents. Exhibit  
18 1, at 76. Khayden was placed with a relative, during which time there is no record of fractures  
19 or other injuries.

20 //

21 As a result of the DHS findings, both Christina and the Defendant were required to  
22 engage in services, including a Clinical Psychological Evaluation and follow  
23 recommendations, couples counseling and various classes to improve parenting skills and  
24 bonding with the children. In September 2010, both parents continued to lack insight into their  
25 role and responsibility as parents. Id. In January 2011, after six months of services with a  
26 counselor, the Defendant and Christina continued to demonstrate a lack of understanding and  
27 insight into Khayden's injuries. The children were reunited with the Defendant and Christina

28 ///

1 in April 2011, but continued to be monitored until July 2012 when the case was closed. Id. at  
2 79.

### 3 ARGUMENT

4 N.R.S. 48.045(2) provides as follows:

5 Evidence of other crimes, wrongs, or acts is not admissible to  
6 prove the character of a person in order to show that he acted in  
7 conformity therewith. It may, however, be admissible for other  
8 purposes, such as proof of motive, opportunity, intent, preparation,  
9 plan, knowledge, identity, or absence of mistake or accident.

10 Evidence of certain types of injury to a child can be probative of the fact that the  
11 physical damage was caused intentionally rather than by accident and thus can be persuasive  
12 of intent. United States v. Leight, 818 F.2d 1297, 1299 (7th Cir.) Cert. denied, 484 U.S. 958  
13 (1987), *abrogated on other grounds*, Huddleston v. United States, 485 U.S. 681, 108 S.Ct.  
14 1496, 99 L.Ed.2d 771 (1988); United States v. Verkuilen, 690 F.2d 648 (7th Cir. 1982).

15 In order to admit such evidence, the State must establish that (1) the act is relevant to  
16 the crime charged; (2) the act is proven by clear and convincing evidence; and (3) the evidence  
17 is more probative than prejudicial. Cipriano v. State, 111 Nev. 534, 541 (1995) (*citing Berner*  
18 *v. State*, 104 Nev. 695, 697 (1988)).

19 Evidence of certain types of injury to a child can be probative of the fact that the  
20 physical damage was caused intentionally rather than by accident and thus can be persuasive  
21 of intent. United States v. Leight, 818 F.2d 1297, 1299 (7th Cir.) cert. denied, 484 U.S. 958  
22 (1987); United States v. Verkuilen, 690 F.2d 648 (7th Cir. 1982).

23 In Bludsworth v. State, 98 Nev. 289, 646 P.2d 558 (1982), the two-year-old victim died  
24 after sustaining severe head injuries. The State charged the step-father with Murder and Child  
25 Abuse and charged the victim's mother with Child Abuse. The step-father claimed he  
26 accidentally injured the victim by dropping him as the step-father climbed the stairs in the  
27 family home. During the trial, the State presented evidence of numerous bruises sustained by  
28 the victim prior to his death. The Appellant argued that the lower court erred in admitting  
evidence of prior injuries wherein the State could not prove who inflicted the injuries upon the

1 victim.

2 The Nevada Supreme Court held that admissibility of the other injuries did not depend  
3 on connecting either defendant to the infliction of the injury. Specifically, the  
4 Court held that:

5 "It is independent, relevant circumstantial evidence tending to  
6 show that the child was intentionally, rather than accidentally,  
7 injured on the day in question. Proof that a child has experienced  
8 injuries in many purported accidents is evidence that the most  
9 recent injury may not have resulted from yet another accident."  
(Emphasis added)

10 Bludsworth, 98 Nev. at 291-92.

11 In Estelle v. McGuire, 502 U.S. 62, 112 S.Ct 475 (1991), the United States Supreme  
12 Court also visited the issue of allowing into evidence of prior bad acts in cases involving child  
13 abuse. In this case, Mark McGuire and his wife took their six month-old baby to the hospital  
14 because the baby was bluish and not breathing. The physician noticed a large and relatively  
15 recent bruise on the baby's chest and multiple bruises around it and the baby's ears. Efforts  
16 to revive the child were unsuccessful. An autopsy revealed 17 contusions on the baby's chest,  
17 29 contusions in her abdominal area, a split liver, a split pancreas, a lacerated large intestine  
18 and damage to her heart and one of her lungs. The autopsy also revealed evidence of rectal  
19 tearing and evidence of partially healed rib fractures. Upon questioning, the defendant stated  
20 that when his wife left the room to make a telephone call, he left the child alone on the couch.  
21 When he returned to the room, he discovered the baby lying on the floor.

22 At trial, the prosecution introduced evidence that the baby was a "battered child", and  
23 evidence from other witnesses as to defendant's treatment of the baby. The case was  
24 overturned at the federal level, wherein the Court of Appeals for the Ninth Circuit ruled that  
25 prior injury evidence was erroneously admitted to establish battered child syndrome, because  
26 no evidence linked the defendant to the prior injuries and no claim had been made at trial that  
27 the baby died accidentally.

28 However, the Supreme Court found that California law permitted the prosecution to  
introduce expert testimony and evidence related to prior injuries in order to prove "battered

1 child syndrome". (Citations omitted). The Court went further in explaining its decision to  
2 reverse the decision of the court of Appeals for the Ninth Circuit:

3 The demonstration of battered child syndrome "simply indicates  
4 that a child found with [serious, repeated injuries] has not suffered  
5 those injuries by accidental means." (Citation omitted). Thus,  
6 evidence demonstrating battered child syndrome helps to prove  
7 that the child died at the hands of another and not by falling off a  
8 couch, for example; it also tends to establish that the "other,"  
9 whoever it may be, inflicted the injuries intentionally. When  
10 offered to show that certain injuries are a product of child abuse,  
11 rather than accident, evidence of prior injuries is relevant even  
12 though it does not purport to prove the identity of the person who  
13 might have inflicted those injuries. (Citations omitted). Because  
14 the prosecution had charged McGuire with second-degree murder,  
15 it was required to prove that Tori's death was caused by the  
16 defendant's intentional act. Proof of Tori's battered child status  
17 helped to do just that; although not linked by any direct evidence  
18 to McGuire, the evidence demonstrated that Tori's death was the  
19 result of an intentional act by someone, and not an accident. The  
20 Court of Appeals, however, ignored the principle of battered child  
21 syndrome evidence in holding that this evidence was incorrectly  
22 admitted. For example, the court stated that, "[evidence cannot  
23 have probative value unless a party connects it to the defendant in  
24 some meaningful way." (Citation omitted). We conclude that the  
25 evidence of prior injuries presented at McGuire's trial, whether it  
26 was directly linked to McGuire or not was probative on the  
27 question of the intent with which the person who caused the  
28 injuries acted.

17 Estelle v. McGuire, 112 S.Ct at 480.

18 Likewise, other jurisdictions have upheld the use of prior instances of abuse to show  
19 absence of mistake or accident and intent. In State v. Hassett, 859 P.2d 955 (Idaho App. 1993),  
20 the Idaho Appellate Court addressed the issue of admission of prior bad acts of child abuse in  
21 order to prove absence of mistake or accident and intent. The defendant was found guilty of  
22 felony injury to a child based on allegations that he had injured his month-old son. On appeal,  
23 the defendant challenged the State's presentation of "prior bad acts" during his trial. The Court  
24 addressed the felony child abuse statute, which is practically identical to Nevada's statute, and  
25 the propriety of allowing into evidence prior bad acts by a defendant in child abuse cases. The  
26 Court stated:

27 ///

28 ///

1 ... [we observe that "the admissibility of evidence of other crimes,  
2 wrongs, or acts to establish intent and an absence of mistake or  
3 accident is well established, particularly in child abuse cases."  
4 United States v. Harris, 661 F.2d 138, 142(10th Cir. 1981).

5 Further, we agree that:

6 when the crime is one of infanticide or child abuse, evidence of  
7 repeated incidents is especially relevant because it may be the only  
8 evidence to prove the crime. A child of [very young age] . . . is a  
9 helpless, defenseless unit of human life. Such a child is too young,  
10 if he survives, to relate the facts concerning the attempt on his life,  
11 and too young, if he does not survive, to have exerted enough  
12 resistance that the marks of his cause of death will survive him.  
13 Absent the fortuitous presence of an eyewitness, infanticide or  
14 child abuse . . . would largely go unpunished. (Emphasis added)  
15 Id., quoting United States v. Woods, 484 F.2d 127 (4th Cir. 1973),  
16 *cert. denied*, 415 U.S. 979 (1974).

17 More specifically, one commentator has observed that:

18 The courts often admit uncharged misconduct in child abuse cases  
19 when the defendant claims that he or she accidentally injured the  
20 child. If the defendant claims that he accidentally touched a  
21 child's genital organs, evidence of the defendant's similar  
22 uncharged sexual misconduct is admissible to prove the  
23 defendant's lewd intent.

24 If the defendant claims that she intended to merely discipline the  
25 child, evidence of uncharged misconduct may be admissible to  
26 establish the defendant's intent to injure the child. If the defendant  
27 claims that he accidentally bumped into or ran down the victim,  
28 evidence of the defendant's other assaults on the same or similar  
victims is admissible to show intent. Edward J. Imwinkelried,  
Uncharged Misconduct Evidence sec. 5:10 (1993).

Hassett, 859 P.2d at 960.

In State v. Toennis, 758 P.2d 539 (Wash. App. 1988), the defendant was convicted of  
Second Degree murder of the four year-old victim. The defendant claimed that the trial court  
committed error when it allowed in prior instances of his mistreatment of the victim. The  
defendant admitted striking the victim on the day of his death. However, he denied that he  
had repeatedly struck the victim in the past and he claimed that some of the victim's injuries  
occurred because of falls. At trial, the State had to prove that the defendant knowingly inflicted  
grievous bodily harm upon the victim.

The Washington Appellate Court held that because the State had to prove that the

1 defendant knowingly inflicted grievous bodily harm upon the victim, the evidence of prior  
2 beatings was relevant to show that the victim was in an obviously battered condition, which  
3 should have put the defendant on notice that additional blows could result in grievous bodily  
4 harm to the victim. 758 P.2d at 546.

5 In State v. Smith, 634 P.2d 1 (Ariz. App. 1981), the Arizona Court of Appeals allowed  
6 into evidence the fact that the defendant's children had previously been removed from the  
7 home due to the unsanitary conditions in order to allow the State to prove that the defendant  
8 acted recklessly which was required by statute. The court found that the evidence was  
9 admissible to show intent, knowledge, and absence of mistake or accident. 634 P.2d at 3.

10 Extremely important to the instant case is the fact that the admission of other bad acts  
11 evidence is permitted even if the evidence elicited pertains to children other than the victim.  
12 In State v. Teuscher, 883 P.2d 922 (Utah App. 1994), the defendant, a child care provider,  
13 called 911 and reported that one of the children in her facility was not breathing. When the  
14 emergency personnel arrived, they found the two-month-old victim laying on the kitchen floor  
15 with no pulse, no respirations, and that his skin was a little pale with cyanosis and slightly cold  
16 to the touch. The baby's pupils were not reactive. Attempts to save his life failed and he was  
17 pronounced dead the day after he arrived at the hospital. The police questioned the defendant  
18 on several occasions. Initially, she told police that she did not know what had happened to the  
19 victim. Later she changed her statement and indicated that the victim had hit his head on a  
20 rocking chair. When confronted with the fact that the explanation did not fit the injuries, the  
21 defendant told the police that she had accidentally dropped the victim.

22 The trial judge permitted the prosecution to introduce evidence of defendant's prior  
23 abuse committed against other children in the defendant's care. The evidence showed that a  
24 six-month-old infant sustained a broken leg while in the defendant's care. Police investigation  
25 revealed that the defendant gave inconsistent explanations for the child's broken leg. A  
26 neighbor of the defendant testified that he had observed the defendant pick up a three-to-four-  
27 year-old boy and shake him harshly and vigorously for five to ten seconds while his head went  
28 back and forth. Another neighbor of the defendant testified that she saw the defendant call a

1 crying four-year-old to her in her backyard and when he was within her reach she reached out  
2 and grabbed his hair with her fist and yanked his head over so that he was closer to where she  
3 was standing and then lifted him up by one arm and lifted him up over the railing and into her  
4 house.

5 The Appellate Court upheld the admission of the evidence of prior instances of abuse  
6 perpetrated against other children to show identity, intent or mental state, and lack of accident  
7 or mistake regardless of whether it is the instant victim or other children who have suffered  
8 instances of abuse at the hands of a defendant. 883 P.2d at 927.

9 Later, in State v. Widdison, 4 P.3d 100 (Utah App. 2000), citing Teuscher, 883 P.2d at  
10 927-28, the Utah Appellate Court upheld the admission of evidence of prior instances of abuse  
11 against a victim and other children to show identity, intent or lack of accident or mistake. In  
12 Widdison, *supra*, the Court stated:

13 Because the prior bad act evidence at issue here related to  
14 defendant's intent or knowledge, it was admissible in the State's  
15 case in chief. By pleading not guilty, defendant placed all  
16 elements of the crime at issue, including knowledge and intent.  
17 See Teuscher, 883 P.2d at 927. Therefore this evidence goes  
18 directly to proving the elements of the crime, requiring the State  
19 to rely on circumstantial evidence. Further, both defendants made  
20 statements to the police and other witnesses which put absence of  
21 mistake or accident at issue. As such, it was necessary and  
22 appropriate for the State to introduce this evidence in its case in  
23 chief.

24 Widdison, 4 P.3d 100 at 109.

25 In State v. Kuehn, 728 N.W.2d 589, 273 Neb. 219 (2007), defendant provided child  
26 care in her home in Norfolk, Nebraska. On August 4, 2004, 10-month-old Cameron Lampert  
27 was seriously injured at defendant's home. Defendant testified that as she began to lift  
28 Cameron out of the playpen, he arched his back and fell, and his head on the corner of the  
playpen. She said he landed on his back on the floor of the playpen, striking his head a second  
time. The playpen had a padded base and fabric sides with netting that covered the collapsible  
frame. Defendant stated that she may have shaken Cameron once she picked him up but that  
he then fell out of her arms and his head on the playpen. After the fall, Cameron began fussing  
and trying to get out of the playpen. He stood up and fell backward.

1 The trial judge admitted evidence during the trial that Cameron had suffered prior  
2 injuries while in Defendant's care. On June 15, 2004, Cameron's mother picked him up from  
3 Defendant's house and noticed a bump on Carmon's head and bruise that covered his left  
4 eyebrow. Defendant told Cameron's mother that when she went to check on him because he  
5 was crying, she noticed his diaper and bedding were wet. Defendant allegedly set Cameron  
6 on the floor to change him and to change the bedding and he leaned forward and hit his head  
7 twice. Cameron vomited twice before leaving Defendant's house and again when he arrived  
8 home. Cameron's mother took him to the doctor the next morning and he continued to vomit  
9 for approximately 10 days, at which time his mother took him to the doctor several times.

10 On June 28, 2004, Cameron was pale-like and dry heaving when his mother picked him  
11 up from Defendant's house. He was crabby and did not want to play or eat. Cameron's mother  
12 took him to the doctor on June 30. Cameron vomited periodically until July 4th.

13 The Appellate Court upheld the admission of the evidence of prior instances of abuse  
14 perpetrated against Cameron to show lack of accident or mistake. In doing so, the Court stated:

15 The evidence of prior incidents in which Cameron was injured or  
16 ill while in Kuehn's care was properly admitted. The jury could  
17 have draw legitimate inferences from the evidence. Court's have  
18 quoted the "doctrine of chances," which provides that "highly  
19 unusual events are highly unlikely to repeat themselves; the  
20 recurrence of the similar result.....tends to establish....the  
21 presence of the normal, i.e. criminal intent accompanying such  
22 act..." U.S. v. York, 933 F.2d 1343, 1350 (7th Cir. 1991)(quoting  
23 2 John Henry Wigmore, Evidence in Trials at Common Law § 302  
24 (James H. Dhadbourne rev. 1979), overruled on other grounds,  
25 Wilson v. Williams 182 F.3d 562 (7th Cir. 1999). The federal  
26 court continued, "The man who wins the lottery once is envied;  
27 the one who wins it twice is investigated." Id.

28 Kuehn, 728 N.W.2d at 603.

The Court further stated:

Evidence of other bad acts which is relevant for any purpose other  
than to show the actor's propensity to commit the act is admissible  
under rule 404(2). State v. McManus, 257 Neb. 1, 594 N.W.2d  
623 (1999). The evidence in this case showed that Cameron had  
sustained a bump on his head and a bruise on his left eyebrow  
while in Kuehn's care on June 15, 2004. Kuehn's explanation was  
that she set Cameron on the floor to change his diaper and that he  
leaned forward and hit his head twice. He vomited before leaving

1 Kuehn's home and continued to vomit for about 10 days. On June  
2 28, Kuehn called a clinic when Cameron suddenly went limp and  
3 his eyes rolled back in his head. He was "dry heaving" and  
4 vomited periodically for another 6 days. These are unusual events  
5 that occurred while Cameron was in Kuehn's care. The fact that  
6 Cameron had twice before shown either physical evidence of  
7 injuries or illness allowed the jury to consider whether Kuehn was  
8 responsible for Cameron's injury on August 4. The evidence was  
9 not offered to reflect on Kuehn's character, but, rather, to refute  
10 her contention that the injury was accidental.

11 Id. 728 N.W.2d at 603

12 In this case, in 2008, Jayden Quisano, the Defendant's first child with Christina  
13 Rodriguez died due to complications from pneumonia on the very same day he was finally  
14 taken for medical treatment. Notably, Christina is the parent who finally took the child to the  
15 doctor and there is no indication Defendant went with her. This event indicates Defendant, at  
16 a minimum, lacked awareness of the severity of Jayden's medical condition and failed to seek  
17 timely medical treatment.

18 As a result of Jayden's death, the pediatrician for Khayden, Dr. Ninomya took the time  
19 to explain to the parents the need to seek immediate medical attention should Khayden present  
20 in a condition similar to Jayden.

21 On or about October 24, 2009, Christina took Khayden to the pediatrician for a runny  
22 nose and cough. There were no signs of injury to Khayden at that time, but Khayden's health  
23 deteriorated sometime after October 24, 2009 and before January 4, 2010.

24 In January 2010, Khayden had been sick with a runny nose, cough and fever for five  
25 days before he was taken to his primary care physician, Dr. Ninomya. Christina had recorded  
26 Khayden's fever as high as 101 degrees during this time period. Khayden resided with both of  
27 his parents and there was no indication the Defendant had been absent from the home during  
28 this time period, yet there was no explanation for the delay in medical treatment. More  
importantly, in January 2010, additional testing unrelated to the runny nose, cough and fever,  
revealed Khayden had multiple healing rib fractures and a healing femur fracture, all of which  
were determined to be non-accidental in nature. Khayden also presented as failure to thrive in  
January 2010, based on a lack of adequate feeding. Again, the Defendant lacked any  
explanation for the source of injuries, awareness as to when Khayden may have suffered these

1 injuries and the failure to thrive. As a result of these injuries and the delay in treatment, Hawaii  
2 DHS found fault with the Defendant and removed Khayden from his parents' care to secure  
3 Khayden's safety. The Defendant had to engage in counseling and other services to address  
4 his lack of awareness and learn how to better care for his children before Khayden and his  
5 brother Khaysen were returned to the family home.

6 In the instant case, the Defendant claims Khayden fell off a chair in the family home,  
7 though significant details of his story changed the more he discussed the events. Moreover,  
8 the Defendant never called 9-1-1. In fact, he waited at least 10 minutes after finding Khayden  
9 on the floor making noise and stiff, with his eyes partially closed, until he called the mother  
10 of Khayden who was at least thirty to forty minutes away from the house. Even then, the  
11 Defendant didn't tell Christina what was wrong with Khayden, but rather, encouraged her to  
12 hurry home. The Defendant made a second call to Christina, again, urging her to hurry home  
13 and, again, withholding information about Khayden's condition. Only when Christina called  
14 the Defendant back and demanded to know what was going on did the Defendant relay  
15 Khayden's condition. Then, it was Christina who hung up and called 9-1-1 to summon  
16 assistance for Khayden.

17 This is exactly why evidence such as this is admitted during trials. The jury should be  
18 aware that the Defendant had, at a minimum, previously neglected his children's medical  
19 needs to such a degree that Jayden died from medical complications related to pneumonia. The  
20 jury should also know that Khayden and his brother were removed from the family home for  
21 their own safety after Khayden was found to have multiple rib fractures and a femur fracture  
22 that were all non-accidental in nature. The Defendant had no explanation for the fractures and  
23 was not eliminated as a potential perpetrator by law enforcement.

24 The jury should also know that as a result of Khayden's non-accidental injuries, the  
25 Defendant was found to have perpetrated harm against Khayden and required to complete  
26 counseling and other services to learn how to care for his children and provide for their needs.  
27 Notwithstanding the history of negative consequences and services for neglecting his  
28 children's care and non-accidental injuries, the Defendant failed to call 9-1-1 to summon

1 medical assistance for Khayden after Khayden's condition clearly and dramatically changed.  
2 The Defendant's claims that he wanted to rely on Christina's assessment of Khayden's  
3 condition or that he was nervous to summon help ring hollow when it becomes known that he  
4 has failed to summon or render care for his other children and has been educated on non-  
5 accidental injuries. More importantly, the Defendant's multiple and inconsistent accounts of  
6 how Khayden suffered the fatal injuries on June 6, 2013, and his efforts to revive Khayden are  
7 all the more significant in light of Khayden's prior fractures and the extensive services the  
8 Defendant received in Hawaii. This is certainly classic evidence to show motive, intent,  
9 knowledge and/or absence of mistake or accident.

### 10 CONCLUSION

11 Based on the above and foregoing Points and Authorities, the State respectfully requests  
12 that this Court permit into evidence the facts surrounding the death of Jayden in 2008,  
13 Khayden's non-accidental injuries in 2010 and the subsequent services received by Defendant.

## CASE ANALYSIS

### Child(ren)'s Status, Functioning, Needs

Pediatrician, Dr. Buehler, has seen the infant Khaysen since birth. He is always accompanied by his mother and supervised by the Grandmother. Mother provides the care and he feels she is doing a good job. Both children are up to date with preventive health visits and childhood immunizations. Both Khaysen and his brother Khayden are well with no active medical concerns or chronic conditions. There have been no serious illnesses and no surgeries noted for either child. Khaysen was hospitalized at 1 month of age with fever (sepsis was ruled out); he was discharged after three days. Both brothers are not on any medications at this time and they have no known allergies according to their medical records.

Khaysen's 16-month-old brother, Khayden, was seen by his pediatrician on 10/29/09 with cough and runny nose. He was referred to KMCWC (Kapiolani Medical Center) for a chest x-ray, which was normal. On 01/04/10, he presented with a fever of 4 or 5 days duration in the range of 99 to 101°. Khayden looked "good" according to resource parent Ms. Sylva; however, Khayden's pediatrician had given explicit instructions to bring him in promptly for any illness. This instruction by the doctor to Khayden's mother was based specifically on the family history of sudden demise in infancy of older sibling Jayden from pneumonia. The chest x-ray obtained for Khayden that day (01/04/10) at KMCWC revealed multiple healing rib fractures of the left 4<sup>th</sup> through 6<sup>th</sup> posterior ribs and healing mid-axillary fractures of the right 4<sup>th</sup> through 6<sup>th</sup> ribs, which are associated with compression. Skeletal survey showed a healing metaphyseal fracture of the medial aspect of the right femur, which is associated with shearing injury. Parents denied knowledge of any trauma, such as a fall. They described Khayden as being fussy since birth. Both parents work during the day; a maternal cousin

MULTIDISCIPLINARY TEAM CONFERENCE REPORT  
CASE NAME: Rodrigues, Christina  
PAGE 3

Shantelle McKinney cared for Khayden for one week from 11/16/09, while babysitter Roberta Fernandez provided childcare for the month of December. The maternal grandmother was visiting with them from Las Vegas for the week prior to presentation and there are other household members including two maternal Great Uncles and a sibling of the mother. Khayden's pediatrician had been concerned because the rate of his weight gain was slowing so that his weight was below the 5<sup>th</sup> percentile. Failure to thrive was attributed to inadequate volume of formula feeding; mother said she had reduced the volume of Khayden's feeding because he looked to her that he was gaining too much weight. On examination in the hospital, Khayden was microcephalic and fussy. His foster mother, Roxane Sylva describes him as now bright, active, and healthy - a reportedly normal appearing one year old. Please see prior MDT report dated 01/07/10 for further details regarding Khayden's injury and hospitalization.

Child(ren)'s Functional Analysis: From a strictly biomedical standpoint, Khaysen and Khayden are average needs children at this time.

---

### Caretaker's Status, Functioning, Needs

Physical and Psychosocial Status: After the last Team was held a year ago, both parents participated in psychological evaluations in March 2010. Results were summarized at the Team. Both parents were notably defensive during their respective sessions, denying responsibility for any harm to Khayden and minimizing personal faults or weaknesses. Both seemed to place culpability upon his babysitter (who had not been considered a suspect by the police investigation, per DHS). Both parents are high school graduates with no overall cognitive deficit, but there were some limitations with regard to their reading comprehension skills. Neither parent acknowledged past childhood abuse despite information to the contrary. The assessment of parenting stress showed child-related stresses revolving around Khayden being perceived by both parents as demanding and having difficulties with adaptability. Ms. Rodrigues presented with flat affect and sadness when asked about the death of her first baby in 2008. Diagnostically, Bereavement was offered along with a Rule Out of Depressive Disorder Not Otherwise Specified. Because parents' defensive stance invalidated some test measures, no other specific diagnoses could be offered with regard to Mr. Quisano's emotional status or both parents' personality traits.

A review of services and parent participation revealed completion of some services (parenting classes in May 2010, ABC hands-on parenting program in December 2010) and ongoing participation in others (Enhanced Healthy Start, Couples therapy with Dr. Herman, and CCSS outreach counseling). It was shared that after the 10 week ABC program, progress had been noted by both parents and mother demonstrated improvement in her ability to interact with the children. A letter from Dr. Herman noted good attendance to couples therapy since June 2010 (bi-monthly), but resistance and low motivation to actually address possible risk factors or to acknowledge some responsibility for Khayden's harm. The CCSS worker reported having had only several sessions with mother who interacted appropriately with Khayden in the home while denying any need for individual therapy related to bereavement.

The DHS worker indicated that overnight visits of the children with their parents commenced after the birth of Khaysen in September 2010, increasing in duration to the point that the children now spend 5 days a week at home with safeguards in a set of relatives who take turns being in the home to monitor the situation and support the family. Given that Mr. Quisano works, Ms. Rodrigues has been in the role of primary caretaker. Concerns were expressed at the Team about Ms. Rodrigues' reluctance to reach out or to communicate her needs to others. There was no information yet available regarding her ability to manage two very young children.

DA - Quisano 000072

MULTIDISCIPLINARY TEAM CONFERENCE REPORT  
CASE NAME: Rodrigues, Christina  
PAGE 5

service providers are working with the parents. However, parents are selective about what they are willing to do. The critical support of therapy is not been utilized to its fullest advantage. Thus, though there are supports in place, the social support is inadequate because parents are not utilizing the most significant service, therapy, to address their issues.

---

### TEAM ASSESSMENT

A multidisciplinary team was held to assess the appropriateness of Family Supervision. Khayden and Khaysen were assessed as average needs children. Both children are up to date with their medical care and have no medical concerns or chronic conditions.

Christina Rodrigues and Jonathan Quisano, parents, continue to be assessed as inadequate caretakers. They continue to deny harming Khayden and blame the babysitter for the injury despite the babysitter being ruled out by the police (per CWS). Parents have completed parenting education as well as hands-on parenting and continue with Enhanced Healthy Start, couples therapy and CCSS outreach services. However, their resistance and low motivation to address the possible risk factors to acknowledge responsibility for Khayden's injury still remains. There has been only superficial compliance in services and no internalized changes in parents to indicate lowered risk for future maltreatment. The couple's social support system was also assessed as inadequate. They have an extensive natural support and formal support system however they are not adequately utilizing them. Therefore, the home continues to be assessed as unsafe.

---

### TEAM RECOMMENDATIONS

1. Placement Recommendations: The Team could not support a transition of the children out of Foster Custody and back home to parents at this time.

Family Supervision might later be considered if there is a more sustainable safety network put into place in the household, which can appropriately safeguard the children.

#### Child(ren) Recommendations

1. Children should continue to maintain a medical home with Dr. Buehler where they appear to have no special needs and are up to date with their preventive health visits and further requirements for immunizations.  
Desired Outcome: Optimal health.
2. Establish a dental home for Khayden where he may receive routine surveillance and hygiene.  
Desired Outcome: Optimal dental health.
3. Continue Enhanced Healthy Start for the children.  
Desired Outcome: Optimal development and monitoring.

DA - Quisano 000073

MULTIDISCIPLINARY TEAM CONFERENCE REPORT  
CASE NAME: Rodrigues, Christina  
PAGE 6

Caretaker(s) Recommendations

1. Obtain the report from the ABC hands-on parenting program to verify completion of services and areas of parent progress.  
Desired Outcome: Complete database. Confirm parental progress in specific areas.
2. Continue couples' therapy.  
Desired Outcome: Increase parents' ability to communicate openly with one another. Identify stresses impinging on the couple and help in building their coping skills.
3. Even more critical at this point than couples' work would be individual therapy for mother as a primary parent. See whether Dr. Herman would be able to start individual work with Mr. Rodrigues in addition to couples' sessions.  
Desired Outcome: Lower defense level so that self-awareness and insight can improve, thereby strengthening her ability to identify stresses and accessing support as needed. Fortify this primary parent's awareness of her own limitations and reinforce use of resources around her.
4. Check with all service providers and observers of parent-child interaction for data on mother's ability to manage both children simultaneously under demanding or potentially stressful conditions. Also check if she can demonstrate improved awareness of physical symptoms the children might display that would warrant medical attention.  
Desired Outcome: Obtain evidence of changes in maternal functioning with respect to being a more protective, attentive, and involved parent.

Social System Recommendations

1. Engage informal supports to assist parents in addressing concerns regarding the abuse that occurred.  
Desired Outcome: To assure that the people who they trust understand the concerns and assist the parents in making the changes that would benefit them.
2. Continue with services in place.  
Desired Outcome: To assure the safety of the children and to assure that their needs are met.

NARRATIVE ACCOUNT

CASE NAME: CHRISTINA RODRIGUES CPSS: 93499  
FC-S: 11-00081

ON 1/4/10, THE DEPARTMENT OF HUMAN SERVICES (DHS) RECEIVED A REPORT OF PHYSICAL ABUSE, MEDICAL NEGLECT, THREAT OF ABUSE, AND THREATENED NEGLECT TO 3 MONTH OLD KHAYDEN QUISANO BY HIS PARENTS, 25 YEAR OLD CHRISTINA RODRIGUES AND 23 YEAR OLD JONATHAN QUISANO. IT WAS REPORTED THAT MS. RODRIGUES BROUGHT KHAYDEN TO HER CHILD'S PRIMARY CARE PHYSICIAN (PCP), DR. JASON NINOMYA, MS. RODRIGUES INFORMED THE PCP THAT KHAYDEN HAD A FEVER FOR THE PAST 4 DAYS AND HIS FEVER HAD REACHED 101 DEGREES. HOWEVER, BY THE TIME MS. RODRIGUES BROUGHT KHAYDEN IN TO SEE DR. NINOMYA, KHAYDEN'S FEVER ISSUES HAD LARGELY BEEN RESOLVED.

DR. NINOMYA REPORTED THAT A PREVIOUS SIBLING'S (JAYDEN SCOTT QUISANO) DEMISE SECONDARY TO PNEUMONIA AT TWO MONTHS OF AGE. AS A RESULT OF JAYDEN'S DEATH, DR. NINOMYA GAVE SPECIFIC INSTRUCTIONS TO BOTH PARENTS' THAT THEY ARE TO SEEK IMMEDIATELY MEDICAL ATTENTION IF KHAYDEN DISPLAYED SIMILAR CONDITIONS AS JAYDEN PRESENTED PRIOR TO HIS DEATH. MS. RODRIGUES AND MR. QUISANO REPORTED DELAY IN MEDICAL ATTENTION PLACED KHAYDEN AT RISK FOR FURTHER HARM.

AS A PRECAUTION, MR. NINOMYA ONCE AGAIN DECIDED TO OBTAIN A CHEST RADIOGRAPH, AND REFERRED KHAYDEN TO KAPIOLANI MEDICAL CENTER WOMEN AND CHILDREN (KMCWC) FOR AN OUTPATIENT RADIOLOGY APPOINTMENT. MS. RODRIGUES TOOK KHAYDEN TO (KMCWC) FOR A CHEST X-RAY. AFTER THE RADIOLOGY WAS COMPLETED, KHAYDEN LEFT WITH HIS PARENTS. DR. NINOMYA WAS NOTIFIED, OF THE RESULTS AND REQUESTED THAT THE FAMILY RETURN TO KMCWC TO THE ER FOR FURTHER EVALUATION AND TREATMENT. THE X-RAY REVEALED MULTIPLE FRACTURES, AND DR. NINOMYA DID NOTE SOME REDDISH SPOTS IN OR NEAR THE EYES OF KHAYDEN.

IT WAS REPORTED THAT KMCWC NEED TO RULE OUT RETINAL DAMAGE TO KHAYDEN. DR. NINOMYA ALSO NOTICED A MARK OR BRUISE ON KHAYDEN'S LEG BUT DR. NINOMYA WAS NOT CLEAR IF THIS WAS AN INJURY OR A BIRTH MARK. KHAYDEN WAS ADMITTED TO KMCWC PEDIATRIC WARD ON 1/4/10.

UPON ADMISSION TO KMCWC, A PHYSICAL EXAMINATION WAS ALSO COMPLETED. WHEN KMCWC COMPLETED A SKELETAL SURVEY ON KHAYDEN, IT REVEALED HEALING POSTERIOR FRACTURES OF THE LEFT 4TH THROUGH 6TH RIBS. THERE WERE HEALING MIDAXILLARY FRACTURES OF THE RIGHT 4TH THROUGH 6TH RIBS. A METAPHYSEAL FRACTURE WAS NOTED ON THE MEDIAL ASPECT OF THE DISTAL RIGHT FEMUR. AN OPHTHALMOSCOPIC EVALUATION REVEALED NO RETINAL HEMORRHAGES, AND A SMALL SUBCONJUNCTIVAL HEMORRHAGE ON THE . AN MRI OF THE BRAIN WAS UNREMARKABLE FOR HEMORRHAGE OR OTHER TRAUMA.

THE SKIN HAD A CURVED HEALING ABRASION OF 1 CM ON THE RIGHT UPPER BACK. MONGOLIAN SPOT WERE NOTED IN THE LEFT LOWER BACK. NO FRACTURES WERE ABLE TO BE PALPATED.

THE ER DOCTOR AT KMCWC COULD NOT DETERMINE WHEN THE FRACTURES OCCURRED, BUT DA: Quisano 000075

06/10/13

TYPE OF CONTACT OTH WORKER 1702 NOTATION CLOSING SUMMARY

NARRATIVE ACCOUNT

THEY ASSESSED THAT KHAYDEN'S INJURIES COULD HAVE OCCURRED BETWEEN 10/24/09 AND 12/2009. IT WAS REPORTED THAT KHAYDEN WAS ORDERED BY DR. NINOMYA TO COMPLETE A CHEST X-RAY ON 10/24/09, DUE TO COUGHING AND CONGESTION OF KHAYDEN AND THERE WERE NO INJURIES DISCOVERED ON THAT CHEST X-RAY.

THERE WERE NO OVERT SKELETAL ABNORMALITY OTHER THAN THESE SPECIFIC TRAUMATIC FRACTURES, AND THEY WERE REPORTED TO BE MOST LIKELY THE RESULT OF A NON-ACCIDENTAL INJURY. THE RIB FRACTURES ARE MOST LIKELY THE RESULT OF COMPRESSIVE OR SQUEEZING FORCES AND THE METAPHSEAL FRACTURE IS FROM SHEARING INJURY. KHAYDEN IS DIAGNOSED AS FAILURE TO THRIVE DUE TO HIS LOW BIRTH WEIGHT AND GROWTH STATUTE AND INADEQUATE REPORTED FORMULA BEING OFFERED TO HIM (2/5 OUNCES EVERY 2-5 HOURS).

ON 1/5/10, ASSESSMENT WORKER, CHAD KOJIMA, INTERVIEWED MS. RODRIGUES AND MR. QUISANO AT THEIR RESIDENCE THEY BOTH REPORTED THAT THEY DID NOT KNOW HOW THEIR SON RECEIVED THOSE INJURIES. MS. RODRIGUES REPORTED THAT SHE DID NOT DROP HIM NOR DID HE FALL DOWN, SO SHE DOES NOT UNDERSTAND HOW KHAYDEN RECEIVED THOSE INJURIES. MS. RODRIGUES REPORTED THAT ON 11/16/09, SHE HAD HER COUSIN, SHANTELL MAKINNEY WATCH KHAYDEN FOR ONE WEEK WHILE SHE WENT BACK TO WORK. MS. ON 1/7/10, THE DHS COMPLETED A MULTIDISCIPLINARY TEAM CONFERENCE AND THE TEAM CONCLUDED THAT MS. RODRIGUES AND MR. QUISANO ARE UNABLE TO PROVIDE A SAFE FAMILY HOME FOR KHAYDEN AT THIS TIME AND HE SHOULD REMAIN IN FOSTER CARE. THE TEAM RECOMMENDED THAT MS. RODRIGUES AND MR. QUISANO COMPLETE A PSYCHOLOGICAL EVALUATION, INDIVIDUAL AND COUPLES COUNSELING, AND PARENTING EDUCATION. THE MDT IDENTIFIED THE FOLLOWING RISK FACTORS REGARDING MS. RODRIGUES AND MR. QUISANO: 1.) JAYDEN QUISANO, WHO PASSED AWAY APPROXIMATELY THE SAME AGE THAT KHAYDEN CURRENTLY IS (2 MONTHS) WITH THE SAME PRESENTING CONDITION (RUNNING NOSE AND HIGH FEVER) AND ARE CONSIDERED FIRST TIME PARENTS WHO REPORTEDLY WAS NOT GIVING KHAYDEN SUFFICIENT FOOD; 2.) KHAYDEN SUFFERED SEVERAL FRACTURES AND PARENTS DID NOT KNOW WHAT HAPPENED TO CAUSE THESE INJURIES. IT IS A CONCERN BECAUSE THEY ARE PRIMARY CAREGIVER OF KHAYDEN AND THE PERPETRATOR OF HARM IS UNKNOWN; 3.) MR. QUISANO AND MS. RODRIGUES WERE INVOLVED IN A CHILD WELFARE CASE AS CHILDREN AND THE EFFECTS OF THE MALTREATMENT AND WHETHER THEY .) MR. QUISANO AND MS. RODRIGUES WERE INVOLVED IN A CHILD WELFARE CASE AS CHILDREN AND THE EFFECTS OF THE MALTREATMENT AND WHETHER THEY ADDRESSED THIS IS UNKNOWN AT THIS TIME.

ON 7/12/10, THIS CASE WAS TRANSFERRED TO DIAMOND HEAD CHILD WELFARE SERVICES UNIT 3 (DHCWS3) AND ADMITTED INTO ZERO TO THREE COURT. UPON TRANSFERRING THE CASE, THIS DHS SOCIAL WORKER WAS ASKED TO RE-INVESTIGATE THE ALLEGATIONS BASED

UPON THE DOCUMENTS AND INFORMATION GATHERED FROM THE PREVIOUS INVESTIGATOR, MEDICAL RECORDS, HPD INFORMATION, DOCTOR REPORTS, AND OTHER INFORMATION PROVIDED TO THIS DHS SOCIAL WORKER. BASED UPON INTERVIEWS OF MS. RODRIGUES, 3/18/10 KCPC PSYCHOLOGICAL EVALUATION OF JONATHAN QUISANO, 3/17/10 KCPC PSYCHOLOGICAL EVALUATION OF CHRISTINA RODRIGUES, KMCWC MEDICAL REPORTS OF 1/4/10, MDT REPORT OF 1/7/10; DR. NINOMYA MEDICAL REPORTS; AND OTHER COLLATERAL CONTACTS- THE DHS MADE THE FOLLOWING INVESTIGATION FINDINGS: ALLEGATIONS OF MEDICAL NEGLECT, THREAT OF NEGLECT, AND THREAT OF QUISANO 000076

NARRATIVE ACCOUNT

ABUSE OF KHAYDEN QUISANO BY HIS MOTHER, CHRISTINA RODRIGUES, ARE CONFIRMED.

ALLEGATIONS OF MEDICAL NEGLECT, THREAT OF NEGLECT OF KHAYDEN QUISANO BY HIS FATHER, JONATHAN QUISANO, ARE CONFIRMED.

THEREFORE, BASED UPON ALL THE INFORMATION GATHERED THROUGHOUT THE CASE, THE DHS HAS IDENTIFIED BOTH PARENTS AS THE PERPETRATORS OF HARM. THIS CASE IS NO LONGER CONSIDERED AN UNIDENTIFIED PERPETRATOR CASE.

DURING THE PERIOD OF 7/12/10-9/6/10, MS. RODRIGUES AND MR. QUISANO CONTINUED TO PARTICIPATE IN ENHANCED HEALTHY START SERVICES, COUPLES COUNSELING WITH DR. HERMAN (SWITCHED FROM DR. KANG OF WAIANAE COAST COMPREHENSIVE HEALTH CENTER), COMPREHENSIVE COUNSELING AND SUPPORT SERVICES (CCSS) WITH CHILD & FAMILY DHS IN CONSULTATION WITH THE GAL, KIM HASEGAWA, AGREED THAT THEIR THERAPIST' RECOMMENDATION AND CONTINUAL INCREASE IN FREQUENCY OF THE VISITATIONS, AND COMPLIANCE WITH ENHANCED HEALTH START SERVICES WOULD ASSIST THE DHS IN DETERMINING IF REUNIFICATION IS APPROPRIATE. THESE REPORTS WOULD ALSO ASSESS IF BOTH PARENTS' ARE ABLE TO PROTECTIVE AND PROVIDE A SAFE FAMILY HOME FOR THEIR CHILD.

ON 9/6/2010, THE DEPARTMENT OF HUMAN SERVICES (DHS) RECEIVED A REPORT OF THREAT OF ABUSE AND THREATENED NEGLECT OF NEW BORN MALE CHILD, KHAYSEN QUISANO, BY HIS PARENTS, 26 YEAR OLD CHRISTINA RODRIGUES AND FATHER JONATHAN QUISANO 23 YEAR OLD JONATHAN QUISANO. BOTH PARENTS WERE PARTICIPATING IN SERVICES; HOWEVER THERE CONTINUES TO BE SERIOUS SAFETY FACTORS REGARDING BOTH PARENTS' ABILITY TO CARE FOR AN INFANT CHILD DUE TO THE FACT THEIR OLDEST CHILD, JAYDEN, DIED OF PNEUMONIA AND KHAYDEN PRESENTED THE SAME CONDITION, BUT BOTH PARENTS WERE PARTICIPATING IN SERVICES; HOWEVER THERE CONTINUES TO BE SERIOUS SAFETY FACTORS REGARDING BOTH PARENTS' ABILITY TO CARE FOR AN INFANT CHILD DUE TO THE FACT THEIR OLDEST CHILD, JAYDEN, DIED OF PNEUMONIA AND KHAYDEN PRESENTED THE SAME CONDITION, BUT BOTH PARENTS WERE NOT DILIGENT PROVIDING THE MEDICAL ATTENTION THAT HE NEEDED; MS. RODRIGUES AND MR. QUISANO CONTINUED TO LACK IN SIGHT REGARDING THEIR ROLE AND RESPONSIBILITY AS A PARENT; AND DR. HERMAN'S REPORT THAT HE SEES MINIMAL PROGRESS IN THERAPY WITH MS. RODRIGUES.

ON 1/5/2011, THIS DHS SOCIAL WORKER, IVALANI K. LUM, REQUESTED AN MDT MEETING AFTER CONSULTATION WITH DHS TA SUPERVISOR, DINA KOYANAGI, AND SECTION ADMINISTRATOR, DANA KANO. THE PURPOSE OF THE MDT MEETING WAS TO ASSIST THE DHS IN EVALUATING IF FAMILY SUPERVISION IS APPROPRIATE FOR THE QUISANO CHILDREN. AN OHANA CONFERENCE WAS ALSO RECOMMENDED TO DEVISE A CONSISTENT AND DETAILED ON 1/5/2011, THIS DHS SOCIAL WORKER, IVALANI K. LUM, REQUESTED AN MDT MEETING AFTER CONSULTATION WITH DHS TA SUPERVISOR, DINA KOYANAGI, AND SECTION ADMINISTRATOR, DANA KANO. THE PURPOSE OF THE MDT MEETING WAS TO ASSIST THE DHS IN EVALUATING IF FAMILY SUPERVISION IS APPROPRIATE FOR THE QUISANO CHILDREN. AN OHANA CONFERENCE WAS ALSO RECOMMENDED TO DEVISE A CONSISTENT AND DETAILED VISITATION PLAN SCHEDULE.

AN OC WAS HELD ON 1/10/2011 TO DISCUSS THE SERVICES AND IMPORTANCE OF ACTIVE DA Quisano 000077

NARRATIVE ACCOUNT

PARTICIPATION IN ALL SERVICES RECOMMENDED. THERE WERE SEVERAL CONCERNS DISCUSSED IN THE OC AS WELL AS A LIST OF DOCUMENTS THAT WERE REQUESTED BY MS. RODRIGUES IN ORDER TO COMPLETE AN EVALUATION OF THE THEIR HOME. MS. RODRIGUES SUBMITTED AND REQUESTED ALL OF THE DOCUMENTS LISTED IN THE DC REPORT. THE INFORMATION AND DOCUMENTS PROVIDED WERE USED TO IDENTIFY THE PERPETRATOR OR PERPETRATORS OF HARM IN THIS CASE.

DURING THE PERIOD OF 7/12/10-1/21/11, DR. HERMAN, WHO HAD BEEN WORKING WITH MS. RODRIGUES AND MR. QUISANO FOR OVER 6 MONTHS, REPORTED THAT PARENTS HAVE NOT PROGRESSED IN THERAPY. DR. HERMAN ALSO REPORTED THAT PARENT'S LACK INSIGHT

AS TO THE REASON CWS IS INVOLVED WITH THE FAMILY. THE DHS ALSO IDENTIFIED ONGOING CONCERNS REGARDING, MR. QUISANO AND MS. RODRIGUES' RELATIONSHIP, MEDICAL CONCERNS AND THE DELAY IN FOLLOWING THE PCP'S RECOMMENDATIONS, AND THE MEDICAL RECORDS DOCUMENTING THE INJURIES. THUS, ALTHOUGH BOTH PARENTS MADE SIGNIFICANT EFFORTS IN ADDRESSING MEDICAL CONCERNS, BONDING AND ATTACHMENT ISSUES, AND HAVE APPEARED TO BE PROTECTIVE; THE DHS COULD NOT ENSURE THAT THEIR HOME WOULD BE SAFE FOR BOTH CHILDREN DUE TO THEIR LACK OF INSIGHT REGARDING KHAYDEN'S INJURIES. DR. HERMAN'S REPORT IS SIGNIFICANT BECAUSE HE HAS BEEN WORKING WITH BOTH PARENTS FOR OVER SIX MONTHS AND HAS NOT PROGRESSED IN THERAPY. CONTINUAL SUPERFICIAL DISCUSSIONS WILL NEGATIVELY IMPACT THIS CASE AS WELL AS FURTHER EVALUATIONS FROM OTHER SERVICE PROVIDERS.

THE FOLLOWING SERVICES WERE OFFERED/RECOMMENDED FOR MS. RODRIGUES AND MR. QUISANO:

T PSYCHOLOGICAL EVALUATION: MS. QUISANO COMPLETED ON 3/17/10 AND RECOMMENDATIONS FROM THE PSYCHOLOGICAL EVALUATION COMPLETED ON 5/17/12; MR. QUISANO COMPLETED ON 3/18/10 AND RECOMMENDATIONS WERE COMPLETED ON 12/15/11. THEY WERE BOTH COMPLIANT AND ENGAGING IN THE RECOMMENDED SERVICES.

T INDIVIDUAL THERAPY FOR MS. RODRIGUES-MDT TEAM RECOMMENDED THAT MOTHER CONTINUE WITH THERAPY UNTIL CLINICALLY DISCHARGED. SHE WAS DISCHARGED ON 5/17/12. MS. RODRIGUES BEGAN WITH DR. KANG THEN DR. HERMAN, AND SINCE 3/29/11 WAS BEING MONITORED BY TRENDIA BERKEY, LCSW. IN TRENDIA BERKEY'S 1/30/12 CLINICAL SUMMARY, SHE STATES THAT THEY HAVE ADDRESSED PARENTING, BEHAVEMENT ISSUES, ANGER MANAGEMENT, AND INDIVIDUAL GOALS FOR MS. RODRIGUES. THE DHS PROVIDED A CWS SAFETY PLAN DATED 1/9/12 TO MS. RODRIGUES AND TRENDIA BERKEY, LCSW. TOGETHER, THEY ADDRESSED EACH OF THE DEPARTMENT'S CONCERNS AND PROVIDED A STATEMENT. MS. RODRIGUES HAS PROGRESSED SIGNIFICANTLY IN THERAPY AND IS NOW ABLE TO DESCRIBE HER ROLE AS A PARENT AND PROVIDE THIS THERAPIST WITH MORE INSIGHT IN HER THINKING AND UNDERSTANDING OF CWS INVOLVEMENT. MS. RODRIGUES IS ABLE TO DESCRIBE AND IDENTIFY SPECIFIC ATTACHMENT AND BONDING ACTIVITIES, IDENTIFY HER STRESSORS, DEVELOPED A SAFETY PLAN REGARDING HOW SHE WILL HANDLE NEW PROBLEMS AND DEVELOPED COPING MECHANISMS IN ORDER TO EASE HER STRESS.

?T COUPLE'S COUNSELING: DR. HERMAN WAS PROVIDING BOTH PARENTS WITH THERAPY TO HELP ADDRESS THE CONCERNS REGARDING PARENTING, INJURIES SUFFERED BY KHAYDEN, AND COMMUNICATION ISSUES WITHIN THEIR RELATIONSHIP. DR. HERMAN REPORTED TO DHS IN JULY 2010 THAT HE DID NOT FIND THAT MR. QUISANO NEEDED TO PARTICIPATE WITH HE HAD THE NECESSARY SKILLS AND DID NOT IDENTIFY ANY PROBLEM AREAS.

NARRATIVE ACCOUNT

T ENHANCED HEALTHY START SERVICES/ EASTER SEALS KAPOLEI- LINDA TINGKANG, EHS SENIOR FAMILY SUPPORT WORKER, HAS MET WITH THE FAMILY SINCE 6/10/10. SOME CONCERNS REGARDING MS. RODRIGUES' ATTITUDE AND ANGER ISSUES WERE REPORTED, HOWEVER, SHE HAS PROGRESSED AND NO CONCERNS WERE IDENTIFIED. THE HOME WAS ASSESSED TO BE SAFE.

T COMPREHENSIVE COUNSELING AND SUPPORT SERVICES/ HOME-BASED PARENTING- BOTH PARENTS WERE REFERRED TO CCSS FOR PARENTING AND COUPLE'S COUNSELING SERVICES. CIONE GUMBOC PROVIDED SERVICES FOR 1 YEAR. ON 12/15/11, HER FINAL REPORT STATED THAT PARENTS ARE APPROPRIATE; DHS AGREED THAT THE CASE SHOULD BE CLOSED SINCE THEY MET ALL OF THEIR OBJECTIVES.

ON 12/11/11, THIS DHS SOCIAL WORKER DEVELOPED A SAFETY PLAN FOR MS. RODRIGUES TO DISCUSS IN THERAPY WITH TRENDIA BERKEY. TRENDIA BERKEY PROVIDED THE DHS WITH A DETAILED LETTER STATING HOW SHE ADDRESSED EACH ISSUE IN THERAPY. ON 5/17/12, TRENDIA BERKEY PROVIDED ANOTHER LETTER TO THE DHS STATING THE REASONS WHY MS. RODRIGUES WAS DISCHARGED FROM HER THERAPY. TRENDIA BERKEY STATED THAT MS. RODRIGUES WAS DISCHARGED DUE TO AN ATTENDANCE ISSUES, HOWEVER, SHE DID NOT FEEL AS IF THERAPY WOULD BE BENEFICIAL FOR MS. RODRIGUES. THE CONCERNS THAT WERE DETAILED IN THE DHS SAFETY PLAN ADDRESSED ALL THE CONCERNS IN THERAPY SHE HAD. BASED UPON HER RECOMMENDATIONS THE DHS WILL BE RECOMMENDING THE COURT TO REVOKE AND TERMINATE JURISDICTION. PARENTS ARE ABLE TO PROVIDE A SAFE FAMILY HOME FOR THE CHILDREN.

FAMILY COURT REVOKED FAMILY SUPERVISION AND JURISDICTION WAS TERMINATED ON 7/25/12.

CASE CLOSED.

PHYSICIAN HISTORY AND PHYSICAL - PEDIATRICS

ADMISSION DATE: 1/4/2010

PRIMARY CARE PHYSICIAN: Jason T Ninomiya, MD

PCP CONTACT NUMBER: 808-693-7300

SOURCE OF INFORMATION: Mother

CHIEF COMPLAINT: Multiple rib fractures

HISTORY OF PRESENT ILLNESS: Khayden K Quisano is a 3 mo old male, was in good of his health until 5 days prior to admission. Since Thursday (5 days PTA) Khyden started having fever, cough and runny nose. Mom used to record the temperature under the arm and maximum temperature in last 5 days has been 101 F. Mom used to give Tylenol for fever and she reported that at the max she would have given 2 times in one day. He has been afebrile since yesterday. Mom described cough mainly dry. Runny nose - was watery, and sometimes just congested nose and no runny nose. There was no history of diarrhea, vomiting, ear discharge, pulling at ears, rash, increased work of breathing, cyanosis or apnea. There is no history of sick contacts. Mom did not give any other medication and consulted PMD today only. PMD wanted to do a chest X- Ray to rule out pneumonia, because mom said - there is a history of other elder sibling dying at the age of 2 monthd from pneumonia; and the CXR suggested multiple rib fractures and so was sent here to KMCWC for further management.

Mom says, there is no history of trauma. She gives a history of fussiness - while putting him on his back in bed and while picking him up from bed. This has been history since birth. Mom says, the PMD knows about it and he has been crying while doing the same at his office visits. Mom says, they used to make him sleep in mom's arm and after getting slept, they put him in the bed - on his own basinet and he sleeps on his back.

PAST MEDICAL HISTORY:

BIRTH HISTORY: Delivered at Castle hospital, 2 weeks prior to EDD, NSVD, birth weight - 6'5", no complications, no jaundice, discharged home the next day. No history of birth trauma

MEDICAL CONDITIONS: None

HOSPITALIZATIONS AND SURGERIES: No hospitalisation, procedures - circumcision, but no surgeries, no injuries, no broken bones.

IMMUNIZATIONS: UTD per mom, got his 2 months shot, Not rotavac (she could not afford it)

DEVELOPMENT: Appropriate for age - head holding in upright position, while lying on his stomach he tries to roll over, recognizes parents, social smile present

DIET: Similac 20 cal formula, 2.5 - 3 oz, every 3-5 hours. No breast feeding

History & Physicals (continued)

**ETHNICITY:** Hawaiian, Puerto Rican, Spanish, Indian, Caucasian, Filipino, Chinese

**FAMILY HISTORY:**

- No family history of recurrent broken bones or bone disease
- Elder sib died at 2 months of age, SIDS. Per mom, the child took his feeding at around 4 Am in the morning, she burped him and put him back in his basinet on his back. At around 6 or 7 Am in the morning, they noticed that he was not breathing. They did CPR, it did not help him and brought to the ER and was found dead. There was no history of fever, cough, trouble breathing or any other medical illness in the child prior to this incident.
- HTN in maternal grandfather and maternal grandmother. Asthma maternal grandfather. DM in maternal grandfather and maternal great grandmother.

**SOCIAL HISTORY:**

- Parents are not married, both parents are employed. Mom is medical assistant.
- Both parents are primary care taker of the child, but since past month a baby sitter is also involved in the care. They put him at baby sitter's place at 6:15 AM and pick him around 5 PM.
- For past 1 week, maternal grand mother was there with them and so she was also involved in the care.
- Other members in the house: Mother's uncles - 2, mother's brother -1, mother's cousin -1, father of the child.
- Uncles - smoke outside the house, father of the child drinks - socially, no history of drug abuse, violence, any CPS history in the past

**REVIEW OF SYSTEMS:**

**CONSTITUTIONAL:** Positive for Fever, Negative for weight loss, fatigue, decreased activity and depressed appetite

**EYES:** Negative for discharge, swelling and icterus

**ENT:** Negative for otalgia and ear discharge, Positive for rhinorrhea

**CV:** Negative for cyanosis

**RESP:** Negative for tachypnea, retractions, flaring, apnea, wheezing and stridor, Positive for cough and runny nose

**GI:** Negative for nausea, vomiting, diarrhea and constipation

**GU:** Negative for dysuria and frequent voiding

**GYN:** Not applicable

**MSK:** Negative for joint swelling

**SKIN:** Negative for rash, ecchymoses, birthmarks, hemangiomas

**NEURO:** Negative for seizures, altered mental status, abnormal movements, spastic and developmental delay

**PSYCH:** Not applicable

**ENDOCRINE:** Negative for weight change and polyuria

**HEME:** Negative for anemia, easy bruising, easy bleeding, pallor, lymphadenopathy

**IMMUNOLOGY/ALLERGY:** Negative for immunocompromised, urticaria, itchy eyes

**MEDICATIONS:**

No Taking medications on file for 1/4/10 encounter (Hospital Encounter).

**ALLERGIES:** No Known Allergies.

**PHYSICAL EXAMINATION:**

Is the patient in pain? Yes

Pain scale (0 = No Pain): When upright holded by mom, no pain, while lying down - starts crying. FLACC scoring:

QUISANO, KHAYDEN K  
MRN: 32049460  
DOB: 9/18/2009, Sex: M  
Acct #: 132506809  
Adm: 1/4/2010, D/C: 1/6/2010

History & Physicals (continued)

Reviewed Chest X-ray, 1/4/2010, and significant for: 1. No definite focal pulmonary infiltrates are visualized.  
2. Interval finding of healing left fourth, fifth, sixth and seventh rib fractures and possibly a right 6th rib fracture.  
Chest X-ray on 10/24/2009 - was normal, no fracture

**ASSESSMENT:** Khayden K Quisano is a 3 mo old male who has Ribs, multiple fractures on his problem list. Given the fact that there is no history of trauma - the first possibility of non accidental trauma - due to child abuse would be the first possible etiology. The chest xray was normal on 10/24/2009 and this X-ray is showing healing fracture, so it gives timing of the fracture around 6 weeks before this X-ray and after CXR on 10/24/2009. Given the fractures on the posterior part of the rib - suggests a possibility of shaken baby syndrome.

The other cause of non accidental trauma would be Osteogenesis imperfecta - given no similar history in the past or family and normal physical exam makes this possibility less likely. The other cause to be ruled out would be rickets, endocrinal - hypo, hyperparathyroid, renal disease affecting calcium and/or phosphorus metabolism.

**PLAN:**

1. FEN, GI: NPO for MRI since midnight and IV fluids 1 X M, otherwise PO simliac 20 cal ad lib later on, Monitor Daily weights and I/O's.
2. CV: Continue vital checks q4hrs
3. RESP: Continue vital checks q4hrs
4. ID: No antibiotics for now
5. HEME: CBC as routine screen
6. RENAL: Urine analysis
7. NEURO: Head MRI to rule out intraventricular or intracerebral hemorrhage, shear injury to brain - due to shaken baby syndrome, tyland for fussiness and pain
8. SOCIAL: Consult social service
9. OTHER: Consult CPS, consult Ophtho - for retinal hemorrhage, Whole body skeletal survey
10. DISP: Stable vitals, CPS opinion - either ok to go home with parents or foster home established

History & Physicals (continued)

PCP CONTACT NUMBER: 808-693-7300

SOURCE OF INFORMATION: Mother and father

CHIEF COMPLAINT: Multiple rib fractures

HISTORY OF PRESENT ILLNESS: Khayden K Quisano is a 3 mo old male, was in good of his health until 5 days prior to admission. Since Thursday (5 days PTA) Khayden started having fever, cough and runny nose. Mom used to record the temperature under the arm and maximum temperature in last 5 days has been 101 F. Mom used to give Tylenol for fever and she reported that at the max she would have given 2 times in one day. He has been afebrile since yesterday. Mom described cough mainly dry with the last cough occurring this AM. Runny nose - was watery, and sometimes just congested nose and no runny nose. There was no history of diarrhea, vomiting, ear discharge, pulling at ears, rash, increased work of breathing, cyanosis or apnea. There is no history of sick contacts. Mom did not give any other medication and consulted PMD today only for ongoing cough. PMD wanted to do a chest X- Ray to rule out pneumonia, because mom said - there is a history of other elder sibling dying at the age of 2 months from pneumonia; and the CXR suggested multiple left posterior rib fractures and possible right lateral 6th rib fracture and so was sent here to KMCWC for further management.

Mom says, there is no history of trauma. She denies any falls or any objects falling on patient, and has no idea how he could have developed rib fractures. She gives a history of fussiness - while putting him on his back in bed and while picking him up from bed. Frequency or severity of fussiness has not changed in recent weeks. This has been history since birth. Mom says, the PMD knows about it and he has been crying while doing the same at his office visits. Mom says, they used to make him sleep in mom's arm and after falling asleep, they put him in the bed - on his own basinet and he sleeps on his back. Mother seemed appropriately tearful and concerned over patient's condition.

I briefly met the father and spoke with him. He denied any knowledge of how patient could have developed the rib fractures. He denies any trauma or falls for the patient. He seemed cooperative with interview and had no questions regarding ongoing evaluation

**PAST MEDICAL HISTORY:**

**BIRTH HISTORY:** Delivered at Castle hospital, 2 weeks prior to EDD, NSVD, birth weight - 6 lb 5 oz (2.87 kg), no complications, no jaundice, discharged home the next day. No history of birth trauma. Mother reports HTN at delivery but no other pregnancy complications.

**MEDICAL CONDITIONS:** None. Saw Dr. Sorbella Guillermo for 1 visit post discharge but then switched to Dr. Ninomiya for further care and has seen him approximately for 3 visits for well child care. Had a CXR on 10/24/09 which was negative for fracture or pathology.

**HOSPITALIZATIONS AND SURGERIES:** No hospitalization, procedures - circumcision, but no surgeries, no injuries, no broken bones.

**IMMUNIZATIONS:** UTD per mom, got his 2 months shot, Not rotavac (she could not afford it)

**DEVELOPMENT:** Appropriate for age - head holding in upright position, while lying on his stomach he tries to roll over, recognizes parents, social smile present

**DIET:** Similac 20 cal formula, 2.5 - 3 oz, every 3-5 hours. No breastfeeding

**ETHNICITY:** Hawaiian, Puerto Rican, Spanish, Indian, Caucasian, Filipino, Chinese

**FAMILY HISTORY:**

- No family history of recurrent broken bones or bone disease or genetic/metabolic disorders.
- Elder sib died at 2 months of age, SIDS. Per mom, the child took his feeding at around 4 Am in the morning, she burped him and put him back in his basinet on his back. At around 6 or 7 Am

Adm: 1/4/2010, D/C: 1/6/2010

**History & Physicals (continued)**

In the morning, they noticed that he was not breathing. They did CPR, it did not help him and brought to the ER and was found dead. There was no history of fever, cough, trouble breathing or any other medical illness in the child prior to this incident. **But PCP reports death due to pneumonia.**  
**Per PCP HPD investigation of sibling's death cleared parents of suspicion.**  
- HTN in maternal grandfather and maternal grandmother. Asthma maternal grandfather. DM in maternal grandfather and maternal great grandmother. One paternal aunt with breast cancer.

**SOCIAL HISTORY:**

- Parents are not married, both parents are employed. Mom is medical assistant and working dayshifts. Father is in construction and currently working during dayshifts.
- Both parents are primary care taker of the child with mother more than father in direct care, but since past month a babysitter is also involved in the care. They put him at babysitter's place at 6:15 AM and pick him around 5 PM. Per mother, babysitter's name is Roberta Fernandez. She located babysitter through craigslist. She said babysitter is applying for licensure, had a negative background check, and has checked babysitter's references prior to placing him in her care.
- For past 1 week, maternal grand mother was there with them and so she was also involved in the care.
- Other members in the house: Mother's uncles - 2, mother's brother - 1, mother's cousin - 1, father of the child.
- Uncles - smoke outside the house, father of the child drinks - socially, no history of drug abuse, violence, any CPS history in the past

**REVIEW OF SYSTEMS:**

**CONSTITUTIONAL:** Positive for Fever and fussiness, Negative for weight loss, fatigue, decreased activity and depressed appetite

**EYES:** Negative for discharge, swelling and icterus

**ENT:** Negative for otalgia and ear discharge, Positive for rhinorrhea

**CV:** Negative for cyanosis

**RESP:** Negative for tachypnea, retractions, flaring, apnea, wheezing and stridor, Positive for cough and runny nose

**GI:** Negative for nausea, vomiting, diarrhea and constipation

**GU:** Negative for dysuria and frequent voiding

**GYN:** Not applicable

**MSK:** Negative for joint swelling Positive for rib fractures.

**SKIN:** Negative for rash, ecchymoses, birthmarks, hemangiomas

**NEURO:** Negative for seizures, altered mental status, abnormal movements, spastic and developmental delay

**PSYCH:** Not applicable

**ENDOCRINE:** Negative for weight change and polyuria

**HEME:** Negative for anemia, easy bruising, easy bleeding, pallor, lymphadenopathy

**IMMUNOLOGY/ALLERGY:** Negative for immunocompromised, urticaria, itchy eyes

**MEDICATIONS:**

Medications marked Taking as of 1/4/10 encounter (Hospital Encounter):

TYLENOL INFANTS PO      Take by mouth.      Disp:      Rf:

**ALLERGIES:** No Known Allergies.

**PHYSICAL EXAMINATION:**

Is the patient in pain? Yes

**Pain scale (0 = No Pain):** When upright held by mom, no pain, while lying down - starts crying. FLACC scoring:  
Face : 1, Leg: 1, Activity: 1, Cry: 1, Consolability: 1, Total : 5

**Describe:**

**Quality/Character:** Not possible  
**Location:** Not possible

**Onset:**

**Date, Time, Duration:** Since birth, per mom  
**What makes the pain worse?** sleeping  
**What makes the pain better?** Holding upright

**Comments regarding variation in pain management history, pain management plan, effects of pain on ADL's and physiologic responses to pain:**

**VITAL SIGNS:**

Blood pressure 100/75, pulse 140, temperature 36.6 °C (97.9 °F), temperature source Tympanic, resp. rate 48, height 0.59 m (1' 11.23"), weight 4.649 kg (10 lb 4 oz), head circumference 38.5 cm (15.16"), SpO2 90%.  
O2 mode: Room air

**WEIGHT:** Wt - Scale: 4.649 kg (10 lb 4 oz) **WT %:** < 5% (Birth Weight 6'5", so gained 3'15" in 3 months)

**HEIGHT:** Height 59 cm (1' 11.23") **HT %:** 9%

**BODY MASS INDEX:** Body mass index is 13.36 kg/(m<sup>2</sup>). **BMI %:** Normalized BMI data available only for age 2 to 20 years.

**HEAD CIRCUMFERENCE:** Head Cir. 38.5 cm (15.16") **HC %:** < 5%

**CONSTITUTIONAL:** Comfortable in mom's arm, active, alert, fixes and tracks, intermittent - jerky respiration, very fussy when put on his back on the bed. No abnormal respirations seen on my exam. Fussy when not held by mother.

**HEAD:** Microcephalic, atraumatic, no palpable fractures, AF - soft and full flat and no bulging/not tense

**EYES:** red reflexes x 2, fixes and tracks, conjugate gaze and no discharge

**ENT:** tympanic membranes clear with good light reflex, no nasal discharge, mucous membranes moist and oropharynx non-injected

**CV:** regular rate, rhythm and normal S1, S2, no murmur, symmetric pulses in all 4 extremities, no S3 or S4 and capillary refill < 3 seconds

**RESP:** clear to auscultation, good aeration, no nasal flaring, no retractions and no grunting

**GI:** soft, non-tender, normal bowel sounds, no distension and no hepatosplenomegaly

**GU:** normal male for age, testes descended and circumcised penis

**EXTREMITIES:** full ROM, no edema and no noticeable tenderness over bones

**SKIN:** warm and dry, no petechiae or purpura and no rashes Mongolian spots noted on left back (lower thoracic area), right buttock. Shallow curved healing abrasion of 1 cm on right upper back.

**MUSCULOSKELETAL:** all limbs normally developed and functional, good muscle tone in neck, trunk, and limbs, no joint tenderness and no muscle tenderness

**NEURO:** good strength and tone in all extremities, normal knee-jerk reflexes, symmetric, no abnormal posturing or movement and no focal deficit on exam

**DEVICES:** None

**OTHER:** No palpable fracture anywhere in the body, no bony tenderness on any part of body

**LAB RESULTS:**

History and Physical

QUISANO, KHAYDEN K  
MRN: 32049460  
DOB: 9/18/2009, Sex: M  
Acct #: 132506809  
Adm: 1/4/2010, D/C: 1/6/2010

History & Physicals (continued)

None

**DIAGNOSTICS:**

Reviewed Chest X-ray, 1/4/2010, and significant for: 1. No definite focal pulmonary infiltrates are visualized.  
2. Interval finding of healing left fourth, fifth, sixth and seventh rib  
Fractures on posterior ribs and possibly a right lateral 6th rib fracture.  
Chest X-ray on 10/24/2009 - was normal, no fracture

**ASSESSMENT:** Khayden K Quisano is a 3 mo old male who has Ribs, multiple fractures on his problem list. Given the fact that there is no history of trauma - the first possibility of non accidental trauma - due to child abuse would be the first possible etiology. The chest xray was normal on 10/24/2009 and this X-ray is showing healing fracture, so it gives timing of the fracture around 6 weeks before this X-ray and after CXR on 10/24/2009. Given the fractures on the posterior part of the rib - suggests a possibility of squeezing of thoracic cavity or shaken baby syndrome.

The other cause of non accidental trauma would be Osteogenesis imperfecta - given no similar history in the past or family and normal physical exam makes this possibility less likely. The other cause to be ruled out would be rickets, endocrinologic - hypo, hyperparathyroid, renal disease affecting calcium and/or phosphorus metabolism.

**PLAN:**

1. FEN, GI: NPO at midnight and IV fluids 1 X M for MRI otherwise PO simlac 20 cal ad lib later on, Monitor Daily weights and I/O's.
2. CV: Continue vital checks q4hrs
3. RESP: Continue vital checks q4hrs
4. ID: No antibiotics for now
5. HEME: CBC as routine screen
6. RENAL: Urinalysis
7. NEURO: Per Dr. Hyden, Head MRI in AM to evaluate for intraventricular or intracerebral hemorrhage, shear injury to brain due to shaken baby syndrome. Tylenol for fussiness and pain
8. SOCIAL: Consult social service
9. OTHER: Consult CPS (Called by PCP- HPD and CPS have seen and interviewed parents), Kapiolani Child Protection Team and Dr. Hyden, consult Ophtho - for retinal hemorrhage, Whole body skeletal survey in AM
10. DISP: Stable vitals, CPS opinion - either ok to go home with parents or foster home established
11. Ortho - Check CMP, phosphorus, review CXR, skeletal survey with radiology in AM. Will hold on rickets, endocrine, osteogenesis imperfecta workup pending initial evaluation of labs, skeletal survey, retinal exam, and consultant recommendation.

Prashant Purohit, RES  
1/4/2010

**PEDIATRIC ATTENDING PATH STATEMENT**

I saw and evaluated the patient on 1/4/2010. Discussed with resident and agree with resident's findings and plan as documented in the resident's note except where noted in red. In addition, my findings are:

History: As noted in resident note.  
ROS as noted in resident note. All other systems not mentioned are negative.

Consult Orders:

1. CONSULT - PHYSICIAN [38447387] ordered by Ogal, Yuliya A, RES at 01/04/10 1917

History of rib fracture. Asked to examine for retinal hemorrhages. On examination, the patient is able to fix and follow with each eye. There is no strabismus, and EOMs are full. Pupils are equal, round and reactive to light in both eyes. There is no afferent pupillary defect. The portable slit lamp examination reveals normal lids, lashes, conjunctiva, cornea, anterior chamber, iris and lens in both eyes except for a 2 mm subconjunctival hemorrhage on the left eye medially. The dilated fundus examination with extended ophthalmoscopy reveals normal disc, macula, and vessels in both eyes. Impression: No retinal hemorrhages. Left eye subconjunctival hemorrhage is nonspecific and should resolve spontaneously and is not visually significant. Recommend follow up pm. Thank you very much.

Consult Orders:

1. CONSULT - PHYSICIAN [36447392] ordered by Ogai, Yuliya A, RES at 01/04/10 1917

**CHILD PROTECTION ATTENDING CONSULTATION NOTE**

**Philip W. Hyden, MD**

The Child Protection Attending was notified regarding Kayden Quisano who sustained multiple rib fractures, and was asked to evaluate for suspected nonaccidental injury.

Khayden is a 3 month old male who was a 38 week gestational product of a spontaneous vaginal delivery without complications. He weighed 6 lbs, 5 ounces (2.87 kg) at birth. He has been followed by Dr. Jason Ninomiya for his ongoing medical care, and his immunizations are up to date. He had a chest X-ray performed on October 24, 2009 for cough and runny nose which was normal, with no fractures or infiltrate. The child has been following along his growth curve, although small for age, until the most recent office visit, where he had been ill for five days with fever, cough and runny nose. Because of a previous sibling's demise secondary to pneumonia at two months of age, Dr. Ninomiya once again decided to obtain a chest radiograph, and referred the patient to KMCWC for an outpatient radiology appointment. Dr. Ninomiya was concerned that the family did not bring the child in sooner with respiratory symptoms, in light of their other child's tragic outcome. After the radiograph was completed, the patient left with his parents. The x-ray revealed multiple fractures, and Dr. Ninomiya was notified, so he sent the family back to KMCWC to the ER for further evaluation and treatment. He also reported the case to CWS, and by the time the family arrived at KMCWC, both CWS and HPD were present. The child was admitted to the Pediatric Ward.

The parents were not available for interviewing at the time of the CPT assessment, so the history is from discussion with Dr. Ninomiya, Dr. Purohit, and the medical records. The mother reported that there was no history of trauma to the child, and denied any fall or contact with any falling objects. She recalls that the child has been fussy when picking him up or laying him down in his bassinet. He has always acted in this manner since his birth. The mother was reported to be tearful and appropriately concerned about her son's injuries. Dr. Lin, the admitting attending, spoke with the father, who denied any knowledge of trauma or other explanation for the fractures. He was reported to be cooperative during questioning and appeared to understand the reason for the evaluation.

KAPIOLANI WOMEN & CHILDREN  
HOS  
1319 Punahou St  
Honolulu, HI 96826-1001  
Consult Notes

QUISANO, KHAYDEN K  
MRN: 32049460  
DOB: 9/18/2009, Sex: M  
Acct #: 132506809  
Adm: 1/4/2010, D/C: 1/6/2010

Consult Notes (continued)

The parents had reported that the child had Similac 20 cal/ounce formula, ingesting 2.5-3 ounces every 3-5 hours and no breastfeeding. They also denied any history of bony abnormalities or disorders in their respective families.

Dr. Ninomiya reported that he was informed by the medical examiner that the demised sibling died of pneumonia, but that the family did not inform him that the child was dead or bring him in because he was ill prior to the death.

Both parents work during the day, and the mother is involved more directly in childcare when at home. The parents have enlisted the use of a babysitter for the past month who cares for the child from 6:15 am to 5 pm.

The sitter does not have a license but reportedly had a negative background check. - For past 1 week, maternal grandmother was there with them and so she was also involved in the care. There are several other household members, including two maternal uncles, a maternal sibling and a maternal cousin.

Physical Examination

Blood pressure 100/75, pulse 140, temperature 36.6 °C (97.9 °F), temperature source Tympanic, resp. rate 48, height 0.59 m (1' 11.23"), weight 4.649 kg (10 lb 4 oz), head circumference 38.5 cm (15.16"), Wt - Scale: 4.649 kg (10 lb 4 oz) WT %: < 5% (Birth Weight 6'5", so gained 3'15" in 3 months)

Height: 59 cm (1' 11.23") HT %: 9%

Head Cir: 38.5 cm (15.16") HC %: < 5%

The child's physical examination was significant for fussiness when moved, but otherwise he appeared small for age, well developed, and alert during the examination.

The skin had a curved healing abrasion of 1 cm on the right upper back. Mongolian spots were noted on the left lower back. No fractures were able to be palpated.

The skeletal survey revealed healing posterior fractures of the left fourth through sixth ribs. There were healing midaxillary fractures of the right fourth through six ribs. A metaphyseal fracture was noted on the medial aspect of the distal right femur. A ophthalmoscopic evaluation revealed no retinal hemorrhages, and a small subconjunctival hemorrhage on the left eye, which was not considered specifically related to trauma. An MRI of the brain was unremarkable for hemorrhage or other trauma.

Impression and Recommendations:

Khayden is a 3 mo old male who has sustained multiple posterior and axillary healing rib fractures, in addition to a metaphyseal fracture of the distal femur, without any etiology provided by the caretakers. There is no overt skeletal abnormality other than these highly specific traumatic fractures, and they are most likely the result of nonaccidental injury. The rib fractures are most likely the result

Consult Notes (continued)

of compressive or squeezing forces, and the metaphyseal fracture is from shearing injury. The child is also failure-to-thrive, with inadequate formula being offered to the child based on the history of 2.5 ounces q 3-5 hours.

The case is being investigated by both law enforcement and CWS. The child is medically ready for discharge, and will go into a foster home. A multidisciplinary team will be held at KCPC on January 7, 2010 to assist CWS in disposition and planned services. Dr. Ninomiya is available for this child for follow-up when the child has been placed into foster care. A repeat skeletal survey should be performed in two weeks to discern any fractures which may not be detected at this hospitalization. The skeletal survey may also assist in discerning the timing of the metaphyseal femur fracture.

The child should also continue feeding Similac 20, with increase in amount and frequency of feeding to allow the child to have 28-32 ounces of formula daily. GER precautions should be observed.

Two hours were utilized in evaluating the patient, discussion with the primary care team, the PCP, and speaking to CWS and law enforcement.

**ORGANIC ACIDS, URINE QUAL (continued)**

Result ORGANIC ACIDS, URINE

Organic Acids, Urine:  
Elevation of several peaks related to medication (acetaminophan propofol); no clinically significant abnormalities detected.

Interpretation  
Pattern of organic acid excretion not suggestive of any specific inborn error of metabolism.

Test performed by STANFORD HOSPITAL AND CLINICS  
300 Pasteur Dr, Rm H1524  
Stanford, CA 94305

INTERPRETATION:  
Essentially normal pattern of amino acids for age.

FLAGS: LL: below critical L: below reference H: above  
reference HH: above critical A: abnormal

Caution: Out-of-reference range flagging will only occur when a reference range is displayed. The absence of a flag does not necessarily indicate a normal result. If gender or birthdate is unknown, reference range defaults to a male born Jan. 1, 1901.

Interpreted by: Tina M. Cowan, Ph.D.  
Director, Biochemical Genetics Laboratory

### Peds Hospitalist Attending Progress Note

No acute events O/N. Discussed with Dr. Hyden, SW, radiologist. No family at the bedside. No acute events. Hungry but RN's do not think he is in pain. No fevers. No O2 requirement. Work of breathing has been stable. MRI unable to be done today

Afeb 120-140's 30-40's 100-110/70's 90-100% RA Wt. - no new wt.  
NPO, MIVF

Alert, interactive. Easily consoled when upset. Small but WD/WN.  
AFOF. MMM with small patches on buccal mucosa. No rhinorrhea. Small, medial scleral hemorrhage on L.  
PERRL, EOMI

CTA B/L, no increased WOB

RRR no murmur

Abd soft, no HSM

Tanner I MEG with testes down

MAE's with normal tone

~3 mm superficial, scabbed abrasion on R upper back. Mongolian spots on mid-back. No other lesions

Labs: Skeletal survey with 4-5 healing rib fractures (with callus formation) on L posterior, 3 healing rib fractures on R lateral chest. R distal femur metaphyseal fracture

A/P: 3 mo M with multiple healing rib fractures and distal R femur buckle fracture consistent with NAT.  
Symmetric FTT with probable SGA at birth based on history

URI - resolving

Discharge Summary Notes (continued)

- MRI brain with sedation to evaluate for acute or chronic bleeds, any signs of shearing. Patient assessed. No significant changes from original H&P. Stable for sedation. ASA score 2
- currently NPO with MIVF for sedation. SL IV and advance diet post-procedure
- repeat BMP to document normalization of CO2
- please obtain growth chart from PCP and birth records from Castle. Obtain autopsy results from sib if possible
- needs repeat skeletal survey in 10-14 days to monitor for callus formation at femur fracture
- anticipate discharge when MRI complete and disposition finalized by CPS (likely to foster care)
- no family may visit at this time but can update parents by phone per SW

I spent 45 minutes in direct patient care. More than 50% of time was spent counseling or coordinating care.

Bettina Ackermann, MD

## PATIENT CARE SUMMARY - PEDIATRICS

ADMISSION DATE/TIME: 1/4/2010 5:37 PM  
DISCHARGE DATE/TIME: 1/6/2010/12:56 PM  
PRIMARY CARE PHYSICIAN: Jason T Ninomiya, MD

**REASON FOR ADMISSION (BRIEF HPI):** Khayden K Quisano is a 3 mo old male, was in good of his health until 5 days prior to admission. Since Thursday (5 days PTA) Khayden started having fever, cough and runny nose. Mom used to record the temperature under the arm and maximum temperature in last 5 days has been 101 F. Mom used to give Tylenol for fever and she reported that at the max she would have given 2 times in one day. He has been afebrile since yesterday. Mom described cough mainly dry with the last cough occurring this AM. Runny nose - was watery, and sometimes just congested nose and no runny nose. There was no history of diarrhea, vomiting, ear discharge, pulling at ears, rash, increased work of breathing, cyanosis or apnea. There is no history of sick contacts. Mom did not give any other medication and consulted PMD today only for ongoing cough. PMD wanted to do a chest X- Ray to rule out pneumonia, because mom said - there is a history of other elder sibling dying at the age of 2 months from pneumonia; and the CXR suggested multiple left posterior rib fractures and possible right lateral 6th rib fracture and so was sent here to KMCWC for further management.

Mom says, there is no history of trauma. She denies any falls or any objects falling on patient, and has no idea how he could have developed rib fractures. She gives a history of fussiness - while putting him on his back in bed and while picking him up from bed. Frequency or severity of fussiness has not changed in recent weeks. This has been history since birth. Mom says, the PMD knows about it and he has been crying while doing the same at his office visits. Mom says, they used to make him sleep in mom's arm and after falling asleep, they put him in the bed - on his own bassinot and he sleeps on his back. Mother seemed appropriately tearful and concerned over patient's condition.

Adm: 1/4/2010, D/C: 1/6/2010

**Discharge Summary Notes (continued)**

I briefly met the father and spoke with him. He denied any knowledge of how patient could have developed the rib fractures. He denies any trauma or falls for the patient. He seemed cooperative with interview and had no questions regarding ongoing evaluation.

**FINAL PRINCIPAL DIAGNOSIS:** Non-accidental trauma

**FINAL PROBLEM LIST/HOSPITAL COURSE:**

Active Hospital Problems  
Ribs, multiple fractures

Resolved Problems  
No resolved problems to display

**Hospital Course:**  
During hospital stay, patient was stable, did not develop any fevers, had good PO intake. Biological parents were not allowed to stay. The patient had multiple imaging done (see below), in summary, there was no retinal hemorrhages, skeletal scan showed multiple rib fractures and metaphyseal fracture of the distal right femur, and head MRI was normal. Ortho was called regarding metaphyseal femur fracture, and did not feel that patient needed follow-up unless patient was tender in that area. Dr. Hyden was consulted regarding concern for non-accidental trauma; it was felt that the patient should have a repeat skeletal survey in 2 weeks to look for fractures that were not evident. Initial BMP's on the patient was significant for CO2 being 17; repeat BMP were with CO2 of 18 and then 20. Patient also with mild elevation of hepatic enzymes of AST 41, ALT 62, and AlkPhos 444. Because of the concern for metabolic/genetic disorders, a serum amino acid and urine organic acid test was drawn, as well as a final BMP (pending) prior to discharge.

**PROCEDURE/IMAGING:**

1/5/09 Skeletal survey - Multiple bilateral healing rib fractures and metaphyseal fracture of the distal right femur. Findings are compatible with child abuse.

1/5/09 Ophtho exam - no retinal hemorrhages

1/5/09 Brain MRI - IMPRESSION: Unremarkable MRI of the brain.

**CONSULTANTS/SERVICE:**

PCP: Jason T Ninomiya, MD

Admitting Provider: Barry M Mizuo, MD

Attending Provider: Bettina Ackemann, MD

Consulting Physician: David A Young, MD

Consulting Physician: Phillip W Hyden, MD

Resident: Bernard A Riola, RES

**IMMUNIZATIONS GIVEN DURING HOSPITALIZATION:** None

**FINAL PROGRESS NOTE**

**S:** Afebrile overnight. Feeding well, but NPO this morning for planned MRI at 9:30 AM. Stool x2, large soft. Growth charts obtained from PCP shows drop-off in weight during the last few months. Gained 114 g since admission. Foster parents found; both biological parents and foster parents are aware of the patient's situation and likely discharge today. Ophtho did not see any retinal hemorrhages, only 2 mm subconjunctival hemorrhage on the left eye medially. Ortho did not feel metaphyseal fracture of the distal right femur needed follow-up if patient was not tender in that area.

**O:**

**VITAL SIGNS (LAST 24 HOURS):**

TOTAL IN (ml/kg/day):

URINE OUTPUT (cc/kg/hr):

STOOLS: 2x, soft

**PHYSICAL EXAM:**

**CONSTITUTIONAL:** Fixes and tracks, fussy when picked up but NAD when lying in bed wrapped

**HEAD:** Microcephalic, atraumatic, no palpable fractures, AFSF

**EYES:** red reflexes x 2, fixes and tracks, conjugate gaze

**ENT:** no nasal discharge, mucous membranes moist and oropharynx non-injected

**CV:** regular rate, rhythm and normal S1, S2, no murmur, symmetric pulses in all 4 extremities

**RESP:** clear to auscultation, good aeration, no nasal flaring, no retractions

**GI:** soft, non-tender, normal bowel sounds

**GU:** normal male for age, testes descended and circumcised penis

**EXTREMITIES:** full ROM, no edema and no noticeable tenderness over bones, including left distal humerus

**SKIN:** warm and dry, no petechiae or purpura and no rashes Mongolian spots noted on left back (lower thoracic area), right buttock. Small abrasion on right upper back.

**DIAGNOSTICS:** See above for results of ophtho exam, head MRI, skeletal survey.

**PATIENT DISPOSITION:** Foster Care

**Discharge Instructions**

**Follow up**

Follow up with Jason T Ninomiya, MD in 1-2 days. Please call 808-693-7300 for an appointment.

**Call your doctor for these signs and symptoms**

Fever, vomiting, decreased eating or urine

**Additional discharge instructions or home services/supplies**

Need to recheck electrolytes in 1-2 weeks. Need to recheck skeletal survey in 2-3 weeks.

**DISCHARGE MEDICATIONS:**

CONTINUE these medications which have NOT CHANGED  
TYLENOL INFANTS PO  
Take by mouth.

**DISCHARGE SUPPLIES:** None

**SPECIAL INSTRUCTIONS:** None

**PATIENT RECEIVED ASTHMA ACTION PLAN:** Not applicable

**PATIENT RECEIVED PEAK FLOW METER:** Not applicable

**ASTHMA EDUCATION/TEACHING WAS COMPLETED BY RT?** Not applicable

I certify that the narrative descriptions of the principal & the major procedures are accurate and complete.

**REASON FOR ADMISSION (BRIEF HPI):** Khayden K Quisano is a 3 mo old male, was in good of his health until 5 days prior to admission. Since Thursday (5 days PTA) Khayden started having fever, cough and runny nose. Mom used to record the temperature under the arm and maximum temperature in last 5 days has been 101 F. Mom used to give Tylenol for fever and she reported that at the max she would have given 2 times in one day. He has been afebrile since yesterday. Mom described cough mainly dry with the last cough occurring this AM. Runny nose - was watery, and sometimes just congested nose and no runny nose. There was no history of diarrhea, vomiting, ear discharge, pulling at ears, rash, increased work of breathing, cyanosis or apnea. There is no history of sick contacts. Mom did not give any other medication and consulted PMD today only for ongoing cough. PMD wanted to do a chest X- Ray to rule out pneumonia, because mom said - there is a history of other elder sibling dying at the age of 2 months from pneumonia; and the CXR suggested multiple left posterior rib fractures and possible right lateral 6th rib fracture and so was sent here to KMCWC for further management.

Mom says, there is no history of trauma. She denies any falls or any objects falling on patient, and has no idea how he could have developed rib fractures. She gives a history of fussiness - while putting him on his back in bed and while picking him up from bed. Frequency or severity of fussiness has not changed in recent weeks. This has been history since birth. Mom says, the PMD knows about it and he has been crying while doing the same at his office visits. Mom says, they used to make him sleep in mom's arm and after falling asleep, they put him in the bed - on his own basinet and he sleeps on his back. Mother seemed appropriately tearful and concerned over patient's condition.

I briefly met the father and spoke with him. He denied any knowledge of how patient could have developed the rib fractures. He denies any trauma or falls for the patient. He seemed cooperative with interview and had no questions regarding ongoing evaluation.

**FINAL PRINCIPAL DIAGNOSIS:** Non-accidental trauma

**FINAL PROBLEM LIST/HOSPITAL COURSE:**

Active Hospital Problems  
Ribs, multiple fractures

Resolved Problems  
No resolved problems to display

**Hospital Course:**  
During hospital stay, patient was stable, did not develop any fevers, had good PO intake. Biological parents were not allowed to stay. The patient had multiple imaging done (see below), in summary, there was no retinal hemorrhages, skeletal scan showed multiple rib fractures and metaphyseal fracture of the distal right femur, and head MRI was normal. Ortho was called regarding metaphyseal femur fracture, and did not feel

**Discharge Summary Notes (continued)**

that patient needed follow-up unless patient was tender in that area. Dr. Hyden was consulted regarding concern for non-accidental trauma; it was felt that the patient should have a repeat skeletal survey in 2 weeks to look for fractures that were not evident. Initial BMP's on the patient was significant for CO2 being 17; repeat BMP were with CO2 of 18 and then 20. Patient also with mild elevation of hepatic enzymes of AST 41, ALT 62, and AlkPhos 444. To evaluate for possible metabolic/genetic disorders, a serum amino acid and urine organic acid test was drawn, as well as a final BMP (pending) prior to discharge.

**PROCEDURE/IMAGING:**

1/5/09 Skeletal survey - Multiple bilateral healing rib fractures and metaphyseal fracture of the distal right femur. Findings are compatible with child abuse.

1/5/09 Ophtho exam - no retinal hemorrhages

1/6/09 Brain MRI - IMPRESSION: Unremarkable MRI of the brain.

**CONSULTANTS/SERVICE:**

PCP: Jason T Ninomiya, MD

Admitting Provider: Barry M Mizuo, MD

Attending Provider: Bettina Ackermann, MD

Consulting Physician: David A Young, MD

Consulting Physician: Phillip W Hyden, MD

Resident: Bernard A Riola, RES

**IMMUNIZATIONS GIVEN DURING HOSPITALIZATION:** None

**FINAL PROGRESS NOTE**

S: Afebrile overnight. Feeding well, but NPO this morning for planned MRI at 9:30 AM. Stool x2, large soft. Growth charts obtained from PCP shows drop-off in weight **at the time of the last visit. Seen by nutrition who recommended 24 kcal formula.** Gained 114 g since admission. Foster parents found; both biological parents and foster parents are aware of the patient's situation and likely discharge today. Ophtho did not see any retinal hemorrhages, only 2 mm subconjunctival hemorrhage on the left eye medially. Ortho did not feel metaphyseal fracture of the distal right femur needed follow-up if patient was not tender in that area.

TOTAL IN (ml/kg/day):

URINE OUTPUT (cc/kg/hr):

STOOLS: 2x, soft

PHYSICAL EXAM:

CONSTITUTIONAL: Fixes and tracks, fussy when picked up but NAD when lying in bed wrapped **Alert,**  
easily consolable when picked up

HEAD: Microcephalic, atraumatic, no palpable fractures, AFSF

EYES: red reflexes x 2, fixes and tracks, conjugate gaze **Unchanged, small subconjunctival hemorrhage**  
of medial L eye

ENT: no nasal discharge, mucous membranes moist and oropharynx non-injected

CV: regular rate, rhythm and normal S1, S2, no murmur, symmetric pulses in all 4 extremities

RESP: clear to auscultation, good aeration, no nasal flaring, no retractions

GI: soft, non-tender, normal bowel sounds

GU: normal male for age, testes descended and circumcised penis

EXTREMITIES: full ROM, no edema and no noticeable tenderness over bones, including left distal humerus  
femur

SKIN: warm and dry, no petechiae or purpura and no rashes Mongolian spots noted on left back (lower  
thoracic area), right buttock. Small abrasion on right upper back (3-4 mm superficial scab).

MUSCULOSKELETAL: all limbs normally developed and functional, good muscle tone in neck, trunk, and  
limbs, no joint tenderness and no muscle tenderness. Fair head control when upright.

NEURO: good strength and tone in all extremities, normal knee-jerk reflexes, symmetric, no abnormal  
posturing or movement and no focal deficit on exam.

OTHER: No palpable fractures, no bony tenderness on any part of body

Discharge Summary Notes (continued)

**Follow up**

Follow up with Jason T. Ninomiya, MD in 1-2 days. Please call 808-693-7300 for an appointment.

**Call your doctor for these signs and symptoms**  
Fever, vomiting, decreased eating or urine

**Additional discharge instructions or home services/supplies**  
Need to recheck electrolytes in 1-2 weeks to look for resolution of acidosis. Need to recheck skeletal survey in 10-14 days. Patient with serum amino acids and urine organic acids drawn prior to discharge.

**DISCHARGE MEDICATIONS:**  
CONTINUE these medications which have NOT CHANGED  
TYLENOL INFANTS PO  
Take by mouth.

**DISCHARGE SUPPLIES:** None

**SPECIAL INSTRUCTIONS:** None

**PATIENT RECEIVED ASTHMA ACTION PLAN:** Not applicable

**PATIENT RECEIVED PEAK FLOW METER:** Not applicable

**ASTHMA EDUCATION/TEACHING WAS COMPLETED BY RT?** Not applicable

I certify that the narrative descriptions of the principal & the major procedures are accurate and complete.

Bernard A. Riola Jr., RES

**Peds Hospitalist Attending Final Progress Note.**

No acute events O/N. No family at the bedside. I agree with Dr. Riola's findings with my additions documented above (in black) and below.

Labs: 1/5: BMP hemolyzed with K+ 6.5, HCO3 18  
1/6: BMP with Na 134, HCO3 20  
MRI brain WNL

Pending Labs: serum amino acids, urine organic acids

A/P: 3 mo M with multiple healing rib fractures and distal R femur metaphyseal fracture consistent with NAT.

Symmetric FTT with probable SGA at birth based on history

Low HCO3 - likely due to hemolyzed specimens but initial metabolic evaluation started prior to discharge

URI - resolving

-d/c to home with foster family

-d/c meds: Tylenol pm pain

-f/u with: KMCWC outpatient clinic on 1/8/09 11:15 AM. Call sooner for difficulty breathing, inconsolability

Printed on 7/24/2013 7:56 AM

Discharge Summary Notes (continued)

or other concerns.

-recommend repeat skeletal survey in 10-14 days to evaluate for possible callus formation at femur fracture site

-consider repeat BMP as outpatient with additional w/u if low bicarb persists

I discussed with Dr. Ninomya and faxed summary.

I spent 45 minutes examining the patient, providing discharge instructions, counseling to the patient and family, and coordinated with other agencies and providers. I prepared discharge records, prescriptions, and referral forms.

Khayden K Quisano is a 3 mo old male  
Patient presents with:  
HOSPITAL F/U

3 month-old male here for follow. He was admitted 1/4-1/6 for NAI after found to have multiple rib fracture from CXR.

Investigation: Eye exam, MRI brain normal. Electrolyte showed mild acidosis CO2 18-20, plasma aminoacid and urine organic acid sent: pending. Skeletal survey 1/5/09: Multiple bilateral healing rib fractures and metaphyseal fracture of the distal right femur. Dr Hyden, CPS involved. Parents are not allowed to take of baby at this time, d/c home with foster mom. Giving similac 24 cal/oz for poor weight gain.

She has vomiting x2, therefore foster mom changed to regular similac, thought that he is better. He takes regular similac 6 oz q 3 hour. D/c weight 4.76 grams, today weight 5 kgs

Feel warm, no high fever, gave tylenol this morning. Here today for follow up.

REVIEW OF SYSTEMS:

GENERAL: no decreased activity, no decreased appetite and no decreased oral intake, +ve vomiting

Printed on 7/24/2013 7:56 AM

## All Notes (continued)

HEAD/FACE/NECK: no swollen glands  
EYES: no eyelid redness, no eye discharge  
ENT: no ear drainage  
RESPIRATORY: no cough  
CARDIOVASCULAR: no cyanosis  
GI: no constipation and no diarrhea  
URINARY: no decreased urine output  
MUSCULOSKELETAL: no deformity  
SKIN: no rash  
NEUROLOGIC: no decreased responsiveness  
PSYCHIATRIC: no behavior abnormalities  
HEMATOLOGIC: negative, no bleeding

PAST HISTORY: As reviewed in the History Activity.

FAMILY HISTORY: No family history on file.

EXPOSURE TO: not reviewed

MEDICATIONS: no

## IMMUNIZATIONS:

There is no immunization history on file for this patient.

ALLERGIES: No Known Allergies.

## PHYSICAL EXAM:

Pulse 120 | Temp (Src) 37.1 °C (98.7 °F) (Temporal Scan) | Resp 28 | Wt 11 lb 0.4 oz  
(5 kg)

There is no height on file for this encounter.

GENERAL: alert, well appearing, no acute distress

HEAD: normocephalic, atraumatic

EYES: no eyelid swelling, no conjunctival injection and no conjunctival exudate

EARS: no external swelling or tenderness, canals clear, tympanic membranes normal in appearance and position

NOSE: nares patent, normal mucosa

MOUTH/THROAT: mucous membranes moist, no focal lesions, no tonsillar enlargement or exudate

TEETH: deferred

NECK: nontender, full range of motion, no mass, no focal lymphadenopathy

CHEST/LUNGS: breath sounds clear and equal bilaterally, no respiratory distress

CARDIOVASCULAR: regular rate and rhythm, no murmur and brisk capillary refill

ABDOMEN: soft, nontender, no hepatosplenomegaly and no mass

GENITALIA: normal male; testes descended bilaterally; no lesions, discharge, mass, swelling or tenderness; no hernia

EXTREMITIES: nontender, no deformity, full range of motion

BACK: nontender, no deformity, no defect

SKIN: warm, dry, no rash, no lesions

NEURO: alert, normal tone, no focal deficit

## ASSESSMENT:

3 month-old male with NAI, doing well

Progress Notes signed by Clarke, Nancy S, MD

01/10/10 2332

Author: Clarke, Nancy S, MD Service: (none)  
Filed: 01/10/10 2332 Note Time: 01/08/10 1214

Author Type: Physician

I have seen and evaluated the patient and discussed with resident, Dr. Jirasakuldej. I agree with the resident's findings and plan as documented in the resident's note. In addition, my findings are:

3 mo male, new patient here with foster mother for follow-up hospital stay for non-accidental trauma. Prior PCP was Dr. Ninomiya; foster mother prefers to obtain care with KMCWC clinic due to closer location to her home.

On 1/4/10, mother had brought Khayden to Dr. Ninomiya's office for evaluation due to cough and fever x 4 days. Dr. Ninomiya obtained a CXR with findings specific for multiple rib fractures including findings of healing left fourth, fifth, sixth and seventh rib fractures and possibly a right sixth rib fracture.

Patient admitted and found on skeletal survey to additionally have metaphyseal fracture of the distal right femur. Ophthalmology consulted and found no retinal hemorrhages. MRI brain obtained and found normal. Orthopedics consulted and recommended no orthopedic follow-up unless area of femur fracture seems tender.

Patient also found to have symmetric failure to thrive though there is reported history of patient being small for gestational age at birth. Per nutrition recommendation, patient was discharged on 24 calorie per ounce formula. Foster mother has switched back to regular 20 cal/oz formula due to Khayden not tolerating the 24 cal/oz formula and vomiting each time it is given. He is taking 6 oz/feed every 3 hours without problems. Foster mother reports he seems fussy at times when he is moved, especially when his right leg is moved.

PMH:

Reported SGA  
Symmetric FTT

Family history: Sibling died at age 2 months from pneumonia; no other family history known

**All Notes (continued)**

Social history: Biological parents have been allowed to visit Khayden; currently with foster family; case under investigation by CWS.

O: gen: awake, alert, not fussy during exam  
 Heent: ncat, mmm, neck soft and supple, bilateral red reflex present  
 Cv: rr, nls1s2, no murmurs  
 Chest: ctab  
 Abd: soft, nt/hd, nl bs, no masses  
 Gu: nl male for age  
 Ext: wwp, no deformities, no hip clicks  
 Skin: Mongolian spot on back, ~5 cm bruise on right upper back, no abrasions  
 Neuro: no focal abnormalities, normal tone and strength

A: 3 mo male here for hospital follow-up, new patient  
 -non-accidental trauma with multiple rib fractures and with right distal femur metaphyseal fracture  
 -under foster care, case under investigation by CWS  
 -failure to thrive, discharged home on 24 calorie/oz formula which he has not been tolerating, now on 20 cal/oz formula and with excellent interval weight gain since discharge from hospital

P:  
 -obtain records from PCP; foster mother unable to sign medical release form; resident MD discussed with CWS case worker, tel: 692 7861 CHAD KOJIMA; however, we will need to have release forms signed by the CWS social worker  
 -skeletal survey to follow-up initial survey next week  
 -f/u pending amino acids and urine organic acids  
 -reasonable to continue on 20 cal/oz formula as not tolerating 24 cal/oz formula and has had good interval weight gain  
 -f/u weight next week  
 -if appears to have persistent/increasing pain in area of right distal femur metaphyseal fracture, will consider referral to orthopedics  
 -clinic numbers to call reviewed

Results Imaging (S)

QUISANO, KHAYDEN K  
MRN: 32049460  
DOB: 9/18/2009, Sex: M

COMPARISON: 10/24/09

RESULT: Frontal and lateral views of the chest demonstrate no focal pulmonary infiltrate, consolidation, or pleural effusion. The heart size is normal. No pneumothorax is appreciated.

There are healing fractures involving the left fourth, fifth, sixth and seventh ribs posteriorly. There is a rounded opacity superimposing the right 6th rib, possibly due to healing fracture. There is a rounded opacity overlying the right 6th rib laterally, which could also be due to a healing fracture.

IMPRESSION:

1. No definite focal pulmonary infiltrates are visualized.

2. Interval finding of healing left fourth, fifth, sixth and seventh rib fractures and possibly a right 6th rib fracture.

Results called to Dr. Ninomiya 1/4/2010 at 3:23.

XR SKELETAL SURVEY &lt;1 YR

REASON FOR EXAM: 3 mo male with nat

RESULT: Fifteen views of the skeleton reveal healing fractures of the posterior portions of the left fourth through seventh ribs. There may also be a healing fracture of the posterior portion of the left eighth rib. There are healing fractures of the axillary portions of the right fourth through sixth ribs. There is a bucket handle fracture of the medial aspect of the distal right femoral metaphysis. There are small exostoses of the shafts of the first metatarsals bilaterally and the shaft of the left second metatarsal.

IMPRESSION: Multiple bilateral healing rib fractures and metaphyseal fracture of the distal right femur. Findings are compatible with child abuse.

MR BRAIN WITHOUT CONTRAST  
REASON FOR EXAM: 3 mo male with nat  
COMPARISON: None available  
TECHNIQUE: MRI of the brain was performed on a 1.5 Tesla Magnet without intravenous contrast using the following pulse sequences multiplanar localizer sagittal T1, axial proton density, T2 \* GRE, T1, FLAIR, T2 and diffusion.  
RESULT: The ventricles and sulci are within normal limits for age. There is normal white matter volume and myelination and sulcation pattern given the age.  
No extraaxial fluid collections, mass, mass effect are identified.  
There are no areas of restricted diffusion to suggest acute infarction nor areas of abnormal susceptibility to suggest prior hemorrhage.  
The orbits, globes, paranasal sinuses, mastoid air cells, middle ears and major intracranial flow voids appear within normal limits.  
IMPRESSION: Unremarkable MRI of the brain.

## STATEMENT OF FACTS

On June 6, 2013, three year-old Khayden Quisano died as the result of blunt force trauma to the head. 1 PHT p. 18-41 (Exhibit A). Khayden lived with his mother, Christina Rodrigues; his father, Jonathan Quisano; his little brother, Khaysen; and his maternal grandmother, Lynn Rodrigues. 1 PHT p. 233. On the morning of June 6, Jonathan left for work just before dawn, in keeping with his usual work schedule. 1 PHT p. 239-24. Christina woke Khayden and Khaysen around 6:30. 1 PHT p. 240. She dressed them and drove them to her grandparents' home, after which she drove to work for her 8:30-5:00 shift at cardiovascular specialist's office. 1 PHT p. 239-241. As typically happened, Christina's grandparents drove Khayden and Khaysen home after Jonathan returned home from work, sometime in the afternoon. 1 PHT p. 233-40. At approximately 5:10 that evening, as Christina was driving home from work, she received a phone call from Jonathan. 1 PHT p. 241-42. Jonathan told her to hurry home. 1 PHT p. 243. A few minutes later, Christina called Jonathan back and asked why he needed her to hurry home. 1 PHT p. 243. Jonathan explained that Khayden fell off of the back of the couch in the tile-floored living room<sup>1</sup> and hit his head. 1 PHT p. 243-44; 261. Jonathan told Christina that Khayden was not opening his eyes and was spitting up. 1 PHT p. 244; 256. Christina hung up and called 911. 1 PHT p. 244.

Emergency personnel responded and found Khayden unresponsive and lifeless. 1 PHT p. 155. Paramedics immediately initiated life-saving measures, including CPR/chest compressions. 1 PHT p. 163-64; 176-79. When asked what happened to Khayden, Jonathan told paramedic Timothy Kline that Khayden fell from a living room chair onto the tile floor. 1 PHT p. 160-61. Notably, the living room housed a love seat, two recliner chairs, and a three-seat couch. 1 PHT p. 237; 245-46. Jonathan similarly told paramedic Patrick Burkhalter that Khayden fell backwards off of a chair/recliner onto the floor. 1 PHT p. 210-12. Jonathan later clarified that he did not actually witness the fall; that he only saw Khayden playing on top of the chair when he fell. 1 PHT p. 213. Las Vegas Fire Department Captain Mickey Pedrol also asked Jonathan how Khayden sustained his injuries. 1 PHT p. 192-93. Jonathan purportedly told Capt. Pedrol that both of his

---

<sup>1</sup> Jonathan later reiterated this version of events to Christina when the couple drove to the hospital. PHT p. 244-49.

1 sons were playing on a bar when Khayden fell off, hitting his head on the floor. I PHT p. 193.  
2 Notably, when asked, Christina Rodriguez could not identify anything in the home approximating  
3 a 'bar,' nor was she aware of anything to which Jonathan referred as a 'bar' other than a barstool  
4 located in the kitchen area. I PHT p. 257.

5 Christina arrived home to find paramedics already tending to Khayden. I PHT p. 249.  
6 Suspicious of Jonathan's accounting of Khayden's injury(ies), Capt. Pedrol alerted LVMPD  
7 officials. I PHT p. 190. Khayden was transported to UMC Hospital where doctors determined  
8 him to be clinically brain dead. I PHT p. 38. Khayden died not long thereafter.

9 LVMPD detectives responded to the hospital and, ultimately, to Khayden's home to  
10 investigate. I PHT p. 253-54. Investigating officers directed Jonathan to leave the hospital and  
11 return home for further investigation of the incident. I PHT 253-54; II PHT p. 101. Initially,  
12 LVMPD Abuse/Neglect detectives responded to the hospital and Jonathan's home. II PHT p. 101-  
13 03. Once it appeared as though Khayden would succumb to his injuries, LVMPD officers  
14 summoned homicide detectives. II PHT p. 101-03. Homicide Detectives Dolphis Boucher and  
15 Tate Sanborn responded. II PHT p. 101-03.

16 Investigating officials obtained a warrant to search Jonathan's residence. II PHT p. 102. By  
17 the time Dets. Boucher and Sanborn arrived at Jonathan's home, Jonathan had returned to the  
18 residence, and numerous other LMVPD officials, including CSAs and LVMPD Child  
19 Abuse/Neglect detectives, were (or had been) present in the home investigating. II PHT p. 103.

20 Dets. Boucher and Sanborn interrogated Jonathan in his kitchen. II PHT p. 77-100. They did  
21 not *Mirandize* him. Jonathan told Det. Boucher that Christina's grandparents dropped Khayden  
22 and Khaysen off at home at approximately 4:30 in the afternoon. II PHT p. 77. Jonathan indicated  
23 that the children appeared to be fine. II PHT p. 77. Jonathan told Det. Boucher that everyone took  
24 a nap for a short while, after which the kids played. II PHT p. 78. At some point, the kids were  
25 playing on the living room sofa while Jonathan sat in one of the recliner chairs watching TV. II  
26 PHT p. 78. Jonathan indicated that, at some point, he looked over at his kids and saw Khayden  
27 falling over the back of the couch onto the tile floor. II PHT p. 127-28. Jonathan indicated to  
28 detectives that he did not see the beginning of the fall; only the "split second" when Khayden was

1 going over the couch. II PHT p. 78-82; 127-28.

2 Jonathan explained that he immediately went to tend to Khayden, and found him lying on his  
3 back, parallel to the couch. II PHT p. 85. Jonathan described Khayden as being "frozen up,"  
4 making some type of noise. II PHT p. 87. Jonathan indicated he picked Khayden up, thinking he  
5 had been knocked out from the fall. II PHT p. 87. Not seeing any blood, Jonathan tried to revive  
6 Khayden by splashing water on his face. II PHT p. 88. Khayden did not respond to the cold water  
7 and began to vomit, at which point Jonathan called Christina, a medical assistant in a doctor's  
8 office, urging her to hurry home. II PHT p. 88.

9 Unhappy with Jonathan's accounting of events, officers told Jonathan that, given Khayden's  
10 injuries, "something substantial happened... that [he was] not explaining." VS p. 20 (Exhibit B).  
11 Officers pressed Jonathan, stating: "Those injuries can't happen the way you're describing.  
12 Something else had to happen..." VS p. 21. Detectives exaggerated the extent of Khayden's  
13 injuries, claiming Khayden suffered "another injury to his ribs here and to his chest," (VS p. 19-  
14 24) and presented at the hospital as "though somebody beat him." VS p. 23-24. Similarly,  
15 detectives exaggerated the force minimally required to cause such injuries, stating, *inter alia*, that  
16 "There's substantial injuries to your child that go way beyond one fall off of a couch -- even if he  
17 landed right on his head you can't substan—you -- you can't get that kind of brain injury from that  
18 -- that low of a fall. Even onto a tile concrete floor like this -- its -- the -- the injuries don't make  
19 sense." VS p. 27.

20 Detectives then offered Jonathan a face-saving explanation for hurting Khayden, suggesting  
21 that "if you lost your temper and it's not what you meant to do that's different than a guy who just  
22 beat his kid and doesn't care." VS p. 26. Detectives threatened that: "If you can't offer me more  
23 than that, we're stuck with you're the kinda guy who did beat your kid to death. And I know  
24 you're saying you're not and I'd like to think you're not." VS p. 24. With this, detectives implied  
25 that, absent additional information and/or an admission of misconduct, the case would move  
26 forward on the premise that Jonathan intentionally beat his child to death.

27 Jonathan then tried to provide details of Khayden's fall which may have been previously  
28 lacking. Unlike his prior description of the fall in which Jonathan indicated he only saw Khayden

1 go over the back of the couch, Jonathan indicated that Khayden was facing in a southward  
2 direction when he fell, and had been standing right next to his brother on the couch just before the  
3 fall. Additionally, investigating officers retrieved a small, stuffed doll and asked Jonathan to  
4 demonstrate how Khayden went over the couch. II PHT p. 115-20. Jonathan purportedly  
5 described that Khayden slid over the back of the couch, head first. II PHT p. 83. Not surprisingly,  
6 detectives arrested Jonathan shortly (1-2 hours) after his interrogation concluded. II PHT p. 99-  
7 100.

8 Dr. Lisa Gavin performed an autopsy on Khayden. III PHT p. 4-10. Dr. Gavin found that  
9 Khayden suffered a stellate skull fracture to the back of his head, slightly to the right of the  
10 midline. III PHT p. 14. Dr. Gavin also found subgaleal and subdural hemorrhaging in this area.  
11 III PHT p. 12-16; 52. Dr. Gavin noted a significant amount of bleeding on the left side of  
12 Khayden's brain, along with some hemorrhaging around the eyes, as well. III PHT p. 19-20; 24;  
13 52. Consistent with imaging performed at the hospital, Dr. Gavin observed a midline shift of the  
14 brain of a few millimeters. III PHT p. 51-52. Neuropathologic testing further revealed diffuse  
15 cerebral edema, as well as early-onset hypoxic ischemia and diffuse axonal injury. III PHT p. 40-  
16 42; 52.

17 Dr. Gavin opined that Khayden died as the result of blunt force trauma to the head. III PHT p.  
18 53. However, Dr. Gavin did not classify Khayden's death as a homicide. III PHT p. 55-56.  
19 Rather, she could not determine the manner of Khayden's death. III PHT p. 55-56. Dr. Gavin  
20 explained that she could not rule out the possibility that Khayden's death was the result of an  
21 accident. III PHT p. 55-56.

## 22 II. POINTS AND AUTHORITIES

### 23 A. Jonathan's statements to investigating officials must be suppressed as they were 24 obtained in violation of his Miranda rights.

25 The Fifth Amendment privilege against self-incrimination provides that "[n]o person...  
26 shall be compelled in any criminal case to be a witness against himself. U.S.C.A. V, XIV<sup>2</sup>; Nev.

27  
28 <sup>2</sup> The privilege against self-incrimination applies to the states through the Fourteenth  
Amendment. See Mallory v. Hogan, 378 U.S. 1, 8 (1964).

1 Const. Art. 1, Sec. 8; Holyfield v. Townsell, 101 Nev. 793 (1985). "[T]he accused must be  
2 adequately and effectively apprized of his rights and the exercise of those rights must be fully  
3 honored." Miranda v. Arizona, 384 U.S. 436, 467 (1966). The Miranda Court held that:

4 ...an individual held for interrogation must be clearly informed that he has the right  
5 to consult with a lawyer and *to have the lawyer with him during interrogation* under  
the system for protecting the privilege we delineate today.

6 Id. 384 U.S. at 472 (emphasis added). Thus, the Fifth Amendment privilege against self  
7 incrimination provides that, absent a valid Miranda warning and waiver, a suspect's statements  
8 made during a custodial interrogation are inadmissible at trial. Taylor v. State, 114 Nev. 1071  
9 (1998) (citing Miranda, supra, 384 U.S. 436, 469-473 (1966)).

10 Jonathan was the subject of a custodial interrogation requiring a Miranda warning and  
11 waiver. 'Custodial interrogation' is defined as "'questioning'<sup>3</sup> initiated by law enforcement officers  
12 after a person has been taken into custody or otherwise deprived of his freedom of action in any  
13 significant way." Mejia v. State, 134 P.3d 722 (Nev. 2006) (internal citation omitted).  
14 "Custody" for Miranda purposes means a "formal arrest or restraint on freedom of movement" of  
15 the degree associated with a formal arrest." Casteel v. State, 131 P.2d 1 (Nev. 2006) (citing  
16 Alward v. State, 112 Nev. 141, 154 (1996) (further citations omitted)). If there is no formal  
17 arrest, *the pertinent inquiry is whether a reasonable person in the suspect's position would feel "at*  
18 *liberty to terminate the interrogation and leave."* Id. (citing Thompson v. Keohane, 516 U.S. 99,  
19 112 (1995) (emphasis added). The Nevada Supreme Court considers the following factors, no one  
20 of which is dispositive, in determining whether objective indicia of custody exist:

- 21 (1) Whether the suspect was told that the questioning was voluntary or that he was  
22 free to leave; (2) whether the suspect was not formally under arrest; (3) whether  
23 the suspect could move about freely during questioning; (4) whether the suspect  
24 voluntarily responded to questions; (5) whether the atmosphere of questioning  
was police-dominated; (6) whether the police used strong-arm tactics or  
deception during questioning; and (7) whether the police arrested the suspect at  
the termination of questioning.

25 Taylor v. State, 114 Nev. 1071, 1082 n.1 (1998)

26  
27  
28 <sup>3</sup> 'Interrogation' is defined as "express questioning or its functional equivalent." Rhode Island v. Innis, 446 U.S. 291 (1980).

1 Under the factors outlined above, Jonathan was *de facto* in custody at the time of his  
2 interrogation. He was directed by law enforcement to leave the hospital where his eldest child lay  
3 in critical condition and return home. By the time his interrogation began, multiple LVMPD  
4 officer and crime scene analysts had descended upon his residence to investigate. Investigating  
5 officials obtained a search warrant for his house, presumably limiting Jonathan's ability to move  
6 about freely in his own residence. At least one, if not more, officers were situated outside of  
7 Jonathan's home while he was subjected to questioning by detectives. II PHT p. 118. It does not  
8 appear that officers told Jonathan that submission to questioning was voluntary and that he could  
9 leave the residence. Officers pressed Jonathan for a different and/or more detailed accounting of  
10 Khayden's injuries by exaggerating the extent of the injuries and the force required to cause them.  
11 Officers further pressed Jonathan by suggesting that, absent a different and/or more detailed  
12 explanation for Khayden's injuries, authorities would be left with no choice but to perceive  
13 Jonathan as the kind of guy who "beat his kid to death." Shortly after his interrogation, officers  
14 arrested Jonathan and booked him into custody. No reasonable person in similar circumstances  
15 would have felt free to terminate the interrogation and leave. As such, Jonathan was "in custody"  
16 at the time of his interrogation.

17 Additionally, Jonathan was the subject of an "interrogation." "Interrogation" is defined as  
18 "express questioning or its functional equivalent." Rhode Island v. Innis, 446 U.S. 291 (1980).  
19 Detectives expressly questioned Jonathan about his involvement in Khayden's death. Thus,  
20 detectives subjected Jonathan to a custodial interrogation, the initiation of which required a valid  
21 *Miranda* warning and waiver. Given the detectives' failure to *Mirandize* Jonathan before  
22 interrogating him, Jonathan's subsequent statements must be suppressed. U.S.C.A. V; XIV; Nev.  
23 Const. Art. 1, Sect. 8.

24 **B. Jonathan's statements were not freely and voluntarily given.**

25 A criminal defendant is deprived of due process of law if his conviction is based, in whole  
26 or in part, upon an involuntary confession, even if there is ample evidence aside from the  
27 confession to support the conviction. Jackson v. Denno, 378 U.S. 368, 376 (1964); U.S.C.A. V,  
28 XIV; Nev. Const. Art. 1, Sec. 8. Thus, a confession is admissible only if it is freely and

1 voluntarily made.<sup>4</sup> Steese v. State, 114 Nev. 479, 488 (1998) (citing Passama v. State, 103 Nev.  
2 212, 213 (1987)). In order to be voluntary, a confession must be the product of a "rational intellect  
3 and a free will." Id. (quoting Blackburn v. Alabama, 378 U.S. 368, 376 (1960)).

4 Whether a confession is the product of "rational intellect and a free will" hinges not only on  
5 the means by which the confession was extracted, but the subjective effect that such extraction  
6 methods have on a particular defendant. As articulated by the United States Supreme Court:

7 [T]he admissibility of a confession turns as much on whether the techniques for  
8 extracting the statements, as applied to this suspect, are compatible with a system  
9 that presumes innocence and assures that a conviction will not be secured by  
inquisitorial means as on whether the defendant's will was in fact overborne.

10 Miller v. Fenton, 474 U.S. 104 (1985) (emphasis in original). See also Passama, 735 P.2d at 323  
11 (holding that "... certain interrogation techniques, either in isolation or as applied to the unique  
12 characteristics of a particular suspect, are so offensive... that they must be condemned under the  
13 Due Process Clause of the Fourteenth Amendment.") (citations omitted).

14 This Court requires a 'totality of the circumstances' analysis to determine the voluntariness  
15 of a confession. Steese, supra, (citing Passama, 103 Nev. At 214). Among the factors to be  
16 considered in determining whether a confession was voluntarily given are:

17 the youth of the accused; his lack of education or his low intelligence; the lack of  
18 any advice of constitutional rights; the length of detention; the repeated and  
19 prolonged nature of questioning; and the use of physical punishment such as the  
deprivation of food or sleep.

20 Id. (citing Schneekloth v. Bustamonte, 412 U.S. 218, 226-27 (1973)).

21 Confessions obtained by physical intimidation or psychological pressure are inadmissible.  
22 Steese, supra, 114 Nev. at 488 (citing Townsend v. Sain, 372 U.S. 293, 307 (1963), *overruled on*  
23 *other grounds by* Keeny v. Tamayo-Reyes, 112 S.Ct. 1715, 1717 (1992)). Promises made by the  
24 police to a suspect are crucial to a determination of voluntariness. Id. (citing Passama, at 215). If  
25

26  
27 <sup>4</sup> The prosecution must prove the voluntariness of a confession by a preponderance of the  
28 evidence. Stringer v. State, 836 P.2d 609, 612 (Nev. 1992) (citing Sanchez v. State, 734 P.2d  
726, 728 (Nev. 1987)).

1 promises made, implicit or explicit, trick a confessant into confessing, the confession is  
2 involuntary. Franklin v. State, 96 Nev. 417, 421 (1980).<sup>5</sup>

3 Under the authority outlined above, Jonathan's statements were not freely and voluntarily  
4 given. He was directed by law enforcement to leave the hospital where his son lay dying and  
5 return to his home -- a home which had become the epicenter of a criminal investigation. By the  
6 time Jonathan returned home, multiple law enforcement officers and crime scene analysts had  
7 descended upon his home to investigate Khayden's impending death. Detectives interrogated  
8 Jonathan in this police-dominated atmosphere, questioning him at length about the events that  
9 precipitated Khayden's injuries -- *in the absence of a Miranda warning*. Detectives exaggerated  
10 certain of Khayden's injuries as well as the minimal force required to cause those injuries in order  
11 to induce a different accounting of events. Detectives made clear that, absent additional and/or  
12 different explanation(s) for Khayden's injuries, Jonathan would be treated as the type of predator  
13 who 'beats his kid and doesn't care' versus a well-intentioned parent who momentarily snaps in a  
14 fit of anger. Sadly, when detectives demanded an 'alternative explanation' for what happened to  
15 Khayden, Jonathan, revealing his intellectual deficits, responded by asking "What's an  
16 alternative?" VS p. 22. Thus, under the factors outlined Steese, Jonathan's statement(s) to  
17 investigating officials were not the product of a rational intellect and free will but, rather, the  
18 police dominated-atmosphere in which he was interrogated, as well as the coercive tactics  
19 employed upon an individual incapable of understanding the word 'alternative.' Thus, Jonathan's  
20 statement(s) to investigating detectives were not freely and voluntarily given. as such, they must  
21 be suppressed. U.S.C.A. V; XIV; Nev. Const. Art. 1, Sect. 8.

23 ///

24 <sup>5</sup> See also Passama, *supra*, at 215; U.S. v. Tingle, 658 F. 2d 1332, 1336-37 (9th Cir. 1981)  
25 (confession involuntary due in part to officer's promise to bring cooperation to prosecutor's  
26 attention); U.S. v. Rogers, 906 F. 2d 189, 191 (5th Cir. 1990) (confession involuntary partly due to  
27 assurance that defendant would not be arrested if he cooperated); U.S. ex rel. Church v. de  
28 Robertis, 771 F.2d 1015, 1020 (7th Cir. 1985) (dictum) (confession may be involuntary if  
defendant's will overborne by state's attorney's misleading promise concerning less severe  
charge).

**CONCLUSION**

Based on the foregoing, the Defendant, JONATHAN QUISANO, respectfully requests that this Honorable Court suppress his statements, both recorded and unrecorded, to investigating officials in the instant matter.

DATED this 16<sup>th</sup> day of May, 2014.

The following is the transcription of a tape-recorded interview conducted by DETECTIVE D. BOUCHER, P#4636, LVMPD HOMICIDE SECTION, on 06-06-13 at 2118 hours. Also present is Detective T. Sanborn, P#5450.

Q: This is Detective D. Boucher - P# 4636 - I'm gonna be conducting an interview under event 130606-3235. Ah, also present is Detective Sanborn, - P# ...

Q1 (TATE SANBORN): 5450.

Q: Ah, we're gonna be speaking with Jonathan Quisano?

A: Yes.

Q: I'm gonna spell it - it's Q-U-I-S-A-N-O. His birthday is 10-16-86 and he has a social of 575-41-4713. Ah, he lives at 4720 Trimwater Court and we're doing the

interview in his dining room. Um, the interview is taking place on, ah, Thursday, June 6th.

A: That's the (unintelligible).

Q: At, um, 2118 hours. And the reason we're here is, um, - while you were home tonight I guess it was you and your - your boys.

A: My two boys - yeah.

Q: One of your boys got hurt pretty substantially.

A: Oh yeah.

Q: He's at the hospital. Um, so we, ah - ah, the police have been here. Um, and initially you called - well we'll have you explain all that..

A: I called, yeah.

Q: But we'll - we'll go through that in a minute, but, um, you - you apparently called your wife and called the police. The ambulance showed up, took the baby to the hospital. You went there and now you're back.

A: Yes.

Q: But we're gonna go through all that, okay? Um, how many kids do you have?

A: Three.

Q: Okay. Tell me how old are they?

A: My oldest is going to be 6 years old but he passed away in 08.

Q: (Unintelligible).

A: He was only 3 months.

EVENT #: 130606-3235  
STATEMENT OF: QUISANO, JONATHAN

Q: Un-'kay, and where was that?

A: In Hawaii.

Q: Okay.

A: Yeah.

Q: And what did he pass away from?

A: Um, they say it was SIDS 'cause we woke up and he was in his crib not breathing - just (unintelligible).

Q: Okay, and how old was he when that happened?

A: He's only like 3 - 3 months.

Q: Okay. And when was that that he passed away?

A: In 2008.

Q: 2008?

A: Yeah, like - was - 'cause he was born of '07 - December 15th and three months went by - end of February I guess was - he had passed. It was the next year.

Q: Okay, did they do an investigation back there regarding that and stuff?

A: Wow that was a long time. Like.

Q: I mean kind of like this where the police showed up and talked to you and everything?

A: Yeah - yeah - yeah - yeah - yeah - yeah.

Q: Okay.

A: They came.

EVENT #: 130606-3235  
STATEMENT OF: QUISANO, JONATHAN

Q: Did they take your other kids away at the time or?

A: Um, no I never had them.

Q: Okay, they - so...

A: Yeah.

Q: ...at the time he was your only child?

A: Yeah.

Q: And is it with the same mom...

A: Same mom.

Q: ...that you have your children with now? And just so I make sure I get her name right it's Christina Rodriguez?

A: Rodriguez.

Q: (Unintelligible).

A: Rodriguez. (unintelligible). Not Re- no not Re- Rodriguez but it's Rodriguez - pronounced Rodriguez.

Q: How do spell it?

A: R-O-D-R-I-G-U-E-S.

Q: Oh, okay.

A: Rodriguez.

Q: But she just pronounces it differently?

A: Yeah.

Q: Okay. And is she the mom of all your babies?

17 Plaintiff,

Case No: C-13-294266-1  
Dept No: XXI

18 -vs-

19 JONATHAN QUISANO,  
20 #5991702  
21 Defendant.

AMENDED  
INFORMATION

22 STATE OF NEVADA }  
23 COUNTY OF CLARK } ss.

24 STEVEN B. WOLFSON, District Attorney within and for the County of Clark, State  
25 of Nevada, in the name and by the authority of the State of Nevada, informs the Court:

26 That JONATHAN QUISANO, the Defendant(s) above named, having committed the  
27 crime of MURDER (Category A Felony - NRS 200.010, 200.030, 200.508), on or about the  
28 6th day of June, 2013, within the County of Clark, State of Nevada, contrary to the form,  
force and effect of statutes in such cases made and provided, and against the peace and  
dignity of the State of Nevada, did then and there, without authority of law and with malice  
aforethought, willfully and feloniously kill KHAYDEN QUISANO, a minor child being  
approximately 3 years of age, by subjecting the said KHAYDEN QUISANO to acts of child

//

//

1 abuse, to-wit: by striking the head and/or body of the said KHAYDEN QUISANO and/or by  
2 shaking him and/or by throwing him against a hard surface and/or by other manner or means  
3 unknown, all of which resulted in the death of said KHAYDEN QUISANO.

**Please Note:** The State formally invites the defense to review the State's case file in the instant matter. This invitation is ongoing and is intended to make all discovery in the State's possession available and accessible to the defense. In addition, the State, at the request of the defense, will facilitate a review of the case file information housed at the Las Vegas Metropolitan Police Department (LVMPD) under the following event number: #130606-3235. In addition, the State, at the request of defense counsel, will also facilitate access to all evidence at the evidence vault which has been impounded under event number: #130606-3235.

It is the desire of the State to provide the defense with full access to all discovery in the possession of the State. That access is available now.

The State acknowledges that its discovery obligations are continuing and the State will make all subsequent discovery received, if any, available to the defense in compliance with the requirements of NRS 174.235, as well as Brady v. Maryland, 373 U.S. 83 (1963) and Giglio v. United States, 405 U.S. 150 (1972).

The State also takes this opportunity to formally request reciprocal discovery from the defense and for the defense to provide timely access to any discovery that it intends to use at trial.

School: Kaiser Hospital / Los Angeles, CA  
Degree\Certificate: Internship

Date Enrolled: 7/1/1996  
 Date Graduated: 6/30/1997  
 Scope of Practice: Internal Medicine

School: Kaiser Hospital / Los Angeles, CA  
 Degree\Certificate: Residency  
 Date Enrolled: 7/1/1997  
 Date Graduated: 6/30/1999  
 Scope of Practice: Internal Medicine

School: Internal Medicine  
 Degree\Certificate: American Board  
 Date Enrolled:  
 Date Graduated: 10/1/1999  
 Scope of Practice: Internal Medicine

School: Radiology  
 Degree\Certificate: American Board  
 Date Enrolled:  
 Date Graduated: 6/1/2003  
 Scope of Practice: Radiology, Diagnostic

School: Emory University Affiliated Hospitals /Atlanta, GA  
 Degree\Certificate: Residency  
 Date Enrolled: 7/1/2001  
 Date Graduated: 6/30/2003  
 Scope of Practice: Radiology, Diagnostic

School: Emory University Affiliated Hospitals /Atlanta, GA  
 Degree\Certificate: Fellowship  
 Date Enrolled: 1/5/2004  
 Date Graduated: 6/30/2004  
 Scope of Practice: Radiology

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
 ON LICENSE AND MALPRACTICE INFORMATION  
 NONE

Board Actions  
 NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed

malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
ON LICENSE AND MALPRACTICE INFORMATION  
NONE

Board Actions  
NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

Reported By: St. Paul Medical Liability

Date of Act/Omission: 8/28/2000

Details: Insured radiologist failed to diagnose Ewing's Sarcoma on x-ray,  
resulting in a seven-month delay and amputation of the leg.

Settlement amount: \$99,999.00

Total Pages: 1

Board Actions

NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
ON LICENSE AND MALPRACTICE INFORMATION  
NONE

Board Actions  
NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
ON LICENSE AND MALPRACTICE INFORMATION  
NONE

Board Actions  
NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

### Blood Stain Reports

The following are events where a separate Bloodstain Pattern Report was completed by me and reviewed by a group of peers (either certified as Bloodstain Pattern Analysts or with a working knowledge of Bloodstain Pattern Analysis).

|                            |                          |
|----------------------------|--------------------------|
| - Missing Person/ Homicide | LVMPD Event #060225-1870 |
| - Homicide                 | LVMPD Event #080116-1315 |
| - Homicide                 | LVMPD Event #080819-3743 |
| - Homicide                 | LVMPD Event #100128-3500 |

I have also written dozens reports detailing bloodstain pattern types and direction of travel for blood drops, and complete descriptions of blood at the scene including homicides, shootings, and other events where bloodshed occurred including the following....

| <u>Event Number</u> | <u>Type Of Crime</u>                       |
|---------------------|--------------------------------------------|
| 050624-1155         | Homicide                                   |
| 050610-1609         | Homicide                                   |
| 050617-1702         | Attempt Homicide                           |
| 060624-1396         | Attempt Homicide                           |
| 071123-2335         | Homicide/ Attempt Robbery                  |
| 080319-2230         | Homicide                                   |
| 080405-2788         | Attempt Homicide                           |
| 080426-3250         | Attempt Homicide                           |
| 080508-3131         | Homicide                                   |
| 080607-2884         | Homicide                                   |
| 080807-2168         | Homicide                                   |
| 081124-1380         | Suspicious Vehicle (blood in U-Haul truck) |
| 090109-3159         | Homicide                                   |
| 090305-2821         | Homicide/ Suicide                          |
| 090415-1724         | Homicide                                   |
| 090501-2896         | Homicide                                   |
| 100106-2582         | Homicide                                   |
| 100128-3500         | Homicide                                   |

Each of these reports were reviewed and signed by an LVMPD Crime Scene Analyst Supervisor, commonly certified in Bloodstain Pattern Analysis by the International Association of Identification.

### Blood Stain Testimony

- On 01-25-2010 I testified in Clark County District Court Department #11 (court room 16D) reference, among other things, blood stains present at a homicide scene (event number 090109-3159) including high velocity blood spatter located near the victim and the relationship this blood stain had to the victim's death.

- On 12-08-08 I testified in Las Vegas Justice Court Department #07 reference, among other things, blood stains on the defendant's clothing and person, blood stains on the couch where the female victim was located, as well as surrounding areas, and blood stains on the victim's clothing. Bullet trajectories were also referenced during my testimony.

- On 03-10-2011 I testified in Clark County District Court #23 reference homicide event 100128-3500 including a full Blood Stain Pattern Report with blood at the scene, blood trail through the scene, and bloodstains on clothing of victim, and two suspects.

\* Additionally, on February 24<sup>th</sup> 2010, I was on the Bloodstain Pattern Review Board reviewing the submitted Bloodstain Pattern Report by a fellow analyst. I have also had two Bloodstain Pattern Reports reviewed under the same circumstances (080819-3743 and 060225-1870) and one Bloodstain Pattern Report (080116-1315) technically reviewed by my supervisor M. Perkins #4242 who is certified in Bloodstain Pattern Analysis by the International Association of Identification (IAI).

Mr. Randall M. McPhail  
491 Sunrise Villa Drive  
Las Vegas, NV 89110

Dear Mr. McPhail:

The Certification Board has received and graded your practical examination and found that you passed. We wish you sincere congratulations on your successful completion of both parts of the Crime Scene Reconstruction test. This accomplishment of proficiency is something you can be very proud of.

A copy of this letter has been sent to the IAI office who will issue you a certificate and a wallet-sized card indicating the time span of your certification. Should you not receive this within the next 30 days please do not hesitate to contact the office or myself.

Again, congratulations on passing the examinations.

If you have any questions or wish to discuss matters of mutual concern, please contact me, or any member of the Crime Scene Certification Board.

Sincerely,

Curtis M. Shane  
Secretary, Crime Scene Certification Board  
Certification is a Sign of Professionalism

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
ON LICENSE AND MALPRACTICE INFORMATION  
NONE

Board Actions  
NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

## Licensee Details

### Person Information

Name: Ashley Lorin  
PISTORIO  
2040 W.  
Address: Charleston  
Blvd. #302  
Las Vegas  
NV 89102  
Phone:

### License Information

License Type: Resident  
License Number: LL2204 Status: Active  
Issue Date: 7/1/2011 Expiration Date: 6/30/2014

## Scope of Practice

Scope of Practice: Surgery, General

## Education & Training

School: Penn State College of Medicine / Hershey , PA  
Medical  
Degree\Certificate: Doctor  
Degree  
Date Enrolled:  
Date Graduated: 5/16/2010  
Scope of Practice:

School: Penn State Hershey Medical Center / Hershey , PA  
Degree\Certificate: Internship  
Date Enrolled: 7/1/2010  
Date Graduated: 6/30/2011  
Scope of Practice: Surgery, General

School: University of Nevada SOM / Las Vegas , NV  
Degree\Certificate: Residency  
Date Enrolled: 7/1/2011  
Date Graduated: 6/30/2014  
Scope of Practice: Surgery, General

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
ON LICENSE AND MALPRACTICE INFORMATION

NONE

Board Actions

NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

702-828-5598 Office

**TRAINING:**

I have received the following training:

I was assigned to the Physical Abuse Detail from 11-1996 to 6-1997. The Physical Abuse Detail investigates physically abused children and the elderly.

I then was reassigned to the Sexual Abuse Detail in June 1997 until August of 2000.

While assigned to the Sexual Abuse Detail I created the Internet Crimes Against Children Detail. The main mission of the ICAC detail was the apprehension of sex offenders when their target was children and their tool the internet and/or a computer. This included all child pornography cases. In January 2003 the LVMPD, and myself, joined forces with the United States Secret Service's Electronic Crimes Task Force and started the Cyber Crimes Detail.

The primary goal of the USSS ECTF and the LVMPD Cyber Crimes Detail consists of any crime where a computer, PDA, or cellphone was used to facilitate that crime including crimes such as Homeland Defense issues, Homicides, Internet Stalking, Robberies, Network Intrusions, Kidnappings, email and online fraud, etc.

**SEXUAL ABUSE:**

CURRENT EMPLOYMENT STATUS / CONDITIONS/RESTRICTIONS  
ON LICENSE AND MALPRACTICE INFORMATION  
NONE

Board Actions  
NONE

Please note that the settlement of a medical malpractice action may occur for a variety of reasons that do not necessarily reflect negatively on the professional competence or conduct of the provider. Therefore, there may be no disciplinary action appearing for a licensee even though there is a closed malpractice claim on file. A payment in the settlement of medical malpractice does not create a presumption that medical malpractice occurred. Sometimes insurance companies settle a case without the knowledge and/or agreement of the physician. This database represents information from insurers to date. Please note: All insurers may not have submitted claim information to the Board.

DEFENDANT'S NOTICE OF EXPERT WITNESSES, PURSUANT TO NRS 174.234(2)  
TO: CLARK COUNTY DISTRICT ATTORNEY:

You, and each of you, will please take notice that the Defendant, JONATHAN QUISANO, intends to call the following expert witness in his case in chief:

DR. JOHN FARLEY, Ph.D., is a physicist who will testify about the physics of applying G force in a domestic environment; he will also provide opinions regarding the results of G force testing conducted in the domestic environment at issue in the instant matter.

DR. ROBERT ROTHFEDER, M.D., 8254 South 300 East, Sandy, UT 84070 physician/pathologist. He will testify as to his opinion(s) and finding(s) pertaining to the observation(s), examination(s), diagnosis, and treatment of KHAYDEN QUISANO, as well as the cause/manner of Khayden's death. In addition, Dr. Rothfeder is expected to provide expert testimony concerning injury patterns, mechanisms of injury and causes of injury.

email: farley@mailaps.org  
FAX: (702) 895-0804

**HOME ADDRESS:** 1858 Ruby Lane  
Henderson, NV 89014  
(702) 451-4395

**BORN:** February 7, 1948, Brooklyn, New York.

**DEGREES:** B.A., Harvard College, 1970  
M.A., Columbia University, 1974  
M. Ph., Columbia University, 1974  
Ph.D., Columbia University, 1977

**ACADEMIC POSITIONS:** Professor of Physics, UNLV, 1996-present  
Associate Professor of Physics, UNLV, 1987-1996  
UNLV Physics Department Chair, 1992-3  
Assistant Professor of Physics, University of Oregon, 1981-1987  
Research Assistant Professor of Physics and Optical Sciences,  
University of Arizona, 1980-1981  
Postdoctoral Fellow in Physics and Optical Sciences,  
University of Arizona, 1979-1980  
NSF National Needs Postdoctoral Fellow, University of  
Arizona, 1978-1979  
Research Associate in Physics, University of Arizona, 1976-1978  
Graduate Research Assistant, Columbia University, 1973-1976

**SOCIETY AFFILIATIONS:** American Physical Society  
American Chemical Society

**Ph.D. THESIS:** "Fine Structure and Hyperfine Structure Measurements in Excited States of Alkali Atoms by Dye Laser Spectroscopy," 1977. Columbia University, New York, New York. Doctoral thesis advisor: Prof. Will Happer (now at Princeton).

**ACADEMIC HONORS:** UNLV Foundation Teaching Award, 2008  
Nevada Regents Teaching Award, 2008.  
College of Sciences Distinguished Teaching Award, 2007  
NSF National Needs Postdoctoral Fellow, 1978-79.  
Award for Excellence in teaching (1973).  
Eugene Higgins Fellow 1971-72 (Columbia).

**PROFESSIONAL HONORS:** Listed in first edition of *Who's Who in Frontier Science and Technology*  
Listed in first edition of *Who's Who in Optical Science and Engineering*  
Served on Program Committee, Division of Atomic, Molecular and Optical Physics, American Physical Society, 1999-2000

**Sessions chaired at Professional Meetings**

Organized and chaired session, "Spectroscopy of Negative Ions," at APS Centennial meeting, Atlanta, March 21-26, 1999.

Organized and chaired session, "Application of Imaging Technology to Atomic and Molecular Physics", Division of Atomic, Molecular and Optical Physics, Storrs, Connecticut, June 2000.

**Scientific Leadership positions:**

Founding Director (2004-present), UNLV Center for Mathematics and Science Education

Primary author of Ph. D. program in physics at UNLV. Program began in 1990 and graduated first student in 1995.

Served as Director of Nevada EPSCoR program, 1993-1998. Supervised statewide scientific effort. The five-year cooperative agreement brought in \$1,485,000 per year in Federal funds to Nevada. It involved a total of 108 people, including 60 faculty, 14 postdocs, 21 graduate students, 6 technical staff, and 7 others. In chemical physics, it supported eight young faculty members, including four in the UNLV physics department.

Since 1992, have directed Research Experience for Undergraduates (REU) program, an NSF-funded program that brings undergraduate students to UNLV from all over the country for a summer research experience.

## **PUBLICATIONS AND PRESENTATIONS**

Lifetime totals: 45 peer-reviewed scientific publications, 92 presentations at scientific conferences. List available upon request.

## **GRADUATE STUDENTS MENTORED**

Supervised the graduate work of 5 masters theses and 5 doctoral dissertations.

## **TALKS**

Have given talks at many universities, including Harvard, Yale, MIT, and Stanford.

## **EXPERTISE**

For a number of years, John Farley has taught the mechanics class for scientists and engineers. The course is quite rigorous, employing calculus and vector notation. The course includes a rigorous treatment of the following topics, which are highly relevant to personal injury cases:

|              |               |
|--------------|---------------|
| motion       | mass          |
| acceleration | velocity      |
| force        | Newton's laws |
| collisions   | gravity       |

## CURRICULUM VITAE

**ROBERT K. ROTHFEDER, M.D.**

**Professional Address :**

175 West 200 South  
Suite 4009  
Salt Lake City, Utah 84101  
(801) 359-7756

**Education :**

Rutgers University  
New Brunswick, New Jersey  
B.A. 1969

University of Minnesota Medical School  
Minneapolis, Minnesota  
M.D. 1974

Internship and Residency - Internal Medicine  
LDS Hospital  
Salt Lake City, Utah 1974 - 1977

University of Utah College of Law  
Salt Lake City, Utah  
J.D. 1984

**Board Certification :**

American Board of Emergency Medicine

**Board Qualified :**

Internal Medicine

**Private Practice :**

Lakeview Hospital Emergency Department  
Bountiful, Utah  
Emergency Department Director, Emergency Physician  
1977-1994

St. Mark's Hospital Emergency Department  
Salt Lake City, Utah  
Emergency Physician 1994 - 2006

Private practice in association with  
Dennis J. Wyman, M.D.  
175 West 200 South, Suite 4009  
Salt Lake City, Utah  
1991 - present  
Referral practice specializing in the  
evaluation and treatment of patients  
with traumatic injuries.

Of Counsel  
Winder & Haslam  
Attorneys at Law  
Salt Lake City, Utah  
1985 - present

**Expert Witness Experience:**

I have been seriously interested in brain injury issues  
in children and adults, infant injury evaluation, and  
child abuse cases for the past 20 years and have consulted  
on several hundred cases.

CASE NO: C-13-294266-1

DEPT NO: XXI

SUPPLEMENTAL NOTICE OF EXPERT WITNESSES  
[NRS 174.234(2)]

19 TO: JONATHAN QUISANO, Defendant; and

20 TO: NANCY L. LEMCKE, DEPUTY PUBLIC DEFENDER, Counsel of Record:

21 YOU, AND EACH OF YOU, WILL PLEASE TAKE NOTICE that the STATE OF  
22 NEVADA intends to call the following expert witnesses in its case in chief:

23 **Joel Albert P# 13204** – Crime Scene Analyst – Is expected to provide testimony as an expert  
24 in the field of crime scene analysis, as well as his direct involvement under LVMPD  
25 Event # 130606-3235.

26 **Shahrokh Assemi, M.D.** – Radiologist - Is expected to testify as a medical expert as to his/her  
27 opinions and findings pertaining to the examination, treatment, observations,  
28 diagnosis, mechanism of injury to victim KHAYDEN QUISANO (DOB 09/18/2009).

**Deborah Brotherson P# 4931** – Crime Scene Analyst - Is expected to provide testimony as  
an expert in the field of crime scene analysis, as well as her direct involvement under

1 LVMPD Event # 130606-3235.

2 **Patrick Burkhalter** – First Responder – AMR - Is expected to provide testimony as an expert  
3 in the field of emergency care and treatment of trauma victims, victim assessment, as well as  
4 his direct involvement under LVMPD Event #130606-3235, involving victim KHAYDEN  
5 QUISANO (DOB 09/18/2009), as well as his interactions with Defendant Jonathan Quisano  
6 and/or statements made by Defendant Quisano.

7 **Michael Casey, M.D.** – Treating Physician – Is expected to testify as a medical expert as to  
8 his opinions and findings pertaining to the examination, treatment, observations, diagnosis,  
9 mechanism of injury to victim KHAYDEN QUISANO (DOB 09/18/2009).

10 **Sandra Cetl, M.D.** – Physician -- Is expected to testify as a medical expert as to her opinions  
11 and findings pertaining to the examination, treatment, observations, diagnosis, mechanism of  
12 injury to victim KHAYDEN QUISANO (DOB 09/18/2009) from 2010 as well as 2013. In  
13 addition, Dr. Cetl will provide expert testimony as an abuse and neglect specialist and will  
14 render opinions about abusive injuries, mechanisms and causes of said injuries, as well as his  
15 opinions related thereto pertaining to the injuries sustained by KHAYDEN QUISANO (DOB  
16 09/18/2009)

17 **David Chao, M.D.** – Treating Physician - Is expected to testify as a medical expert as to his  
18 opinions and findings pertaining to the examination, treatment, observations, diagnosis,  
19 mechanism of injury to victim KHAYDEN QUISANO (DOB 09/18/2009).

20 **L. Chen, M.D.** – Forensic Neuropathologist – eyes – Pathology # SHS-13-27338 - Is expected  
21 to provide testimony as a medical expert as to his opinions, findings and diagnoses regarding  
22 his Neuro-Ophthalmologic analysis pertaining to victim KHAYDEN QUISANO (DOB:  
23 09/18/2009) under Coroner's Case # 13-05465. In addition, Dr. Chen is expected to provide  
24 expert testimony concerning injury patterns, mechanisms of injury and causes of injury in  
25 general, as well as those specifically pertaining to KHAYDEN QUISANO as derived from Dr.  
26 Chen's analysis.

27 **Kris Chipman** – First Responder - Las Vegas Fire Department - Is expected to provide  
28 testimony as an expert in the field of emergency care and treatment of trauma victims, victim

1 assessment, as well as his direct involvement under LVMPD Event #130606-3235, involving  
2 victim KHAYDEN QUISANO (DOB 09/18/2009), as well as his interactions with Defendant  
3 Jonathan Quisano and/or statements made by Defendant Quisano.

4 **Thomas Costello, M.D.** – Radiologist - Is expected to testify as a medical expert as to his
