About datasets used in this table

## Value Notes

🚔 Estimates are not comparable to other geographic levels due to methodology differences that may exist between different data sources.

Some estimates presented here come from sample data, and thus have sampling errors that may render some apparent differences between geographies statistically indistinguishable. Click the Quick Into 1 left of each row in TABLE view to learn about sampling error.

The vintage year (e.g., V201B) refers to the final year of the series (2010 thru 2018). Different vintage years of estimates are not comparable.

Fact Notes

- (a) (b) (c)
- Includes persons reporting only one race Hispanics may be of any race, so also are included in applicable race categories Economic Census Puerto Rico data are not comparable to U.S. Economic Census data

Value Flags

Either no or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest or interval of an open ended distribution.
