Re: **In the Matter of the Creation of a Commission to Study the Adjudication of Water Law Cases , in the Supreme Court of the State of Nevada, ADKT 0576**

Dear Ms. Brown:

On behalf of the Truckee-Carson Irrigation District (District), we here provide to you comments on the Petition filed by Chief Justice Hardesty, in the matter referenced above, pursuant to the Order issued in the matter on February 8, 2021. For reasons including those expressed herein, we support the creation of a Commission to Study the Adjudication of Water law cases in Nevada.

Our District was organized under state law (NRS Chapter 539) in 1918. Since 1925 the District has operated and maintained the Newlands Federal Reclamation Project, Nevada. Subject to the approval of a new contract with the United States, by the electors of our District, we hope to continue the relationship with the United States for another 25 years. Our duties include the delivery of water to water right holders in accordance with two (2) federal decrees: 1. The Orr Ditch Decree, as modified by the Truckee River Operating Agreement (TROA), for the Truckee River system; and, 2. The Alpine Decree –governing water rights on the Carson River. The performance of our duties is further guided by Federal Regulation specific to us: The Operating Criteria and Procedures for the Newlands Federal Reclamation Project, Nevada (OCAP) 43 C.F.R. Part 418. Routine daily activity at the District, under state rule, includes management of original water right maps and other records, dating back to the origin of the Newlands Project, along with the application of newly created State Engineer Project water right mapping, with which we assist our water right holders with matters such as proofs of beneficial use, water right transfers, and water right mapping –for submission to the Nevada State Engineer for review and approval.

It is difficult to imagine any other state, ours being the very driest, where the consequences of the determinations made under both federal and state rule relating to water have such an impact upon all human affairs.

The complexity of Nevada water law coupled with the force of the interests shaped thereby serves to compel creation of a Commission to study the adjudication of water law cases. Moreover, we support a Commission membership base that includes representation of rural Nevadans, federal interests, and the municipal, agricultural and tribal interests we serve in the City of Fernley, Churchill and Lyon Counties.

Respectfully,

TRUCKEE-CARSON IRRIGATION DISTRICT
