Re: ADKT 581

Dear Ms. Brown:

I second Mr. Willick's recommendations in his letter of June 13, 2021. A commission looking into the efficiency and propriety of post-pandemic continued audio/video hearings in family court as a default makes a lot of sense. As a family law practitioner in Las Vegas since 2005, I think using technology to increase service, decrease cost, minimize waste, reduce pollution, and reduce risk of danger makes a lot of sense.

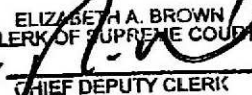

SpaceX, in its Starlink project, is completing its goal of putting over 40,000 satellites into Earth's orbit this year to connect the entire world with high-speed internet. That said, driving to buildings to communicate is far more costly, dangerous, wasteful, and prohibitive for access to justice than accessing a smart phone from anywhere on the planet.

Sincerely,

  
Anthony M. Wright
