Page 189

- THE COURT: It's not admitted for evidence as to 1 whether Mr. Leibel committed suicide. It is admitted as to 2
- whether Mrs. Leibel was consistent. 3
- MS. BROWN: Thank you. 4
- THE COURT: And it's for that reason only that 5
- the jury may consider that evidence. 6
- O. (By Ms. Brown) And towards the end of this
- interview, it was clear -- you made it clear to Ms. Leibel
- that you didn't believe her story; is that correct?
- 10 A. That's correct.
- 11 Q. And you basically accused her of killing her
- husband over and over again?
- MR. GREGORY: Your Honor, I object to the 13
- 1.4
- THE COURT: The question is whether he accused 15
- her. That's not hearsay. Overruled. 16
- THE WITNESS: Yes, I did. 17
- 18 Q. (By Ms. Brown) And at -- you told her everything
- in the investigation pointed to her being the suspect; is 19
- that correct? 20
- 21 A. That's correct.
- MR. GREGORY: Objection, your Honor. Hearsay. 22
- THE COURT: The question is whether this witness 23
- accused her; is that correct? Is that the question? 24
- MS. BROWN: Yes. 25

- 1 correct?
 - 2 A. That's correct.
 - 3 O. And she signed the written consent for you to
 - search her phone; is that correct?
 - 5 A. That's correct.
 - 6 Q. And that phone is not password protected, is it?
 - 7 A. No, it's not.
 - O. And at that point different clothing was brought
 - to her and the clothes she had been wearing during the day
 - were taken? 10
 - 11 A. That's correct.
 - 12 O. She was told to come back the next morning?
 - 13 A. I asked her if she would come back and she
 - 14 agreed.
 - 15 O. And she did show up the next morning?
 - 16 A. Yes, she did.
 - 17 O. And again she was -- talked to you about what had
 - 18 happened?
 - 19 A. Correct.
 - 20 Q. And at the end of that interview she was again
 - 21 allowed to leave?
 - 22 A. Correct.
 - 23 O. And then you obtained a search warrant for her
 - later that day on the 24th? Or I'm sorry. An arrest
 - warrant?

Page 190

1 A. Later that night, yes.

2 Q. And that was done during the day following

3 Mr. Leibel's death?

- 4 A. I'm sorry. What was that?
- 5 O. That was done the day after Mr. Leibel's death?
- 6 A. Yes. On the 24th.
- 7 Q. And what is the process of -- or do you prepare
- documents in support of getting an arrest warrant?
- 9 A. Yes. An affidavit was prepared and issued by the
- judge and it's his determination whether he believes there's 10
- probable cause for the arrest. 11
 - MS. BROWN: I need Number 74.
- MR. GREGORY: Your Honor, I would request a 13
- hearing outside the presence of the jury, please? 14
- THE COURT: Okay. At this time I'm going to 15
- excuse the jury for a few minutes. I'll ask you to go in to 16
- 17 the jury room. We're going to hear some arguments of
- counsel. So while you are out of our presence during this 18
- recess, you are not to talk or converse among yourselves or 19
- with anyone else in any subject connected with this trial or 20
- read, watch or listen to any report of or commentary on the 21
- 22 trial or any person connected with this trial by any medium
- of information, including without limitation, newspapers, 23
- television, radio or internet. You're not to form or express 24
- any opinion on any subject connected with the trial until the

THE COURT: It's overruled. 1 2

MS. BROWN: And she told you repeatedly that you

- needed to do more investigation? 3
- MR. GREGORY: Your Honor, objection. Hearsay. 4
- She's asking for content of the interview, statements by her 5
- own client. It's hearsay. 6
- THE COURT: I think that you're getting beyond 7
- simply was she consistent. Now you're getting to the content
- of what she had to say and I think that that does become 9
- 10 hearsay.
- MS. BROWN: Your Honor, I think her response is 11
- not for the truth of the matter asserted, again, but for the 12
- fact that she directed these responses towards Investigator 13 Hubkey.
- 14
- THE COURT: You're offering it for that reason? 15
- I'll admit it for that reason. 16 O. (By Ms. Brown) Yes. And at the conclusion --17
- She had earlier allowed Investigator Chrzanowski to go
- through her phone; is that correct? 19
- 20 A. Correct.
- 21 Q. And then she had signed a consent to search her
- residence?
- 23 A. Correct.
- 24 Q. And at the end of your talk with her, you asked
- her to sign a written consent to search her phone; is that

187

Min-U-Script®

Page 195

Page 196

Page 193

case is finally submitted to you. I'll have the bailiff 1 escort you to the jury room. 2

We're now outside the presence of the jury. Mr. 3

Gregory. 4

-5

MR. GREGORY: Thank you, your Honor. I

appreciate the opportunity. I realize that the next exhibit

Ms. Brown was going for is an exhibit that contains the portion of the interview that was conducted by the sheriff's

department with Ms. Leibel. My concern is, your Honor, that 9

they are eliciting hearsay. There is a way for Ms. Leibel to 10

get her statements in front of the jury and it's to take the 11

stand if she chooses to do that. I object to the defense 12

continually asking this witness for information regarding the 13 content of that interview. And I asked for this hearing 14

15 outside the presence because of the next exhibit that was

being reached for. So I would ask that your Honor address 16

that issue and direct the defense to quit asking questions 17 that elicit hearsay. 18

THE COURT: Well, I haven't -- I haven't reviewed 19 the exhibit itself. Ms. Brown, if they're within that 20

affidavit if there's information about what Ms. Leibel said 21

happened, it seems to me that it's either hearsay or you're 22

simply trying to do what I've told you already that you could 23

do, which is to provide proof that she was consistent. And 24

it's not going to be allowed for evidence as to proof of her

THE COURT: Okay. Proceed, please.

2 Q. (By Ms. Brown) And on February 24th, the day

after Mr. Leibel's death, you obtained an arrest warrant for

Mrs. Leibel; is that correct?

5 A. That's correct.

6 Q. And as part of that, getting that arrest warrant,

you prepared an affidavit that contains facts as you know

them to be? В

9 A. Correct.

10 Q. And this affidavit contained facts concerning the

11 investigation up to this point?

12 A. Yes.

13 Q. And at this point the crime lab had been to the

house the previous evenings but there was no reporting from

their -- from their analysis of the scene; is that correct?

16 A. No official reports had come in yet.

17 Q. And there was nothing concerning that reporting

18 included in your affidavit?

19 A. Correct.

20 Q. And there had been no ballistics testing done?

21 A. No.

22 Q. And there had been no fingerprint evidence

23 analyzed at this point?

24 A. No.

25 Q. And there had been no DNA processing done at this

Page 194

1 point?

2 A. No.

3 Q. And as I said, there had been even though the

crime lab had been at the scene, had done some measurements,

there was no trajectory reported yet? 5

6 A. Correct.

7 Q. And how was Mrs. Leibel's arrest arranged the

following day?

9 A. We had spoken to a friend with her and arranged

10 for her to be at the house in the morning. And when she

arrived on scene, she stepped out of the car, I asked her to 11

walk over to my car because her daughter was in the car with 12

her. And I walked her over to my car between the house and 13

14 the car-as out-of-view as I could, I informed her we had a

warrant for her arrest, I placed her in handcuffs and sat her 15 in my car.

16

Q. So again, she had been free in her movements up 17

to this point? 18

19 A. Correct.

MS. BROWN: Can we get all the lights on up here? 20

THE COURT: Yeah, we'll get them on.

MS. BROWN: I believe I was going blind. 22

23 Q. (By Ms. Brown) Then you did the forensic

examination on Tatiana's phone that you spoke about earlier; 24

is that correct? 25

defense that this was in fact a suicide. So there may be -you may have some other reason for offering it. I don't know

what's in it. But I'll tell you that if it is simply -- if

you're going to tell me it's simply to demonstrate that she 4 was consistent. I think that there are other ways to do that, 5

other than the admission of this affidavit. 6

MS. BROWN: Actually I wasn't going to offer it. I just wanted it available if in questioning Investigator

Garren that I was going to ask about things that are not included in it and if he needed to refresh his memory we 10

would have the document available.

THE COURT: Then it may be subject to reduction if in fact it is admitted. So your objection seems to be a little premature but I think it was wise to bring it up outside the presence of the jury. The jury will be returned.

MR. GREGORY: Thank you. 16 THE COURT: Bring them back in. Both parties 17 know where I am on this issue. 18

Folks, you barely had time to cut a little corner 19 off one of those doughnuts. Thank you, folks. Have a seat. 20 21 Stipulate to the presence of the jury,

22 Mr. Gregory?

7

8

11

12

13

14

15

MR. GREGORY: Yes, your Honor. 23

THE COURT: Ms. Brown? 24 MS. BROWN: Yes, your Honor. 25

\$212/ 188

Page 197

- 1 A. That's correct.
- 2 O. And she, there was considerable exchanges between
- 3 her and Lana, her daughter, concerning planning that trip to
- 4 southern California; is that correct?
- 5 A. That's correct.
- 6 Q. And even going through booking of a hotel
- 7 reservation in California?
- 8 A. Correct.
- 9 Q. And her daughter kept begging her to come?
- 10 A. Correct.
- 11 Q. And Mrs. Leibel would promise and then back off
- some because Harry was not agreeing to that; is that correct?
- 13 A. There were messages saying she was coming and
- 14 then she was going to be delayed and she would explain to her
- 15 later.
- 16 Q. And entry number 43 was a message from Tatiana
- 17 Leibel to Lana Ramo, and this was on the evening of the 22nd
- 18 at 9:50. And at that point she said that she couldn't leave
- 19 now because Harry was going crazy, she needs to calm him down
- 20 some, I'll contact you a little bit later?
- 21 A. If that's what's written down there, that's
- 22 right. I don't have a copy of that with me.
- 23 O. But then by the next morning Mrs. Leibel still
- 24 hadn't been able to leave?
- 25 A. I know she hadn't left.

- 1 is.
- 2 THE COURT: Again, why don't you say for the
- 3 record what exhibit you're looking at?
- 4 MS. BROWN: I'm sorry, your Honor. I believe
- 5 it's Exhibit 61. I'm showing you Exhibit 61.
- 6 THE WITNESS: Okay.
- 7 Q. (By Ms. Brown) And I think it's on the last
- 8 page?
- 9 A. Page four on the back, very back.
- 10 Q. Yes. Starting with entry number 44. These were
- 11 messages from Chris Hedrick?
- 12 A. Yes. Incoming from Chris Hedrick.
- 13 Q. And what were the messages Chris sent in?
- 14 A. Starting at 44?
- 15 Q. Yes.
- 16 A. "Harry, my friend, you have left me without
- 17 saying good-bye. The good moments we've had and your truths
- 18 of life and people that we have in or universe good and bad.
- 19 I knew a month ago something wasn't right and felt you were
- 20 going to be on your journey to another world. This world
- 21 wasn't right for your soul. I couldn't say why, but I did
- 22 see it. It's weird that you're gone and I have lost a real,
- 23 real friend. I pray for your soul and hope we meet again. I
- 24 thank you for guiding me to bettering myself and my life with
- 25 your honesty. Love your friend Chris."

Page 198

Page 200

Page 199

- 1 Q. And in the web history did you see a hotel
- 2 confirmation?
- з A. Yes, I did.
- 4 O. And that was the following day?
- 5 A. Which day are we talking, following day of?
- 6 Q. The 23rd.
- 7 A. There was a confirmation that had the check in
- 8 the 23rd, to check out on the 26th.
- 9 Q. And then you also did the examination of
- 10 Mr. Leibel's phone?
- 11 A. Correct.
- 12 Q. And you noted two calendar entries, one was a
- 13 start time on the 25th of call locksmith. One was a start
- time of 1:00 o'clock on the 25th, turn on house alarms; is
- 15 that correct?
- 16 A. Correct.
- 17 Q. And you don't know when those phone -- those
- 18 entries in to a calendar were made, do you?
- 19 A. No.
- 20 O. And you can't enter reoccurring entries on a
- 21 telephone such as this?
- 22 A. You can.
- 23 O. In another message you saw on the phone was an
- 24 incoming text from Chris Hedrick and that was on 2-24?
- 25 A. Yes. I would need the document to see what it

- 1 Q. And was -- Thank you. Was Chris ever contacted
- 2 after you reviewed this text message?
- 3 A. Yes, he was.
- 4 Q. But that was not until October of last year; is
- 5 that correct?
- 6 A. That's correct.
- 7 O. And so there's a text message indicating that at
- 8 least one of his friends felt something was wrong and Harry
- 9 wasn't right for this world and you didn't investigate it for
- 10 several more months?
- 11 A. No. I wasn't able to get him in for an interview
- 12 until October.
- 13 O. From -- You did these in March?
- 14 A. Correct. I had scheduled at least two interviews
- 15 with him that he didn't show up for. And getting to contact
- 16 him was difficult at times. Sometimes he wouldn't call back.
- 17 Q. Thank you. And then there was also the -- on
- 18 page two.
- 19 THE COURT: Of the same exhibit?
- MS. BROWN: Of the same exhibit.
- 21 THE WITNESS: Okay.
- 22 Q. (By Ms. Brown) And this was message number 17,
- 23 the one you referred to earlier?
- 24 A. Correct.
- 25 Q. To Keri Rajacic?

Page 203

Page 201

- 1 A. It's from -- Yeah. Outgoing, correct.
- 2 O. "Hi, pal. I hope you both are well. We're okay.
- Things have dragged on for way too long. That being said, 3
- the slow moving powers that being should bring this process
- to a conclusion in the very near future(days) You'll hear a
- loud sigh like distant thunder. That would be me"?
- 7 A. Uh-huh.
- 8 O. And these individuals weren't contacted until the
- following month? 9
- 10 A. That's correct.
- 11 O. And they were contacted by a different
- investigator? 12
- 13 A. That's correct.
- MS. BROWN: Thank you. I have nothing further. 14
- THE COURT: Mr. Gregory. 15
- REDIRECT EXAMINATION 16
- By Mr. Gregory: 17
- 18 Q. Investigator, you were asked on
- cross-examination, and actually they referred you to your |19 A. Correct.
- report where you indicated that it did not look like a 20
- suicide to you. D you remember them asking you about that? 21
- 22 A. Yes, I do.
- 23 Q. What was it that didn't look like a suicide to
- 24 you?
- 25 A. Well, it was like no suicide I have ever seen or

- 1 O. Ms. Brown was asking you whether or not
- Ms. Leibel was consistent in her statements. As case agent
- are you familiar with all the statements made by Ms. Leibel
- during the course of this case?
- 5 A. Yes, I'm familiar with them.
- 6 Q. Are you familiar with the contents of the 911
- 7 call?
- 8 A. Yes, I am.
- 9 O. Are you familiar with what Ms. Leibel told first
- responders? 10
- 11 A. Yes, I am.
- 12 Q. Are you familiar with what she told Leann Brooks?
- 13 A. Yes. I am.
- 14 O. You interviewed Ms. Brooks?
- 15 A. Yes, I have.
- 16 O. And you're familiar with the contents of the
- interview that has been indicated went on for about eight
- hours: correct?
- 20 O. Was Ms. Leibel in fact consistent throughout that
- interview, all of those statements?
- 22 A. No, she wasn't.
- 23 O. Okay. Let's talk about that. In what ways was
- she not consistent?
- 25 A. There were minor inconsistencies with her story

Page 202

Page 204

- been a part of. And the nature of the scene seemed
- suspicious to me. So at that point I wasn't comfortable at 2
- that moment in time saying, yeah, he took his own life. So 3
- I've done what I've previously done on other death 4
- investigations is we back out --5
- THE COURT: That's nonresponsive. The question 6
- is what was it that didn't seem like a suicide. Not what you 7
- did. So there probably is another question. 8
- THE WITNESS: Sorry. 9
- 10 Q. (By Mr. Gregory) And you were about to indicate
- that you had done that in the past whenever you see a 11
- suspicious set of circumstances and then you back off. Is 12
- that what you did here? 13
- 14 A. That's correct.
- 15 Q. And you've done that in other cases?
- 16 A. Yes, I have.
- 17 Q. Can you give an example of that?
- 18 A. At the end of July, 2013, it was a reported
- suicide. When I got on scene, the scene was suspicious. We 19
- backed everybody out, followed the same procedure. Called 20
- more investigators, called Washoe County Crime Lab and 21
- processed the scene and conducted the investigation.
- 23 Q. And what was the result of that investigation?
- 24 A. It was ultimately determined that it was a
- suicide.

- regarding the morning of the incident. At the very beginning
- she indicated that when she got up in the morning Harry made
- 3 her tea to the point that she said thank you and he said
- you're welcome. Later on that changed to where she made her 4
- own tea. She was inconsistent and changed how she saw 5
- Mr. Leibel holding the gun after the first shot to where she 6
- demonstrated how she saw it and then kept changing and then
- ultimately said, I don't know, I don't remember. That kept 8
- 9 changing.
- 10 Q. How about more specifically with the time frame
- in terms of when she had argued with Harry and when she
- 12 called 911, anything inconsistent in that regard?
- 13 A. During the first part of the interview she
- indicated that this argument with Harry started between nine
- 15 and ten a.m. She indicated she had just received a message
- from Lana on her phone, had set her phone down and then got 16
- up to make her statement to Harry that she was leaving. 17
- 18 O. And since you're familiar with the first
- responders and what she said to them, you would know that she 19
- 20 told Chris Lucas that she was outside when she heard two
- gunshots. Is that statement consistent with what she said in
- the interview? 22
- 23 A. No, it's not.
- 24 Q. In what way?
- 25 A. She told the one first responder, I was outside,

(51) Pages 201 - 204 22193 190

Page 207

Page 208

Page 205

- 1 I heard two shots. And then it changed to where she wasn't
- in the living room. She went to the kitchen, heard a shot
- and came in, saw him moving the weapons, put her hands over
- her face and at that time heard the second shot.
- 5 O. And how about the order of the shot? Which shot
- came first? Was she always consistent about that?
- 7 A. On the 911 call she indicated that he shot
- himself first in the hand and then somewhere else. She
- indicated that early on in the interview that after the first
- shot she saw something on his left hand. And when we checked 10
- the gun in examination, the order the bullets were fired, we 11
- were able to determine that the first round was shot through 12
- his right torso and the second shot came through the left 13
- 14 hand.
- 15 Q. And how about how she demonstrated for you how
- 16 Harry looked when she first came in to the room? Was she
- always consistent in that regard? 17
- 18 A. I don't recall any major inconsistencies with
- 19
- 20 O. How about how Harry was holding the gun, any
- inconsistencies there? 21
- 22 A. She indicated several different ways that he was
- 23 holding it. I believe the first time she had the right hand
- up here and the left hand here. 24
- 25 Q. Okay. You've demonstrated your right hand out in

- typically made only when the investigation is fully
- 2 completed?
- 3 THE INTERPRETER: I'm sorry. Only when?
- MR. GREGORY: Only when the investigation is 4
- fully completed. 5
- THE WITNESS: No. Sometimes we have the ability 6
 - to do that. Sometimes we make the arrest as soon as we start
- working a case and develop probable cause and believe we have 8
- 9 probable cause to arrest somebody and then we'll apply for an
- arrest warrant. 10
- 11 Q. (By Mr. Gregory) And the investigation
- continues? 12
- 13 A. The investigation does continue.
- 14 O. Anything abnormal about the process that was done
- in this case compared to other cases you've handled?
- 16 A. No.
- 17 O. And Chris Hedrick was kind of alluded to that
- maybe you weren't diligent in contacting him. Can you tell 18
- us about your efforts to contact Mr. Hedrick? 19
- 20 A. I made several phone calls. I got in touch with
 - him a couple times. I had arranged a couple interviews. He
- didn't show up. He travels a lot doing his wood cutting 22
- business. So he said I'll be here this weekend. I said 23
- 24 here's my cell phone number, call me. I-will make myself
- 25 available to you. I never got any calls from him. He told

Page 206

- front of you? 1
- The left hand here.
- 3 Q. And your left hand tucked in towards your torso?
- Towards my body. And then as she got questioned
- more about it as it went along, she would change I don't know
- where it is, and then ultimately said I don't know, I don't
- remember. 7
- 8 MR. GREGORY: Court's indulgence.
- THE COURT: Take your time, sir.
- 10 O. (By Mr. Gregory) What about in reference to the
- second shot? Was she consistent in referring the involvement 11
- of their dog? 12
- 13 A. She indicated in the interview that when the
- 14 first shot went off the dog went crazy and was running around
- like crazy. And then on the 911 you don't hear the dog, you 15
- only hear the dog bark momentarily before the doorbell rings. 1.6
- 17 And then the dog barks some more and it's the deputies at the
- house. 18
- 19 O. How about seeing the wound to Harry's left hand,
- was she consistent regarding that?
- 21 A. Like she said on the 911, he shot himself in the
- hand first. On the interview, she said after the first shot
- he shot himself on the hand first. And as she progressed,
- 24 she didn't really remember what happened.
- 25 O. In your experience, Investigator, are arrests

- me he lives in an area in California where he doesn't have a
- lot of cell reception. It took several times of coordinating
- with him before he finally came up and I met with him for the
- interview. 4
- O. So you acknowledge and you've talked about how
- the arrest was made while the investigation was still
- pending; correct?
- A. Correct. 8
- Q. Had the investigation panned out such that you
- believe that the murder did not happen, that it was a
- 11 suicide?
- MS. BROWN: Objection as to what his belief is. 12
- THE COURT: Repeat the question. 13
- 14 MR. GREGORY: And I'll rephrase it.
- 15 THE COURT: Okay.
- Q. (By Mr. Gregory) After Ms. Leibel was arrested, 16
- had the investigation uncovered evidence that supported that 17
- it was a suicide, what would you have done? 18
- A. I would have brought that information to the DA's 19
- office and told them this is what we uncovered and seek a 20
- dismissal of the charges. 21
- MR. GREGORY: Thank you. I have nothing further. 22
- 23 THE COURT: Ms. Brown.
- RECROSS-EXAMINATION 24
- 25 By Ms. Brown:

5

9

Page 211

Page 209

- 1 Q. And Investigator Garren, you've given bits and
- 2. pieces of an eight-hour interview and said there's
- 3 inconsistencies; is that correct?
- 4 A. Correct.
- 5 Q. And that whole interview was videotaped; is that
- 6 ·correct?
- 7 A. Correct.
- 8 O. And that video tape has been logged in to
- 9 evidence?
- 10 A. Correct.
- MS. BROWN: Your Honor, I would ask the
- investigator to bring the video tape to court to be offered
- 13 in to evidence. He's referred to bits and pieces of it and I
- have the right to offer the rest of the statement.
- MR. GREGORY: Your Honor, request another hearing outside the presence.
- THE COURT: Well, first of all, it's not here.
- 18 And so --
- MR. GREGORY: It is here, your Honor.
- 20 THE COURT: In the room?
- MR. GREGORY: Yeah, it was marked as an exhibit.
- THE COURT: So the investigator doesn't have to
- 23 go get it. Do you have other questions that you want to ask
- 24 this witness before we do that?
- 25 Q. (By Ms. Brown) The information you received from

- 1 really having to repeat.
 - THE COURT: Did you hear the question, sir?
- 3 Repeat the question and then answer the question, repeat the
- 4 question, Ms. Brown.
 - MS. BROWN: I forgot it.
- 6 THE COURT: It was obvious to you that English
- 7 wasn't her native tongue?
- 8 THE WITNESS: Correct.
 - THE COURT: I believe I've stated that correctly.
- what the question was; is that correct?
- 11 MS. BROWN: That's correct.
- THE COURT: Then your next question, ma'am.
- 13 Q. (By Ms. Brown) And in her interview statement
- 14 she gave Williamson, the written statement she gave, she
- 15 couldn't say what happened because for the first shot she was
- in the kitchen, for the second shot she had come in to the
- 17 living room and put her hands over her face; is that correct?
- 18 A. That's correct.
- 19 Q. And so positioning of hands would have been
- 20 higher to a shot, after a shot, something like that?
- 21 A. Correct.
- 22 Q. In the matter of the seconds it took for this all
- 23 to happen?
- 24 A. Correct.
- 25 Q. And in fact, she told you towards the end of your

Page 210

Page 212

- the 911 call is basically a one statement concerning while
- 2 she was trying to explain to a dispatcher that her husband
- 3 had been shot and she wanted somebody to come to the house;
- 4 is that correct?
- 5 A. Correct.
- 6 Q. And the quote of that is she was asked if there's
- 7 serious bleeding. I don't know. I'm not seeing bleeding but
- 8 I see one hand, he shoot two times, first shoot his hand and
- 9 there -- then shoot somewhere else, I don't know where.
- Now, you spent a lot of time with Mrs. Leibel.
- 11 You know her English is -- she's conversant but it's broken;
- 12 is that correct?
- 13 A. I don't know that it's broken. But at times she
- 14 does use inappropriate words, which would be typical of
- somebody that didn't learn English in this country.
- 16 Q. And so sometimes if you're trying to -- talk
- about one the number or first, you may use the wrong
- 18 translation in to another, a second language; is that
- 19 correct?
- 20 A. I don't know how somebody would handle that.
- 21 That isn't knowledge of our language or not.
- 22 Q. It was obvious to you that English was not her
- 23 native tongue; is that correct?
- 24 A. She spoke with a heavy Russian accent but she was
- 25 able to converse and we were able to talk freely without

- 1 interview with her she was asking -- you were asking her, or
- 2 Hubkey at that point was asking, you were present, she had
- 3 just explained again that she was covering her face and heard
- 4 a boom and you were asking if -- or Hubkey was asking if she
- 5 had been shot under the armpit and she said no, I think
- 6 before because I not see shot hand beginning when I come from
- 7 kitchen?
- 8 THE INTERPRETER: I'm sorry. Because I did not
- 9 see?
- MS. BROWN: Shot hand beginning when I come from
- 11 kitchen.
- 12 THE WITNESS: I would have to hear that part of
- 13 the interview to verify that's what she said.
- 14 Q. (By Ms. Brown) Have you reviewed the transcript
- 15 of the interview?
- 16 A. I have.
- 17 Q. So even at the conclusion of that interview,
- 18 she's saying I didn't see what happened because I not -- and
- 19 then I not see shot hand beginning when I come from kitchen?
- 20 A. I would have to see the transcript. That was a
- long interview. I don't have the entire thing memorized.
 THE COURT: Would looking at the transcript
- 23 refresh your recollection?
 - THE WITNESS: It would.
- THE COURT: Ms. Brown, do you have the

2216-192

Page 213

transcript? And this is not the entire transcript; is that 2 correct?

MS. BROWN: That's correct.

THE COURT: This is a portion that you've been 4

asking him about? 5

MS. BROWN: Yes. I'm showing you what's been 6 marked for identification as 124. Do you recognize that? 7

MR. GREGORY: Your Honor, I have not seen that 8

Exhibit. 9

3

10

13

23

MS. BROWN: I'm sorry.

THE COURT: I would appreciate if you show 11

Mr. Gregory. 12

THE WITNESS: That's a portion of the transcript of the interview.

14 15 Q. (By Ms. Brown) And does looking at that refresh

your memory concerning the statement she made concerning not 16 seeing the shot hand?

17

18 A. Correct, yes. That refreshes my memory.

19 O. Thank you.

THE COURT: You may go ahead and ask him the 20

21 22

MS. BROWN: And your Honor, again, I'd offer Exhibit Number 63, the video of her statements.

THE COURT: Wait a minute. You refreshed his

24 recollection. Do you intend to ask him a question about his 25

this trial will be full days.

So we'll take our evening recess. During this 2

recess you are admonished not to talk or converse among 3

yourselves or anyone else on any subject connected with this 4

trial or to read, watch, or listen to any report of or 5

commentary on the trial or any person connected with this 6

trial by any medium of information including without 7

limitation, newspapers, television, radio or internet. 8

You're not to form or express any opinion on any subject 9

connected with the trial until the case is finally submitted 10

to you. Please bear that in mind as you spend your evening. 11

12 Thank you.

13 Before any of the witnesses leave, the

admonishment about talking to each other or anyone other than 14 15

the attorneys remains true.

16 Ms. Brown.

23

24

25

MS. BROWN: Yes.

THE COURT: Clearly you want to introduce the 18

entire tape of this interview, to which Mr. Gregory is 19

20 exactly correct is hearsay.

MS. BROWN: Your Honor, I think somewhat under 21

NRS 47.120 when any part of writing a report or statement --22

THE COURT: You need to slow down, ma'am. 23

24 MS. BROWN: When any part of a writing or

recorded statement is introduced by a party, the party may be

Page 214

recollection? 1

2 O. (By Ms. Brown) Was the statement I made to you

concerning, no I think before because I am not see shot hand

beginning when I coming from kitchen. Is that a statement,

one of the statements she made towards the conclusion of the 5

interview? 6

A. Correct. 7

O. And in that you can see that she's speaking in

somewhat broken English and transposing words? 9

10 A. Correct.

12

11 MS. BROWN: Thank you.

. THE COURT: I understand you have an exhibit that

you want to offer. Do you have any other examination of this 13

witness that you want to do for the next 15 minutes while we 14

have the jury here? 15

MS. BROWN: No. your Honor. Thank you. 16

THE COURT: Okay. Well, folks, I'm going to hear 17

from the attorneys for a little bit and I'm going to let you 18

go early tonight. You should know that you will also get the 19

opportunity to leave early tomorrow. There's some issues 20

that I need to deal with the attorneys with and we will begin 21

that at 3:00 o'clock tomorrow. So when we take our 3:00 22

o'clock break tomorrow afternoon, you'll be released for the 23

rest of the day and you won't have to come back tomorrow 24

after 3:00 o'clock. I expect that the rest of the days of

Page 216

required at the time to introduce any other part of that which is relevant and any party may introduce any other 2

relevant parts. Although the recording has not been 3

introduced, the officer has testified to specific portions 4

and so I think the rest of the context of where he's getting

his inconsistent statements from would be admissible.

THE COURT: Aren't you the one who introduced those parts of the recording first?

MS. BROWN: No. Mr. Gregory on rebuttal was questioning him about specific statements that were made.

THE COURT: I think you were asking him about her statement to the officers first and whether she was consistent. You started that, did you not?

MS. BROWN: No, I didn't ask if she was

consistent. I said she maintained the fact, maintained that her husband committed suicide.

THE COURT: It was admitted for purposes of you demonstrating that she was consistent. And so you were admitting portions of that statement. I don't believe that you can come in and admit portions of the statement and then claim that now you get to introduce the rest because there was cross-examination about the part that you introduced.

MS. BROWN: Mine wasn't coming in for the truth of the matter asserted.

THE COURT: And how was his? His was coming in

7

MS. BROWN: No. My allegation -- What I had 2 offered it for was to show that throughout an eight-hour 3 period where she was confronted she maintained that her 4 husband committed suicide. 5

THE COURT: She maintained consistency. That's 6 7 the same thing.

MS. BROWN: In the general story of my husband committed suicide.

THE COURT: So she maintained the consistency. She got -- Mr. Gregory gets to attack that position through his follow-up examination. But you're the one who went to the eight-hour examination and who said let's talk about this examination and she was consistent. Now, I limited the 14 admissibility of that testimony so that it was not admitted to prove the truth of what Ms. Leibel was saying in that was not admitted to establish the truth of the allegation that -or of the position that she's taken that in fact her husband committed suicide. It's not admissible for that reason. It 19 was admitted only to show the maintain or the consistency. Maintain and consistency are interpreted by this Court as the

same thing unless you can provide me with different

definitions. I have a dictionary on my desk in there that I

So if that's why it was admitted, certainly

would be happy to get for you.

consistent and inconsistent statements, consistent and

2 inconsistent statements. The declarant testifies at trial

and is subject to cross-examination regarding --3

THE INTERPRETER: Counsel.

THE COURT: You're going too fast, sir, and I'm 5

going to ask you to slow down. 6

MR. GREGORY: My apologies.

THE COURT: It's okay. 8

MR. GREGORY: 51.035(2). It talks about

testimony coming in of consistency when a declarant has 10 11 testified. Now, again, I tried to keep that from going that direction but it went there. Ms. Brown insisted that we go 12 13 to consistency and it came in.

THE COURT: Well, the State previously introduced evidence that she made an inconsistent statement to someone outside of the home about her being outside, so I think that consistency issue was already raised.

MR. GREGORY: That's a fair position, your Honor. So the defense does not get to drive the boat though as far as which statements of the defendant come in. I know they very badly want that statement to come in. And frankly, it upset me when they kept asking the questions knowing that they were going to get the hearsay objection and ringing that

bell with the jurors. The bell has been rung. That's fine. 24

But there is no way they should be able to now introduce this 25

Page 218

Page 220

1 Mr. Gregory gets to take the position that she was not consistent. How does that allow you to then bring in hearsay to establish the truth of the matter asserted? Help me with 3 4

MS. BROWN: Because my maintain is maintained her innocence. His is inconsistencies on details within the story. Out of an eight-hour interview he couldn't even describe some of them. She demonstrated the gun some way, I can't remember exactly which way she was holding it, but it changed. Broad general statements concerning very specific things that were said in an interview. And so I think since those specific statements have been brought in that that would then give the jury the right to hear the whole context

15

of what was said. THE COURT: Mr. Gregory. MR. GREGORY: Well, I tried very hard and fired many shots across the bow to prevent this from happening but Ms. Brown kept asking the questions about the interview. I kept objecting on hearsay grounds. She insisted it was for the purpose of consistency only. And so the Court allowed that. Absolutely then the State should get to ask about inconsistencies without opening the door up to the whole hearsay statement. The interesting thing with consistency and

24 inconsistency is in NRS 51.035(2) where it talks about prior 25

whole statement when they were the ones that opened up that 2 door on inconsistency. She opened it extremely wide and I drove through it. 3

4 THE COURT: It's the position of the Court that the defense was allowed to introduce evidence of this

statement only as to her maintaining a consistent position. 6

7 The State was allowed to introduce evidence that was contrary

to that. That does not open the door to this whole В

statement. And I think that to do so would allow in hearsay 9 evidence that is not related to the issue of consistency and 10 11

the Court is not going to admit it.

Anything else?

MS. BROWN: No, your Honor.

THE COURT: Mr. Gregory? 14

15 MR. GREGORY: No. your Honor.

THE COURT: I'm not going to admit it at this 16 17 point.

So are both parties done with this investigator? 18

MR. GREGORY: No, your Honor. I don't know if 19 Ms. Brown was finished. But I had some questions based upon 20 what she elicited. 21

THE COURT: I think she's done with her cross. 22

She may have recross later. Are you done? 23

MS. BROWN: No. I thought he had already done 24 25 redirect.

Q. What types of instruments do you use to take the measurements? A. I use a distometer, which is a laser measuring device commonly used in forensics. I will also use just a hand-held tape measure for smaller measurements.
4 5 6 7 8 9 10 11 12 13 14 15 16 17	Direct examination by Mr. Gregory Cross-examination by Ms. Brown THE WITNESS: JENNIFER NARANJO Direct examination by Mr. Gregory Cross-examination by Ms. Henry THE WITNESS: KEVIN BYRNE Direct examination by Mr. Gregory THE WITNESS: JUSTIN LIEBEL Direct examination by Mr. Gregory Cross-examination by Ms. Henry TRECTORS-examination by Ms. Henry TRECTORS-examination by Mr. Gregory THE WITNESS: JAMES HALSEY Direct examination by Mr. Gregory THE WITNESS: JAMES HALSEY Direct examination by Mr. Gregory 86	3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. Can you tell me just generally how do you go about measuring and diagramming a crime scene? A. Once we have been requested to do a diagram, I ask to be informed of the locations of all items of evidence to make sure that I set my diagram parameters to be large enough to not miss any items of evidence, and I start large, and I begin with exterior measurements, and I work my way through each room systematically to take enough accurate measurements to draw up that scene and also locate items of evidence within that scene. Q. What types of instruments do you use to take the measurements? A. I use a distometer, which is a laser measuring device commonly used in forensics. I will also use just a hand-held tape measure for smaller measurements.

Can you tell me just generally how do you go about measuring and diagramming a crime scene? A. Once we have been requested to do a diagram, I ask to be informed of the locations of all items of evidence to make sure that I set my diagram parameters to be large enough to not miss any items of evidence, and I start large, and I begin with exterior measurements, and I work my way through each room systematically to take enough accurate measurements to draw up that scene and also locate items of evidence within that scene. Q. What types of instruments do you use to take the measurements? A. I use a distometer, which is a laser measuring device commonly used in forensics. I will also use just a hand-held tape measure for smaller measurements. Q. And the first instrument you mentioned? A. Yes. Q. What is the accuracy of an instrument like that? A. We, as a lab, we quality assurance measure

- 1 do a quality assurance measurement on scene prior to
- 2 using the device every time, and we are accurate within
- 3 less than half of an inch.
- 4 Q. And in this particular case, did you test the
- 5 instrument before using it to measure the crime scene?
- 6 A. I did. I tested it against a standard tape
- 7 measure at the distance of two feet.
- 8 O. And what was the accuracy rate?
- 9 A. Less than half of an inch.
- 10 Q. So you indicated that you start by on the
- 11 outer walls, and then you kind of move in?
- 12 A. Yes.
- 13 O. Is that what you did in this case?
- 14 A. Yes.
- THE COURT: Are these new numbers?
- 16 THE CLERK: Yes. 125 and 126.
- MR. GREGORY: Showing 125 and 126 to the
- 18 defense.
- 19 MS. BROWN: Thank you.
- 20 MR. GREGORY: May I approach the witness,
- 21 Your Honor?
- 22 THE COURT: Yes.
- 23 O. (BY MR. GREGORY:) Sir, I'm handing you
- 24 Exhibits 125 and 126. Can you take a look at those,

- 1 THE COURT: 25 and -- 26, 125 --
- 2 MR. GREGORY: 125. Yes, thank you, Your
- 3 Honor.
- 4 THE COURT: And no objection to either,
- 5 Ms. Brown?
- 6 MS. BROWN: No, Your Honor.
- 7 THE COURT: They're both admitted.
- 8 MR. GREGORY: I'm publishing 125.
- 9 THE COURT: Would you like the light to dim a
- 10 little bit there?
- 11 O. (BY MR. GREGORY:) Thank you. I just kind of
- want to give the jury an idea of what your work was out
- 13 there on the scene. So all of these notations are your
- 14 measurements of the various walls and furniture within
- 15 that living room?
- 16 A. Yes.
- 17 Q. And up in the right-hand corner, you
- 18 indicated you tested the laser device beforehand to make
- 19 sure it was accurate?
- 20 A. Yes.
- 21 Q. Do your notes represent that?
- 22 A. Yes. In the upper right-hand corner, I write
- 23 the word "disto," which is my abbreviation for
- 24 distometer, and I reported that the disto read one foot

Page 6

Page 8

- 1 please.
- 2 A. Yes.
- 3 O. What are those?
- 4 A. These are copies of my field notes I used
- 5 that day to document my work on scene.
- 6 O. Is that a way for you to keep track of the
- 7 measurements as you're taking them on scene?
- 8 A. Yes.
- 9 Q. And you indicated they are field notes. What
- 10 do you ultimately do with those notes?
- 11 A. Once back at the lab, I use these notes to
- 12 use a computer-aided drafting program. We use Crime
- 23 Zone, which is widely used in the forensic field to
- 14 reconstruct crimes scenes and also major accident scenes,
- 15 and I use these notes to input that to create the
- 16 diagram.
- 17 O. Have those notes that you have in front of
- 18 you, have they been altered in any kind of way?
- 19 A. No.
- 20 O. They appear to be accurate?
- 21 A. Yes.
- MR. GREGORY: Your Honor, I'd move for
- 23 admission.
- MS. BROWN: No objection.

- 1 11 and 31-32nds of an inch at the distance of two feet
- 2 against the tape measure.
- 3 THE COURT: Sir, one moment.
- 4 THE INTERPRETER: Your Honor, this is the
- 5 interpreter speaking. May the witness be instructed when
- 6 quoting numbers to do so particularly slowly.
- 7 THE COURT: Would you please do that, sir.
- 8 THE WITNESS: Yes, sir.
- 9 THE COURT: It's difficult to translate when
- 10 you speak very rapidly, and sometimes when we're looking
- 11 at numbers, we tend to say them fairly quickly.
- 12 THE WITNESS: Okay.
- 13 THE COURT: So I'm going to ask you to slow
- 14 down, please.
- 15 THE WITNESS: Yes, sir.
- 16 THE INTERPRETER: If the witness would repeat
- 17 the last measurement, please.
 - .8 THE WITNESS: At two feet on the tape
- 19 measure, the distometer read one foot 11 and 31-32nds of
- 20 an inch.
- 21 O. (BY MR. GREGORY:) And that accuracy rate
- 22 meets with the standards of Washoe County FIS?
- 23 A. Yes, sir.
- 24 Q. Now publishing 126. Again, more notations.

1 Thank you. Return 125 and 126 to the clerk. Sir, I'm

- 2 handing you Exhibit Numbers 27 through 35. And can I ask
- you, did you take some photographs on scene of the
- measurements that were being taken?
- 5 A. Yes, I did.
- 6 Q. Go ahead and please look at those exhibits
- and let me know what they are generally.
- 8 A. These are photographs that I took in relation
- to defects that were noted in the love seat on scene, and
- these series of photographs are documenting measurements
- and angles for trajectory analysis.
- 12 O. Do those photographs accurately depict the
- way that those measurements looked as you were taking
- them?
- 15 A. Yes.
- MR. GREGORY: Your Honor, I'd move for 16
- admission of Exhibits 27 through 35. 17
- 18 THE COURT: Ms. Brown?
- MS. BROWN: No -- May I voir dire? 19
- THE COURT: Yes. 20
- VOIR DIRE EXAMINATION 21
- BY MS. BROWN: 22
- 23 Q. Were all of those photographs taken by you?
- 24 A. Yes.

- 1 A. That is correct.
- 2 O. Okay. And so when you stuck the rod through
- 3 the couch, this is where it hit the wall initially;
- correct?
- 5 A. Correct.
- 6 O. Displaying Exhibit Number 28. What does
- photograph depict?
- 8 A. This photograph depicts that same trajectory
- rod coming out of the back of the defect of the couch,
- now lining up with the defect in the sheetrock above the
- baseboard and appropriate documentation of the
- 12 measurement of height as well.
- 13 Q. So when you say lining up with the defect,
- 14 where I'm pointing, is that the rod going into the defect
- in the wall? 15
- 16 A. Yes.
- 17 O. Now, between those two exhibits and the first
- 18 exhibit, the rod hit farther up the wall; correct?
- 19 A. Yes.
- 20 O. What was done to that rod and/or the couch to
- 21 make it line up with that defect?
- 22 A. In the first photograph, there was no weight
- 23 of a person placed on the couch. We were informed that
- 24 medical personnel had removed the deceased from the seat

Page 10

- 1 Q. And were all of the photographs at the scene
- 2 taken by you?
- 3 A. I took a series of photographs. I believe
- 4 they were all additional photographs taken by Douglas
- County personnel.
- 6 Q. But the ones that were taken by the Washoe
- County Crime Lab, you took?
- 8 A. Correct. All by me.
- MS. BROWN: Thank you. 9
- THE COURT: Any objection? 10
- MS. BROWN: No, Your Honor. 11
- THE COURT: Exhibits 27, 28, 29, 30, 31, 32, 12
- 33, 34, and 35 are all admitted.
- 14 Q. (BY MR. GREGORY:) Looking first at Exhibit
- 27, what does that photograph depict?
- 16 A. This photograph depicts a defect at the rear
- of the couch, and there is a trajectory rod that has been
- 18 placed through that defect. And this particular
- 19 photograph shows the height of that trajectory rod as
- it's coming out of the back of the couch.
- 21 O. Now, is the defect, the bullet defect into
- 22 the sheetrock also visible in this photograph?
- 23 A. It is visible just above the baseboard.
- 24 Q. Where I'm pointing to it, is that accurate?

- 1 of a reclined position in the couch to the floor to
- render aid. The first photograph, there's no weight on
- the couch. In the second photograph, we simulated as
- best as we could by having a person sit in the seat and
- simulate the weight and the compression on the couch,
- then lines up the trajectory rod with the defect on the
- 8 Q. Now, to do that, was the couch itself moved
- at all, the base of the couch?
- 10 A. The couch was not moved, just the weight of a
- 11 person added.
- 12 Q. While you were on scene, did you move the
- 13 couch at all?
- 14 A. No. sir.
- 15 Q. How about did you observe anybody else moving
- 16 the couch?
- 17 A. No.
- MR. GREGORY: Publishing Exhibit 29. That 18
- does not look good on there. I'm going to show this to
- the witness, and then I might ask that it be published to
- the jury. 21
- THE COURT: Too much glare off of that light? 22
- 23 Is that what that is?
- MR. GREGORY: I don't know. All I know is it

State of Nevada vs Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

Page 13

- doesn't look very good up on the screen.
- 2 THE COURT: All right, sir.
- 3 O. (BY MR. GREGORY:) All right. Take a look at
- Exhibit Number 29. What is that?
- 5 A. This is a close-up view showing the
- trajectory rod in contact with the defect on the
- sheetrock and an appropriate view of the angle finder
- placed on top of that trajectory rod.
- 9 Q. And what was the angle? If you need to refer
- 10 to your notes --
- 11 A. Yeah, I would have to. Based on the
- 12 photograph, 19 degrees.
- THE INTERPRETER: I'm sorry. 19? 13
- THE WITNESS: Nineteen degrees. 14
- THE INTERPRETER: Degrees? 15
- 16 THE WITNESS: Yes.
- THE COURT: Can I see the exhibits, please. 17
- 18 O. (BY MR. GREGORY:) Would your notes
- 19 accurately reflect that angle?
- 20 A. I would have to refer to my notes to clarify.
- 21 O. Would the angle be something you put in your
- 22 notes?
- 23 A. The angle would only be documented in the
- 24 photograph.

- the first defect in the couch.
- THE COURT: Mr. Gregory, there's the lights 2
- that on the -- If you adjust that, you may impact that
- glare a little bit. I don't know if it will help you or
- not. Apparently, it won't.
- O. (BY MR. GREGORY:) Okay. And Exhibit
- Number 34?
- A. Another view of the defect in the front of
- the love seat. This view is depicting a height
- measurement farther out away from the defect. 10
- MR. GREGORY: And, Your Honor, given the 11
- glare, I would ask that I be allowed to show the jurors 12
- these photographs. 13
- 14 THE COURT: You may do that, sir. I'm going
- to suggest that why don't you hand them in a group so 15
- that you don't -- so that they can pay attention to your 16
- examination of this witness. So once you get done with 17
- all of the photographs, I'll give you a moment to hand 18
- 19 them, pass them around, and you can pause for a minute.
- 20 MR. GREGORY: Thank you.
- THE COURT: But I'd prefer that they not be 21
- looking at a photograph while you're trying to get them 22
- 23 to listen to you.
- MR. GREGORY: I appreciate that. Thank you. 24

Page 14

- 1 O. Okay. So you're saying that the photograph shows the 19-degree angle?
- 3 A. Yes.
- 4 Q. Okay. Thank you. Showing you Exhibit 30.
- 5 What does that photograph show?
- 6 A. This is a view from the front of the love
- seat where the trajectory rod was placed in and showing
- the height of the trajectory rod.
- 9 Q. Exhibit Number 31. Does what does that show?
- 10 A. This is a closer-up view with the angle
- 11 finder placed on the trajectory rod with the height
- 12 measurement in the background.
- 13 O. And Number 32?
- 14 A. A closer-up view to show the angle found at
- 15 that measurement.
- 16 Q. Is the photograph clear enough for you on the
- projector to tell us what the angle reading was?
- 18 A. It appears to be there's a little glare on
- 19 the screen.
- 20 Q. Let me show it to you.
- 21 A. Okay. Twenty-four degrees.
- 22 Q. Thank you. And Exhibit Number 33?
- 23 A. This is also additional view of the front of
- 24 the couch showing distance out away from the defect in

- THE COURT: Or more importantly, to the 1
- witness. 2
- 3 THE CLERK: 127.
- 4 Q. (BY MR. GREGORY:) Showing you what's been
- marked as 127. What is that?
- 6 A. This is a diagram that I produced based off
- of the field notes and measurements taken on scene.
- O. So that's you taking your field notes, going
- back to the office --
- 10 A. Correct.
- 11 O. -- and generating this diagram?
- 12 A. Yes.
- 13 Q. And you used those measurements, you plugged
- 14 the measurements into the program, or how do you do it?
- 15 A. We use a computer-aided drafting program
- referred to as Crime Zone, and point by point, I begin to
- enter my measurements until you can see a final product
- documenting items of evidence located in the scene.
- 19 Q. Is that diagram accurate?
- 20 A. It is a graphic representation of the crime
- 21 scene based on accurate measurements.
- MR. GREGORY: Your Honor, if I could pause 22
- there and have them look at the photographs, then we're 23
- 24 going to be getting into a different subject matter with

Page 17

- 1 this witness.
- 2 THE COURT: Before we do that, are you going
- 3 to offer 127?
- 4 MR. GREGORY: Thank you, Your Honor. Yes.
- 5 I'd move for State's Exhibit 127.
- 6 THE COURT: Ms. Brown?
- 7 MS. BROWN: No objection, Your Honor.
- 8 THE COURT: Then 127 is admitted. We'll pass
- 9 for a moment, and you may circulate those amongst the 10 jury.
- MR. GREGORY: I'm going to release
- 12 Mr. Garren. He's out in the hallway.
- 13 MS. BROWN: Yes.
- 14 THE COURT: I already did it. He doesn't
- 15 need to. I already did it.
- 16 MR. GREGORY: Thank you. It's done. I
- 17 misunderstood.
- 18 THE COURT: Mr. Gregory, you may proceed.
- MR. GREGORY: Thank you, Your Honor. I'm
- 20 going to return all of the exhibits back to the clerk.
- 21 THE COURT: Thank you.
- 22 Q. (BY MR. GREGORY:) Mr. Lear, were you also
- 23 involved in this case to the extent of looking for
- 24 fingerprints on the rifle in question?

- 1 A. On the top portion of the cylinder after
- 2 applying a black powder, I observed one possible print of
- 3 value that I attempted three lifts off the cylinder.
- 4 Q. Were you successful in pulling a print off of
- 5 the weapon?
- 6 A. I was.
- 7 Q. And so that singular print, you said it was
- 8 on the cylinder. Is that a part that rotates --
- 9 A. Correct.
- 10 Q. -- on the gun? Thank you. And would you
- 11 have attempted to print the entire gun or just areas of
- 12 the gun, or?
- 13 A. We processed the entire weapon for any
- 14 possible prints of value. That was the only one that I
- 15 located after the super gluing and gluing and application
- 16 of black powder.
- 17 Q. So you look on the trigger?
- 18 A. Correct.
- 19 Q. And on the hammer, the caulking of the gun?
- 20 A. Correct.
- 21 Q. And on the barrel of the gun?
- 22 A. Correct.
- 23 Q. And no prints in those areas?
- 24 A. Correct.

Page 18

Page 20

- 1 A. Yes.
- 2 O. And what is your training and experience in
- 3 regard to lifting fingerprints off of items?
- 4 A. I have several classes. I took a public
- 5 agency training council phase one crime scene
- 6 investigator. I have the Washoe County Crime Lab 40-hour
- 7 crime scene investigator class, and as part of my time as
- 8 a forensic investigator in the crime lab, you go through
- 9 a formal training program on the documentation,
- 10 collection and identification of latent fingerprints, and
- 11 I've done that in detention, patrol, and in the crime lab
- 12 in my experience as a deputy.
- 13 Q. So did you attempt to obtain fingerprints off
- 14 of the rifle in question?
- 15 A. Yes, I did.
- 16 Q. How did you go about doing that?
- 17 A. That particular rifle was approved for super
- 18 glue, and that's a method used in forensic investigations
- 19 where we have a chamber, and super glue is heated and
- 15 Whole we have a chamber, and super give is neared and
- 20 adheres to any residue or possible perspiration or latent
- fingerprints left behind on the item. In that particular case, there was one fingerprint identified of possible
- 23 value on the rifle.
- 24 Q. Where was that fingerprint located?

- 1 Q. All right. Just one other question going
- 2 back to the crime scene. About how long were you on
- 3 scene documenting and diagramming and measuring?
- 4 A. Approximately three and a half hours.
- 5 MR. GREGORY: Thank you. Nothing further.
- 6 THE COURT: Ms. Brown or Ms. Henry?
- 8 CROSS-EXAMINATION
- 9 BY MS. BROWN:
- 10 Q. Going back to the prints, you said that there
- 11 was one print that you tried to lift three times?
- 12 A. Yes.

7

- 13 Q. What do you mean by that?
- 14 A. When we apply powder to latent fingerprints.
- 15 there are times when you attempt a first lift, and what
- 16 is removed is a lot of what we refer to as noise and the
- 17 background, and so you always follow up with additional
- 18 attempts at that same lift. And sometimes the second and
- 19 third lift of that fingerprint actually provides the
- 20 cleanest view for a fingerprint identifier to work with.
- 21 You submit every lift you attempt so that all of the
- 22 evidence is collected.
- 23 Q. And when you talk about usable prints, what
- 24 do you mean by that?

- 1 A. That there are points of minutia or points of
- 2 identification located within those fingerprints that
- 3 could be used by a certified latent fingerprint examiner
- 4 to ID the fingerprint.
- 5 Q. And is it unusual not to find usable latent
- 6 prints on items?
- 7 A. Depending on the surface, yes.
- 8 Q. It's unusual?
- 9 A. I'm sorry. Can you ask the question again?
- 10 O. Is it unusual not to find usable latent
- 11 prints?
- 12 A. No, it's not unusual. I'm sorry. I was
- 13 confused at the initial question.
- 14 Q. That's okay. So usable latent prints are the
- 15 exception to find? Is that --
- 16 A. I can't -- It depends on the item that you're
- 17 attempting to fingerprint. I can't say specifically that
- 18 that's the exception.
- 19 Q. Is there anything else you look for when
- 20 you're taking attempting to lift prints off any item?
- 21 A. In terms of evidence?
- 22 Q. Yes.
- 23 A. There may be items that are submitted for
- 24 also biological testing, and if any of those items are

- 1 A. With the oils, it would more likely that you
- 2 might have a smudge or extra residue left behind on the
- з firearm.
- 4 Q. Before going through the super glue process,
- 5 do you do kind of a visual examination?
- 6 A. Yes.
- 7 Q. And what are you looking for in the visual
- 8 examination?
- 9 A. Any latent impressions that might be of
- 10 value.
- 11 Q. And in your visual examination, could you see
- 12 any other possible prints that could have been evaluated?
- 13 A. I would have to refer to my notes to be
- 14 specific on that, and I believe it's documented in my
- 15 report.
- 16 Q. Your report refers to three latent lift
- 17 cards, and those were the same three you were talking
- 18 about?
- 19 A. Correct. I'm referring to my notes page on
- 20 the processing of that gun, which I do have a copy with
- 21 me on the desk if you do not.
- MS. BROWN: May I see a copy of that,
- 23 Mr. Gregory?
- MR. GREGORY: Your Honor, could I bring the

Page 22

Page 24

- 1 identified, those would be noted.
- 2 O. So on a gun say, for example, a gun such as
- 3 this, it would not be unusual not to find usable prints;
- 4 is that correct? Too many negatives?
- 5 A. There's too many negatives in that question.
- 6 I don't want to answer it incorrectly. If you could
- 7 rephrase it for me, please.
- 8 Q. In referring to something like a firearm, is
- 9 it usual not to find usable latent prints?
- 10 A. It can be depending on the surface of the
- 11 firearm.
- 12 Q. And what about the surface would cause you
- 13 not to find usable latent prints?
- 14 A. For example, a lot of our handguns that get
- 15 submitted have a textured rubberized frame, and on a
- 16 firearm like that, you are unlikely to be able to recover
- 17 a latent fingerprint because of the surface is not
- 18 conducive with the perspiration from the fingerprint
- 19 being left behind on that hard rubberized material.
- 20 Q. What about, for example, the oils or
- 21 something used in cleaning a gun? Would that affect --
- 22 A. Those could have an effect.
- 23 Q. By making it more likely or less likely to
- 24 have a fingerprint?

- 1 witness -- He brought some things with him today, or is
- 2 it better have him come get what he needs?
- 3 THE COURT: You can walk up to the witness.
- 4 That's okay, sir. But if the witness is going to review
- 5 something, I want to know exactly what he's looking at.
- 6 THE WITNESS: Okay.
- 7 THE COURT: So if you review an item, I want
- 8 you to tell me what, and I want you to tell Ms. Brown and
- 9 Mr. Gregory.
- THE WITNESS: I'm currently look at the lab
- 11 report that I generated in relation to the processing of
- 12 the firearm.
- 13 THE COURT: Ms. Brown, do you want to
- 14 approach and see what he's looking at so that both of you
- 15 can see it? Is that the only thing you need from this
- 16 pile?
- 17 THE WITNESS: Yes, Your Honor.
- 18 THE COURT: Thank you, Mr. Gregory.
- 19 THE WITNESS: And then within here, I have
- 20 notes on processing the gun, and that's what I was
- 21 talking to you about.
- 22 THE COURT: Thank you, Mr. Gregory.
- 23 MS. BROWN: Okay. Thank you.
- 24 THE COURT: I don't want him to testify from

Page 28

Page 25

- 1 these notes unless you know that he's doing that, so --
- 2 MR. GREGORY: I'll take them back.
- 3 THE COURT: Thank you, sir. Ms. Brown, your
- 4 next question.
- 5 Q. (BY MS. BROWN:) How long can latent prints
- 6 stay on a surface?
- 7 A. Depends on the weather conditions and the
- 8 surrounding environmental factors in relation to that
- 9 item
- 10 Q. So a long period of time? A short period of
- 11 time?
- 12 A. It can be for a long period of time. Yes.
- 13 O. And going back now to February 23rd, what is
- 14 your background and training to qualify to be a forensic
- 15 investigator?
- 16 A. I graduated with a Nevada POST Category 1
- 17 POST certificate in 2007. I have eight years of
- 18 experience working as a deputy sheriff including the
- 19 detention facility, the patrol division, and one year
- 20 experience of working as a forensic investigator.
- 21 Like I mentioned earlier, I have several
- 22 classes: The Public Agency Training Council, Phase One,
- 23 crime scene investigator, 40-hour Washoe County Crime Lab
- 24 Crime Scene Investigator, and then the formal training

- 1 Q. (BY MS. BROWN:) Do you know the evidence
- 2 volunteer Schrambra? Was she there?
- 3 A. I am not familiar.
- 4 Q. Excuse me?
- 5 A. I'm not familiar, ma'am.
- 6 Q. Was Deputy Marshall there?
- 7 A. I recall there being a deputy on scene. I do
- 8 not know his name.
- 9 Q. Was Investigator Chrzanowski there?
- 10 A. I don't recall.
- 11 Q. And Deputy Schemenauer, or Investigator
- 12 Schemenauer?
- 13 A. Yes.
- 14 Q. So there are numerous people already present
- 15 at the scene when you arrived?
- 16 A. That's correct.
- 17 Q. And when you arrived at the scene, were they
- 18 already starting to collect evidence?
- 19 A. They had identified items of evidence by
- 20 placards within the crime scene.
- 21 Q. And was that later collected by them?
- 22 A. Yes.
- 23 Q. Generally under the protocol of Washoe
- 24 County, when you respond to a crime scene like that, is

- 1 program that you go through in the crime lab covering all
- 2 areas of crime scene investigation.
- 3 O. Are you a member of any professional
- 4 organizations?
- 5 A. I am. I am a Certified Crime Scene
- 6 Investigator through the International Association of
- 7 Identification.
- 8 Q. Who went with you when you went to 452 Kent
- 9 Way?
- 10 A. Investigator Margritier and Sergeant Michael
- 11 Lyford.
- 12 Q. And when you arrived there, what time was it?
- 13 A. Approximately 5:00 p.m.
- 14 Q. And who else was present when you arrived?
- 15 A. There were multiple investigators from
- 16 Douglas County, including Investigator Garren and also
- 17 Captain Milby.
- 18 Q. They were inside the residence?
- 19 A. Yes.
- 20 O. Was Evidence Technician Barden inside of the
- 21 residence?
- 22 A. Yes.
- 23 THE COURT: Ms. Brown, would you turn your
- 24 microphone back on, please. Thank you, ma'am.

- 1 it generally your protocol to collect the evidence?
- 2 A. It depends on the nature of the request from
- 3 the outside agency. In certain cases, we collect
- 4 evidence if they're requesting it. In this particular
- 5 case, they requested documentation for the diagramming of
- 6 the items of evidence located and also documentation of
- 7 the couch and any trajectory analysis.
- 8 Q. So while you were there doing the
- 9 measurements, there were other Douglas County deputies
- 10 there or investigators collecting evidence?
- 11 A. Correct.
- 12 Q. How long were you at the scene?
- 13 A. Approximately three and a half hours.
- 14 Q. And during the time you were at the scene,
- 15 were other people coming and going out of the residence?
- 16 A. I was primarily in the upstairs living room
- 17 and kitchen area, and the -- there was not any additional
- 18 personnel that I recall arriving while I was on scene.
- 19 Q. And within your forensic division, is it
- 20 appropriate protocol to have numerous people on scene
- 21 while you're trying to document evidence?
- 22 A. Depends on the nature of the scene and how
- 23 many people you need to process it.
- 24 Q. And so while you're doing your work and

State of Nevada vs Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

Page 29

- 1 there's other individuals present, does that interfere
- 2 with anything you're doing?
- 3 A. In this case, there was no interference in my
- 4 work.
- 5 Q. Did do you know how many people were present
- 6 in the residence before you arrived on the scene?
- 7 A. I do not know.
- 8 O. Prior to doing any of your documentation,
- 9 were you advised that one of the paramedics had moved the
- 10 coffee table in the living room?
- 11 A. I was not advised of that.
- 12 Q. When you're doing measurements such as this,
- 13 is that type of information helpful?
- 14 A. It can be. It depends on the nature of the
- 15 scene.
- 16 Q. And were you advised that numerous people
- 17 including paramedics had been looking around the scene
- 18 earlier?
- 19 A. Yes.
- 20 Q. And viewing the bullet hole behind the couch?
- 21 A. No, I was not advised of that.
- 22 Q. So in doing measurements and the trajectory,
- 23 it would be important to know if things had been moved or
- 24 hadn't?

- 1 scene.
- 2 Q. And was there any report to you that the
- 3 couch had fallen forward during the movement of
- 4 Mr. Leibel?
- 5 A. No.
- 6 Q. Now, when you come in and start diagramming
- 7 the scene, then you're taking the items as they are in
- B place; is that correct?
- A. That's correct.
- THE COURT: Are those new numbers, ma'am?
- 11 THE CLERK: 128, 129, 130. That's it.
- 12 THE COURT: That's it?
- 13 MS. BROWN: 110.
- 14 THE COURT: Ms. Brown, you just marked some
- 15 new exhibits. Would you show those to Mr. Gregory,
- 16 please.
- 17 Q. (BY MS. BROWN:) I'm sorry. First I'm going
- 18 to show you Exhibits 115 -- sorry. 110 through 115.
- 19 Would you look at those and see if you recognize those?
- 20 A. Yes, I do recognize these as my photographs.
- 21 Q. And are those fair and accurate
- 22 representations of the scene on February 23rd?
- 23 A. Yes.
- 24 Q. And then Exhibits 128, 129, and 130?

Page 30

Page 32

- 1 A. Correct.
- 2 Q. Now, the sofa, was the back of it broken when
- 3 you saw it?
- 4 A. What do you mean, broken?
- 5 O. The back of the sofa, you can lift up off the
- 6 rails?
- 7 A. Okay.
- 8 Q. When we were allowed to view it last week --
- 9 MR. GREGORY: Objection, Your Honor.
- 10 Introducing evidence.
- 11 THE COURT: Sustained.
- 12 Q. (BY MS. BROWN:) There was no issue with the
- 13 couch?
- 14 A. Not to my knowledge.
- 15 Q. You didn't notice the ability to maneuver the
- 16 back of that couch?
- 17 A. Could you be more specific?
- 18 Q. Move the back seat up off a rail?
- 19 A. I did not attempt any movements of that
- 20 nature with the couch while on scene.
- 21 Q. Were you advised that Ms. Leibel had reported
- 22 removing her husband off of that couch?
- 23 A. I was advised that the subject had been moved
- 24 off the couch upon medical personnel's arrival on the

- 1 A. Yes, additional photographs that I took.
- 2 Q. Okay. And are those fair and accurate
- 3 representations of the scene?
- 4 A. Yes.
- 5 MS. BROWN: Thank you. Showing you
- 6 exhibit ---
- 7 THE COURT: No. You're not going to show
- 8 anything until they're admitted. Okay?
- 9 MS. BROWN: And, Your Honor --
- 10 THE COURT: So lets start with that.
- 11 MS. BROWN: Start with that. I'd offer
- 12 Exhibit 110 through 115.
- MR. GREGORY: No objection.
- 14 THE COURT: 110 through 115 are admitted.
- MS. BROWN: And Exhibits 128 through 130.
- 16 MR. GREGORY: No objection.
- 17 THE COURT: 128, 129, and 130 are admitted:
- 18 Thank you, ma'am. You may go ahead.
- 19 Q. (BY MS. BROWN:) Thank you. And showing you
- 20 Exhibit 110, can you tell me what's shown in that
- 21 photograph?
- 22 A. This is a view of the living room including a
- 23 center coffee table, a love seat with a firearm, and a
- 24 number one placard depicted next to it, and some

Min-U-Script®

Jury Trial - Thursday January 29, 2015

Page 35

Page 33

- 1 blankets, and an additional recliner in the corner.
- 2 Q. Okay. And when you first arrived at 453
- 3 Kent, is this the way the furniture was set up?
- 4 A. Yes.
- 5 Q. And this would have been towards the right of
- 6 the couch if you were standing looking at it?
- 7 A. Correct.
- 8 O. And Exhibit 111?
- 9 A. Yes.
- 10 Q. Is this the same view with some of the items
- 11 removed?
- 12 A. This is a closer-up view later on. Yes.
- 13 Q. Okay. And so the coffee table and recliner
- 14 that was over here have been removed?
- 15 A. You can still see the blanket in the corner
- 16 hanging off the recliner. The coffee table, I had to
- 17 move in order to -- after I diagrammed the scene, I had
- 18 to be able to document in photographs and put myself down
- 19 in a very small space to be able to document with
- 20 photographs.
- 21 O. Okay. So that coffee table had to be moved
- 22 to access behind the couch?
- 23 A. That's correct.
- 24 O. In Exhibit 112, what's shown in this

- MS. BROWN: Thank you, Your Honor.
- 2 THE COURT: Yes, ma'am. Would you, for the
- 3 record, tell us what exhibit you have just displayed to
- 4 the jury.
- 5 Q. (BY MS. BROWN:) Yes, Your Honor. Exhibit
- 6 126. And it notes in the reclined position at, that's
- 7 the top of the couch is seven inches from the wall?
- 8 A. That's correct. The upper left portion that
- 9 you're looking at, which I marked with the number one.
- 10 Q. And the one in the upright position would be
- 11 eight inches from the wall?
- 12 A. Yes
- 13 Q. So this is a couch that -- it's a recliner
- 14 that doesn't lean back. It scoots forward; is that
- 15 correct?
- 16 A. Correct. Yes. It rotates in order to
- 17 recline. Yes.
- 18 Q. And then it was noted the bottom frame of the
- 19 couch again in the reclined position would be one foot
- 20 eight and a half inches from the wall?
- 21 A. Correct.
- 22 Q. And in the upright position, it's one foot
- 23 three inches from the wall. Is that correct?
- 24 A. Yes.

Page 34

Page 36

- 1 photograph?
- 2 A. This is a view to the rear of the love seat.
- 3 Q. And what perspective would this be looking
- 4 from? Looking over? Around? Where are you documenting?
- 5 A. Standing next to the couch showing the view
- 6 behind on the wall.
- 7 O. So to the right of the couch looking more
- 8 towards behind it?
- 9 A. Correct.
- 10 Q. And in your notes, you had that the couch in
- 11 the upright position?
- 12 A. Correct.
- 13 Q. Has a distance of seven inches from the wall?
- 14 A. I don't recall from memory.
- MS. BROWN: May I get a copy of that exhibit,
- 16 the diagram?
- 17 THE COURT: Ms. Brown, somehow, we end up --
- 18 it's -- there's not a light over your table. If you want
- 19 Mr. Sedden to keep turn the lights up for you at any
- 20 time, just let us know. I'm been trying to get the
- 21 lights to go up and down as we display things for you and
- 22 Mr. Gregory, but your table is a little darker. Somehow
- 23 there's a light over his. But at any time you need the
- 24 lights on, you let us know.

- 1 O. And on both of these documents --
- THE COURT: Now, you just displayed another
- 3 exhibit. Would you please, for the record --
- 4 Q. (BY MS. BROWN:) On Exhibit Number 125 and
- 5 Exhibit Number 126 --
- 6 THE COURT: Thank you.
- 7 O. -- there is a notation that this is
- 8 supervised. What does that mean?
- 9 A. One of our crime lab policies is while you
- 10 are completing the year-long formal training program, any
- 11 casework that you do, there's another certified forensic
- 12 investigator that has to sign off and validate the work
- 13 that you do. In this case, I'm required to write
- 14 "supervised" on my notes, and then there's a cosigner on
- 15 my report of the investigator that supervised the case
- 16 work.
- 17 Q. And so it would be Marci Margarita?
- 18 A. Marci Margritier.
- 19 Q. Sorry. Is the one that's supervising you?
- 20 A. Correct.
- 21 Q. So you're in a first year of --
- 22 A. I was actually at this point almost completed
- 23 with the formal program.
- 24 Q. Okay. And in Exhibit Number 113, this is

(9) Pages 33 - 36

State of Nevada vs Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

1	looking fr	om the r	right-hand	side of the	couch	through	to
---	------------	----------	------------	-------------	-------	---------	----

- 2 the left-hand side of the couch; is that correct?
- 3 A. That is correct.
- 4 O. And it appears at this point that the
- 5 right-hand side of the couch is not visible.
- 6 A. The far corner of it is not visible.
- 7 Correct.
- 8 O. That the back is not visible?
- 9 A. Well, you're looking at the back portion of
- 10 the left-hand side of the couch, and then there's a break
- in the couch, and that next piece over would be the
- 12 right-hand side of the couch, as it's a dual love seat.
- 13 Q. And the right-hand side of the couch is the
- 14 one that's reclined; is that correct?
- 15 A. Correct. Well, this view is not depicting
- 16 any reclining, so I don't want to confuse anyone. So
- 17 I'll let you ask that question again so I can answer
- 18 appropriately.
- 19 Q. So the couch was unreclined at some point?
- 20 The right-hand side of the couch was unreclined at some
- 21 point?
- 22 A. While we were processing the scene?
- 23 Q. Yes.
- 24 A. Yes.

- 1 A. Yes.
- 2 THE COURT: That question is ambiguous. Was
- 3 the wall in place, or is your question was the rod --
- 4 Q. (BY MS. BROWN:) Was the trajectory rod in
- 5 place with the wall at this point?
- 6 A. Was it in place with the wall? The
- 7 trajectory rod was through the couch all the way to the
- 8 wall. Yes. I can't tell you based on this photograph
- 9 where the other end of that trajectory rod is touching
- 10 because it's not depicted in the view.
- 11 Q. And in Exhibit Number 130, who is this
- 12 individual?
- 13 A. That is my supervisor, Sergeant Mike Lyford.
- 14 Q. And in this photograph, the trajectory rod is
- 15 in place?
- 16 A. That's correct.
- 17 Q. And why is he positioned on the couch?
- 18 A. We had to use a person for a specific reason
- 19 on the scene. It was reported that the victim in the
- 20 case was seated in a similar position reclined, and when
- 21 we began the documentation for the trajectory, we showed
- 22 photographs without any weight or compression on the
- 23 couch with no one in the couch, and those photographs
- 24 depict the trajectory rod hitting the wall clearly higher

Page 38

- rage so
- 1 Q. So if both of them were unreclined, wouldn't
- 2 they be equal distance then?
- 3 A. It depends on how the couch functions.
- 4 O. And in Exhibit 114, again, that's looking at
- 5 the left-hand side of the couch?
- 6 A. Correct.
- 7 O. And the right-hand side of the couch has been
- 8 moved forward?
- 9 THE INTERPRETER: I'm sorry. Is what?
- 10 O. (BY MS. BROWN:) I'm sorry. Yeah. The right
- 11 side of the couch has been unreclined?
- 12 A. Yes.
- 13 Q. And in Exhibit 115, this is looking at the
- 14 trajectory?
- 15 A. Showing a distance away from the defect in
- 16 the front of the couch with a trajectory rod in place.
- 17 Q. Is that trajectory rod going through-to-
- 18 another location?
- 19 A. Yes. It goes through the corresponding
- 20 defect on the back of the love seat that you saw in the
- 21 other views.
- 22 Q. And what about the wall?
- 23 A. In this view, the wall is not depicted.
- 24 Q. But was it in place at the time?

- 1 above the defect.
- When you compress the couch with the person
- 3 and the weight as reported how it occurred, that
- 4 compression of the couch affects the trajectory rod being
- 5 able to line up with the defect in the front, the rear of
- 6 the couch, and the corresponding defect above the
- 7 baseboard on the wall. So we had a specific purpose, and
- 8 we had no choice but to use a person to be on the couch
- 9 in these photographs.
- 10 Q. And are you aware of the injuries that were
- 11 -- they were -- The attempt was made to find the
- 12 trajectory for using this method? Do you know which
- 13 injury you were looking for?
- 14 A. No, I do not.
- 15 Q. Okay. And you said there was a suggestion
- 16 that Mr. Leibel had been sitting on the couch. Is that
- 17 correct?
- 18 A. Correct.
- 19 Q. And he was -- Why would you put a person in
- 20 this position at the center of a couch where you're
- 21 almost on the brink between both seats?
- 22 A. Our best attempt without injuring our
- supervisor and having him lay on top of a trajectory rod.
- 24 And like I said, the purpose was to try to add some

Page 41

- 1 weight to simulate where that couch would be and where
- 2 those defects would be in relation to having that
- 3 compression.
- 4 Q. But the weight -- location of the weight on
- 5 the couch, if it were on, for example, over in this
- 6 corner, wouldn't have the same effect on moving the
- 7 trajectory rod.
- 8 A. Could be different. Yes.
- 9 Q. And so you don't know that this was a
- 10 position that had ever been reported Mr. Leibel was in,
- 11 is that correct, other than on the couch somewhere?
- 12 A. It was reported that he was sitting in the
- 13 reclined position. That's all that we knew.
- 14 Q. Sitting in a reclined position?
- 15 A. That's what was reported.
- 16 Q. And is this couch relined at this point?
- 17 A. It appears to be partially reclined, yes, as
- 18 evidenced by Sergeant Lyford's leg being up in the air.
- 19 Q. So you had to recline the couch to some
- 20 degree and put weight on it in an undocumented location
- 21 to get this trajectory?
- 22 A. That's why we documented both the before
- 23 photographs and after so that you can see both sides.
- 24 Yes.

- 1 case, did you?
- 2 A. No, I did not.
- 3 Q. And so you don't know if there was trace
- 4 evidence on the couch that had or had not been collected?
- 5 A. We had not collected any. Correct.
- 6 Q. And this individual is sitting basically over
- 7 where a suspected bullet hole is in the couch?
- 8 A. Correct.
- 9 Q. Did you examine the hole in the drywall
- 10 itself, the wall?
- 11 A. How do you mean, examine?
- 12 Q. View it? Look at it?
- 13 A. I viewed it. Yes.
- 14 Q. And does it appear to be actually a
- 15 conglomeration of two or three, four different holes
- 16 overlapping?
- 17 A. I would just refer to it as a defect in the
- 18 wall.
- 19 Q. And at the time you were doing the trajectory
- 20 measurements, that wall was intact other than the defect?
- 21 A. Correct.
- 22 Q. The piece of it hadn't been cut out to see
- 23 what was behind it?
- 24 A. Correct.

Page 42

Page 44

- 1 Q. So without it being in an upright position
- 2 without weight on it, you couldn't make it go in -- The
- 3 trajectory rod would not match up with the hole?
- 4 A. With the corresponding defect on the
- 5 sheetrock.
- 6 O. On the sheetrock.
- 7 A. That's correct.
- 8 O. When you partially reclined it, so you
- 9 changed its position, and you put an unknown weight in an
- 10 unknown location to basically make it fit?
- 11 A. We simulate it the best that we could.
- 12 O. The best you could?
- 13 A. Yes. And like I said, it was for a very
- 14 specific reason.
- 15 O. Do you know had the Washoe County, or excuse
- 16 me, Douglas County Sheriff's Office completed their
- 17 evidence collection at this point?
- 18 A. At which point?
- 19 Q. At the point Exhibit 129 was taken?
- 20 A. In terms of the evidence collection of items
- 21 on that scene?
- 22 O. Yes.
- 23 A. I am not familiar.
- 24 O. You didn't take any trace evidence in this

- 1 Q. And you couldn't see it at that point what
- 2 was behind it?
- 3 A. Correct.
- 4 O. This hole was larger than the trajectory rods
- 5 that were being it put in it?
- 6 A. The hole was what?
- 7 O. Larger than the trajectory rods being
- 8 inserted into it?
- 9 A. That's correct.
- 10 Q. And so there was some wiggle room there?
- 11 A. That's correct.
- 12 Q. And in actuality, you couldn't see where
- 13 behind the wall to have an endpoint with that trajectory
- 14 rod?
- 15 A. Correct.
- 16 MS. BROWN: Sorry, Your Honor.
- 17 THE COURT: No, ma'am. You take your time.
- 18 MS. BROWN: Thank you. I have nothing
- 19 further.
- 20 THE COURT: Mr. Gregory?
- 21 MR. GREGORY: No questions, Your Honor.
- 22 THE COURT: All right, Mr. Lear. Thank you
- 23 for your appearance today. You may step down.
- THE COURT: Could we have the lights back up,

1	please. Your next witness, Mr. Gregory.	1	Highlands University.	
2	MR. GREGORY: Jennifer Naranjo.	2	THE COURT: Ma'am.	
3	THE COURT: I want to make sure that all of	3	THE WITNESS: Yes.	
Δ	the exhibits are returned to the clerk, please. Jennifer	4	THE COURT: I'm going to ask you to slow	

- Naranio? Is that correct? 5
- MR. GREGORY: Yes. 6
- 7 THE COURT: I've noted several people going
- in and out of the courtroom. I just want to remind 8
- counsel keep an eye back in the courtroom and make sure 9
- none of your witnesses on the other side appear, having
- invoked the rule of exclusion. 11
- Ma'am, if you'd come forward, step in front 12
- of the clerk, raise your right hand, please. 13
- 15 JENNIFER NARANJO,

14

18

- having been first duly sworn, was 16
- examined and testified as follows: 17
- 19 THE COURT: If you'd come up and have a seat
- 20 up here, please. There's some water there if you'd like.
- 21 THE WITNESS: Thank you.
- THE COURT: Mr. Gregory. 22
- MR. GREGORY: Good morning. 23
- 24 THE WITNESS: Good morning.

- 5 down, please.
- 6 THE WITNESS: Okay.
- 7 THE COURT: I know that you have a lot of
- information to present, but this is all being
- interpreted, and it is very difficult for the
- interpreters to keep up with you.
- THE WITNESS: Okay. Absolutely. 11
- 12 THE COURT: Thank you, ma'am.
- MR. GREGORY: You were telling us about your 13
- 14 training and experience in those two areas.
- THE WITNESS: Yes. I have 30 graduate credit 15
- hours from the University of Nevada-Reno in the field of 16
- DNA analysis and molecular biology. In addition to that, 17
- 18 I have completed a seven-month training program at Washoe
- County Crime Lab under the direct supervision of three 19
- qualified DNA analysts, and that is required prior to 20
- doing any type of casework. During that time, I
- processed numerous samples which would be similar to what
- I would expect to see in casework. 23
- Additionally, I wrote numerous reports that 24

Page 46

- DIRECT EXAMINATION
- BY MR. GREGORY: 2
- 3 Q. Can you please state and spell your last
- 4 name.

1

- 5 A. My name is Jennifer Naranjo: N-a-r-a-n-j-o.
- 6 Q. What do you do for a living?
- 7 A. I'm a criminalist at the Washoe County
- Sheriff's Office Crime Lab.
- 9 Q. How long have you been so employed?
- 10 A. I've been employed for approximately over
- 11 nine years.
- 12 O. And what specifically do you do within that
- 13 division?
- 14 A. I'm a DNA analyst and a primary exam analyst
- 15 in the crime lab, and my role is to look at evidence that
- are submitted in cases for initially, I can do screening,
- which is my role as a primary exam analyst for biological
- evidence. And as a DNA analyst, I then process those
- samples and generate DNA profiles, which I then make
- 20 comparisons to if I can.
- 21 Q. What is your training and experience in those
- 22 two areas?
- 23 A. I have a Bachelor's of Science degree in
- 24 environmental science and management from New Mexico

- would be similar to what I would expect to be writing as
- an analyst. Additional type of education that I've
- obtained, we have to do eight hours of continuous
- education every year, and also we take classes from the
- manufacturers that provide our kits for our analysis as
- well as the companies that provide our equipment.
- Q. (BY MR. GREGORY:) Are the methods that you
- employ accepted in the scientific community?
- A. Yes, they are.
- 10 Q. Were you asked to process a rifle in this
- 11 case?
- 12 A. Yes, I was.
- 13 Q. And did you both -- did you do -- Tell us
- 14 what you did with the rifle.
- 15 A. Okay. May I refer to my report?
- 16 Q. If that will help you refresh your
- 17 recollection.
- 18 A. Yes, please.
- 19 Q. You did two reports in this case. Would you
- 20 like to see both of them?
- 21 A. Yes.
- THE COURT: Ma'am, do you need the report to 22
- 23 refresh your recollection?
- THE WITNESS: I do.

Page 49

- THE COURT: And by reviewing the report, 1
- would it refresh your recollection?
- THE WITNESS: Yes, it will. 3
- THE COURT: Are you going to mark those as Δ
- 5
- (Whereupon, Exhibit Nos. 131-132 were marked for 6
- 7 identification.)
- THE CLERK: 131, 132. 8
- THE COURT: Thank you, ma'am.
- 10 Q. (BY MR. GREGORY:) I'm showing you 131 and
- 11 132. Are those your reports?
- 12 A. Yes, they are.
- 13 O. Take a moment to look at those reports and
- let me know if it refreshes your recollection.
- 15 A. Okav.
- 16 O. So tell us first what you did with the gun.
- What was the first step? 17
- 18 A. So the initial screening of the rifle would
- include I would take the rifle and use illuminated
- magnification to look over the entire front and back on 20
- both sides of the rifle to determine if there was any 21
- 22 biological fluids present, and then at that point, I
- would do any testing if necessary. For this particular
- case, I found none of that, so what I did was --

- 1 with one wet, one dry swab, and I swabbed them as A-1
- 2 life. I just gave them a designation. Additionally, I
- 3 swabbed the strap of the rifle on both sides, front and
- back of that, as A-2 Rifle, and then those were forwarded
- onto the DNA section, which I processed for DNA analysis.
- Q. So just briefly, what does "swabbing" mean?
- Tell us what you're doing when you're swabbing.
- 8 A. Okay. So I would take two sterile swabs.
- One would be wet and would be would be dry, and I would
- take those on the hammer area, and I swab first with the
- wet followed by the dry, and then go to the trigger and
- do the same, one wet, one dry. Those would go into a
- box, and of course they would be labeled A-1 rifle. And
- 14 I would then collect a water control that is associated
- with the same water that I used to collect the possible
- 16 DNA that may be on the item.
- 17 O. So the areas swabbed again were the strap,
- the leather strap; correct?
- 19 A. Correct, as A-2.
- 20 O. And then the hammer and the trigger?
- 21 A. Correct, as A-1.
- 22 O. And then what did you do with items A-1 and
- 23 A-2?
- 24 A. Those were processed through the entire DNA

Page 50

- 1 Q. When you say "None of that," so none of what?
- 2 A. No biological staining.
- THE COURT: Wait. You're a little fast.
- Please slow down. And, Mr. Gregory, do you intend to
- offer these reports? 5
- MR. GREGORY: No. Your Honor. 6
- THE COURT: Because if you don't, then I'm 7
- going to ask you to withdraw them from the witness. 8
- MR. GREGORY: Yes. 9
- THE COURT: Because I don't want her to 10
- testify from them if she's just using them to refresh her
- 12 recollection.
- MR. GREGORY: And, ma'am, if you need them 13
- again to refresh your recollection, just let me know. 14
- THE WITNESS: Okay. 15
- THE COURT: Mr. Gregory, thank you. 16
- 17 O. (BY MR. GREGORY:) And, Your Honor, I'm going
- to hold onto these during her testimony. 18
- So you said no indication of biological 19
- evidence. What do you mean by that? 20
- A. There was no blood observed on the rifle.
- 22 O. And then what was your next step?
- 23 A. The request was to swab the trigger and
- hammer of the rifle. Therefore, I swabbed those together

- 1 process for -- I would need to refer to my report. I
- don't want to confuse item one and item two, please.
- 3 O. Handing you both of those exhibits back, 131
- and 132. So in reference to A-1, and A-1 is the swab
- from the hammer and the trigger. Did you perform an
- analysis of those swabs?
- 7 A. I did. So I initially took half of each swab
- and carried those through to DNA. That is our protocol.
- When I processed it through the State, the point where I
- would determine if there's any DNA present for Item A-1,
- I determined that it was insufficient to move forward, so
- I had to stop and request to utilize the other half.
- 13 For Item A-2, I was able to process that
- through the whole entire DNA process, and I determined 14
- after completing the process that there were at least 15
- four individuals who their DNA would be associated with 16
- that, and that I could make no conclusions for that mixed 17
- DNA profile due to a low level of DNA as well as the
- number of contributors. So I have no conclusions for 19
- 20 that.
- 21 Q. So that's on the strap?
- 22 A. That is on the strap.
- 23 Q. And then going back to the trigger and the
- 24 hammer, you found that there was low levels of DNA on

State of Nevada vs Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

Page 55

Page 53

- 1 that as well?
- 2 A. So for the trigger and the hammer, which is
- 3 A-1, I had to go back and take the over half of the
- sample and combine them together to get a sufficient
- amount of DNA to attempt to get a profile. At that
- point, I was able to generate a profile that was too low 6
- to make any conclusions, so due to a low level of DNA. I 7
- could offer no conclusions on that item.
- MR. GREGORY: Thank you. I have nothing Q
- further. 10
- THE COURT: Ms. Brown? 11
- MR. GREGORY: Your Honor, I'm going to return 1.2
- 13 the exhibit to the clerk.
- THE COURT: Thank you, sir. 14
- MS. BROWN: Ms. Brown or Ms. Henry? 15
- 16
- CROSS-EXAMINATION 17
- BY MS. HENRY: 18
- 19 O. Ms. Naranjo, you indicated that you have a
- 20 Bachelor's of Science in environmental science. Was that
- 21 right?
- 22 A. Yes, ma'am.
- 23 O. And then beyond that, did you say you had 30
- graduate credit hours in DNA analysis?

- 1 O. And have you ever published anything in your
- 2 field?
- з A. No.
- 4 Q. So I just want to make sure that I'm clear.
- 5 You took -- You originally took a DNA reference sample
- from Mr. Leibel, correct, or a DNA reference sample was
- given to you?
- A. That's correct.
- Q. For Mr. Leibel; right?
- 10 A. Correct.
- 11 Q. And a DNA reference sample was also given to
- you for Mrs. Leibel?
- 13 A. That's correct.
- 14 Q. And then the trigger and the hammer of the
- rifle were both swabbed together for possible residual
- DNA for any person that handled the gun --
- 17 A. That's correct.
- 18 Q. -- correct? And both sides of the strap of
- the rifle were swabbed for the possible residual DNA from
- a person that handled the gun?
- 21 A. That's correct. Yes.
- 22 Q. And then a portion of the trigger and hammer
- 23 were swabbed for the reference samples for Mr. and
- 24 Mrs. Leibel as well; correct?

Page 54

- 1 A. Correct.
- 2 Q. And that 30 hours is your training for what
- you're doing now?
- 4 A. No. That's from the University of Nevada-
- 5 Reno.
- 6 Q. Right. But is that -- That's for the
- 7 specific field and what you do now in your employ?
- 8 A. It's related to the field. Yes.
- 9 Q. Okay. And then beyond those 30 hours, you
- 10 then have a seven-month training program?
- 11 A. That is correct.
- 12 O. And you said that you have written numerous
- 13 reports. Are you talking about reports like you wrote in
- 14 this instance?
- 15 A. Yes. During my training, we are required to
- 16 write a minimum of 20 reports that we have to utilize the
- 17 information that was previously generated and reports
- 18 written, and then our reports have to basically be the
- 19 same near identical to what the previous analyst wrote to
- 20 demonstrate that we can in fact get the same results and
- 21 give a report that is correct.
- 22 Q. And do you belong to any professional
- 23 organizations?
- 24 A. I do not.

- 1 A. No.
- 2 Q. So -- I'm sorry. A portion of the trigger
- 3 and the hamper were also swabbed alongside the strap;
- correct?
- 5 A. The initial -- so A-1 was the trigger and the
- hammer swabbed together. A-2 was the front and back of
- the strap swabbed together.
- Q. Okay. And then at that point, is that when
- -- because you said you also did DNA profiles. Is that
- the point when the DNA profiles are created?
- 11 A. The DNA profiles are not created. They are
- either on the item or they're not. So the DNA exists
- there. I collect it, what possible DNA, moved it through
- the DNA process, and that could -- you know, that's
- extracting the DNA from the cells, finding out how much
- DNA is there, and then finally generating the profile.
- Q. Okay. And then with regard to the DNA from
- 18 the strap of the rifle, you said that there was a low
- level of DNA. Is that correct?
- 20 A. No. On the strap of the rifle, that was the
- 21 item that was both a low level and a mixture that I could
- 22 make no conclusions from.
- 23 Q. So there was a low level of DNA?
- 24 A. There is.

4

January 29, 2015 Page 59

Page 57

- 1 Q. Okay. And you couldn't make any conclusions
- 2 with regard to whose DNA was on the strap of the rifle?
- 3 A. That's correct.
- 4 O. And then the same with regard to the DNA from
- 5 the trigger and the hammer. You also determined that
- there was a low level of DNA present there as well?
- 7 A. That's correct.
- 8 O. And because of that, you couldn't match that
- to any -- you couldn't match to Mr. Leibel or
- Mrs. Leibel?
- 11 A. That's correct. I could make no comparisons.
- MS. HENRY: No further questions. 12
- THE COURT: Mr. Gregory? 13
- MR. GREGORY: Nothing further. 14
- THE COURT: Ma'am, thank you for your 15
- appearance today. You're excused. Mr. Gregory, we find 16
- ourselves at the morning break, so we're going to take a
- 15-minute break. 18
- Ladies and Gentlemen, we'll take a 15-minute 19
- recess. And during this recess, you are admonished not 20
- to talk or converse among yourselves or with anyone else 21
- on any subject connected with this trial or read, watch,
- or listen to any report of or commentary on the trial or
- any person connected with this trial by any medium of

- KEVIN BYRNE, 1
- having been first duly sworn, was 2
- examined and testified as follows: 3
- THE COURT: Come on up and have a seat 5
- please, sir. There's some water there, if you'd like. 6
- 7 THE WITNESS: Thank you.
- 8 9 DIRECT EXAMINATION
- BY MR. GREGORY: 10
- 11 Q. Sir, please state your name and spell your
- 12 last name.
- 13 A. Kevin Byrne: B-y-r-n-e.
- 14 O. What do you do for a living, Mr. Byrne?
- 15 A. I'm a latent fingerprint analyst at the
- 16 Washoe County Sheriff's Office.
- 17 Q. How long have you been so employed?
- 18 A. Nearly seven years.
- 19 Q. What does a latent fingerprint analyst do?
- 20 A. A latent fingerprint examiner is basically a
- 21 person who takes fingerprints from a crime scene and
- 22 compares them to known fingerprints to determine if they
- came from the same source.
- 24 Q. What training and experience do you have that

Page 58

- 1 enable you to be an analyst?
- 2 A. Specialized training in latent comparison,
- crime scene investigation, latent print processing.
- 4 Q. Do you have any certification for fingerprint
- analyst?
- 6 A. Yeah. I'm certified as a latent fingerprint
- examiner through the IAI, which is the International
- Association for Identification.
- Q. Thank you. And is the methodology that
- you've been employed or that you use, is it accepted
- within your scientific community?
- 12 A. Yeah, for fingerprint examinations, we use a
- methodology called Ace V. It's an industry standard we
- use on all of the fingerprint identification.
- 15 Q. In this particular case, were you given for
- analysis a fingerprint that had been pulled off of a
- rifle in question?
- 18 A. Yes.
- 19 Q. And did you have an opportunity to analyze
- 20 that fingerprint and compare it to other known
- 21 fingerprints?
- 22 A. Yes, I did.
- 23 Q. Tell us a little bit about how you go about
- 24 conducting your analysis.

1 information including, without limitation: Newspaper, television, radio or Internet.

- You're not to form or express any opinion on 3
- any subject connected with the trial until the case is
- finally submitted to you. Thank you. We're in recess.
- We'll be back at a quarter till. So give you a chance to take a bit of a break. Thank you very much.
- (Recess was taken.) R
- THE COURT: We're back in session in 14DI62,
- State of Nevada versus Tatiana Leibel. Mr. Gregory is 10
- here. Ms. Brown and Ms. Henry here. Ms. Liebel is here.
- The interpreters are here. Please bring the jury in.
- Thank you, Ladies and Gentlemen. Have a seat please. Relax. Counsel stipulate to the presence of the 14
- MR. GREGORY: Yes, Your Honor. 16
- MS. HENRY: Yes, Your Honor. 17
- THE COURT: Thank you. Your next witness, 18
- please. 19
- MR. GREGORY: Kevin Byrne. 20
- THE COURT: Come on up, sir. If you'd pause 21
- about right there and sworn. 22
- 23 24

Page 68

Jury Trial - Thursday

for your appearance today.

THE WITNESS: Thank you. 2

MR. GREGORY: The State calls Justin Leibel. 3

THE COURT: If you would pause there, sir. 4

Raise your right hand.

6 7

JUSTIN LEIBEL,

having been first duly sworn, was 8

examined and testified as follows: 9

10

THE COURT: Come on up, sir. You've been in 11

the room, so you've seen several people testify. You 12

know how to do it. There's some water for you, there. 13

THE WITNESS: Thank you so much. 14

15

DIRECT EXAMINATION 16

17 BY MR. GREGORY:

18 Q. Sir, please state your full name and spell

19 your last name.

20 A. Yes. My name is Justin Leibel: L-e-i-b-e-l.

21 Q. And are you familiar with Harry Leibel?

22 A. Yes.

23 O. How so?

24 A. He is my father.

1 was of the Jewish religion?

2 A. Yes.

3 O. Describe your father's personality.

4 A. Flamboyant, outgoing, friendly, willing to

5 give advice, usually spiritual advice. He voiced his

6 opinions. Very open demeanor.

7 Q. What did you know of your father's health?

8 A. He had cancer in 2004, colon cancer, and had

9 survived that. It was due to smoking, but he continued

10 to smoke after.

11 O. He was a cancer survivor?

12 A. He was a cancer survivor, yes.

13 Q. Focusing on about the last five years, about

14 how often would you see your father?

15 A. I wouldn't see him often. I'd see him once a

16 year when I did not live in Lake Tahoe. But before he

17 moved up to Lake Tahoe in 2004, I'd see him every

18 weekend, every other weekend usually.

19 Q. And after you moved to down to the Southern

20 California area, how often would you communicate with

21 him?

22 A. Communication a lot. Every month, I would

23 talk to him two or three times.

24 Q. And Ms. Leibel, Tatiana, did you ever have

Page 66

1 Q. And are you familiar with Tatiana Leibel?

2 A. Iam.

3 O. And how is it that you know her?

4 A. She married my father ten -- 11, ten and a

5 half years ago.

6 O. And was there ever a time where you lived

7 here in Lake Tahoe?

8 A. I did. I lived here in August of 2005 to

9 February 2006; about six months.

10 Q. Did you actually live with your father and

11 Ms. Leibel during that time?

12 A. No, I did not. I lived on the California

13 side near in Al Tahoe.

14 Q. And while you were here, did you have --

15 Tell me the level of contact you had with your father.

16 A. If not daily, every other day. I was there

17 most Shabbats, I mean most Fridays, weekends most of the

time. 18

19 Q. Moz Shabbat. What is that?

20 A. Shabbats. It's Friday nights for the Jewish

21 religion, like a Sabbath.

THE COURT: There's two different words.

23 It's most Shabbats.

24 O. (BY MR. GREGORY:) Thank you. Your father

1 conversations with her?

2 A. Yes, of course.

3 O. What language would you use?

4 A. English. English. Very clear.

5 Q. Did you ever have any problems communicating

6 with her in the English language?

7 A. No. It's broken English, but it's very --

8 for me, it's understandable.

9 Q. When was the last time you actually saw your

10 father?

11 A. January, a month before this happened.

12 Q. Where did you see him?

13 A. I stayed at his house.

14 Q. Was Miss Leibel there during your stay?

15 A. Yes, she was.

16 Q. And you had contact with her then?

17 A. Yes, I did.

18 Q. How was your father's demeanor during that

19 stay?

20 A. It was normal.

21 Q. Did you and your father have any plans to do

22 anything together?

23 A. Yes. I have a passion for cars. He was

24 talking to me about doing some future endeavors with

Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

- 1 muscle car era vehicles, and I recently got a motorcycle,
- so when I got some more experience, we'd wanted to go
- riding together. And then of course the graduate -- I
- just graduated from Cal State Long Beach. He was looking
- forward to that in May.
- O. When was the last time you spoke to your
- father on the phone or through some other means?
- A. February 10th. I drilled that date in my
- head. I spoke to him over the phone.
- 10 O. About 13 days prior to his death?
- 11 A. Yeah.
- 12 Q. How did he sound?
- 13 A. Normal. Just normal. There was nothing out
- of the ordinary.
- 15 Q. Anything that he said that concerned you?
- 16 A. I couldn't -- not off the top of my head.
- 17 There was nothing that was out of the ordinary.
- 18 O. Are you aware of -- Well, tell me about your
- 19 father and guns.
- 20 A. He was a gun fanatic, and he was very
- meticulous how he handled his guns. We used to go
- shooting all the time at the ranges near Carson City, and |22 Q. -- was used?
- he just was passionate about different type of weapons, 23
- unusual weapons. And every time we got back, he would

- 1 Q. Do you recall when the last time it was that
- 2 you went shooting with your dad?
- 3 A. It would have to be the summer of 2013.
- 4 O. And did Tatiana go with you as well --
- 5 A. Yes.
- 6 Q. -- at that time? Are you familiar with a
- rifle that's called a Circuit Judge?
- A. Yes.
- Q. How are you familiar with that rifle?
- A. That was one of his favorite guns. He had a
- lot of favorite guns, but he showed me that one, and it
- was very unique, very rare gun that is kind of a custom 12
- gun, but easily attainable, I guess.
- THE INTERPRETER: I'm sorry. 14
- THE WITNESS: Easily attainable. 15
- 16 Q. (BY MR. GREGORY:) Did you ever shoot that
- gun? 17
- 18 A. I have not shot that gun.
- 19 O. So when you went out in the summer of 2013,
- 20 that wasn't a gun that --
- 21 A. No, not --
- 23 A. -- that gun.
- 24 Q. When did you learn of your father's death?

Page 70

- usually clean the guns. Actually, all the time clean the
- guns that same afternoon. Very meticulous. He had a
- place for everything.
- 4 Q. Are you familiar with whether he'd keep
- firearms at the residence?
- 6 A. He did.
- 7 O. Do you have an approximate number?
- 8 A. I'm sure he never showed me all of them, but
- he had guns in a clock, he had guns by the bed, he had
- guns on the rifle rack that we've seen in pictures. He 10
- 11 kept guns kind of everywhere.
- 12 Q. Did he have both long guns and handguns?
- 13 A. Yes.
- 14 O. Did you ever go shooting with him?
- 15 A. Yes. Yes.
- 16 Q. And did Miss Leibel ever go shooting with
- 17 you?
- 18 A. She did go with us.
- 19 O. Did she shoot the guns?
- 20 A. She would.
- 21 Q. How was she at shooting the guns?
- 22 A. Pretty good. I wouldn't say she's a sniper,
- 23 but she was a good aim. The targets were fairly close,
- 24 so all of us were pretty accurate.

- 1 A. I found out Tuesday, the 25th, at 9:11 in the
- 2 morning. My sister called me.
- 3 O. Sorry for your loss.
- 4 A. Thank you.
- 5 Q. Being around your father there at the
- residence, especially when you were living up here in
- Tahoe, did your father have any manner in which he would
- relax?
- A. Yes. Every time he watched TV, he'd usually
- recline and put his hands behind his head in a reclining
- fashion to watch TV. He loved relaxing that way. 11
- 12 MR. GREGORY: Thank you. I have nothing
- further. 13
- THE COURT: Ms. Brown? Ms. Henry? 14
- 15
- 16 CROSS-EXAMINATION
- 17 BY MS. HENRY:
- 18 Q. Did you interview with the sheriff's office
- in this case?
- 20 A. I did.
- Q. And I think didn't you say that your dad was
- also worried about money, that you had spoken with him
- and he was worried about money?
- 24 A. I do recall that.

anuary **29, 2015** Page 75

Page 73

- 1 Q. And you said -- You know and you reported to
- 2 the officer that you knew that Tatiana was in school in
- 3 Reno; correct?
- 4 A. Yes. UNR.
- 5 Q. At UNR, and that she was in Reno a lot
- 6 because of school?
- 7 A. Yes. She would frequently leave.
- 8 Q. And you also told the officers that you felt
- 9 like Harry did not want to be alone?
- 10 A. I don't recall that.
- 11 Q. If I showed you the police report, would
- 12 that --.
- 13 A. That might help, yeah.
- 14 Q. -- refresh your recollection?
- 15 THE COURT: For the record, would you tell us
- 16 all what you're showing him.
- MS. HENRY: Yes, Your Honor. I'm showing
- 18 Mr. Leibel a police report where he was interviewed.
- 19 THE COURT: Okay.
- 20 MS. HENRY: And the pages are not numbered in
- 21 this report.
- 22 THE WITNESS: I was referring to his
- 23 marriage. He didn't want to be alone. That's why he was
- 24 married.

- 1 A. Yes, I'm sure he had help or needed help.
- 2 Q. And I believe you also said in your report
- 3 that Tatiana was also warm and hospitable to you;
- 4 correct?
- 5 A. Yes.
- 6 Q. Okay. And you just testified that you
- 7 really, in the last five years, you hadn't really seen
- 8 him often?
- 9 A. Correct. Yeah, because of the distance. I
- 10 came up once a year.
- 11 Q. So you saw him once a year?
- 12 A. Physically, yes.
- 13 Q. And you maybe talked to him two to three
- 14 times a month?
- 15 A. Yes.
- 16 MS. HENRY: Nothing further nor me.
- 17 THE COURT: Thank you. Mr. Gregory, anything
- 18 else?
- 19
- 20 REDIRECT EXAMINATION
- 21 BY MR. GREGORY:
- 22 Q. Thank you. You were asked ant your father's
- 23 concerns for money. What were the concerns that you he
- 24 voiced to you?

Page 74

- 1 Q. (BY MS. HENRY:) Okay. So you said in your
- 2 report," Justin said he felt Harry did not want to be
- 3 alone."
- 4 A. Yeah.
- 5 O. You said that and you just read that;
- 6 correct?
- 7 A. Yes.
- 8 Q. And then you also just read in your report,
- 9 you said, "Justin said he felt Harry would rather be with
- 10 someone than be alone in his condition."
- 11 A. In regards to marriage. Yes.
- 12 Q. "In his condition." You said that, right?
- 13 A. Yes.
- 14 Q. And his condition was he had previously had
- 15 colon cancer. And you just said that; correct?
- 16 A. Yes.
- 17 O. I believe you also stated in your report that
- 18 he you had to use the restroom all the time?
- 19 A. Yeah, very frequent.
- 20 Q. That he had kidney stones?
- 21 A. In the past, yes.
- 22 Q. And that those were painful for him?
- 23 A. Very, yes.
- 24 Q. And that he needed help?

- 1 A. He was a little nervous of certain things
- 2 were happening, and he had vented to me a while back, and
- 3 then kind of stopped talking to me about it.
- 4 MS. HENRY: Objection, Your Honor. Hearsay.
- 5 MR. GREGORY: Your Honor --
- 6 THE COURT: Overruled.
- 7 MR. GREGORY: You can go ahead and answer the
- в question.
- 9 THE WITNESS: He did.
- 10 Q. (BY MR. GREGORY:) Thank you. You said he
- 11 vented to you about some things. Can you be more
- 12 specific?
- 13 A. Yeah. He was just frustrated that he was --
- MS. HENRY: Objection, Your Honor. Hearsay.
- 15 He's asking him what he said, and those are specific
- 16 comments that he said.
- MR. GREGORY: And, Your Honor, in response,
- 18 they asked him for what Mr. Leibel said. I should now be
- 19 able to give context to the question.
- 20 THE COURT: I agree. Go ahead. Overruled.
- 21 THE WITNESS: I'm sorry. Repeat the
- 22 question.
- 23 Q. (BY MR. GREGORY:) You indicated your father
- 24 had vented to you about some things regarding the

Page 80

Page 77

- 1 finances. Can you be more specific?
- 2 A. He had specifically told me he was spending
- money for Lana. He kind of vented to me about Lana, but
- he didn't really go into very much detail. I think he
- was just upset at the moment, so after that, he never 5
- really brought it up, and I asked him in the future, like
- "How are things going with that?" And he said, "They're
- going okay." So he didn't really answer anything. 8
- Q. Who is Lana?
- A. Lana is Tatiana's oldest daughter. 10
- Q. And you mentioned Tatiana going to UNR. Did
- she graduate from UNR?
- 13 A. She did.
- MR. GREGORY: Thank you. I have nothing 14
- 15
- MS. HENRY: No further questions. 16
- THE COURT: Sir, thank you for being here. 17
- Mr. Gregory? 18
- MR. GREGORY: Your Honor, my next witness, 19
- who is Dr. Kubiczk, is on a tight schedule. He is 20
- scheduled to be here at 1:00 o'clock. So I propose 21
- taking your lunch recess now instead of later. 22
- THE COURT: You don't have another witness? 23
- MR. GREGORY: And he will be here actually 24

- of the jurors to go ahead and take your break.
- Ms. Martin, I believe you have an issue, and 2
- I'd ask you to stay for just a minute. Okay? The rest
- of the jurors are excused. Just wait there.
- Have a seat everyone, please.
- Ms. Martin, I'm advised that your mother is 6
- 7 ill.
- MS. MARTIN: My mother is 95. She lives at
- Emeritus. Should I tell everybody? 9
- THE COURT: It's your business if you want to 10
- 11 tell anyone.
- MS. MARTIN: She lives at Emeritus. She 12
- developed a cold the other day, very common as an older 13
- person. I saw her this morning. Well, I saw her last
- night after the trial. I've been going at lunch and
- breakfast. She barely ate yesterday. I kind of forced
- her to eat, and then she vomited. But I think she's just 17
- dehydrated. I truly think that's probably what it is.
- To me, my mother was much sicker last year. 19
- So I really think that they're going to take her to the 20
- hospital in front and hydrate her, and I think she's 21
- going to be okay. I truly do. And I know my mother 22
- would not want me not to be here, but I do want to be
- able to go see that she's okay. My husband is retired.

- earlier, you know, if you want to start up again at 12:30
- or something. That would be fine also. 2
- THE COURT: Do you have any other witnesses 3
- 4 that you can put on?
- MR. GREGORY: I do not. 5
- THE COURT: Well, if we take a break now,
- we'll start early. I don't want to lose an hour here.
- So we will take a break, but we have one of the jurors
- has an issue that has come up, and what we're going to do 9
- is take the break and try to accommodate that and see if 10
- we can get back to work here soon. We'll start at 12:30. 11
- I'm going to ask all of the jurors to be prepared to go 12
- forward at 12:30. So we'll take a recess until then. 13
- Ladies and Gentlemen of the Jury, we'll take 14
- a recess until 12:30. During this recess, you're 15
- admonished not to talk or converse among yourselves or 16
- with anyone else on any subject connected with this 17
- trial. You're not to read, watch, or listen to any 18
- report of or commentary on the trial or any person 19
- connected with this trial by any medium of information 20
- including, without limitation, newspaper, television, 21
- radio, or Internet. You're not to form or express any 22
- opinion on any subject connected with the trial until the 23
- case is finally submitted to you. I'm going to ask all

- He's up skiing. I left him several messages to get to
- the hospital. And unless they tell me my mom is going to
- pass today, you know --
- THE COURT: Ma'am, I want you to have
- opportunity. You're going to go to the hospital. Is it 5
- in the ER here or in Carson City? 6
- MS. MARTIN: Yeah, it's right here right in 7
- front of Emeritus in Gardnerville.
- THE COURT: Go ahead and take care of your 9
- mother. If some other issue comes up that you want to
- advise me of, please feel free to do that.
- MS. MARTIN: I think I'll be back at 12:30, 12
- to be honest with you.
- THE COURT: All right. Well, I want you to
- give you the chance to do that. 15
- MS. MARTIN: Thank you. 16
- THE COURT: So please go take care of your 17
- mother. My mother is about the same age, and just about
- two weeks ago, he was in the ER kind of in the same
- situation. 20
- MS. MARTIN: Exactly. It just goes around. 21
- THE COURT: Feel free the let me know if you 22
- need something, okay. 23
 - MS. MARTIN: Thank you. And I just call like

Page 83

- 1 the court line.
- THE COURT: You can do that. Mr. Seddon will 2
- give you a number to call to reach us. Okay.
- MS. MARTIN: Okay. Thank you.
- THE COURT: Thank you, ma'am. Ms. Martin is 5
- gone. I've also received a note from another one of the 6
- jurors. Apparently, one of the jurors had some
- difficulty hearing the testimony of findings of
- fingerprints. The testimony was that neither Ms. Leibel
- or Mr. Leibel -- there were no fingerprints that could be 10
- identified to match either one of them. This juror 11
- simply could not hear that testimony. 12
- My suggestion is that we can either read it 13
- back, or we can simply make a statement to the jurors 14
- that the testimony was that there were no prints 15
- associated with either of them discovered either on the 16
- weapon, or I think it was only on the weapons that we 17
- were looking at, or we can not respond to it. 18
- And so, Mr. Gregory, I'd ask for your 19
- suggestion as to how you want deal with that issue. 20
- MR. GREGORY: Well, I would recommend 21
- responding. We have somebody that couldn't hear
- something that is important. It would be fine with me if
- you did that by either documenting that or a read back.

- 12:15. 1
- MS. BROWN: There is one other issue. Juror 2
- 3 number 12 is -- she has the blue folder with a lot of
- papers in it that she carries in out of the out
- courtroom. I don't know if it's her personal things
- she's working on in the back or if she's taking her notes
- out of the courtroom, but --
- THE COURT: I'll remind them that they cannot
- do that. If you feel that we need to ask Ms. Stugart if
- she is taking notes out of the courtroom, I'll ask if you
- think that that needs to be done. They were all told to
- 12 leave their notebooks. And actually, the bailiffs have
- been watching to see if they're taking any notebooks that 13
- they've been writing in out.
- MS. BROWN: She brings it out of the jury 15
- 16 room with her and takes it back in, so I don't know what
- 17
- THE COURT: Okay. I'll remind them not to do 18
- 19 that.
- 20 MS. BROWN: Thank you.
- 21 THE COURT: Are you satisfied with that
- 22 response?
- MS. BROWN: Yes. 23
- THE COURT: Mr. Gregory?

Page 82

Page 84

- Either of those is fine with me. I don't know which
- would be more convenient for the Court. 2
- THE COURT: You say, "Documenting it." Would 3
- 4 it be --
- MR. GREGORY: Or telling him. 5
- THE COURT: -- acceptable to you to have me 6
- simply state what I just stated? 7
- 8 MR. GREGORY: Yes.
- THE COURT: Thank you, sir. Ms. Brown? 9
- MS. BROWN: That would be fine, Your Honor, 10
- 11 to just state it.
- THE COURT: It's my intention then that I 12
- will simply state that that's what the testimony was, but 13
- the jurors are entitled -- I would add that the jurors
- are entitled to use their own memories of what the
- 15 testimony was. And I will remind all of them that if 16
- they cannot hear something, they need to advise me. Is
- 17
- there anything that you would object to about that 18
- process, Mr. Gregory? 19
- MR. GREGORY: No, Your Honor. 20
- THE COURT: Anything that you would object 21
- 22 to, Ms. Brown or Ms. Henry?
- MS. BROWN: No, Your Honor. 23
- 24 THE COURT: Okay. Then we're in recess until

- MR. GREGORY: Yes, Your Honor. 1
- THE COURT: Ms. Henry? 2
- MS. HENRY: Your Honor, I also just had a 3
- question regarding the -- I guess the call logs that
- Mr. Gregory gave the jurors. I don't know that those
- were ever collected from the jurors, and I wasn't sure if
- that was the process to collect them, or if they're 7
- supposed to still have them at this point. 8
- THE COURT: Well, I don't think that they 9
- were ever returned. We can collect them because I told 10
- them that they'll be looking at the originals. They
- 12 don't seem to be thumbing through them now, so we can
- collect them. They were simply demonstrative so that
- they can follow along with the testimony. So we'll ask 14
- to collect them. 15
- 16 MS. HENRY: Thank you, Your Honor.
- THE COURT: Okay. Are you okay with that, 17
- Mr. Gregory? 18
- 19 MR. GREGORY: Yes.
- 20 THE COURT: We're in recess until 12:30.
- 21 (Recess was taken.)
- 22 THE COURT: We're back in session in case
- 14DI62, State of Nevada versus Tatiana Leibel. 23
- Mr. Gregory is here. Ms. Brown, Ms. Henry are here.

(21) Pages 81 - 84

Page 85

- Ms. Leibel is here, the translators are here, and let's
- bring the jury in unless you have something you want to 2
- discuss beforehand. 3
- MR. GREGORY: No, Your Honor.
- MS. BROWN: No, Your Honor. 5
- THE COURT: Thank you, folks. Have a seat, 6
- please. Counsel stipulate to the presence of the jury? 7
- MS. BROWN: Yes, Your Honor. 8
- MR. GREGORY: Yes, Your Honor. 9
- THE COURT: Thank you. Just before we broke 10
- for lunch, I received a note in one of the jurors 11
- indicating that that juror was not able to hear the
- testimony regarding the finding of fingerprints for
- either Mr. Leibel or Ms. Leibel on the weapon. I've 14
- discussed that question with counsel for both sides, and 15
- the response to the question is that the testimony was 16
- that there were no discovered prints from either 17
- Miss Leibel or Mr. Leibel. 18
- I would again remind you that it is your 19
- memories, your notes, and your memories that matter as 20
- oppose to the Court's. And if your memory's -- if any of 21
- the juror's memories of that testimony differs from what 22
- you've just been told, you'll be free to discuss that at
- the time that you deliberate. Until then, that's the

- 1 O. What do you do for a living?
- 2 A. I'm a sergeant with the Douglas County
- Sheriff's Office currently signed to the investigations
- O. How long have you been with the sheriff's
- office?
- 7 A. Twenty years.
- O. So as far as ranking within the
- investigations division. Captain Milby already testified.
- Would you be just under Captain Milby?
- 11 A. Yes, sir. He's my boss, and I'm the
- supervisor of investigators.
- 13 Q. Okay. Regarding the case at hand, did you
- have occasion to go to 452 Kent Way here in Douglas
- County, Nevada, on February 24th, 2014?
- 16 A. Yes, I did, sir.
- 17 O. And that was the day after the incident;
- 18 correct?
- 19 A. Yes, sir.
- 20 O. What was your purpose in going to the
- 21 residence on that day?
- 22 A. My purpose was to supervise the investigators
- 23 who were there executing a search warrant and to assist
- 24 them in that search.

Page 86

Page 88

- answer that the parties have agreed to provide you. The
- note that I received will be handed to the clerk, who
- will keep custody of it and make it part of the court
- file. Having addressed that, Mr. Gregory.
- MR. GREGORY: Your Honor, the State calls Jim 5 Halsey. 6
- THE COURT: Come on up. Sir, if you would please, face the clerk. Raise your right hand. 8
- JAMES HALSEY, 10
- having been first duly sworn, was 11
- examined and testified as follows: 12
- THE COURT: Thank you, sir. Come on up. 13
- Have a seat in the witness stand. And have some water, 14
- if you'd like. 15

9

18

- THE WITNESS: Okay. Thank you, sir. 16
- THE COURT: Mr. Gregory, Your Honor witness. 17
- DIRECT EXAMINATION 19
- BY MR. GREGORY:
- 21 Q. Thank you. Sir, please state your name and
- spell your last name.
- 23 A. My name is James Halsey. Last name is
- 24 spelled: H-a-l-s-e-y.

- 1 O. And specifically, did you play a role with
- 2 ceasing firearms in the residence?
- 3 A. Yes, sir.
- 4 O. And can you tell us generally, you aren't
- responsible for seizing the firearm that is used;
- correct?
- 7 A. That is correct, sir.
- O. You were involved with other firearms?
- A. Yes, sir. Other firearms were still in the
- residence.
- 11 Q. Can you just generally tell us about how many
- other firearms there were and what types they were.
- A. Yes, sir. There were six rifles. Well, five
- rifles and a shotgun that were mounted on a rack in the
- living room along the east wall, so I collected those. I
- also searched a safe that was in the garage. I was given
- information that there was a safe in the garage, that 17
- there were possibly firearms in there, so I went to
- search that. The safe was locked, so I had to use a pair
- of bolt cutters to open it. I re-secured it afterward,
- 20 but inside that safe, I found 12 firearms, 11 of which
- were handguns, one of which was a survival rifle.
- 23 O. Thank you. And were you also tasked with
- trying to retrieve shotgun pellets from the sheetrock?

Page 89

- 1 A. Yes, sir.
- 2 Q. Who assisted you with that?
- 3 A. Our evidence tech, John Barton.
- 4 O. Can you describe the process that you
- 5 employed.
- 6 A. Yes, sir. This was in the living room.
- 7 There's a short pony wall, a short wall like this that
- 8 separates the dining -- formal dining room area from the
- already living room, and the couch where this incident
- was reported to have occurred backed up against that 10
- 11 wall
- Behind that couch in the wall was a defect. 12
- 13 It was a hole in the wall, a small hole, and lined up
- with an area that it's believed the projectile, the
- projectile passed through the couch into the wall and
- then ultimately or possibly inside there because on the
- 17 other side of the wall, there was no exit. There was no
- 18 hole or anything, which made us believe something entered
- the wall but did not exit. So I cut out a around that
- defect hole. I cut out an proximate five-by-six-inch
- 21 rectangle of the drywall and looked inside the wall.
- 22 Inside there --
- 23 Q. If you could just stop there for a moment.
- 24 A. Yes, sir.

- THE COURT: Only 35 was admitted.
- 2 Q. (BY MR. GREGORY:) Okay. So if you could
- 3 then look at 36 through 39. And I'm just asking you
- first generally, what do those photographs depict?
- 5 A. It depicts a hole in the wall and then after
- I cut it out and what I examined inside of that.
- 7 O. Does it document your efforts to retrieve the
- pellets out of the wall?
- 9 A. Yes. sir.
- 10 O. And does it accurately document that?
- 11 A. Yes, sir.
- MR. GREGORY: Your Honor, I'd move for 12
- 13 admission of Exhibits 36 through 39.
- THE COURT: Each of them independently 14
- 15 accurately document that effort; is that correct?
- THE WITNESS: In sequence or no? 16
- THE COURT. They may be in sequence. I don't 17
- know. You can talk about that later. Do each of them 18
- independently document your effort? 19
- THE WITNESS: Yes, sir. 20
- THE COURT: Do you have an objection to these 21
- 22 exhibits?
- MS. BROWN: No, Your Honor. 23
- THE COURT: Then they are admitted. 24

Page 90

- 1 Q. I'm going to show you some exhibits.
- MR. GREGORY: May I approach the witness, 2
- Your Honor? 3
- THE COURT: You may, sir.
- 5 O. (BY MR. GREGORY:) Sir, I'm showing you
- 6 Exhibits 35 through 39. Can you just take a look at
- 7 those for a moment. Generally speaking, what do those
- 8 photographs show?
- 9 A. Well, the first two photographs show the
- 10 defect hole that was originally seen.
- THE COURT: Why don't we start by having you 11
- 12 talk about a specific exhibit. Tell us what number it
- 13 is.
- THE WITNESS: Yes, sir. 14
- THE COURT: And then I think Mr. Gregory is 15
- going to more specific questions as opposed to what they 16
- depict. 17
- MR. GREGORY: So if you could look at Exhibit 18
- Number 35 first. 19
- 20 THE COURT: And that has been admitted
- 21 already, sir.
- MR. GREGORY: May I check, Your Honor? Has 22
- 23 35 through 39?
- THE CLERK: Yes. Just 35. 24

- 1 Thirty-six, 37, 38, and 39 are admitted.
- (Exhibit Nos. 36-39 were admitted into evidence.)
- THE COURT: Thirty-five is already admitted. 3
- MR. GREGORY: Thank you. 4
- THE COURT: You can proceed with your
- examination.
- 7 Q. (BY MR. GREGORY:) Thank you. This is
- Exhibit 35. Is this the defect in the sheetrock that you
- 9 were talking about?
- 10 A. Yes, sir.
- THE COURT: Mr. Seddon, would you take the 11
- 13 O. (BY MR. GREGORY:) And this was directly
- 14 behind the couch in the living room?
- 15 A. Yes, sir.
- 16 Q. Exhibit Number 36, what is depicted there?
- 17 A. That is a closer shot of that same defect
- 18 hole with a ruler next to it and showing the direction of
- 19 the bullet hole.
- 20 O. You testified you cut the hole. Then what
- 21 did you do?
- 22 A. Then I looked inside of the wall, the hollow
- 23 space between the wall.
- 24 Q. And what did you observe?

State of Nevada vs Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

Page 93

- 1 A. I observed two pellets initially laying on
- 2 the sill plate down at the base of the wall just to the
- 3 interior of that.
- 4 Q. Show you Exhibit Number 37. What does
- 5 photograph depict?
- 6 A. Those are those two bullets that were laying
- 7 inside of there.
- 8 Q. I'm using my pen to point. Is this one of
- 9 the pellets?
- 10 A. Yes, sir.
- 11 Q. Is this the other one?
- 12 A. Yes, sir.
- 13 O. What did you do upon observing those?
- 14 A. Collected them as evidence.
- 15 Q. Are you familiar with ammunition?
- 16 A. Yes, sir.
- 17 O. Were those pellets consistent with shotgun
- 18 ammunition?
- 19 A. Yes, sir, with triple F ought.
- 20 Q. Showing you Exhibit 38. What did you do.
- 21 after you retrieved those two?
- 22 A. I examined -- the dining room is raised
- 23 higher than the living area, so there's the end of the
- 24 floor joist from that dining room are -- you can see them

- 1 A. I looked further, and it appeared there was
- 2 another object that was buried even further into the wood
- deeper than that third object.
- 4 Q. And I'll show you Exhibit Number 39. What
- does that photograph depict?
- 6 A. That is that fourth object that I saw inside
- 7 of there.
- 8 Q. And again, I'm using any pen. Am I pointing
- to the object you're talking about?
- 10 A. Yes, sir.
- 11 Q. What did you do then?
- 12 A. I dug that out and collected it also.
- 13 Q. And was it consistent with the other pellets?
- 14 A. Yes, sir.
- MR. GREGORY: Thank you, I have nothing 15
- further. 16

20

- THE COURT: Ms. Henry? Ms. Brown? 17
- MS. BROWN: Thank you, Your Honor. May I 18
- 19 have those, Tom? Thank you.
- **CROSS-EXAMINATION** 21
- BY MS. BROWN: 22
- 23 Q. And showing you again Exhibit 35, and this is
- 24 the defect in the wall?

Page 94

- 1 inside of that wall when I cut out that space. So I
- 2 looked to see if those pellets had struck something to
- 3 cause them to fall inside the wall. At the end of one of
- 4 those floor joists, I saw a defect, basically a chip in
- 5 the wood that made me believe that's where they struck,
- and so I examined that area further.
- 7 Q. And what did you find there?
- 8 A. Inside there, I found, embedded in the wood,
- 9 another object that appeared to be another pellet.
- 10 Q. Show you Exhibit 38. What does that
- 11 photograph depict?
- 12 A. That's the initial view of what I saw when I
- 13 looked at it inside of there.
- 14 O. What I'm pointing to, is that what you
- 15 thought might be another pellet?
- 16 A. Yes, sir.
- 17 Q. What did you do after making that
- 18 observation?
- 19 A. I dug it out with a pocket knife and
- 20 collected it.
- 21 Q. And when you did so, what was it?
- 22 A. It was in fact another object similar to the
- 23 other two that I'd already collected.
- 24 Q. How did you proceed next?

- 1 A. Yes, ma'am.
- 2 Q. And you cut out a rectangle at some point
- 3 around this?
- 4 A. Correct. Yes, ma'am.
- 5 Q. And this would be the rectangle you cut out?
- 6 A. Correct. The outer -- the white area that's
- 7 cut out there, the drywall, and then inside there is the
- end of that floor joist.
- 9 Q. And based on this photograph, you can't see
- where that hole was in relation to the piece of wall that
- 11 you cut out?
- 12 A. That's correct.
- 13 Q. Now, you said this was the first pellet; is
- 14 that correct?
- 15 A. No, ma'am. I said that's a pellet.
- 16 Q. A pellet. Sorry?
- 17 A. An object that -- do you want me to -- That
- was an object I saw inside the wood, but the first two
- 19 pellets, I looked down inside the wall. Inside, there's
- 20 a space between this drywall and the end of that joist,
- and inside, I saw two pellets laying on the sill at the 21
- 22 base of that.
- 23 O. Okay. So this would be -- The object I'm
- 24 pointing to that's kind of silvery towards the left of

4

15

January 29, 2015

Page 99

Page 100

- 1 the floor joist would be one of the pellets?
- 2 A. Yes, ma'am. That would be number three.
- 3 Q. And then showing you Exhibit Number 39,
- 4 there's another silver object, it looks like, next to a
- nail?
- A. Correct.
- 7 O. And was that the last?
- 8 A. Yes, ma'am.
- 9 Q. So those -- The pellets shown in Exhibit
- 10 Number 38 and the pellets shown in Exhibit 39 are
- actually -- are in different locations; is that correct?
- 12 A. They're in different locations in the fact of
- 39 is buried deeper in the wood, but they're in that same
- 14 location where you see 38 there. Thirty-nine is just
- behind it deeper in the wood. And you see that area that
- you're pointing to right there, that's a nail that's 16
- adjacent to it that I dug out.

this pellet was located?

6 A. That's correct. No, ma'am.

- 18 Q. So this nail is where in this picture? I'm
- 19 sorry. The nail in 39 is where in 38?
- 20 A. The nail was dug out because I was digging
- 21 through trying to find the other pellet, so I would --
- not knowing where it exactly it was in 38, I could not

measurements from the floor to where this was located,

4 Q. And the same when you removed the pellet from

angles, but sorry, Exhibit Number 38 and Exhibit

tell you, ma'am.

3 A. No, ma'am.

5 Number 39?

24 O. As to Exhibit Number 38, did you make any

- PIOTR KUBICZK, 1
- having been first duly sworn, was 2
- examined and testified as follows: 3
- THE COURT: Come on up and have a seat up 5
- here, sir. There's some water if you need it. 6
- 7 THE WITNESS: Thank you.
- 8 THE COURT: Sir, I see that you brought a
- folder with some papers in it. I'm going to ask that you
- do not open that folder and do not refer to your papers
- 11 unless you're directed to do so by me.
- 12 THE WITNESS: Okay.
- MR. GREGORY: Good afternoon, sir. 13
- THE WITNESS: Good afternoon. 14
- 16 DIRECT EXAMINATION
- BY MR. GREGORY: 17
- 18 Q. Can you please state your full name and spell
- your last name.
- 20 A. My name is Dr. Piotr: P-i-o-t-r. Kubiczk:
- 21 K-u-b-i-c-z-k.
- 22 Q. What do you do for a living?
- 23 A. I'm a forensic pathologist medical examiner
- 24 at Washoe County Office of Coronary Medical Examiners.

Page 98

- 1 Q. And do you perform autopsies?
- 2 A. Yes, I do.
- 3 Q. Did you perform an autopsy on Harry Leibel?

- 6 experience, if you could go through your medical training
- 7 for us.
- A. First, I completed my medical education at
- Medical University of Warsaw, Poland. Then I proceeded
- with my postgraduate education. I completed my pathology
- residency at Ball Memorial Hospital, Muncie, Indiana.
- 12 And then after that, I completed one year of fellowship
- in forensic pathology at Montgomery County Office of 13
- Coronary in Dayton, Ohio. Then I qualified and passed 14
- Board examinations in anatomic pathology and forensic
- 16 pathology.
- 17 Q. What certifications do you have?
- 18 A. I'm a Board certified in anatomic pathology
- 19 and forensic pathology.
- 20 Q. What does a forensic pathologist do?
- 21 A. Let's start from the beginning. Pathology is
- 22 a medical science which is preoccupied with studying
- disease processes, pathology processes in human bodies.
- Then forensic pathology, it's a subspecialty of pathology

- 5 Q. Let's talk a little bit about your medical

- Number 39 are actually the same location just different angles from outside that cutout space?

7 O. And these are just taken from different

- 11 A. Yes, ma'am.
- MS. BROWN: Thank you. I have no further 12
- 13 questions.
- THE COURT: Redirect? 14
- MR. GREGORY: Nothing further, Your Honor. 15
- THE COURT: Sergeant Halsey, thank you for
- being here, sir. 17
- THE WITNESS: Thank you, sir. 18
- THE COURT: You're excused. 19
- MR. GREGORY: The State calls Dr. Kubiczk. 20
- THE COURT: Come on up, sir. If you could 21
- pause right there and face the clerk, raise your right
- hand, please.

24

(25) Pages 97 - 100

Page 104

Page 101

- which applies the knowledge of natural diseases and
- pathologic processes and injuries at the court of law. Q. Thank you. Approximately how many autopsies 3
- have you performed?
- A. So far, I have performed more than 3,200
- autopsies. 6
- O. Can you describe for me the difference
- between cause of death and manner of death.
- A. Cause of death is the reason or injury that
- actually causes disease and death. It could be gunshot 10
- wound. It could be heart attack. It could be some sort 11
- of infection, pneumonia. So this is cause of death. 12
- Manner of death describes how the person died. 13
- In our State of Nevada, we have the following 14
- manners of death: Natural, suicide, accident, homicide, 15
- and undetermined manner of death. Manner of death was 1.6
- actually invented in the United States in 1910, and the 17
- main purpose of mention of manner of death was for 18
- statistical purposes because it's much easier to 19
- categorize deaths using manner of death such as natural 20
- death versus homicides versus suicides, and this can be 21
- done -- this information can be used for other studies 22
- and could be used for morbidity, mortality studies, could 23
- be also used for government projects to provide money for

- 1 the investigation. Would that be accurate?
- 2 A. Yes.
- 3 Q. And in the State of Nevada, who determines
- manner of death?
- A. Actually, in our state, medical examiners and
- coroners are able to determine the cause of death. It
- depends on, basically, jurisdiction. In Washoe County
- where I work, medical examiners establish cause and
- manner of death. In other counties, actually coroners
- establish the manner of death.
- O. And in Douglas County?
- 12 A. This is sheriff office of coroner establishes
- this manner of death.
- O. So your function in this case was to
- establish the cause of death; correct?
- A. Yes.
- O. And, Doctor, have you been qualified as an
- expert in other district courts here in the State of
- Nevada?
- A. Yes. 20
- 21 MR. GREGORY: Your Honor, I'd ask that you
- make a finding that Dr. Kubiczk is a qualified
- pathologist qualified to render opinions in the case
- regarding cause of death.

- 1 THE COURT: Any objection?
- MS. BROWN: No objection, Your Honor. 2
- 3 THE COURT: I'll make that finding. It
- appears that he has the qualifications. The Court so
- 5 finds.
- Q. (BY MR. GREGORY:) You indicated you
- performed the autopsy on Harry Leibel. Do you recall
- when you that occurred?
- A. Yes. This was February 24th, 2014 at 11:10
- 10 a.m.
- 11 Q. Where was that autopsy performed?
- A. The autopsy was performed at our autopsy
- suite at Washoe County Office of Medical Examiner Coroner
- at 10 Pyramid Avenue. Reno, Nevada.
- Q. In conducting that autopsy, did you follow
- the protocol of methodologies that you've been trained
- 17 in?
- A. Yes. 18
- THE COURT: Doctor, I'm going to ask you to
- speak up a little bit for me if you would please, sir. 20
- Thank you. 21
- MR. GREGORY: May I have Exhibits 40 through 22
- 23
 - THE COURT: Forty through 55 he has? Okay.

- certain grounds to study or address issues, for example,
- with suicides or certain types of diseases. 2
- O. How do pathologists go about determining
- cause of death?
- A. Cause of death is autopsy dependent, meaning
- we perform the full autopsy as a postmortem examination
- to determine cause of death. In most of the cases, we 7
- are able to determine lesion or injury that caused the 8
- decedent's death.
- Q. If a pathologist was going to determine
- manner of death, what would that involve?
- A. Manner of death is again how a person died, 12
- and this is investigation-dependent subject. This is 13
- subject that is determined based on investigation of 14
- circumstances of death. So of course we establish the 15
- cause of death through the autopsy, but how the person
- died, the term manner of death, we have to request 17
- 18 investigative agencies, sheriff's office, police
- departments, to perform full investigations. In 19 difficult cases, very extensive investigations performed 20
- with additional ancillary studies such as ballistics 21
- studies, for example, a weapon used.
- 23 Q. If I understood correctly, when you're
- 24 talking at manner of death, you consider the autopsy plus

Page 105

- 1 Before we go any further, Mr. Gregory, we've discussed
- 2 this issue before.
- 3 Ms. Brown, are you anticipating -- you'll
- 4 have to tell me what it is -- to which of these are you
- 5 anticipating an objection to any of these?
- 6 MS. BROWN: No. Any photos?
- 7 THE COURT: Yes.
- 8 MS. BROWN: No, no photos.
- 9 THE COURT: Thank you. Then you may proceed.
- 10 Q. (BY MR. GREGORY:) Doctor, during the course
- 11 of the autopsy, were photographs taken along the way?
- 12 A. Yes.
- 13 O. Would those photographs help you in your
- 14 testimony before the jury today?
- 15 A. Yes.
- 16 Q. Show you Exhibits 40 through 55. If you
- 17 could just take a moment to look through those, please.
- 18 Doctor, are those all photographs that were taken during
- 19 Harry Leibel's autopsy?
- 20 A. Yes.
- 21 Q. And do they accurately depict what you
- 22 observed during the course of the autopsy?
- 23 A. Yes.
- MR. GREGORY: I'd move for their admission,

- 1 can hear you.
- 2 MS. BROWN: Works good out on the sidewalk.
- 3 THE COURT: Pardon?
- MS. BROWN: I said it works good out on the
- 5 sidewalk.
- 6 THE COURT: How about tapping it for me?
- 7 Thank you, ma'am.
- 8 Q. (BY MR. GREGORY:) Doctor, showing you
- 9 Exhibit 40. It will be on the monitor there. What does
- 10 that does that photograph depict?
- 11 A. This is a photograph of decedent's face.
- 12 This called identification photograph. We can see also
- 13 our case number for this particular decedent, so it was
- 14 14-0548VOU. VOU indicates data scan. And so we see on
- 15 the bottom of the picture, there's a scale with the case
- 16 number and then, for identification purposes, decedent's
- 17 face.
- 18 Q. Doctor, did you observe any injuries to the
- 19 right side of Harry Leibel's torso?
- 20 A. Yes.
- 21 O. Can you describe where you saw the injury?
- 22 A. There was an entrance gunshot wound present
- 23 on the right lateral aspect of the chest, the middle
- 24 axillary line.

Page 106

- 1 Your Honor. And again, that's Exhibits 40 through 55.
- 2 MS. BROWN: No objection.
- 3 THE COURT: Forty through 55 are admitted.
- 4 (Exhibit Nos. 40-55 were was admitted
- 5 into evidence.)
- 6 Q. (BY MR. GREGORY:) I'll take those, Doctor.
- 7 Doctor, did you obtain the general characteristics of a
- B height and weight of Mr. Leibel?
- 9 A. Yes.
- 10 Q. What were those?
- 11 A. He was 170 pounds, 67 inches. That's five
- 12 feet seven inches tall, and his appearance was consistent
- 13 with age of 65 years.
- 14 O. Now, there are some exhibits that were left
- 15 up here that I'm going to return. They are exhibits from
- 16 the former witness, Exhibits 35, 37, 36, 39, and 38.
- 17 THE COURT: Thank you. Ms. Brown, would you
- 18 make sure your microphone is working. How about the one
- 19 on your lapel?
- 20 MS. BROWN: Is working or not working?
- 21 THE COURT: Working. I'd like it to work.
- 22 You can turn it off if you're having a conversation, but
- 23 it was reported to me that you weren't picking up very
- 24 well in the last witness, and I want to make sure that we

- 1 Q. And during the autopsy, is the subject
- 2 cleaned up before you actually begin the autopsy?
- з A. Yes.
- 4 Q. Let me show you Exhibit Number 41. What does
- 5 that photograph depict?
- 6 A. This photograph shows decedent's right aspect
- 7 of his body, and then again we can see here the scale
- 8 with the case number identifying this decedent. And
- 9 also, on the right lateral aspect of the chest, we can
- see an entrance wound right above the scale.
- 11 O. And can you give further description as far
- 12 as measurements go of where that injury was located on
- 13 Mr. Leibel.
- 14 A. This injury was more than 90 inches below the
- 15 apex of the scalp, and it was quarter inch in diameter.
- 16 It had circumferential abrasion. It did not have
- 17 circumferential searing on the area or burning
- 18 surrounding this wound.
- 19 Q. What is the significance?
- 20 THE INTERPRETER: Your Honor, I cannot hear
- 21 the witness. Can you please --
- 22 THE COURT: Ma'am, I'm sorry.
- 23 THE INTERPRETER: The interpreter cannot hear
- the witness. Can you please advise the witness to speak

- 1 up a little?
- 2 THE COURT: Again, could you speak up a
- 3 little bit more. And perhaps, sir, I know that you want
- 4 to address the jury. There is a microphone in front of
- 5 you, and perhaps if you could face the microphone,
- 6 everyone could hear you a little better. Thank you.
- THE WITNESS: Sorry.
- B THE COURT: No. You're doing fine, sir.
- 9 Thank you.
- MR. GREGORY: Does this microphone work?
- 11 THE COURT: Yes.
- MR. GREGORY: I could give the doctor my
- 13 microphone, if that would help.
- 14 THE COURT: Well, let's try this. We'll see
- 15 how it works. Thank you, sir.
- 16 Q. (BY MR. GREGORY:) So, Doctor, you indicated
- 17 that -- you were starting to describe where on
- 18 Mr. Leibel's body the defect was.
- 19 A. Yes. The defect that we can see here in the
- 20 central part of this photograph right above the scale is
- 21 the entrance gunshot wound of the chest. It is round,
- 22 quarter-inch in diameter, and has circumferential
- 23 abrasion, but there is no circumferential searing,
- 24 meaning burning around the edges. There is no soot, no

- 1 range. So lack of gunpowder stippling, searing, this
- 2 indicates, especially searing, indicates it's not a
- 3 contact gunshot wound.
- 4 Of course, decedent was wearing clothing that
- 5 could have stopped the gunpowder particles, unburned
- 6 gunpowder particles from reaching the skin surface, so
- 7 this is why I called this undetermined cause of death,
- 8 undetermined range gunshot wound, meaning that it is not
- 9 a contact range, but I cannot say this was intermediate
- 10 range or distant range gunshot wound because detecting
- 11 unburned gunpowder particles and gunpowder residue in
- 12 general on clothing is done by different investigating
- 13 agency. Those are ballistics experts who can determine
- 14 the true range of fire.
- 15 Q. Doctor, while we're talking about sooting and
- 16 stippling and searing, did you see any of those three
- 17 things on Mr. Leibel's right arm?
- 18 A. No, I didn't see that. I mean, could you --
- 19 Sorry. Could you be specific? You said left arm?
- 20 Q. On his right arm.
- 21 A. On his right arm. No, I didn't see that.
- 22 Q. Showing you Exhibit Number 42, what does that
- 23 photograph depict?
- 24 A. This is up-close photograph of the entrance

Page 110

- gunpowder particles or gunpowder stippling present on theskin surface.
- 3 Q. What is stippling?
- 4 A. Surrounding the wound.
- 5 Q. I'm sorry, Doctor. What is stippling?
- 6 A. Let me explain this. When the firearm is
- 7 fired, it's not only the bullet that leaves the barrel of
- 8 the gun. You have also hot causes and unburned gunpowder
- 9 particles. A certain distance between the gun barrel and
- the skin surface, those unburned gunpowder particles can
- 10 the skin surface, those unburned gunpowder particles car
- 11 travel and hit the skin surface surrounding the entrance
- 12 gunshot wound.
- 13 Q. Doctor, what --
- 14 A. Now --
- 15 Q. -- if I could interrupt you. Sorry for doing
- 16 that. I need to be quiet and let you finish, but what
- 17 does the lack of stippling, sooting and searing, why was
- 18 that significant to you?
- 19 A. Lack of searing or soot on the skin surface,
- 20 especially searing, indicates that this is not a contact
- 21 gunshot wound. Lack of gunpowder stippling or those
- 22 abrasions caused by unburned gunpowder particles that I
- 23 mentioned before, presence of those on the skin surface
- 24 is called intermediate range of fire. Intermediate

- 1 gunshot wound. We can see it is round. We have
- 2 circumferential abrasion, and we do not see, again,
- 3 searing or burns around the edges of the wound, and we do
- 4 not see any gunpowder stippling or soot or gunpowder
- 5 particles on the skin surface surrounding the wound.
- 6 Q. Showing you Exhibit Number 43. What is that
- 7 a photograph of, Doctor?
- 8 A. This is a photograph representing decedent's
- 9 open chest. On the right side of the photograph, there
- 10 will be decedent's head. On the left side of decedent's
- 11 -- of the left side of this photograph, there will be
- 12 decedent's abdomen, and in the middle, we see open chest
- cavity after all organs were removed from this cavity.
- 14 This includes both lungs and heart.
- This photograph represents a defect, a tissue
- defect that exists in the right lateral aspect of
- 17 decedent's chest. This corresponds, of course, to
- 18 entrance gunshot wound, which we saw before on the skin
- 19 surface. This is how this wound entrance wound looks
- 20 from inside the open chest. We can see there is a large
- 21 tissue defect that encompasses lateral aspect of right
- 22 ribs, number five and six.
- 23 O. Thank you, Doctor. Next, showing you Exhibit
- 44. What does that photograph show, Doctor?

Page 113

- 1 A. This photograph represents a posterior or the
- 2 back aspect of decedent's right lung. The projectile,
- 3 when it traveled through the body, perforated the right
- 4 aspect of the chest, right lung, right dome of diaphragm.
- 5 Diaphragm is a muscular membrane that divides the chest
- 6 from the abdomen. Then perforated the pulmonary trunk --
- 7 That's a large vessel that provides blood into the lungs
- 8 from the heart -- and then perforated the left lung, then
- 9 perforated left upper aspect of the chest, and then
- 10 perforated the tissues of the left arm, and it exited
- 11 from the exit wound in the left arm.
- So this is left lung, posterior aspect of the
- 13 left lung, and we can see here in the middle aspect of
- 14 the lung, there is a defect, bloody defect, which you see
- 15 is dark red here. This is the area where the bullet
- 16 perforated right lung.
- 17 Q. And is that significant to you to show the
- 18 path of travel of the projectiles through the body?
- 19 A. Yes. This is very important to see the
- 20 damage done by the projectile.
- 21 Q. You mentioned it also perforated the
- 22 pulmonary trunk. Where is the pulmonary trunk in
- 23 reference to the lungs?
- 24 A. Pulmonary trunk, it's a large vessel, artery

- 1 aspect of our abdomen, and it should be actually sitting
- 2 underneath the 12th rib.
- 3 Q. And how a person sits affects where the liver
- 4 is?
- 5 A. Yes, of course. The liver can move.
- 6 Q. Showing you Exhibit Number 46. What is that?
- 7 A. This is a photograph representing posterior
- 8 back aspect of decedent's left lung, and we can see here
- 9 there is tissue defect kind of closer to the top of the
- 10 photograph. Yeah, that's it. This is the tissue defect
- 11 caused by the bullet traveling through this area of the
- 12 left lung.
- 13 Q. Exhibit 47.
- 14 A. This is again a photograph representing left
- 15 aspect of the chest after the organs such as lungs and
- 16 heart were moved, and you can see here in the corner
- 17 there is a defect, tissue defect in the first intercostal
- 18 space. Intercostal space is the space between ribs, and
- 19 first one is between first and second rib. So here you
- 20 can see tissue defect corresponds to the wound pathway of
- 21 the bullet that already exited the left lung and now went
- 22 through the left aspect of the chest into the left arm.
- 23 Q. So whereabouts then on his body is that
- 24 defect?

10

Page 114

Page 116

- 1 that connects the right ventricle of the heart with both
- 2 lungs, so it's actually sitting very close to the heart,
- 3 and it's the dividing going to the right and left
- 4 pulmonary artery. So it is very, very close to lungs.
- 5 Q. Showing you Exhibit 45. What does that
- 6 photograph show?
- 7 A. As I mentioned before, the wound pathway of
- 8 the bullet traveled through the liver, so we can see that
- 9 this photograph represents liver. And actually, the
- 10 defect tissue, defect is situated on the upper aspect of
- 11 the liver. Right. Yes, that's it. That's the area
- 12 where the bullet perforated the liver. It caused, of
- 13 course, the laceration of the tissue and loss of blood in
- 14 this area, there was about 100 milliliters of liquid
- 15 blood in the decedent's abdomen.
- Now, the wound pathway through the chest
- 17 caused 600 milliliters of liquid blood in the right chest
- 18 cavity and about 800 milliliters of liquid blood in left
- 19 chest cavity, and there was about 50 milliliters of
- 20 liquid blood around the heart.
- 21 O. Where is the liver in the body?
- 22 A. The liver is on the right side of our
- 23 abdomen. It's actually, most of the time, it's sitting
- 24 covered by ribcage, so it's sitting on the right upper

- 1 A. It's left upper aspect of the chest.
- 2 Q. Exhibit Number 48?
- 3 THE COURT: Before we go any further,
- 4 Mr. Gregory, I know that you're trying to help the jury,
- but the record should reflect what you've been doing is
- 6 taking a pen and pointing at certain parts of the
- 7 pictures. Doctor, I know that you've seen that. So what
- 8 I'm going to ask that you do -- I know that you and
- 9 Mr. Gregory have gone over these photographs before.
 - What I'm going to ask you to do is if he
- 11 points at anything that you're not talking about, it's
- important that you say so. His use of the pen is to
- assist the jury in understanding your testimony, but I
- 14 want you to examine where he's looking and where he's
- 15 pointing the pen and make sure that the area that he's
- 16 pointing the pen at is where you're testifying about.
- 17 And I think that you've been doing that, but I want the
- 18 record to be clear that that's what you're doing. Will
- 19 you agree to do that, sir?
- 20 THE WITNESS: Yes, I will. I can come up
- 21 there and point myself.
- 22 THE COURT: Well, that's another way to do
- this, and there hasn't been an objection to this manner,
- but I just want the record to be clear that Mr. Gregory

(29) Pages 113 - 116

- 1 is not testifying. That is, the doctor is testifying,
- 2 and he's, Mr. Gregory, is simply trying to point out what
- 3 you're talking about. Okay? So let's go on.
- 4 Q. So, Doctor, this is Exhibit 48. What does
- 5 that photograph depict?
- 6 A. This photograph is up-close representation of
- 7 this tissue defect in the first intercostal space on the
- 8 left side. Again, we can see it's round with some ragged
- 9 edges, and it's in the first intercostal space between
- 10 the first and second left rib, and this defect was
- 11 created by a bullet comes out from the left lung going
- 12 into the -- through the left aspect of the chest and
- 13 going to into the left arm.
- 14 O. Exhibit Number 49. What does that photograph
- 15 show?
- 16 A. This photograph represents decedent's left
- 17 arm and left aspect of his chest, and of course you can
- 18 see also his head and face. Now, on the anterior aspect
- 19 of his left arm, you can see a dark red defect surrounded
- 20 by purple irregular area. This defect is the exit
- 21 gunshot wound.
- 22 Q. Doctor, am I pointing out directly where the
- 23 exit wound was?
- 24 A. Yes.

- 1 projectile was found in the right lung. Then one
- 2 fragment of projectile was found in the left lung, and
- 3 then there were two fragments of projectile found in the
- 4 left arm, and then there was one fragment of projectile
- 5 found in the sleeve of the decedent's robe.
- 6 O. Which sleeve? His right sleeve or his left
- 7 sleeve?
- 8 A. Left sleeve.
- 9 O. Consistent with where the exit wound was?
- 10 A. Yes
- MR. GREGORY: May I approach the witness,
- 12 Your Honor?
- 13 THE COURT: You may, sir.
- 14 Q. (BY MR. GREGORY:) Sir, I'm showing you
- 15 Exhibits 133 through 136. If you could look at those to
- 16 yourself, please. Were x-rays taken of Mr. Leibel during
- 17 the course of the autopsy?
- 18 A. Yes.
- 19 Q. Do those photographs accurately depict the x-
- 20 x-rays that you observed?
- 21 A. Yes.
- 22 MR. GREGORY: Your Honor, I'd move for
- 23 admission of those four exhibits?
- MS. BROWN: No objection.

Page 118

Page 120

- 1 Q. And by an exit wound, what do you mean by
- 2 that?
- 3 A. Exit wound is a wound created by exiting
- 4 projectile or a fragment of projectile.
- 5 Q. Were there any other exit wounds found on
- 6 Mr. Leibel's body?
- 7 A. In reference to this particular gunshot
- 8 wound, no.
- 9 O. Exhibit Number 50. What does that
- 10 photograph?
- 11 A. This is up-close photograph of the exit
- 12 gunshot wound on the anterior aspect of the left arm.
- 13 You can see they're irregular red tissue defect
- 14 surrounded by purple area. This is like bruising.
- 15 Q. Doctor, did you, during the course of the
- 16 autopsy, locate any projectiles inside of the decedent?
- 17 A. Yes.
- 18 Q. Approximately how many?
- 19 A. Six fragments of projectile.
- 20 Q. Do you recall where those were found?
- 21 A. Yes.
- 22 O. Can you please tell the jury.
- 23 A. One fragment of projectile was found next to
- 24 the entrance gunshot wound. Then one fragment of the

- 1 THE COURT: 133, 134, 135, and 136 are
- 2 admitted.
- 3 (Exhibit Nos. 133-136 were admitted into evidence.)
- 4 O. (BY MR. GREGORY:) We'll see how these
- 5 project. Exhibit Number 133, Doctor, can you see that
- 6 good enough up there, or would you rather see the actual
- 7 photograph?
- 8 A. No, that's good.
- 9 O. It's okay? All right. Tell us what that is.
- 10 A. It's an x-ray of the right side of decedent's
- 11 chest and right arm, and you can see here that there are
- 12 some smaller regular metallic fragments present within
- 13 the left lateral aspect of the wall of the chest.
- 14 O. May I try to point to them to --
- 15 A. Yes, please. Yes, those are the fragments of
- 16 the projectile.
- 17 Q. And I'll point to another one.
- 18 A. Yes. It's another fragment, smaller fragment
- 19 of the projectile.
- 20 Q. And I ask you to look at the actual exhibit
- 21 and just ask if there are any other projectiles that you
- 22 can see in this particular exhibit.
- 23 A. Yes, there is one more irregular fragment of
- 24 metallic projectile present within the right lung, and

Page 121

- 1 they're also very small fragments of metallic projectile
- 2 present in the midchest.
- 3 O. Exhibit 134. What does that x-ray show?
- 4 A. This x-ray shows decedent's chest, and we can
- 5 see here lots of irregular light gray objects present
- 6 within the right aspect of the chest and left aspect of
- 7 the chest and parts of the left arm on the left side.
- 8 O. I'm going to attempt to point out the ones on
- 9 the left arm. Am I in the right location?
- 10 A. Yes.
- 11 Q. Okay. And as far as in the chest cavity,
- 12 would that be a projectile?
- 13 A. Yes, this is fragment of a projectile.
- 14 Q. And how about here?
- 15 A. No. This is part of clotting.
- 16 Q. And what about this right here?
- 17 A. Yes, this is fragment of projectile present
- 18 in the lung on the left side.
- 19 Q. And there seems to be a lot of little
- 20 pinpoints around this area. What would those be?
- 21 A. Those are very small, basically insignificant
- 22 fragments of projectile present within the mediastinum
- 23 central part of the chest.
- THE COURT: We're going to pause for a

- 1 white, light tan objects present along the left humerus
- 2 or the left bone on the left arm, and those are
- 3 fragments, metallic fragments of the projectile that
- 4 passed through there. And those fragments can be visible
- 5 in the central part of this photograph.
- 6 O. From that x-ray, would you be able to show us
- 7 -- a few moments ago, we looked at autopsy photographs of
- 8 where the projectiles went into the right arm. Would you
- 9 be able from this x-ray to indicate where that was in
- 10 relationship to these projectiles?
- 11 A. I mean, it would be very difficult to
- 12 pinpoint the exact area of exit, but --
- 13 Q. And next, I'll show you Exhibit Number 135.
- 14 What is that?
- 15 A. It's a photograph of the right lung, and you
- 16 can see in central part lots of small fragments of
- 17 metallic projectile.
- 18 O. What is this needle-shaped object down in the
- 19 lower left-hand corner?
- 20 A. We use metallic objects like needles to
- 21 orient us which side is left and which side is right, and
- 22 this x-ray was taken for the purpose of looking for
- 23 larger fragments of metallic projectile to verify we
- 24 removed all of the significant, ballistically significant

Page 122

- 1 minute. Mr. Gregory, you're free to do this as you wish,2 but I want to point out to you that as you mark things
- 3 like that, the record that we're establishing will never
- 4 show what you're talking about.
 - If you would like, sir, you may have the
- 6 witness actually mark something on your exhibit either
- 7 with Sharpey or a pen, circle it in some fashion, and
- a identify if so there that there's a permanent record of
- 9 what you're talking about.
- 10 MR. GREGORY: Thank you. I think I'll take
- 11 you up on that suggestion.
- 12 THE COURT: Because if you don't do that,
- 13 there is no record of what you're talking about.
- MR. GREGORY: If I could just finish here,
- 15 and thenally ask the witness to do that.
- 16 THE COURT: Okay.
- 17 Q. (BY MR. GREGORY:) Let's look at these two
- 18 other exhibits first, Doctor. Exhibit Number 136. What
- 19 is that?
- 20 A. This is an x-ray of the decedent's left arm,
- 21 and we can see that there is, of course, left humerus.
- 22 That's the bone in the left arm. And this occupies the
- 23 central and right side of the central and right side of
- 24 this picture, and then there are lots of small irregular

- 1 fragments of the metallic projectile.
- 2 MR. GREGORY: Your Honor, do you have a
- 3 marking pen, or Madame Clerk?
- 4 THE COURT: I can get you one. I don't know
- 5 if we have a -- I'd like you to use some kind of
- 6 permanent pen. There's a Sharpey up here that the clerk
- 7 has. Blue is fine.
- 8 Q. (BY MR. GREGORY:) I'll take it. Okay,
- 9 Doctor. I'm going to show you Exhibit Number 133. This
- 10 was the first x-ray that we looked at. If you could just
- 11 circle with the --
- 12 THE COURT: One moment, Ms. Brown or
- 13 Ms. Henry, you're welcome to come up and watch what the
- 14 doctor does.
- 15 O. (BY MR. GREGORY:) If you could circle with
- 16 Sharpey objects you identify as being projectiles. On
- 17 that exhibit, there's two areas that you circled.
- 18 A. There's a third area which has all of those
- 19 very small metallic --
- 20 THE INTERPRETER: Your Honor, I cannot hear
- 21 what the witness is saying.
- THE COURT: A little bit louder, please. He
- 23 says there is a third area which has a very small
- 24 projectile.

Page 128

Page 125

- THE WITNESS: Very small fragments of 1
- 2 projectile.
- THE COURT: Thank you. The record will 3
- reflect that the doctor is marking these exhibits with a
- blue Sharpey.
- 6 Q. (BY MR. GREGORY:) Exhibit Number 134, I
- would ask you to do the same thing. 7
- 8 A. Here I marked on this exhibit four areas with
- fragments of metallic projectile.
- 10 Q. Thank you. Exhibit 136?
- 11 A. On this photograph, I marked also one big
- area with fragments of metallic projectile.
- O. Exhibit 135.
- 14 A. Here I marked three main areas with metallic
- 15 projectile.
- 16 Q. Thank you. Doctor, based upon your
- 17 assessment of that particular gunshot, can you tell us
- 18 the path of travel of the projectiles through
- 19 Mr. Leibel's body?
- 20 A. Yes. The wound trajectory, wound trajectory
- 21 side of decedent's body from -- it was from decedent's
- 22 right to left, back to front, and upwards.
- 23 Q. Can you, after looking at these exhibits and
- 24 conducting your autopsy, do you have an opinion regarding

- of the left wrist and anterior aspect of the left
- O. Showing you Exhibit Number 51. What does
- that photograph?
- A. That photograph represents dorsal aspect, the
- back aspect of the decedent's left hand. In the central
- part, you can see an irregular tissue tearing laceration
- that is surrounded by soot. This is the entrance shotgun
- 10 O. If I could stop you there because I think
- 11 that's important. I'm going to point out what I think
- 12 you're telling me as being the entrance wound.
- 13 A. Yes, that is correct.
- 14 O. Okay. And I'm going to have you go ahead and
- circle that with the pen.
- 16 A. So on this exhibit, I've circled the entrance
- shotgun wound. 1.7
- O. Can you kind of demonstrate on your hand 18
- whereabouts that would be? 19
- 20 A. It's the back of the hand, left hand, and I'm
- pointing here in the more or less central part of the
- 22 back of my left hand.
- 23 O. What other observations did you make
- 24 regarding the entrance wound?

- 1 A. It is an irregular tissue defect, and again,
- 2 it's surrounded by soot. It's dark residue present near
- the entrance of shotgun wound, which you can see here
- between 6:00 and 12:00 o'clock location.
- O. And what is looks like there's an object at
- the top. What is that?
- 7 A. Actually, here on the upper part of the
- wrist, left wrist, this is left wrist, you can see a
- wadding, ballistic wadding, sticking out of exit shotgun
- wound. So the central part is an entrance gunshot wound,
- and right there on the top of decedent's left wrist,
- there will be an exit shotgun wound with piece of the
- plastic wadding sticking out of it.
- Q. The plastic wadding would be from the shotgun 14
- shell itself? 15
- 16 A. Yes.
- THE COURT: Mr. Gregory, would you return the 17
- exhibit to the witness and let him mark what he's
- referring to and circle it and put a W next to that, the 19
- W standing for wadding. 20
- THE WITNESS: So I circled an area of the 21
- exit shotgun wound with the piece of the wadding sticking
- out of it, and I marked it with letter W.
- 24 Q. (BY MR. GREGORY:) And would you then put it

- 1 the position of the arm at the time of the shot, the left
- arm?
- 3 A. Yes. Most likely, it was elevated.
- 4 O. Why do you say that?
- 5 A. Because first, based on the x-rays, we can
- 6 see the wound pathway going through the right aspect of
- 7 the chest, right lung, liver, and pulmonary trunk, left
- lung, entering then into the left upper aspect of the 8
- chest, and then exiting from the anterior aspect of the 10 left arm some distance from the axilla.
- 11 Q. Can you demonstrate with your left arm, when
- 12 you say "elevated," give us -- demonstrate that for us.
- 13 A. This way.
- 14 O. Thank you.
- 15 A. So I present the left arm elevated.
- 16 Q. Let the record reflect the witness had his
- 17 left arm elevated with his elbow up to even with his ear.
- 18 A. Yes. But this is, of course, one of the
- possibilities.
- 20 O. Okay. Did you observe any other gunshots on
- 21 Mr. Leibel?
- 22 A. Yes.
- 23 Q. Where was that?
- 24 A. I observed perforating complex shotgun wound

7

Page 131

Page 129

- back up so it can be displayed?
- MR. GREGORY: Yes. 2
- THE COURT: Thank you. Thank you, sir. 3
- Proceed with your examination.
- Q. (BY MR. GREGORY:) Exhibit Number 52. What
- does that picture show us?
- 7 A. This is a raised wound of the anterior aspect
- of decedent's left shoulder. So this photograph
- represents decedent's left shoulder, and this is the
- central part of the photograph. Then of course you can, 10
- on top of the picture, you can see parts of the 11
- decedent's head, and then in the central part of this 12
- photograph, you can see all of the area of the gray 13
- wound, and this is the part of the perforating complex 14
- shotgun wound of the wrist and left shoulder. 1.5
- O. In looking at that wound, are you able to
- tell which way the bullet was traveling or the 17
- projectiles were traveling? 18
- A. Actually, up close, we can observe tissue 19
- pattern inside this wound indicating that the projectile
- or projectiles traveled from front to back without much
- of indication left to right, and they also traveled 22
- 23 upwards.
- 24 Q. I'm going to ask you to, with arrows and your

- 1 And I'm not convinced that the projector is really
- demonstrating that good enough, so I would ask to public
- this to the jurors. 3
- THE COURT: They'll get the opportunity to
- see them at the close of the case. Do you have other
- questions of this witness? 6
 - MR. GREGORY: I do. Thank you.
- THE COURT: I'm going to ask you to go on 8
- with your examination. They can examine those at the
- close of the case. I don't want to pause the case right
- now. We've got about another hour left with the jury
- today, and I'm going to take a very brief break right now
- because I am going to keep them here for another hour, 13
- and so I'm going to give them a break just for a few
- minutes, and I'd like you all to just understand that we
- are going to make this kind of a short break, so I'm 16
- 17 going to ask you to try to take a break and be back in
- your chairs close 2:00 o'clock as you can. And that's 18 about eight or nine minutes. If you need a little bit 19
- more time, you can let me know, but let's try make good 20
- use of the time we have today. So you are excused for 21
- 22 the moment.
- 23 While you are on this recess, though,
- 24 however, Ladies and Gentlemen, we're going to take about

Page 130

- a nine-minute break. And during the recess, you are
- admonished not to talk or converse among yourselves or
- with anyone else on any subject connected with this trial 3
- or read, watch, or listen to any report of or commentary
- on the trial or any person connected with this trial by
- any medium of information, including, without limitation, 6
- newspapers, television, video or Internet. You're not to
- form or express any opinion on any subject connected with 8
- the trial until the case is finally submitted to you. 9
- Thank you. We'll take a brief break. 10
- Ms. Brown, as you're probably aware, 11
- Ms. Holsen is listening in on us, and she was the one who 12
- gave me an e-mail that she couldn't hear you. So it may
- be that the jury isn't saying they couldn't here and I 14
- could hear you, but maybe you just weren't picking up. 15
- MS. BROWN: Okay. And maybe I had it off 16
- 17 because I turned it off, walked outside and talked to
- Tatiana. 18
- 19 THE COURT: Thank you. We're in recess.
- Record this, please. While we are on recess, please 20
- don't discuss your testimony with anyone other than the 21
- three attorneys. Thank you very much, sir. 22
- THE WITNESS: Thank you. 23
- (Recess was taken.) 24

- 1 blue pen, indicate the direction of travel.
- The photograph, I indicated the direction of
- 3 travel of the projectiles.
- 4 O. Displaying Exhibit 52 and then Exhibit 53.
- Is that a close-up of the same wound?
- A. Yes. This is a close-up photograph of this
- wound, graze wound created by projectiles that exited
- from the left wrist and traveled to graze the anterior
- aspect of left shoulder. 9
- Q. Showing you Exhibit 54. What does that 10
- photograph show? 11
- A. This is photograph that shows parts of our 12
- measurement of length of right arm. The length was
- measured from the decedent's right armpit all the way to 14
- the top of decedent's left third finger. 15
- Q. And Exhibit 55? 16
- A. This is up-close photograph of decedent's 17
- right hand while we were measuring the distance between
- the decedent's right armpit and the tip of the right
- third finger, and the distance is about between 24, 25 20
- inches. 21
- MR. GREGORY: Your Honor, I would ask that 22
- the jury have an opportunity to see these photos at this 23
- point. They're important to be able to see them clearly.

Page 136

Page 133

THE COURT: We are back in session in case 1 14DI062. Mr. Gregory is present, Ms. Brown and Ms. Henry 2

are present. Ms. Leibel is present. The interpreters 3

are present, and the witness is still on the stand. I do 4

want to let you know that when we break at 3:00, I intend

to give you a longer break. Okay? So just for your 6

benefit. Let's bring the jury in. 7

Please have a seat. Thank you. Will you 8

stipulate to the presence of the jury? q

MR. GREGORY: Yes. Your Honor. 10

MS, BROWN: Yes, Your Honor. 11

THE COURT: Thank you. Would you continue 12

with your examination, please. 13

MR. GREGORY: I will, Your Honor. My 74

microphone went out on me, so I'm going to use this one, 15

if that's okay. 16

THE COURT: The little handheld one --

MR. GREGORY: Yes. 18

THE COURT: -- or the one that you wear on 19

your lapel? Do we charge those with a battery, or do we 20

plug them in and charge them? We'll find out. We will 21

investigate that. Thank you, Mr. Gregory. 22

23 24

1

17

The rigor mortis starts with the muscles of

the jaw, then muscles of the face, then muscles of upper

extremities and it continues to fully develop. It's

fully developed after six to about six to 12 hours after

death, and when the decomposition changes start, it.

disappears about 36 to 48 hours after death. Of course,

again, rigor mortis setting in may be accelerated by the

environmental factors such as temperature, higher

temperature of the body or the environment, and can be 9

slowed down, the setting of the rigor mortis can be

slowed down by colder temperatures such as temperatures 11

in the cooler. 12

Q. What happens to the body's muscles

immediately upon death?

A. In order to -- They basically become

contracted. They are contracted. And to alleviate this

contraction, we need a special molecule, which is carrier

of energy, it's called ATP, and this molecule after death 18

is not produced anymore. This molecule causes the

muscles to relax. So we have live person. We can

contract the muscles and relax muscles without any

problem because we have big supply of those

energy-carrying molecules that help our muscles to relax.

After death, those molecules get exhausted, and they are

Page 134

not produced anymore after death, so the muscles stay

contracted. This is why we observe increasing stiffness 2

of the muscles because there's not enough of this

energy-carrying molecule causing muscles to relax. So

this is how the rigor mortis or stiffness after death

develops. 6

O. Would you expect to see rigor mortis 15

minutes after death?

A. Well, there is a situation which is called

cadaveric spasm. This is rigor mortis that sets in right

after death, but to see that, we need some criteria or

some conditions that help this condition to develop.

This abrupt spontaneous stiffness of muscles after death 13

occurs in situations where there is a very high

temperature of environment or the body or the decedent.

before dying, was performing very exhausting extensive 16

activities, exercises. 17

And what's most very important, this is very 18

rare condition, this cadaveric spasm. The literature,

major authors in forensic pathology literature quote that

they saw cadaveric spasm maybe twice in their 30-year

long career. So it's very, very rare, rare condition. 22

23 It may occur, but we have to have certain conditions for

the cadaveric spasm to develop. Again, very high

CONTINUED DIRECT EXAMINATION

BY MR. GREGORY: 2

3 O. Thank you. Doctor, during the course of your

testimony just a little bit ago, you talked about there

being some blood inside Mr. Leibel's chest cavity. Can 5

you further articulate that? 6

A. So during my internal examination of the 7

decedent's body, I found that he had 600 milliliters of

liquid blood in his right chest cavity and 800 9

milliliters of liquid blood in left chest cavity, and he 10

had a hundred milliliters of liquid blood in his abdomen, 11

and he had about 50 milliliters of liquid blood in 12

pericardial sac. It's a sac that surrounds the heart. 13

This hemorrhage or this bleeding came from the injuries 14

inflicted by the projectile passing through those organs

and the chest and abdomen. 16

17 Q. Doctor, what is rigor mortis?

18 A. Rigor mortis is postmortem change. It's

basically stiffness of muscles that develops after death.

It first appears within about two hours after death, but

again, this depends on especially the temperature of the 21

body and the temperature of the environment. If the 22

temperature of the environment or the body is elevated

significantly, then the rigor mortis may start earlier.

23

Page 137

- 1 temperature of the body or very high temperature of the
- 2 environment, and/or very intensive activity that the
- 3 decedent was performing before dying.
- 4 Q. When you say extremely high temperatures, how
- 5 high?
- 6 A. Let's say you could see this more often in
- 7 Las Vegas where the temperatures maybe 125, or in cars,
- 8 you can see temperatures of 140 degrees Farenheit, so in
- 9 this setting, you may actually expect sometimes to see
- 10 cadaveric spasm. Not here in middle of winter, for
- 11 example. It becomes very, very rare phenomenon.
- 12 Q. What about 75 to 80 degrees? Would that be
- 13 that type of extreme temperature?
- 14 A. No.
- 15 O. And would somebody sitting in a couch be the
- 16 type of physical exertion that might occasion the
- 17 cadaveric spasm?
- 18 A. No.
- 19 Q. In the absence of cadaveric spasm, would you
- 20 expect to see rigor mortis 15 minutes after death?
- 21 A. No, rather not.
- 22 MR. GREGORY: Nothing further.
- 23 MS. BROWN: Good afternoon, Doctor.
- 24 THE WITNESS: Good afternoon.

- 1 Q. So this was the date that you concluded the
- 2 report?
- 3 A. Yes. It's the date when I completed the
- 4 report. Yes.
- 5 Q. Before you performed the autopsy on
- 6 Mr. Leibel, did you review any photographs or written
- 7 reports in the case?
- 8 A. Before completion of my report?
- 9 Q. No, before the autopsy, were you provided any
- 10 information concerning the case?
- 11 A. Yes.
- 12 Q. And what type of information were you
- 13 provided?
- 14 A. It was just general information about the
- 15 case, how the decedent was found at his residence.
- 16 That's it.
- 17 Q. And was anybody else present during the
- 18 autopsy?
- 19 A. Yes.
- 20 Q. Who was that?
- 21 A. It was FIS technician, Mrs. Marci Margritier,
- 22 and then there was sheriff deputy from Douglas County was
- 23 Jeff.
- 24 Q. Schemenauer?

Page 138

Page 140

- 1 CROSS-EXAMINATION
- 2 BY MS. BROWN:
- 3 Q. Now, when you performed the autopsy on
- 4 Mr. Leibel, it was the following day after his death; is
- 5 that correct?
- 6 A. Yes.
- 7 Q. So it was 24 hours later that you were
- 8 observing his condition; is that correct?
- A. Yes.
- 10 Q. And at the conclusion of your examination,
- 11 you've prepared a report; is that correct?
- 12 A. Yes.
- 13 O. And that was dated on August 21st?
- 14 A. I don't have the report from front of me, so
- 15 I don't remember that exact date.
- 16 O. I'm handing you a document labeled MEK
- 17 0548DOU. Do you recognize that document?
- 18 A. Yes.
- 19 Q. And is that the autopsy protocol you
- 20 prepared?
- 21 A. Yes. This first two pages, those are the
- 22 cover page and investigation report from our office. And
- 23 the first page, that's the beginning of my autopsy
- 24 report, and the date I signed was August 21st, 2014.

- 1 A. Schemenauer. Right.
- 2 Q. Did he also provide you a verbal synopsis
- 3 concerning the case?
- 4 A. Yes.
- 5 Q. And it was indicated to you that the
- 6 sheriff's department suspected homicide?
- 7 A. I don't remember that.
- 8 Q. They requested a homicide protocol in the
- 9 case?
- 10 A. Yes. It was highly suspicion case, so in
- 11 those cases, you perform homicide protocols.
- 12 O. Excuse me?
- 13 A. Yeah.
- 14 Q. When you begin your autopsy or at the
- 15 beginning, you noted that there was a broken body bag
- 16 seal. Was that broken by a member of your -- Mr. Leibel
- 17 was present and arrived in a body bag; is that correct?
- 18 A. Yes.
- 19 Q. And then there was a broken body bag seal.
- 20 Was that done by someone in your office?
- 21 A. It was my office. Right.
- 22 Q. And before you did the autopsy, that's when
- 23 you did the x-rays?
- 24 A. Yes.

(35) Pages 137 - 140

Page 144

Page 141

- 1 Q. Were the x-rays were done?
- They were done. 2 A.
- 3 O. So and Mr. Leibel was still closed?
- 4 A. Yes.
- 5 O. When that was completed? And I'm showing you
- Exhibit Number 134. Did you previously identify
- something that may be an object of clothing?
- 8 A. Yes.
- 9 Q. And where was that?
- 10 A. Object of clothing.
- 11 Q. Just put a C by it.
- 12 A. Would you rephrase the question? I have not
- -- I identified on this photograph fragments of metallic
- 14 projectiles.
- 15 Q. And you were asked about the fragment to the
- 16 left?
- 17 A. Yes. It's an object on the right upper
- 18 aspect of the chest, which is round, and there's another
- 19 one very similar, same object on the left aspect of the
- 20 body, and I'm indicating those by arrows.
- 21 Q. And those were not --
- 22 A. Those are not fragments of metallic

1 A. Most likely, they're a part of clothing.

2 O. And your initial examination, did you notice

(Whereupon, Exhibit No. 137 was marked

THE COURT: Did you show those to

THE COURT: Would you, please.

16 Q. And is that a photograph of Mr. Leibel?

19 clothing, and he's still in the body bag.

20 O. Okay. And on his hands, there are --

17 A. It's a photograph of decedent's body, and he

12 Q. (BY MS. BROWN:) Showing you what's been

13 marked as Exhibit 137. Do you recognize what's shown in

18 was brought to our office, and he was still wearing some

THE COURT: Why don't we get it admitted

MS. BROWN: Why don't we. I'd offer Exhibit

23 projectiles.

4

5

6

7

8

9

10

11

21

23

22 first.

137.

24 Q. Okay. Did you say they were?

3 anything else? Get these marked.

MS. BROWN: I'm sorry.

THE COURT: 130?

THE CLERK: 137.

for identification.)

Mr. Gregory?

14 that photo?

15 A. Yes.

- 1 MR. GREGORY: No objection.
- THE COURT: 137 is admitted. 2
- (Exhibit No. 137 was admitted into evidence.)
- Q. (BY MS. BROWN:) Just put in up here and we
- can talk. Showing you what's been marked Exhibit 137 for
- identification or admitted as Exhibit 137. On
- Mr. Leibel's hands, there appears to be some kind of bag?
- 8 A. Yes.
- Q. And did he arrive in that condition?
- 10 A. Yes.
- 11 O. Do you know why his hands were placed in
- 12 those bags?
- 13 A. They're always placed in cases when we have
- 14 gunshot wounds. The paper bags protect the hands and so
- 15 the gunshot residue can be collected afterwards.
- 16 Q. Was any gunshot residue testing done during
- the autopsy?
- 18 A. I don't know. This is done by other
- 19 investigating agency.
- 20 Q. But the hands were in bagged and unbagged at
- 21 some point?
- 22 A. Yes.
- 23 Q. I'm showing you what's been marked as Exhibit
- 24 138. Do you recognize that?

Page 142

- 1 A. I can't see very well.
- THE COURT: Well, we'll eel get the lights
- back up for you.
- THE WITNESS: Yes.
- Q. (BY MS. BROWN:) Do you recognize what that's
- a photograph of?
- 7 A. This is photograph of the body bag when he
- was brought.
- 9 Q. And was any object discovered in the body
- 10 bag?
- 11 A. Yes.
- 12 Q. And what was that?
- 13 A. It was a fragment of the plastic wadding.
- THE INTERPRETER: I'm sorry. This is the 14
- interpreter speaking. Fragment of? 15
- 16 THE COURT: Fragment of the plastic wadding.
- 17 Now, are you going to introduce that photograph?
- MS. BROWN: Once he identifies it. 18
- THE COURT: Okay. 19
- 20 Q. (BY MS. BROWN:) And is does this photograph
- 21 include that plastic wadding?
- THE COURT: Well, now, that's testifying from 22
- 23 the photograph. So before you ask that question, let's
- see if we can get it admitted.

Pages 141 - 144 (36)

Capitol Reporters 775-882-5322

Page 145

- 1 MS. BROWN: Your Honor, I'd offer Exhibit
- 2 138.
- 3 MR. GREGORY: No objection.
- 4 THE COURT: Then 138 is admitted, and you mow
- 5 may ask that question, ma'am.
- 6 (Exhibit No. 138 was admitted into evidence.)
- 7 Q. (BY MS. BROWN:) And is that a photograph of
- 8 the plastic wadding that was located in the back?
- 9 A. There was a plastic object like transparent
- 10 present on this part of the body bag.
- 11 Q. Okay. And you noted in your autopsy protocol
- 12 that there was a piece of plastic wadding found in the
- 13 body bag; is that correct?
- 14 A. That is correct.
- 15 Q. And you noted in your report that at this
- 16 point, Mr. Leibel was in full rigor mortis; is that
- 17 correct?
- 18 A. That is correct.
- 19 Q. And again, this was 24 hours since his death?
- 20 A. Yes.
- 21 Q. And on the timeframe of rigor mortis, you
- 22 said generally around two hours. This is a rather large
- 23 timeframe when rigor mortis can either start or cease;
- 24 isn't that correct?

- 1 Mr. Leibel, but two distinct -- from two distinct
- 2 injuries; is that correct? Sorry. We talked about an
- 3 entrance wound, an exit wound, and then another wound on
- 4 his shoulder. Was that a pattern, so that would be
- 5 consistent with one shot?
- 6 A. Yes. I mean, there are two gunshot wounds on
- 7 the decedent's body.
- 8 Q. Okay. I was going to ask you about the other
- 9 one too. And then the other one is on the right hands
- 10 underneath the armpit; is that correct?
- 11 A. That's the entrance gunshot wound.
- 12 Q. And that wound to the trunk would not have
- 13 been immediately fatal; is that correct?
- 14 A. No. It would take few minutes for a person
- 15 to die.
- 16 Q. And the gunshot wound to the left wrist and
- 17 shoulder was not in and of itself fatal in any way?
- 18 A. It was not immediately fatal, but if left
- 19 untreated, it would cause death by loss of blood or shock
- 20 or infection.
- 21 O. And in discussing the wound to the right side
- of the chest, you called it a middle -- you stated it was
- 23 in the middle axillary line. What's that?
- 24 A. It's basically the left or right aspect of

Page 146

. 1, ,1 ,

Page 148

- 1 A. Could you repeat the question?
- 2 O. The timeframe in which rigor mortis either
- 3 develops or ceases is a very large timeframe?
- 4 A. Yes, it is a very large timeframe, and it's
- 5 approximation.
- 6 Q. And as to the cadaveric spasms, you listed
- 7 several considerations or several conditions that you
- 8 believe had to exist in order for cadaveric spasms to
- 9 occur: the heat, and extreme exercise?
- 10 A. It's not I believe this, but this is
- 11 information that is presented by the forensic pathology
- 12 literature.
- 13 O. And is there another condition where there's
- 14 traumatic injury that can cause cadaveric spasms?
- 15 A. If it is associated with exertion, extreme
- 16 exertion, yes, it may be associated cadaveric spasm, but
- 17 again, we have to understand the mechanisms of it.
- 18 O. And when we spoke back I believe it was like
- 19 December 23rd, and at that time, you even brought out an
- 20 example of people from the plane wreck in Southeast Asia
- 21 that were being brought out of the ocean with cadaveric
- 22 spasms; is that correct?
- 23 A. No, I don't recall giving that information.
- 24 O. Now, you'd noted multiple gunshot wounds on

- 1 the chest. It can be -- We can draw imaginary lines that
- 2 serve to orient the injuries or other findings better.
- 3 And so the line starts from the armpit and continues down
- 4 the middle of the side aspect of the chest. That's the
- 5 middle line. And then you have anterior line, which is
- 6 frontal to the middle axillary line, and then you have
- 7 posterior line, which is in the back of the middle line.
- 8 And those are just imaginary lines used for better
- 9 orientation of position of the injury or other findings
- 10 on decedent's body.
- 11 O. And so being on the middle axillary line
- means it's basically in the middle of that zone
- 13 underneath the armpit?
- 14 A. Yes, as we saw it on the photograph.
- 15 Q. And when you give the wound path is from back
- to front, it doesn't mean somewhere in the back coming
- 17 out the front. It means the entrance wound was more back
- 18 from the exit wound; is that correct?
- 19 A. Yes, that indicates just how the bullet
- 20 traveled inside the decedent's body.
- 21 O. But back-to-front does not mean the wound
- 22 itself, entrance wound itself was anywhere towards the
- 23 back of the body?
- 24 A. I mean, this way closer to the -- it is, you

(37) Pages 145 - 148

Page 149

- 1 know -- Could you rephrase the question?
- 2 Q. Yes. Most people, when they think of back to
- 3 front, they're thinking it's back here and this is front.
- 5 Q. Okay. This wound is on the midaxillary line,
- so it's right midline there?
- Yes.
- O. It's not on the back. It's not --
- A. Yes.
- 10 O. -- on the front. So the path the bullet took
- 11 was this the entrance wound was more towards back than
- 12 the exit wound?
- 13 A. Yes.
- 14 O. Is that correct?
- 15 A. Yes.
- 16 O. And in discussing this injury -- and I'm
- 17 showing you Exhibit 134 -- and these two with the arrows
- are the two that you noted as not fragments. Possibly --
- 19 A. That's correct.
- 20 Q. -- pieces of clothing?
- 21 A. Piece of clothing or KG pods. They can also
- 22 leave this type of picture. But anyway, they are not
- 23 fragments of projectile.
- 24 Q. And then this larger circle or kind of

- 1 know which one, was inside the clothing actually?
- 2 A. The largest one. This one which is the most
 - towards the bottom, this one. Yes, this is the one that
 - was sitting in decedent's left sleeve robe sleeve.
 - Q. And you stated you felt it was most likely
- that Mr. Leibel had his left arm up or extended when this
- -- when he received these injuries; is that correct?
- 8 A. Yes.
- Q. Thank you. But it could have happened in
- another manner; correct?
- A. It's possible.
- 12 O. That even if his arm was down when those
- fragments or a larger fragment hit the bone, it could
- have sent those fragments down the arm?
- A. Well, it is possible but rather unlikely
- because when you have a projectile or fragment of
- projectile and we saw the projectile was basically
- falling apart as it travels through the body, when this
- projectile hits the bone, either it breaks the bone or it
- doesn't, then it will leave some area at the point of the
- impact full of very small, very minute fragments of
- metallic fragments. And when you look at the x-ray that
- we just saw --23
- 24 Q. Let me ask you this.

- MR. GREGORY: Your Honor, he was answering
- the question.
- THE COURT: I think he already answered the 3
- question. You can follow up.
- 5 Q. (BY MS. BROWN:) Thank you, Your Honor. The
- question was, this is a possibility; correct?
- 7 A. Yes, it is possible.
- Q. And a larger fragment could hit a bone and
- produce those smaller fragments in the arm?
- A. The larger fragment, when it hits the bone,
- it can break it or not, but there will be some evidence
- that the projectile, fragment projectile hit the bone in
- certain point and --
- 14 O. Thank you.
- 15 A. -- I don't see that here.
- 16 Q. And on the wrist and shoulder injury, on the
- wrist injury, you gave no estimate of range? 17
- 18 A. No.
- 19 Q. On the internal examination, there were
- 20 surgery scars present on the abdomen?
- 21 A. Yes.
- 22 Q. And were you aware Mr. Leibel had a history
- of cancer of the bladder?
- 24 A. No.

- 1 oblique circle in the center was very small fragments?
- 2 A. Yes, very small fragments.
- 3 Q. And then the one to the right of this and to
- the left of that center fragment, there appears to be
- 5 larger fragments?
- 6 A. Yes.
- 7 Q. So this projectile was breaking up as it went
- through the body?
- A. Yes, that is correct.
- 10 O. So it wasn't a single bullet that was going
- 11 through the body. It was eventually just fragments that
- were going; is that correct?
- 13 A. Yes. The term is called "shower."
- 14 Q. And showing you Exhibit 136, again, this is
- 15 showing the left arm?
- 16 A. Yes.
- 17 Q. And again, there's multiple fragments?
- 18 A. Yes. They're very small.
- 19 Q. And this was taken --
- 20 A. Fragments, yes.
- 21 Q. And this was taken -- very small -- taken
- 22 with Mr. Leibel's still had clothing on?
- 23 A. Yes.
- 24 Q. And at least one of those fragments, we don't

Page 155

- 1 Q. Were you aware he had any history of cancer
- 2 at all?
- 3 A. No.
- 4 O. You also indicated that the lumen contained
- 5 50 milligrams of like tan, thick, chunky fluid?
- 6 A. How much?
- 7 Q. I'm sorry. 500.
- 8 A. Yes, 500.
- 9 O. And what is the lumen?
- 10 A. Lumen refers basically to inside of the
- 11 stomach.
- 12 Q. In examining the liver, did you see any signs
- 13 of liver disease?
- 14 A. Well, he had status post cholecystectomy.
- 15 His gallbladder was removed. So one of the scars present
- 16 on his abdomen corresponds to surgery involving removal
- 17 of gallbladder.
- 18 Q. Did you see any signs of liver disease?
- 19 A. Not really.
- 20 O. Were there any microscopic slides taken of
- 21 any of the tissues or organs?
- 22 A. No.
- 23 Q. And there were kidney stone present?
- 24 A. Yes, there were kidney stones in the right

- 1 A. Exhibit 54 shows partial measurements of
- 2 decedent's left arm. Right arm. Sorry.
- 3 O. And Exhibit Number 55 is a continuation of
- 4 that photograph?
- 5 A. Yes. This shows the up-close photograph of
- 6 right decedent's right hand and the scale and the
- 7 measurement tape.
- 8 Q. And in that photograph, it shows his middle
- 9 finger extending to 24 inches?
- 10 A. Yes, it was 24 inches.
- 11 O. And this was taken, the photographs were
- taken when Mr. Leibel was in full rigor mortis?
- 13 A. Yes.
- 14 Q. And one of the symptoms of full rigor mortis
- 15 is the muscles contracting; is that correct?
- 16 A. Yes, he had the rigor mortis before measuring
- 17 hand or arm.
- 18 Q. And does that photograph -- Let me take this
- 19 up.
- 20 THE COURT: For the record, you're displaying
- 21 exhibit ---
- MS. BROWN: Number 54.
- 23 THE COURT: Thank you, ma'am.
- 24 Q. (BY MS. BROWN:) And we had discussed

Page 154

- 1 kidney.
- 2 Q. And was Mr. Leibel's blood submitted for
- 3 toxicology?
- 4 A. Yes.
- 5 O. And did you get a report back on that?
- 6 A. Yes.
- 7 Q. And what were the results?
- 8 A. Peripheral blood showed presence of marijuana
- 9 metabolites.
- JUROR NO. 14: Your Honor, I got a problem.
- 11 His last answer to the question, what was in the blood.
- 12 I didn't hear that real good.
- THE COURT: Would you repeat your answer
- 14 please, sir.
- THE WITNESS: Yes, Your Honor. Peripheral
- 16 blood that was tested showed presence of marijuana
- 17 metabolites.
- 18 THE COURT: Did you get that, sir?
- 19 JUROR NO. 14: Yes, sir. Sorry.
- THE COURT: No apology is necessary. I
- 21 encourage all of you if you cannot hear, you let me know.
- 22 We'll make certain that you do.
- 23 Q. (BY MS. BROWN:) And showing you again
- 24 Exhibit 54, what's shown in that photograph?

- 1 previously we met back in December, that is distinct arch
- 2 in the wrist here, and then you go from Exhibit 54 into
- 3 Exhibit 55, you can also see the curving of the fingers.
- 4 And you couldn't say how much that would affect his
- 5 reach; is that correct?
- 6 A. Yes. It's why I give between 24, 25 inches.
- 7 It's approximation in length.
- 8 Q. An approximation?
- 9 A. Yes.
- 10 O. Just so we can try this, if this is my arm
- 11 flat against there, what would the reach, or can you
- 12 position it here? Oops. I lost that again?
- 13 THE COURT: It's quite all right.
- THE WITNESS: Measure going to armpit, and
- 15 tried to measure distance between the armpit and tip of
- the third right finger in this case, so it would be 25
- 17 and a quarter of an inch in length.
- 18 THE COURT: The record will reflect that the
- 19 doctor is measuring Ms. Brown's arm length from
- 20 apparently -- I can't see where he started. Apparently,
- 21 her armpit to the tip of one of her fingers.
- MS. BROWN: Middle finger.
- 23 THE COURT: Middle finger. Thank you.
- 24 Q. (BY MS. BROWN:) And if my hand is arched and

Page 159

Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

1	fingers	curled	back,	do :	I I	lose	some -	-
---	---------	--------	-------	------	-----	------	--------	---

- 2 A. Yes, of course.
- How many? з Q.
- 4 A. This way?
- 5 Q. Yes.
- 6 A. About three-quarters of the inch.
- 7 Q. What was it before?
- 8 A. Twenty-four and a quarter. But of course
- everybody is different.
- 10 O. In talking about the length of an arm, you
- 11 aren't talking about a person's actual reach, are you?
- 13 O. Okay. So just by the -- if I'm standing here
- 14 with my microphone on my -- Sorry. Okay. And so
- 15 standing here with my arms straight down at my side, that
- 16 would be my the length of my arms?
- 17 A. You mean how measured? Because there are
- 18 different measurements and different definitions like
- 19 wingspan or arm reach or length of the right and left
- 20 arm. Sometimes you have different. Sometimes --
- 21 O. Okav. Well, let's do my right arm then. So
- 22 at this natural position, this would be kind of viewed as
- 23 the length of my arm?
- 24 A. Length of the arm measured. I don't

- 1 marijuana were?
- 2 A. No.
- 3 Q. And would reviewing the report refresh your
- memory?
- A. Yes, but I'm not a forensic toxicologist,
- THE COURT: Sir, please just listen to the 7
- question and answer only the question.
- THE WITNESS: I'm sorry. Of course.
- 10 O. (BY MS. BROWN:) Would reviewing your report
- refresh your recollection of the toxicology report that
- came back? 12
- 13 A. Yes.
- THE COURT: And I assume that Mr. Gregory has 14
- 15 a copy of that report.
- MR. GREGORY: I do, Your Honor. 16
- MS. BROWN: Yes, Your Honor. 17
- THE COURT: And so you understand that he's 18
- 19 reviewing what?
- MS. BROWN: The case information, the first 20
- page is entitled case information in the case number
- 140548DOU. 22
- 23 THE COURT: Thank you, ma'am.
- 24 Q. (BY MS. BROWN:) And it's been -- you've

Page 158

- 1 understand the question.
- 2 O. This is as far as I can reach with my arm
- 3 like this.
- 4 A. Yes.
- 5 O. And if I, for example, just dropped that
- shoulder, I can gain more reach; is that correct?
- 7 A. Yes, of course.
- 8 Q. So in a flexible body, you can get more reach
- past where your arm naturally falls.
- 10 A. Yes.
- 11 O. And if I want to reach for something over
- 12 there. I'm not defined by the end of my fingers here, is
- 13 that correct? This wouldn't be the farthest I could
- 14 reach. I have my arm extended out to the left-hand side.
- 15 A. You can change positions of the body and this
- 16 way extend.
- 17 Q. Yeah, like bend at the waist.
- 18 A. Yes.
- 19 Q. Is that correct?
- 20 A. Yes.
- 21 Q. So I can gain some additional reach with
- 22 movement of a flexible body; is that correct?
- 23 A. Yes.
- 24 Q. Do you recall what the levels of the

- previously identified that same document as containing
- your autopsy protocol.
- з A. Yes.
- O. And what were the results of the testing,
- blood testing that was done? What's the active THC
- level?
- 7 A. Peripheral blood showed presence of delta
- 90C, which was 20 nanograms per milliliter. Delta 9
- carboxy C, which was 31 nanograms per millimeter.
- THE INTERPRETER: Your Honor --10
- THE COURT: Wait a minute. You have to go a 11
- little bit slower for our interpreters, please. 12
- MS. BROWN: They get messed up on numbers. 13
- 14 THE COURT: Would you repeat that, please,
- 15 sir.
- THE WITNESS: Yes. So peripheral blood 16
- showed presence of delta nine THC that was 20 nanograms 17
- per milliliter. Then there was delta nine carboxy THC.
- It was 31 nanograms per millimeter, and then liver tissue 19
- showed presence of delta nine carboxy THC, which was 580
- nanograms per gram. 21
- Q. (BY MS. BROWN:) And that was the only
- narcotic that was found present in the blood?
- 24 A. Yes. There was only one.

Ρ	а	a	е	1	6	1

- MS. BROWN: Thank you. I have no further 1
- questions. 2
- 3 THE COURT: Mr. Gregory.
- MR. GREGORY: Thank you, Your Honor. 4
- THE COURT: I think both of those are 5
- 6 working.
- 7
- 8 REDIRECT EXAMINATION
- BY MR. GREGORY: 9
- Q. Doctor, did Harry Leibel die from kidney
- stones?
- 12 A. No.
- 13 Q. Did he die from liver disease?
- 14 A. No.
- 15 Q. How about cancer?
- 16 A. No.
- 17 O. How about marijuana?
- 18 A. No.
- 19 Q. What did he die from?
- 20 A. He died from multiple gunshot wounds.
- And, Doctor, if the bullet projectiles were 21 Q.
- going up into Mr. Leibel's left arm and his arm was down
- and the projectile hit a bone causing the projectiles to
- go down into his arm, what would you expect to see in the

- 1 morning.
- During this recess, you're admonished not to
- talk or converse among yourselves or with anyone else on
- any subject connected with this trial. You're not to
- read, watch, or listen to any report of or commentary on
- the trial or any person connected with this trial by any
- medium of information including, without limitation,
- newspapers, television, radio, or Internet. You're not
- to form or express any opinion on any subject connected 9
- with the trial until the case is finally submitted to 10
- you. I thank you for your attention today. You are 11
- excused. We will be in recess. 12
- 13 I want to give -- You've got a very short
- break earlier. I know you need to do some organizing
- before we start the next process, so my suggestion is to
- give you -- if I give you 20 minutes, is that enough time
- for everybody to have a break? Do you need longer than
- 18 that, Mr. Gregory?
- MR. GREGORY: Thirty would be appreciated. 19
- 20 THE COURT: Can we still get done by 5:00.
- 21 approximately?
- MR. GREGORY: From my standpoint, yes. 22
- 23 THE COURT: Ms. Brown?
- MS. BROWN: I believe so. 24

Page 162

Page 164

- 1 x-rays?
- 2 A. First of all, you may see fracture of the
- bone in this area, but if it's not present, at least
- you're going to see some debris present next to this bone
- next to the site of the impact on the bone. And here, we
- don't see that.
- 7 Q. And that is why it's your opinion that his
- arm was in the up position when he was shot?
- A. Yes. 9
- MR. GREGORY: Thank you. Nothing further. 10
- MS. BROWN: Nothing further. 11
- THE COURT: Doctor, thank you for your 12
- presence today. You are excused, sir. 13
- Well. I don't think it behooves us to try to 14
- take six minutes of someone else's testimony before we 15
- release the jury, so we will let you go for the evening.
- And I'd ask that you be back and we'll start promptly at 17
- 9:00 o'clock tomorrow morning. Yesterday, you were 18
- provided, for your convenience, copies of one of the
- exhibits. I'm going to ask that you not take those with 20
- you and that you leave them with Mr. Seddon as you leave 21
- the room so that we can collect those. Don't take them
- with you. Don't do anything else with them. We'll 23
- collect them all back. See you at 9:00 o'clock in the

- THE COURT: Then I'm going to give you 30 1
- 2 minutes. It may be that you can have some discussions
- and resolve some of this too. I don't know. You're
- certainly not obligated to do that in any fashion. We
- are in recess for 30 minutes, which puts us back in this
- room in our chairs at 25 minutes after the hour. And I
- want to remind you, the interpreters are leaving at 5:00
- o'clock. That means that they're in a car at 5:02.
- 9 Thank you.
- 10 (Recess was taken.)
- 11 THE COURT: We're back in session in case
- 12 14DI26, State of Nevada versus Leibel. Mr. Gregory is
- present representing the State. Ms. Henry and Ms. Brown 13
- are here representing Miss Leibel, who is here together 14
- with the interpreters. We're here outside the presence 15
- 16 of the jury in order to hear a Motion in Limine. I'll
- take evidence regarding that motion unless there's been 17
- 18 some agreement reached. It's your motion, ma'am.
- MS. BROWN: Your Honor, I would just ask that 19
- there be an offer of proof by Mr. Noedel concerning this 20 matter. 21
- THE COURT: Well, Mr. Noedel doesn't make 22
- offers of proof. The State might. And I don't know 23
- whether they want to do that or not. And so again, it's

(41) Pages 161 - 164

- 1 a your motion. I don't know if you've talked to
- 2 Mr. Gregory about him doing that, agreeing on how you'll
- 3 proceed. Mr. Gregory?
- 4 MR. GREGORY: No, we have not spoken about
- 5 that.
- 6 THE COURT: Well, it's your motion, ma'am.
- 7 Call any witnesses.
- 8 MS. BROWN: Yes, I'll call Mr. Noedel.
- 9 THE COURT: Is Mr. Noedel here?
- 10 THE WITNESS: Yes.
- 11 THE COURT: Come forward, sir. If you would
- 12 pause about right there, turn and face the clerk.

13

- 14 MATTHEW NOEDEL,
- 15 having been first duly sworn, was
- 16 examined and testified as follows:

17

- THE COURT: Come on up and have a seat on the
- 19 stand there, sir. And it looks like somebody left their
- 20 cup, but clean cups and fresh water are there for you if
- 21 you'd like to have that.
- THE WITNESS: I prepared this one, sir.
- 23 THE COURT: Go ahead.

24

- 1 when you're training or doing work on a contract, or is
- 2 that performed in another way?
- 3 A. I'm physically present. I come to Reno about
- 4 once a -- one week out of every month for about the last
- 5 four years.
- 6 Q. And you submitted a report in this case,
- 7 excuse me, if I can just find a copy here. Showing you
- what's been marked as Exhibit 139. Do you recognize
- 9 that?
- 10 A. Yes, I do.
- 11 Q. And what is that?
- 12 A. This looks like a copy might of my
- 13 reconstruction report from this event.
- 14 Q. And when you prepared this report, was it
- 15 done under your own private company or under Washoe
- 16 County Crime Lab?
- 17 A. It was prepared as a part of my own company,
- 18 Noedel Scientific.
- 19 Q. Now, as part of this report, you said you did
- 20 examine some documents, photographs, pictures, things
- 21 like that?
- 22 A. Yes, I did.
- 23 Q. What did you examine?
- 24 A. I examined all of the available crime scene

Page 166

Page 168

- 1 DIRECT EXAMINATION
- 2 BY MS. BROWN:
- 3 O. Thank you, Your Honor. Could you state your
- 4 name and spell your last name, please.
- 5 A. Matthew Noedel: N-o-e-d-e-l.
- 6 Q. And what is your occupation?
- 7 A. I'm a forensic consultant for my own company
- 8 called Noedel Scientific.
- 9 Q. Are you also an employee of the Washoe County
- 10 Crime Lab?
- 11 A. Yes, a contract basis.
- 12 Q. And what do you mean by, "on a contract
- 13 basis"?
- 14 A. One of my contracts through my business as
- 15 Noedel Scientific was to help train and work on backlog
- 16 cases at the Washoe County Crime Laboratory, specifically
- 17 training new examiners in the firearm tool marking and
- 18 also working on backlog cases as time permitted.
- 19 O. And you give an address in "Pollyup,"
- 20 Washington?
- 21 A. Yes, Puyallup, Washington.
- 22 Q. And is that where your business is located?
- 23 A. That's correct.
- 24 Q. Are you physically present at the crime lab

- 1 photographs, the available autopsy photographs, the
- 2 autopsy report, some of the police reports that were
- 3 available about the event, other forensic reports
- 4 initiated by people who were at the crime scene, so
- 5 laboratory reports.
- 6 Q. Five people that were at the crime scene?
- 7 A. Yes, from people at the crime scene.
- 8 Q. Oh, from people at the crime scene?
- 9 A. Sorry.
- 10 Q. Did you have a chance to speak with one of
- 11 the crime scene investigators, Joey Lear?
- 12 A. Yes, I did.
- 13 Q. And when did you speak with him?
- 14 A. About three weeks ago, I spoke with him via
- 15 the phone.
- 16 Q. That was prior to preparing your report?
- 17 A. Yes, it was prior to my report.
- 18 Q. And in your report, you reached a conclusion
- 19 the physical evidence including the length of the rifle,
- 20 the length of Mr. Leibel's, Harry Leibel's arm, the
- 21 distance of each shot, the angle of each shot --
- 22 THE COURT: Ma'am, please slow down. It's
- 23 okay, but it's going to be difficult. Thank you. You
- 24 may start over, if you'd like.

Page 169

- 1 Q. (BY MS. BROWN:) The orientation required for
- 2 each shot, the re-caulking of the hammer after the second
- 3 shot best supports that Harry Leibel did not shoot
- 4 himself during this event. Is that your conclusion?
- 5 A. That is one of my conclusions. Yes.
- 6 Q. Do you have other conclusions?
- 7 A. Other bullet points that are in that
- B document.
- 9 Q. This is your -- the enunciation of your main
- 10 conclusion?
- 11 A. I would agree.
- 12 Q. So your strongest opinion is this best
- 13 supports that Harry Leibel did not shoot himself during
- 14 this event?
- 15 A. That's correct.
- 16 O. And in preparing, were you aware -- Did you
- 17 receive any reports that made you aware that prior to the
- 18 measurements being taken by Mr. Leibel (sic), there had
- 19 been paramedics wandering around examining the scene?
- 20 A. Measurements taken by Mr. Leibel?
- 21 Q. I'm sorry. Mr. Leer.
- 22 A. Yes, the record reflects that paramedics had
- 23 gone into the house as well as police officers.
- 24 Q. And were you aware from those reports that

- 1 Q. And that document noted that it was not done
- 2 to scale?
- 3 A. That is correct.
- THE COURT: That it is not done to scale?
- 5 Q. (BY MS. BROWN:) Not done to scale.
- 6 Now, in your -- Sorry. Concerning the
- 7 trajectory that was created concerning the second shot --
- 8 A. Yes.
- 9 Q. You determined that at the time of the second
- 10 shot, the recliner was neither sitting upright or lying
- 11 flat all the way approximately in the middle position?
- 12 THE COURT: Slow down.
- 13 THE WITNESS: Yes. I believe that fits with
- 14 the bullet path analysis.
- 15 Q. (BY MS. BROWN:) And so the basis of your
- 16 conclusion was based on what?
- 17 A. It was based on the documentation that was
- 18 provided by the crime scene processors who actually
- 19 connected the entry position in the couch, the exit
- 20 position of the couch, and then the reentry into the
- 21 fixed wall behind it.
- In order to connect that as a single bullet
- 23 path trajectory, the couch had to be reclined a certain
- 24 amount. When the seat is upright, that path moves, and

Page 170

Page 172

- 1 paramedics were looking around the couch to see a bullet
- 2 defect behind the couch?
- 3 A. I was not aware of that specific detail.
- 4 Q. Did you receive a report by Investigator
- 5 Chrzanowski stating that one of the paramedics saw the
- 6 defect in the wall after the patrol officers had moved
- 7 the couch?
- 8 A. I don't recall that specifically, but that
- 9 may be one of the documents that I received.
- 10 O. Did you receive a report reflecting the
- 11 coffee table had been moved prior to the diagramming?
- 12 A. I don't recall reading that.
- 13 O. I'm showing you Exhibits 125 and 126. Were
- 14 those documents you received in reference to this?
- 15 A. Yes.
- 16 Q. And you received those from the Washoe County
- 17 Crime Lab?
- 18 A. That is correct.
- 19 Q. And as part of your report, on page eight of
- 20 26 is a diagram of the crime scene?
- 21 A. I believe that to be accurate. Yes.
- 22 Q. And that was a copy of a report you received
- 23 from the Washoe County Crime Lab; is that correct?
- 24 A. That is correct.

- 1 the trajectory rod will not meet the hole in the wall, or
- 2 if the couch is reclined all the way flat, the trajectory
- 3 rod points too far down. It doesn't meet with the hole
- 4 that's fixed in the wall. It's the fixed position of the
- 5 trajectory that enables us to reposition that bullet path
- 6 along those lines.
- 7 Q. And there was no indication in the written
- 8 notes what degree of reclining they had in that?
- 9 A. No
- 10 Q. So you determined that for your purposes by
- 11 it has to be in the middle position based on their
- 12 photographs; is that correct?
- 13 A. Two different things. I had an opportunity
- 14 to examine the couch myself. They documented very well
- 15 the position of the hole in the wall, and they also
- 16 documented how far over the couch was within the room.
- 17 Part of my analysis of the couch also involved going back
- 18 to the house itself and seeing what the spatial
- 19 relationship is on that wall. The hole in the wall was
- 20 still present where they cut all out the projectiles from
- 21 that impact. So my reconstruction of the angle was based
- 22 on the position of the hole that they documented that's
- still in the wall and the alignment, knowing that the projectiles that came out on that bullet path had to

(43) Pages 169 - 172

Page 176

Page 173

- 1 follow essentially a straight line. And so the bullets
- 2 cannot make a u-turn in midair, so if the couch is seated
- 3 all the way forward, the hole should have been higher op
- 4 the wall, but it wasn't. The hole was low on the wall,
- 5 approximately ten inches off the ground. They have
- 6 photographs depicting a ruler straight onto where that
- 7 defect is. So part of trajectory analysis can be solved
- 8 practically, which is what we did when we examined the
- 9 couch by inserting a rod. You can even do it
- 10 mathematically by calculating the distance.
- 11 Q. Let me interrupt you a second. When did you
- 12 observe the couch?
- 13 A. Approximately four to six weeks ago.
- 14 Q. And where was it at?
- 15 A. It was here in this building.
- 16 Q. In a room?
- 17 A. Yes, in an examination room downstairs.
- 18 Q. So you didn't examine the couch in the house?
- 19 A. No. I was not at the house the day of the
- 20 event.
- 21 Q. But, I mean, they didn't take the couch to
- 22 your house?
- 23 A. No.
- 24 Q. I'm showing you what's been marked as

- 1 A. Correct.
- 2 Q. And for purposes of following this
- 3 trajectory, if it relates to the second shot, that would
- 4 be an incorrect position?
- 5 A. Yes. The person pictured in that image is
- 6 not in an appropriate position for the second shot that
- 7 occurred.
- 8 Q. So to put a person in that position to load
- 9 the couch with weight to make the trajectory rod line up
- 10 with the hole in the wall behind it is based on false
- 11 information?
- 12 A. Yes. If they are relying on that trajectory
- 13 rod based on having that individual sit there, then that
- 14 is probably -- that is not a good way to try to establish
- 15 the trajectory. The better data is in other photographs
- 16 that come in along with this photo.
- 17 O. But Joey Lear testified this morning that
- 18 that was the way they managed to get that trajectory rod
- 19 to line up with the hole, is was for this individual to
- 20 be sitting in this position to make the -- otherwise,
- 21 they couldn't line up the trajectory rod with the hole.
- 22 A. I was not aware of that.
- 23 Q. So would that change anything concerning your
- 24 trajectory?

Page 174

- 1 A. No.
- 2 Q. So without this person in this position, then
- 3 this rod does not line up with the hole?
- 4 A. I disagree.
- 5 MR. GREGORY: And, Your Honor, this
- 6 mischaracterizes Mr. Lear's statement. With that
- 7 particular photo, he testified he could not tell you
- 8 whether the rod behind the couch married up with the hole
- 9 in the wall. He specifically stated that looking at that
- 10 same photo.
- 11 THE COURT: I think he -- I think at first he
- 12 said that it did, and then he said he could not see where
- 13 the rod went behind.
- MR. GREGORY: That photo doesn't show that.
- THE COURT: That the photo doesn't show where
- 16 the rod goes.
- MS. BROWN: But his testimony was this person
- 18 was in this position on the couch to weight the couch so
- 19 they could eventually get it to line up with the hole
- 20 behind the couch.
- 21 THE COURT: I would agree that he did say
- 22 that.
- 23 THE WITNESS: And that if that was his
- 24 process while he was working on the scene, that's fine.

. 050 ...

1 Exhibits 129 and 130. Were these documents you received?

- 2 A. Yes.
- 3 Q. And that now, it was explained to us this
- 4 morning by Mr. Lear that the only way or the way they
- 5 were able to achieve this trajectory and getting rod to
- 6 actually enter the hole in the wall was when they put
- 7 this person in this position on a somewhat reclined
- 8 couch?
- 9 THE COURT: And you're pointing to exhibit --
- MS. BROWN: Number 129.
- 11 THE COURT: Thank you.
- 12 THE WITNESS: Yes, that's my understanding,
- 13 is that one of the reasons for establishing the sergeant
- 14 in that photograph was to put a load on the couch. One
- 15 of the difficulties that they relayed to me later was
- 16 that while they could measure the trajectories, they
- 17 weren't sure what loading the couch, actually putting
- 18 weight on the springs would do the movement of that. So
- 19 they positioned a person.
- 20 Q. A person whose weight they didn't know?
- 21 A. I assume they did not know his weight.
- 22 O. And they positioned them in the middle
- 23 portion almost onto the right-hand cushion; is that
- 24 correct?

Page 177

- That's not the information that I relied on in order to
- establish the trajectory through that couch.
- Bullet path analysis requires that you have 3
- multiple points along the line. We know the position of
- the couch. If Mr. Lear's measurements are accurate, and
- we did this in the exercise for the reconstruction
- report, we can reposition the couch. We know where the
- hole in the wall is. We then take a straight trajectory
- rod independent of any of these photos and insert it in
- the entry hole, fish it through exit hole, and position 10
- it back in the reentry of the reconstructed bullet path. 11
- Q. (BY MS. BROWN:) When you went to the house
- to see the area on the wall where the defect had been,
- that area had been cut out; correct?
- 15 A. Correct.
- 16 O. And there was -- Did you take the piece of
- wall with you to put back in that hole?
- 18 A. No, I did not.
- O. And behind that, there's no measurement that
- shows where that hole in that piece of wall that was
- taken out is in relation to that wall cut?
- 22 A. There is now. It's a measurement that I took
- when I went back out to the house. By using some of the
- original scene photographs, I was able to match the wood

- 1 A. If by "exact measurement" you mean within --
- we're talking in terms of error, you can get very close
- because the group of the size of the pellets that went
- through have to hit the wall behind them. There's
- actually a stud that goes right through, so there is a
- two-by-four. So we can have accuracy to within
- approximately an inch and a half based on knowing that
- that stud was hit, and the stud was behind the bullet
- path. So within an area of about an inch and a half, we
- know where the terminus of that second shot went. But
- exact, not -- I wouldn't say we could get much closer
- than about an inch and a half position. 12
- O. And when they took the original trajectories,
- there was -- they didn't have that opening; correct?
- They were using the hole?
- A. Correct. They were using the actual bullet
- hole as it was positioned in through the drywall.
- O. And with that hole in the wall, that's
- multiple holes, looks like overlapping; is that correct?
- A. Correct. We call it a scalloped edge, so
- it's a hole that has slight hemispherical perimeters
- because the projectiles that cause it was four pellets of
- sphere -- four spherical pellets, and they had just begun
- to separate and create what's called a scalloped edge.

Page 178

- grain on a countertop that was still there. It has a
- pattern to it that was captured. And so we know by taking the new measurements and actually dents in the
- carpet were still present where the feet of the couch
- once sat because it's a heavy piece of furniture, so we do --6
- 7 Q. Wait. Let me stop you a minute. You were
- measuring off just the divots in the carpet where from
- where the couch used to be?
- A. I did record the divots, and I recorded, as I 10
- said, the grain of the wood, the pattern in the wood.
- And I could see -- measure from the corner of the room, 12
- which we do have accurate measurements from the Lear 13
- diagram, measure the corner of the room to establish that
- in fact, the position of the hole in the wall is accurate
- 15
- as it's drawn in the Lear diagram. I confirmed that for 16 myself. 17
- O. And when they took that piece of wall out, 18
- there was no documentation of measurements of where those
- -- the shots hit behind that; is that correct? 2.0
- A. Just the photograph. Nothing with a ruler or 21
- a scale, as I recall.
- Q. And so there's no way to correlate where
- those pellets hit with an exact measurement?

- 1 O. And so that hole with the scalloped edges is
- 2 larger than the trajectory rod, so there's wiggle room in
- 3 this?
- 4 A. Yes.
- 5 O. And the couch is basically a moveable object
- that you can pick up and put at an angle and still line
- up trajectory rods, right?
- 8 A. Yes.
- 9 Q. And so without knowing for sure where that
- the couch was when the actual shot happened, you could
- not do an actual trajectory?
- 12 A. You can estimate the trajectory if the couch
- was in its same relative position. If the couch is
- inordinately out of position, then you can't do a 14
- trajectory. In other words, part of what we do with a 15
- bullet path analysis is we always add plus or minus five 16
- degrees. So we always want to incorporate there is a
- measurement error. There's always going to be some 18
- 19 error.
- In reality, moving the terminus point in the 20
- drywall by one inch changes the angles by a half a degree 21
- or so, but we want to incorporate that because the couch 22
- could have been moved and put back. But if the hole
- through the couch continued into the wall, there's only

- so many places that it can be. We can move the couch out 1
- from the wall farther and change the vertical trajectory
- some, but we're not going to change it that much unless
- the couch were, say, in the middle of the room where we
- move it, 12, 14 feet away from the wall. That can
- dramatically change the trajectories. If the couch was
- in reasonable position from when the shot was delivered,
- we can estimate those horizontal and vertical
- trajectories easily within plus or minus five degrees.
- Q. But if the couch was in a different position, 10
- and I'm not saying it moved this way, but if it was
- angled even some, that would change the trajectory? 12
- A. Yes. Yes. 13
- THE COURT: I want the record to be clear
- what you're talking about, and I apologize for doing this 15
- to you, Ms. Brown, but when you refer to "angle," you
- mean one end of the couch being moved forward or back. 17
- MS. BROWN: Correct. 18
- THE COURT: Thank you. And the witness has 19
- used the phrase "inordinately" moved, and I have no idea 20
- what that means. And the witness also said something
- about reasonable movement, I believe, and I don't know 22
- what that means. And I'm just going to let you know that 23
- the Court is not guided by that, by those terms. So one

- 1 Exhibits 14 and 15 in your report, your conclusion
- concerning those in your report, you referred several
- times to, "If he could even reach the trigger." Is that
- correct?
- 5 A. That is correct.
- 6 O. And because those photographs show a
- measurement of about I believe we came up with 24 to 25
 - inches.
- O. And you can see in those photographs that
- there is an actual arch in the arm.
- 12 A. Correct.
- Q. And Dr. Kubiczk today acknowledged that you
- could get an additional half to three-quarters of an inch
- straightening that arm out.
- A. Okay.
- Q. And also, the length of that arm does not
- determine how far you can actually reach; is that
- correct?
- A. The length of your arm does dictate how far
- you can reach because you can't reach father than you can
- reach. That measurement has error in the documentation.
- There's a natural curvature where your forearm comes down
- to meet your wrist. We all have that. And then there

Page 184

- of you will have to help me with that. 1
- 2 Q. (BY MS. BROWN:) Could you explain what you
- mean by inordinately moved.
- A. Yes. In assessing this bullet path, what has
- to happen is the pellets have to reach a fixed wall.
- That fixed point in the wall is not movable without
- moving the entire residence, so the path connecting the
- entrance and exit of the couch has to marry with that
- hole in the wall. So as we move the couch, we have to
- pivot, essentially. We have to end at that hole. So you 10
- can only move so far before you can no longer stay in
- that fixed hole, but that has to happen. We have to hit 12
- that hole. 13
- So by the limits of the couch movement are 14
- dictated by the entry position, the exit position, and 15
- the reentry into a fixed point. So if we imagine hanging 16
- the couch on that trajectory rod to where we can't pull 17
- the rod out of the wall, any twist or rotation that lets 18
- that rod stay fixed in the wall with the end of the 19
- trajectory is conceivable, is possible. 20
- O. Now, concerning your photographs of the
- measurement of Mr. Leibel's arm --
- 23 A. Yes.
- 24 Q. -- taken from the autopsy, and those would be

- 1 also appears to be some canted appearance to the wrist.
- 2 Q. Yes.
- 3 A. The other consideration with that photograph
- is that the end of the tape measure is actually tucked
- into the armpit. So we're actually measuring from a
- deeper spot than the external surface that we would have
- to measure.
- я So what becomes important from a
- reconstruction perspective is how do we translate the
- two-dimensional information from the photograph into the
- three-dimensional world. When we do it absolutely and
- simply measure, compare the measurements of the gun, the
- length of the gun from the muzzle to the trigger and we
- add the distances that we know that are indicated because
- there is a standoff distance based on the gunshot residue
- patterns on the robe, we combine that information, we
- know about how far the gun has to be away from the front
- of the robe. Then when we compare that to the length of
- the arm, we see that absolutely speaking, as we compare 19
- those two photographs, his fingers can't reach the 20
- trigger. It can't be reached. 21
- Now, in reconstruction though, I have to keep 22
- in my head that these are two-dimensional images of a
- three-dimensional life. Life has twisting, contortions.

Page 187

Page 188

- 1 I don't know what Mr. Leibel's ability to twist, contort,
- 2 stretch. What I do know is that the distance to reach
- 3 the trigger and operate this firearm is just at or just
- beyond his maximum reach based on that data, based on
- that picture.
- 6 O. Based on that picture?
- 7 A. Yes.
- 8 Q. And also in figure number 13, you have the
- green setoff marked at three inches, and that's taking
- 10 the distance away from the body?
- 11 A. From the robe.
- 12 O. From the robe. And actually, in your
- ballistics report, you had a range of two to six inches;
- 14 is that correct?
- 15 A. Correct.
- 16 O. So the closest could have been two inches?
- 17 A. Could have been as close as two or as far as
- 18 six.
- 19 Q. And as to how far a person is able to reach,
- we went through with Dr. Kubiczk, you can drop your
- shoulders and gain additional reach in your arms?
- 22 A. Correct.
- 23 O. And you also have flexibility, so it's not
- 24 putting something straight under your body and --

- 1 weight in the center of the couch, that would alter, I
- 2 mean, that wouldn't in any way replicate that trajectory,
- 3 right?
- 4 A. It's irrelevant to me because the trajectory
- 5 can be measured on its own. I would need to know more
- 6 information about why they didn't position -- did they
- know of the wounds, first of all, when they were doing
- the trajectory assessment, and there was a lot of blood
- on the seat of that couch. Were they toward the center
- simply to weight it without sitting in blood. So I would
- want to know more of the factors like that. There's no question that the other image that shows the sergeant 12
- sitting on the couch in the center is not an accurate
- representation of how the second shot occurred. 14
- O. Okay. But if that was an accurate 15
- representation of how they were able to line up the
- trajectory rods was by putting weight on the couch in 17
- that location, then anything other than that location 18
- would change the -- shift the weight on the couch?
- 20 A. It would change the load on the couch for
- sure. But again, one thing has to happen. The hole has
- to come in the outside out the back and into the fixed
- position. However you load the couch, wherever you put
- weights or people, that has to happen.

Page 186

- 1 Q. But in order to get the rod that's through
- the couch to line up with the hole in the wall, they had
- to put weight in a certain location, and if that weight
- wasn't in that location, then their trajectory
- measurements were wrong.
- 6 A. That's confusing to me because I was able to
- establish the trajectory without weighting the couch, so
- I'm not sure what they were trying to establish.
- 9 Q. So your trajectory may be different from
- 10 their trajectory?
- 11 A. Perhaps.
- 12 Q. And so relying on the same information, you
- 13 can get to two different conclusions?
- 14 A. No.
- 15 O. Okay. You also testified or noted that the
- 16 presence of fiber in that bullet hole could have shown
- that his shoulder was very close because of the transfer
- of fibers; is that correct?
- 19 A. Yes.
- 20 O. Do you know if those fibers were ever
- 21 collected into evidence?
- 22 A. I'm not aware of those having been collected.
- 23 Q. And do you know if they were ever tested?
- 24 A. I do not.

1 A. Correct. It's a baseline measurement that

- 2 gives us an idea of the kinds of distances we're working
- 3 with, and then we, from a reconstruction perspective,
- then we consider who has to happen similar to the couch.
- What has to happen is the entry site is 5
- known. We can't move that. So it's not just a matter of
- being able to move your body and stretch your arm. It's
- a function of being able to operate a firearm and
- maintain the path, the bullet path that's indicated, and
- 10 reach the distances.
- 11 Q. Showing you what's been marked as Exhibit
- 12 128.
- 13 A. Okay.
- 14 Q. Do you recognize that as a photograph of the
- 15 couch?
- 16 A. Yes.
- 17 Q. And one of your conclusions then was that
- 18 Mr. Leibel's shoulder had to be basically right below
- that, the hole in the left-hand side of the couch in
- 20 order to receive the injuries he received. Is that
- 21 correct?
- 22 A. That's correct.
- 23 Q. And if Joey Lear testified that the way they
- 24 were able to line up the trajectory was to put human

(47) Pages 185 - 188 2268

- Page 189

r age re

- 1 Q. So we don't know where those fibers came
- 2 from; correct?
- 3 A. Correct. There is no analysis of the fibers.
- THE COURT: Which hole are you talking about?
- 5 Q. (BY MS. BROWN:) The hole in the front of the
- 6 couch. I'm referring again to your report, Exhibit 139
- 7 to figure 13 on page 20 of 26.
- 8 A. Yes.
- 9 Q. And you wrote this photograph or diagram
- 10 represented the approximate orientation Mr. Leibel would
- 11 have had to achieve to get a self-inflicted wound with
- 12 this pattern or the path through the body; is that
- 13 correct?
- 14 A. That is correct.
- 15 O. And there's other ways he could do that; is
- 16 that correct?
- 17 A. Other ways that he can self-inflict this
- 18 wound?
- 19 O. He does not need to be laying down on the
- 20 couch; correct?
- 21 A. No, he does not have to be laying on the
- 22 couch.
- 23 Q. So he doesn't have to be in any type of
- 24 reclined position?

- 1 A. Correct.
- 2 O. Correct? And in fact, your earlier
- 3 description is he would have to be slouched down low on
- 4 the couch to line up the shoulder with that bullet hole
- 5 in the front of the couch?
- 6 A. He does.
- 7 Q. And this is not a slumped individual?
- 8 A. I think I would need you to clarify what is a
- 9 slumped individual. That's a representation of a model
- 10 that would show how he would have to angle that shot in
- order for the shot to go through his hand, eclipse his
- 12 shoulder, and continue on the path through the couch and
- 13 into the wall.
- 14 O. But this is --
- 15 A. There is no couch in that diagram on purpose.
- 16 The reason there's no couch in there is because it's hard
- 17 to position him in a two-dimensional image of what the
- 18 three-dimensional representation is. But this is the
- 19 approximate orientation of the rifle, his hand, the wound
- 20 to his shoulder, and then you take that diagram and set
- 21 it on that couch, and you have the entire path of the
- second bullet identified.
- 23 Q. But his legs are not locked in that position?
- 24 A. No.

Page 190

- 1 A. He does not have -- Correct. He does not
- 2 have to be reclined. He could be standing --
- 3 Q. He could be standing?
- 4 A. -- and deliver this.
- 5 Q. And he could be leaning over to the side
- 6 sitting on the couch; is that correct?
- 7 A. Yes, yes. There's a number of positions he
- 8 can achieve as long as the path is maintained in this
- 9 orientation.
- 10 Q. So this stating it represents the approximate
- 11 orientation is misleading because there's numerous
- 12 positions he could be in to basically just orient the
- entry into the right chest with the path across the body;
- 14 is that correct?
- 15 A. Yes. You could take that diagram and rotate
- 16 it as if he were standing. As long as the relative
- 17 position of the rifle maintains that position, any
- 18 position that he can reach and maintain that angle and
- 19 have his arm up is a position that can occur for the
- 20 first shot.
- 21 O. And in figure 16 on page 23, again, you're
- 22 talking this would be the proximate orientation that
- 23 Mr. Leibel would have to achieve to get a self-inflicted
- 24 second shot?

- 1 O. The only thing that's locked in position
- 2 would be his shoulder relative to that hole in the couch;
- 3 is that correct?
- 4 A. Correct. Because he has no wounds to his
- 5 legs or feet, I can't accurately position his legs or
- 6 feet. There's no way to do that.
- 7 THE COURT: Are you telling me he then could
- 8 just be sitting up?
- 9 THE WITNESS: No, he cannot. For the second
- 10 shot -- because it's more complicated than that specific
- 11 diagram. That diagram shows the relationship of the
- 12 rifle, the position of the rifle aligned with the wound
- through his hand into the top of his shoulder.
- 14 To complete that, there's a diagram later in
- 15 the report, I believe. We would have to apply that
- 16 general orientation of rifle, hand and shoulder to the
- 17 elements of the couch and identify -- that's how you can
- 18 achieve the slumped or what's called a slumped nature.
- 19 He has to be low enough for the hole in the couch to
- 20 eclipse his shoulder, so his shoulder has to be just at
- 21 the bullet hole in the couch.
- 22 Q. And showing you what's been marked as Exhibit
- 23 33, do you recognize that photograph?
- 24 A. Yes, I do.

Page 193

- 1 Q. And what is that?
- 2 A. This is a photograph that was with the
- 3 initial set of crime scene response, and it's a picture
- 4 of them laying a ruler next to a trajectory rod.
- 5 Q. And this was when they were working on the
- 6 trajectory?
- A. Correct.
- 8 O. And they had moved the coffee table out of
- the corner by the left-hand side of the couch to get in
- that position; is that correct?
- 11 A. That is correct.
- 12 Q. And showing you what's been marked as Exhibit
- 104 for identification, do you recognize the couch in
- that photo?
- 15 A. I do.
- 16 Q. Is that our couch?
- 17 A. That is the couch. Yes.
- 18 Q. And Exhibit Number 105.
- 19 A. Yes, another perspective.
- 20 Q. And is that -- Could either of those be a
- 21 possible?
- THE COURT: Wait, wait. Are you going to 22
- offer those for purposes of this hearing? 23
- MS. BROWN: For purposes of this hearing. 24

- objection is overruled. I want to know, is that 104?
- THE WITNESS: Yes. It's specifically, as I 2
- look at 104, it's a better perspective photo to evaluate
- than 105. My concern with the image depicted by the
- person in 104, first I would want to know how long that
- individual's arm is, based on the similar types of
- measurements that we have in the photographs from the
- autopsy. In other words, are we dealing with an
- individual who has, at least photographically, a similar 9
- arm length if we were to record and take the same picture 10
- that we took at the autopsy, take a picture of his arm,
- the ruler next to it. So I'm concerned about the length
- of his arm. 13
- The second problem I have with this is 14
- knowing the track of the bullet, the angle that the 15
- fragments pushed through the body. This angle is much 16
- too severe relative to the appearance of the images in 17
- the x-rays and the fragments.
- O. So a person could lean out a little further
- and reduce that angle and still have?
- 21 A. If he were to stand up and lean left or yes,
- if he leaned -- if he took the butt of the gun, either
- took the butt of the gun up in the air to shallow this
- angle -- I measured this angle to be about 45 degrees. I

Page 194

- THE COURT: And anything admitted right now
- 2 is for purposes of this hearing only. Do you have an
- objection to those, Mr. Gregory?
- MR. GREGORY: No, Your Honor. 4
- THE COURT: Well, can I get their numbers and 5
- know which ones you're offering.
- MS. BROWN: I have 104 and 105.
- THE COURT: 104 and 105 are admitted for 8
- purposes of this hearing. If you want to use them at
- trial, you'll need to readmit them then.
- (Exhibit Nos. 1-4-105 were admitted into evidence.)
- 12 Q. (BY MS. BROWN:) Yes. And that could be a
- possible position to achieve the first shot?
- 14 A. I disagree.
- 15 O. On?
- 16 A. That this is a possible position for the
- 17 first shot.
- 18 O. Why?
- A. First --
- MR. GREGORY: Your Honor, this seems to be 20
- getting far afield of the Motion in Limine and more into 21
- questions she might have for him on cross-examination, 22
- but it really doesn't go to the Higgs' requirements. 23
- THE COURT: She's testing methodology. The 24

- 1 measured the angle in the x-ray to be approximately 20
- degrees. So he's too steep by about 25 degrees.
- 3 O. And so like I said, if you move that gun out
- a ways, you would reduce that angle.
- 5 A. Correct. If we change this picture, we can
- achieve the angle, and he can sit forward. The other
- problem with this picture is his left arm is down. And
- what happened to -- what actually happened is the
- fragments pushed all the way through into the muscle of
- his left arm for this bullet, because --
- 11 Q. Are you a pathologist?
- 12 A. No.
- MS. BROWN: Okay. Thank you. 13
- MR. GREGORY: Your Honor, he's trying to 14
- 15 answer the question.
- THE COURT: I understand. Why don't you let 16
- him finish that answer because it's going to come out on 17
- cross anyway, and I need to hear the answer. 18
- THE WITNESS: With this bullet, this is a 19
- specialty design of bullet that's designed to fragment on 20
- impact. I'm not a pathologist, but I study bullet
- performance. That's a big part of what my business is 22
- and what I do in shooting reconstruction. I teach 23 shooting reconstruction. I shoot gelatin. I've shot

State of Nevada vs Tatiana Leibel, aka Tatiana Kosyrkina - 14-CR-0062

1 extreme Shock brand of ammo in gelatin and hooked at how it performs. 2

What I anticipate is that in this bullet 3

performance, because it's fragmenting, it's not going to

- take a deflection of what I measured to be approximately
- 137 degrees downward. There's no reason for these small
- fragments to do that near the end of their path when 7
- they're almost out of energy. So the angle is too steep, 8
- and the arm, the left arm is in the wrong position. And 9
- that's what I don't like about that picture.
- THE COURT: Thank you. 11
- 12 Q. (BY MS. BROWN:) So if Dr. Kubiczk testified
- 13 it is a possibility that they deflected off of both, you
- disagree with Dr. Kubiczk? 14
- 15 A. If that's what he testified, I'd disagree.
- 16 O. And showing you Exhibit 102.
- THE COURT: Are you going to object to 102? 17
- MR. GREGORY: No, Your Honor. 18
- THE COURT: For purposes of this hearing, are 19
- you going to offer it? 20
- MS. BROWN: Yes. 21
- THE COURT: All right. 102 is admitted for 22
- purposes of this hearing. 23
- (Exhibit No. 102 was admitted into evidence.) 24

- **CROSS-EXAMINATION**
- BY MR. GREGORY:
- 3 O. Mr. Noedel, what is reconstruction?
- 4 A. Reconstruction is -- in forensic
- reconstruction --
- THE COURT: Would you pause, please. Please.
- 7
- 8 O. Go ahead. You were talking about
- reconstruction.
- THE COURT: If you're okay, go ahead. 10
- THE WITNESS: I'm okay. Reconstruction in 11
- 12 terms of shooting reconstruction, which is the primary
- area that I work in, involves using physical evidence to 13
- test and try to answer specific questions about a 14
- shooting event, something that involves a discharge of a 15
- firearm. 16
- So in performing a reconstruction, it's never 17
- -- it never -- the analysis never plays out like a movie.
- That's a common misconception about reconstruction is 19
- that I can sit here and tell you and what happened from 20
- the time they got up that morning until the time 21
- everything ended. What reconstruction can do is it can 22
- take specific questions and address them using the 23
- physical evidence that's available. And so that's the 24

Page 198

Page 200

Page 199

- THE COURT: Go ahead, sir. 1
- THE WITNESS: 102 is a much better image, and 2
- 3 in my opinion, a much more accurate image. The only
- difference that I see between my diagram and the 4
- photograph that you've taken as 102 is you've had the 5
- model cover his eyes with his hand, but I see that you 6
- have maintained the required trajectory, and he has
- slumped down the required amount to have it eclipse his
- shoulder. The other difference between my diagram is I
- 10 did not raise the individual's right knee. You have
- 11 raised the right knee.
- 12 Q. (BY MS. BROWN:) Which would help raise the
- firearm; is that correct?
- 14 A. It could support the firearm, but we don't
- have physical evidence to determine whether the knee was
- up or down. 16
- 17 Q. Correct. So you can't put it down, and you
- can't say it's up?
- 19 A. Correct.
- MS. BROWN: Thank you. I have nothing 20
- further. 21
- THE COURT: Mr. Gregory? 22

23 24

- process that is used to do reconstruction. You have to
- evaluate questions of the event and measure it against
- the available physical evidence.
- O. Are you certified to do reconstruction?
- A. Yes, I am.
- 6 O. In what way?
- The International Association For
- Identification offers a certification. It's a written
- and practical examination. I think there are currently
- 17 people in the United States that carry that
- certification, and that's the one I carry for 11
- reconstruction. I also have certifications in firearm 12
- and tool mark analysis as well.
- O. Is reconstruction accepted in your industry?
- A. Yes, it is. Reconstruction is the subject of
- numerous textbooks. It's a common goal even if it's not
- formally called reconstruction, it's what's being done 17
- all the time when we try to determine how far a gun was 18
- away from a target or what two elements, which came 19
- first. Was one object overlying another. The subject is
- covered in textbooks, it's taught in classes, and it is
- in fact an association called the Association For Crime 22 Scene Reconstruction. I'm past president of that
- organization. It's a group of about 300 or so law

Page 201

- 1 enforcement, private practitioners like myself, all of
- 2 whom attend crime scenes and try to piece together the
- 3 elements based on the physical evidence.
- We have our 25th anniversary conference
- 5 coming up in two weeks. I'll be teaching at that
- 6 conference on shooting topics. But to give you an idea
- 7 of how robust the field is, that organization has been
- 8 around for 25 years come next February. So it is a very
- 9 well-established branch of forensic science.
- 10 THE COURT: What is the certification you
- 11 have that only 17 people have?
- 12 THE WITNESS: The International Association
- 13 for Identification offers four levels of crime scene
- 14 reconstruction. They offer basic scene reconstruction,
- 15 which covers things like how to collect physical evidence
- 16 at a scene. They offer advanced crime scene
- 17 reconstruction, which involves things like how to measure
- 18 trajectories and bullet path analysis. They offer a
- 19 third one that's like a senior supervisory supervise
- 20 crime scenes.
- 21 Their fourth certification is crime seen
- 22 reconstruction. How do you piece together the physical
- 23 elements from a scene and sequence them, test them. It's
- a way of thinking. It's a way to apply the scientific

- 1 couch; correct?
- 2 A. I did.
- 3 Q. And you had an opportunity to view all of the
- 4 measurements that were taken from the crime scene;
- 5 correct?
- 6 A. Yes.
- 7 Q. And Joey Leer testified that those
- 8 measurements are accurate to within one half inch. Is
- 9 that a suitable degree of error for your profession?
- 10 A. Oh, absolutely.
- 11 Q. In this case, we also know the wounds. And
- 12 you took those into consideration as well?
- 13 A. Yes.
- 14 Q. So you have the wounds, the couch, the
- 15 firearm, and the measurements?
- 16 A. Correct.
- 17 O. Is that data sufficient for you to
- 18 reconstruct the scene?
- 19 A. That's a part of the data, yes. There's more
- 20 data than that, but certainly, that is a great basis from
- 21 which to start for reconstruction.
- 22 O. What other data did you utilize?
- 23 A. Performance of this relatively unusual round
- 24 of ammunition, the fact that this particular firearm is a

Page 202

- 1 method and have viable, reliable, producible results that
- 2 form the basis of a reconstruction. You have to have
- 3 physical evidence in order to test. That's why things
- 4 like was a person mad will never show up in a true
- 5 reconstruction because we can't test that.
- 6 THE COURT: That's not my question. The
- 7 question is I asked you what 17 people -- what
- 8 certification you had that only 17 people have. So which
- 9 one is it?
- 10 THE WITNESS: It's the IAI Crime Scene
- 11 Reconstruction.
- 12 THE COURT: Which is the fourth category that
- 13 you mentioned?
- 14 THE WITNESS: Yes.
- THE COURT: So out of hundreds of people who
- 16 practice crime scene reconstruction, 17 people have this
- 17 certification?
- 18 THE WITNESS: Correct.
- 19 THE COURT: Go ahead, Mr. Gregory.
- 20 Q. (BY MR. GREGORY:) In this particular case,
- 21 the firearm was taken into evidence. Have you had an
- 22 opportunity to shoot that firearm?
- 23 A. Yes, I have.
- 24 Q. And you had an opportunity to observe the

- 1 long-gun revolver, it's a relatively unique firearm, has
- 2 unique properties, one called cylinder gap which are
- 3 gases that can escape that need to be considered in
- 4 context, that the firearm can in fact handle single
- 5 projectiles or shotgun projectiles, multiple projectiles,
- 6 is a feature of this. The appearance and deposition of
- 7 the blood itself helps answer some questions about where
- 8 was an individual who was bleeding, helps piece together
- 9 whichever questions you're trying to answer.
- 10 THE INTERPRETER: Your Honor ---
- 11 THE COURT: Yes.
- 12 THE WITNESS: This is the interpreter
- 13 speaking. The interpreter didn't hear the appearance and
- 14 the composition of the blood or deposition of the blood?
- 15 Deposition of the blood. So depending on what question
- 16 it is you're addressing, all of those features may come
- 17 into play in assessing the data.
- 18 Q. (BY MR. GREGORY:) Given the data that you
- 19 had available and even taking into consideration some of
- 20 the information given to you in examination today, are
- 21 you confident in the opinions you've rendered?
- 22 A. Yes, I am.
- 23 Q. And if you didn't have sufficient data in
- 24 this case, what would you have done?

- 1 A. If you don't have sufficient data, then you
- can't answer those questions. The only questions that
- can even be addressed are ones that have data. If you
- pose a question to me for which there is no data, then it
- does not enter into the reconstruction. It can't be tested. 6
- MR. GREGORY: Thank you. Nothing further. 7
- THE COURT: Ms. Brown? 8
- MS. BROWN: Nothing further, Your Honor. 9
- THE COURT: You can stand down, sir. We'll 10
- be in recess. 11
- (Recess was taken.) 12
- THE COURT: All three counsel are here, and 13
- the defendant is here together with the interpreters. 14
- Would you care to make argument, Ms. Brown? 15
- MS. BROWN: Your Honor, one issue that 16
- Mr. Gregory had brought up in his response was that the 17
- reasonable scientific certainty standard did not apply to
- anything outside of medical evidence, medical causation. 19
- I had cited Yeghiazarian: Y-e-g-h-i-a-z-a-r-i-a-n. 20
- THE COURT: I have a copy of that opinion on 21
- the bench, ma'am. 22
- MS. BROWN: And in that case, they were 23
- 24 discussing Dr. John E. Baker, who was listed as a doctor

- out of his reach, the approximate positions that are
- shown as being basically the only positions he could have
- been in are misleading, and therefore, I don't think
- their testimony is reliable and should be admissible.
- THE COURT: Let me ask you this, Ms. Brown.
- Do you see a distinction between the admissibility of the
- witness's testimony and the admissibility of the
- witness's report? In other words, clearly, he testified
- that he drew -- that he created some diagrams, and some
- of your questioning resulted in his response that yes, 10
- there could be other positions which tends to indicate 11
- that the diagrams that he's drawn are not exclusive of
- any other position of Mr. Leibel. So if he accepts that 13
- there may be other positions available and if the Court 14
- were to rule that therefore those diagrams are not 15
- helpful, does that necessarily exclude his entire 16
- testimony? 17

18

- MS. BROWN: Your Honor, I'd still say that
- based on the differences in the trajectory from the crime 19
- scene people who are doing it at the scene and his 20
- reconstruction of that, that does not have the weight on 21
- the couch in his statement is so definite that this body
- has to be slumped down on the couch, his shoulder in a 23
- certain position over towards the left side of the couch

Page 206

- with the initials P.E. after it for professional
- engineer, there was not a medical doctor. And relying on 2
- the Hallmark standard, the Court in that case said -- and
- it was looking at it under the reliability of the 4
- methodology and the opinion of -- that Dr. Baker was able 5
- to calculate to a reasonable degree of scientific 6
- certainty the vehicle's starting positions, the braking, 7
- therefore, it wasn't an abuse of discretion to allow him 8
- to testify. 9
- So I think by implication, that case does, 10
- under the Hallmark case standard, adopt a reasonable 11
- degree of scientific certainty as it relates to 12
- scientific evidence under the reliability standard that 13
- they had previously enunciated. 14
- Other than that, I would say Your Honor, I 15
- think I do think based on the testimony of Joey Lear, 16
- that that couch -- to achieve the trajectory they 17
- achieved at the crime scene was the only way they could 18
- do that was by placing a weighted body in the center of 19
- the couch and lining up the trajectory from the couch 20
- with the hole in the wall. So I think that calls into 21
- question any other -- reliability of any other trajectory 22
- pattern, and the absolute statements relating to the
- length of Mr. Leibel's arm compared to the gun, it being

- to achieve a trajectory at the crime scene by putting
- somebody in the middle of the couch to make a half or
- somewhat reclined couch laying back and appropriately 3
- line up a trajectory hole with the -- or the trajectory
- rod with the hole with the defect in the wall just calls
- into question the whole methodology or the reliability of
- the methodology that was used in the situation.
 - THE COURT: Well, I don't think you have
- answered my question. It was a really good statement,
- but I don't think it addressed the point that I raised. 10
- 11 And so --
- MS. BROWN: You're talking about the diagram? 12
- THE COURT: I'm talking about his diagrams 13
- because his testimony was that he did some measurements
- of his own, not necessarily relying only on Mr. Lear's 15
- testimony or anything like that. 16
- So what I want to ask you is if his diagrams 17
- are excluded, or even, you know, parts of his report,
- does that mean that he can't testify and still render an
- opinion? Because he's already -- you know, it seems to
- me there's a very real issue here between his -- between 21 rejecting his ability to testify and allowing you,
- through cross-examination, to contest his methodology,
- and particularly contest his results. And clearly, you

12

Page 211

Page 209

- 1 have the right to do. Clearly, you have a strategy with which you would do so. 2
- 3 And cross-examination is the tool by which
- you would address the State's proposition that they intend to present through this witness, but does it
- inially exclude his testimony? And if in fact he's
- recognized in some of the drawings that he's created are
- not conclusive, does it not -- Is it not sufficient to
- say you can't use those drawings then if they're just
- made-up drawings of hypotheticals, and that there could 10
- be other positioning, and there could be other ways that 11
- Mr. Leibel was positioned. Since you didn't draw them
- all, what if we exclude those drawings, and then you have 13
- the opportunity to cross examine this witness regarding
- all of the potentialities which you have raised. 15
- MS. BROWN: And, Your Honor, if we made it 16
- past the first hurdle of whether or not the standard 17
- should be with a reasonable degree of scientific 18
- certainty as to his opinion, then yes, that testimony can
- come in. 20
- THE COURT: He wasn't asked that. Nobody 21
- asked him that during this hearing. And I would agree 22
- with you that the decision that you refer to does refer 23
- to that standard, so he testified that his conclusion

- 1 broader standard than Daubert, and the Supreme Court has
- specifically told us that we're not going to be limited
- by Daubert.
- MR. GREGORY: Yes. 4
- THE COURT: That in Nevada, we look a little 5
- broader. But I would also say that Ms. Brown is right,
- that in that particular opinion she's addressing, and it
- is, for the court reporter's benefit, it's: 8
- Y-e-g-h-i-a-z-a-r-i-a-n, Yeghiazarian. It's not how I
- pronounce it, but I spelled it for her because if I just
- pronounce it, she wouldn't have any idea.
 - The Supreme Court clearly says that the
- 13 record indicates that the witness in that case,
- Dr. Baker, was able to calculate to a reasonable degree 14
- of scientific certainty, and therefore, we can't say that
- there was an abuse. Now, that doesn't necessarily say 16
- that that's the standard. It doesn't say that the Court 17
- has to require the witness to testify to that, but it's 18
- the threshold that the Court, in Yeghiazarian, found. 19
- And therefore, the Supreme Court found that there wasn't
- an abuse of discretion because it reaches that threshold.
- The Court hasn't set a lower threshold would necessarily 22
- exclude the testimony. I think that's the argument that
- you're about to make.

Page 210

Page 212

- 1 rose to that standard.
- MS. BROWN: But he testified that this best 2
- supports that Harry Leibel liable did not shoot himself 3
- during this event. 4
 - THE COURT: Well, you asked him if that's
- what he wrote in his report. No one asked him if that 6
- was the standard to which he was testifying. 7
- MS. BROWN: I asked if that's the strongest 8
- statement you can make concerning that. 9
- THE COURT: I don't recall that. Sorry. 1.0
 - I'll look at the transcript. I know -- and I wrote down
- that you did indicate that that was the standard that he 12
- used in his report, but assuming the State gets past 13
- 14 that.

5

- MS. BROWN: Then yes, taking the diagrams out 15 would be -- that part of the report would be acceptable. 16
- THE COURT: Let me hear from Mr. Gregory. 17
- MR. GREGORY: Well, I can't read Higgs and 18
- Hallmark to indicate that expert testimony should be more 19
- restrictive. I read those cases to suggest that the 20 Supreme Court thinks that expert testimony should be
- 21 given more than, say, under the Daubert standard or other 22
- standards. 23
- THE COURT: I think I agree with you. It's a 24

- MR. GREGORY: It is. Yeghiazarian does not
- stand for the proposition that the defense wants it to.
- I agree with your assessment of what you just said
- exactly. And I think if Yhegazarian meant to do that,
- then, like I'd indicated in my brief, it would be a
- landmark case overruling or at least significantly
- changing Higgs and Hallmark, and that case doesn't talk
- anything about that. So there's no indication to me the
- Supreme Court is looking to backtrack off of Higgs and
- Hallmark. So I can't read Higgs and Yhegazarian that 10
- way. I just don't think it stands for that proposition, 11
- and that wasn't really what that case turned on. 12
 - THE COURT: So talk to me about the
- difficulty of some of these drawing or computer-aided 14
- 15 depictions.

- MR. GREGORY: Reconstruction, as Mr. Noedel 16
- indicated, is not an absolute. He is not saying this is 17
- how it had to happen.
- THE COURT: So then why include those? Why 19
- subject the jury to that? 20
- MR. GREGORY: Because it's useful to the jury 21
- to help them understand how to connect physical evidence, 22
- wounds, firearms, couches, statements. It helps the jury
- understand and combine all of that information into a

usable thought process, not just giving measurements.
It's not helpful to give the jury measurements without telling them, having an expert explain how do those measurements -- how can we use those measurements.

measurements -- how can we use those measurements.

THE COURT: My concern though is that they're
subject to couple of problems. One, speculative
testimony is not admissible. And I know that you would
agree with that. So when the witness says, clearly
testified yeah, that's one way. It could have been some
other way. I just did this because it seemed like it was
a way to depict one of the ways, then we're -- it seems

like it's speculative because he's acknowledged there
could be other ways. So he's chosen one of the many

ways. That's one issue.And two, even if you're going to say well,

16

other way, don't we run the risk of it being more
prejudicial than probative then? And that's the other
concern I have. And it seems to me that if this
testimony is going to be presented, that the best way to
present it is without diagrams and pictures that the

it's more likely that it's that way, but it could be some

witness acknowledges may not be right so that he could testify without presenting to the jury things that he acknowledges may not be correct. Help me with that. 1 felt like he had enough data, which included looking at

2 the couch itself, going to the house itself, handling the

3 gun, and going through all of that. So I didn't take it

4 that that changed his opinion. In fact, and I asked him

5 how confident he was in his opinion even with that

6 information.

THE COURT: I'm not addressing that with you.

8 I'm talking to you about the diagrams contained in here.

9 Now, we already have an issue where I told you I'm not

10 going to allow diagrams of a skeleton shooting anybody,

11 but if he's able to testify without these diagrams that

may or may not be accurate as to how the body was

13 positioned and he gets to testify, but he's simply not

14 able to use diagrams that are based on it could have

15 happened this way. And that's my concern.

MR. GREGORY: Well, I didn't take his

17 testimony to be that these diagrams are inaccurate. In

18 fact, he builds into the diagrams a rate of error, as you

19 can see with the cones that he put on and even in his

testimony. I did understand Your Honor's concern

21 regarding the figures that were used, and he has put

22 different figures into the diagrams, giving two options.

23 One is with a female, which we have in this case. The

24 other is that a more neutral-type figure, but not a

Page 214

1 MR. GREGORY: Yes.

2 THE COURT: And tell me if you disagree

3 that's okay.

11

4 MR. GREGORY: I disagree that's speculative.

5 Here's a guy whose qualifications are spotless. He's one

6 of 17 guys that have these qualifications. He's not just

7 sitting here speculating, Your Honor. He's basing it on

8 data. And yes, from that data, there can be other ways

9 that Mr. Leibel could have been positioned, and he's

10 acknowledging that.

THE COURT: Other conclusions reached.

MR. GREGORY: But there are some really good

definite absolutes in this case which are the

.4 measurements, the trajectory, the path of every -- you

15 know, the wounds through the body, the arm being up. All

16 of this testimony that's already been covered that's come

in, and I should say there's been no testimony that the

18 couch has been moved. At least I haven't heard that;

19 that the couch was moved prior to Joey Lear doing his

20 measurements. I haven't heard that.

The other thing I heard from Mr. Noedel is

this idea that when they put Sergeant Lyford on that

3 couch to load it up, he's acknowledging maybe that's not

the best, but that didn't impact his decision. He still

1 skeleton-like figure.

2 THE COURT: I think it should be asexual.

3 MR. GREGORY: And I have to tell you that's

4 what he and I did understand what you were saying with

5 those. He was making every attempt with those photos to

6 make it neutral. Understanding what your concerns were,

7 though, he has even a different --

8 THE COURT: I don't presume bad intent, sir.

9 I understand that. I appreciate that.

10 MR. GREGORY: Okay.

11 THE COURT: I'm not presuming that it was

12 intended to be ghoulish.

13 MR. GREGORY: Thank you.

14 THE COURT: Anything else; sir?

.5 MR. GREGORY: No.

THE COURT: All right. Having listened to

17 the expert, I think Mr. Noedel does possess the

18 qualifications necessary to be an expert witness.

19 Two, under Hallmark, would his testimony

20 provide the jurors with some assistance? And I think his

1 testimony would assist the jury, and the scope is going

22 to be limited because I'm not going to allow him to

23 present -- I'm not going to allow the State to present

evidence of diagrams that he's created where he's

Page 217

- acknowledged that they're a mere possibility and that
- 2 there are other things that could have happened. So the
- 3 diagrams won't come in.
- 4 He can testify as to his belief as to what
- 5 the scene looked like, and he'll be subject to
- 6 cross-examination. I think that that is designed -- that
- answer is designed to weigh the probativeness of
- 8 Mr. Noedel's testimony versus the prejudice that could be
- 9 created by the presentation of those diagrams.
- 10 MR. GREGORY: And, Your Honor, would that --
- 11 and I understand -- I want to understand what you're
- 12 saying.
- 13 THE COURT: Yes, sir. I want you to.
- MR. GREGORY: So the photographs that
- 15 Ms. Brown offered, those don't come in either because
- 16 they're also inaccurate.
- 17 THE COURT: Well, they were admitted only for
- 18 the purpose of this hearing. I don't know that she'll
- 19 try to admit them. If she does, you know, I think that
- 20 he's going to testify that he believes that it happened a
- 21 certain way, and she'll be able to cross-examine him and
- 22 suggest other ways that it could have happen, and he may
- 23 acknowledge those, or he may not. He has acknowledged
- 24 some of them today. So we'll see what he does tomorrow,
 - Poor

- 1 THE COURT: Response?
- 2 MS. BROWN: I'm sorry. I was did distracted.
- 3 THE COURT: Ms. Henry was talking too much.
- 4 MS. BROWN: Well, I was talking to her,
- 5 actually.
- THE COURT: So here's what Mr. Gregory has
- 7 said. Because I've excluded diagrams that Mr. Noedel has
- s created about what could have happened -- now, he may
- 9 have some, and if he's got diagrams that he would say.
- 10 "This is what happened," those aren't excluded. That's
- 11 his opinion. But if it's simply speculation that this
- 12 could have happened, they're excluded. The objection
- 13 was, as to your photographs, as to what could have
- 14 happened based on the same theory. Do you have a
- 15 response to that?
- MS. BROWN: Not to strike them for purposes
- of this hearing, but not to admit them for purposes of
- 18 trial.
- 19 THE COURT: Right.
- 20 MS. BROWN: I would not be offering them at
- 21 trial at this point.
 - THE COURT: Well, I guess that matter is
- 23 resolved. I appreciate your arguments, and I think
- 24 that's how we'll handle this. Mr. Noedel will be allowed

Page 218

Page 220

- 1 I presume.
- 2 MR. GREGORY: Well, it would help in knowing
- 3 just so I don't do something improper in front of the
- 4 jury. The way that sounds to me is you're allowing the
- 5 defense to show him ways they think it happened, and then
- show those to the jury, but the State is not allowed to
- 7 do that. So I'm trying to figure out what I can do with
- 8 Mr. Noedel, if I can't offer the diagrams. Will we be
- 9 able to demonstrate?
- THE COURT: Yes. He you can engage in engage
- 11 in physical demonstration.
- 12 MR. GREGORY: Okay.
- 13 THE COURT: He certainly can. And I think
- 14 that the defense photographs may be subject to objections
- 15 based on speculation just as the State's witness is going
- 16 to be subject to objections based on speculation. Could
- 17 this have happened, could this have happened. That's
- 18 speculation.
- MR. GREGORY: Since this is a Motion in
- 20 Limine, I feel it could be really helpful to know going
- 21 into tomorrow with whether those photographs are
- 22 admissible or not. So I'm moving in limine, given your
- 23 order regarding Mr. Noedel, I'm now going to move in
- 24 limine to strike those photographs.

- 1 to testify. He will be allowed to present. My only goal
- 2 was just to keep out those -- or my only ruling is just
- 3 to keep out those diagrams at this point.
- 4 That having been said, we are in recess. The
- 5 Court wants to, on the record, indicate that it greatly
- 6 appreciates Ms. Brodskaya's assistance in translating.
- 7 She is leaving, and there will be a different translator
- 8 here taking her place tomorrow. Ms. Brodskaya will
- 9 continue to be here, but on that note, thank you so much
- 10 for your assistance --
- 11 THE INTERPRETER: Thank you, Your Honor.
- 12 THE COURT: -- to the court.
- 13 THE INTERPRETER: My please.
- 14 THE COURT: Come back to Douglas County any
- 15 time. We are in recess.

) -	DA 14-343G	-000-
3		2
4	IN THE NINTH JUDICIAL DISTRICT COURT OF THE STATE OF	3
5		4 THE COURT: We're back in session in 14-DI16,
6	NEVADA IN AND FOR THE COUNTY OF DOUGLAS	5 State of Nevada versus Tatiana Leibel. Mr. Gregory is
7	THE HONORABLE NATHAN TOD YOUNG, DISTRICT JUDGE	6 here for the State, and for the defense, we have
8	-000-	7 Ms. Brown and Ms. Henry, who are both here. Ms. Leibel
	STATE OF NEVADA,	* ·
9	Plaintiff,)	8 is here, and the interpreters are here. However, we have
10	vs.)	9 a new interpreter that I would like to swear before we go
11	Ì	10 any further. New to us. Face the clerk here. Raise
12	TATIANA LEIBEL, a.k.a.) TATIANA KOSYRKINA,)	11 your right hand.
13	Defendant.)	12 (WHEREUPON, the interpreter was duly sworn.)
14	***ROUGH DRAFT** TRANSCRIPT OF PROCEEDINGS	13 THE COURT: Thank you, ma'am. You may have a
ì	JURY TRIAL	14 seat. Now all of our interpreters has been sworn. I
15	FRIDAY, JANUARY 30, 2015 MINDEN, NEVADA	15 want to address an issue that came to my attention this
16		16 morning. One of the bailiffs advised me that one of our
17	For the State, Mhomas Crosser	17 jurors saw someone that she knew, apparently didn't know
18	For the State: Thomas Gregory, Deputy District Attorney	18 her very well, and it turns out that they had a very
19		19 brief conversation, and she the question was, "What
20	For the Defendant: Kristine L. Brown, Esq. Jamie Henry, Esq.	· · · · · · · · · · · · · · · · · · ·
21	<u>-</u> , <u>-</u>	20 are you doing here? Do you work in this building?" She
22	The Defendant: Tatiana Leibel, a.k.a.	21 said, "No, I'm at Ed Garren's mom." And she said, "Oh,
1	Tatiana Kosyrkina	22 well, I can't talk to you," I think, was the extent of
23	Reported by: Capitol Reporters Nicole Alexander, Nevada CCR #446	23 it.
24	(775) 882~5322	24 However, I intended to bring that juror in
<u> </u>		
	Páge	Page 4
1	INDEX	1 just to have her say exactly what happened and hear if
2	THE WITNESS: PAGE	2 either of you believes that there's cause to dismiss her
3	RALPH BURACH Direct examination by Mr. Gregory 10	
1		1
4	Cross-examination by Ms. Henry 20	3 from the jury. So it's Miss Martin, and it's my
		3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection
5	THE WITNESS: DARLA LEIBEL-BURROW	 3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory?
	THE WITNESS:	 3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor.
5 6 7	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29	 3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one
5	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23	 3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor.
5 6 7	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34	 3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one
5 6 7 8	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40	 3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one 8 of you? 9 MS. BROWN: No, Your Honor.
5 6 7 8 9	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40 THE WITNESS: MATTHEW NOEDEL	3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one 8 of you? 9 MS. BROWN: No, Your Honor. 10 THE COURT: Can we bring Miss Martin in.
5 6 7 8 9	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40 THE WITNESS: MATTHEW NOEDEL Direct examination by Mr. Gregory 42 Cross-examination by Mr. Gregory 102, 121	3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one 8 of you? 9 MS. BROWN: No, Your Honor. 10 THE COURT: Can we bring Miss Martin in. 11 Ms. Martin, good morning.
5 6 7 8 9 10 11 12	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40 THE WITNESS: MATTHEW NOEDEL Direct examination by Mr. Gregory 42	3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one 8 of you? 9 MS. BROWN: No, Your Honor. 10 THE COURT: Can we bring Miss Martin in. 11 Ms. Martin, good morning. 12 JUROR NO. 3: Good morning. It's me again.
5 6 7 8 9 10 11 12 13	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40 THE WITNESS: MATTHEW NOEDEL Direct examination by Mr. Gregory 42 Cross-examination by Ms. Brown 102, 121 Redirect examination by Ms. Brown 102, 121 Redirect examination by Mr. Gregory 127, 132,	3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one 8 of you? 9 MS. BROWN: No, Your Honor. 10 THE COURT: Can we bring Miss Martin in. 11 Ms. Martin, good morning. 12 JUROR NO. 3: Good morning. It's me again. 13 I apologize.
5 6 7 8 9 10 11 12 13 14	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40 THE WITNESS: MATTHEW NOEDEL Direct examination by Mr. Gregory 42 Cross-examination by Ms. Brown 102, 121 Redirect examination by Mr. Gregory 127, 132, Recross examination by Ms. Brown 134 THE WITNESS:	3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. GREGORY: No, Your Honor. 7 THE COURT: And do the defense, either of one 8 of you? 9 MS. BROWN: No, Your Honor. 10 THE COURT: Can we bring Miss Martin in. 11 Ms. Martin, good morning. 12 JUROR NO. 3: Good morning. It's me again. 13 I apologize. 14 THE COURT: No, ma'am. It's all right, but
5 6 7 8 9 10 11 12 13 14 15	THE WITNESS: DARLA LEIBEL-BURROW Direct examination by Mr. Gregory 23 Cross-examination by Ms. Henry 29 THE WITNESS: SHARON OREN Direct examination by Mr. Gregory 34 Cross-examination by Ms. Brown 40 THE WITNESS: MATTHEW NOEDEL Direct examination by Mr. Gregory 42 Cross-examination by Ms. Brown 102, 121 Redirect examination by Mr. Gregory 127, 132, 142 Recross examination by Ms. Brown 134	3 from the jury. So it's Miss Martin, and it's my 4 intention to start with that. Do you have any objection 5 to that, Mr. Gregory? 6 MR. Do you mind telling 20 us about it? 21 JUROR NO. 3: No. I mentioned it because I 22 didn't know who possibly could have seen it who might

Page 5

- 1 as I was leaving, I just said, "Hi, Sandy." She said,
- 2 Hi. I thought it was you." And so I said to her, "Are
- 3 you still going to the same church?" We talked about the
- 4 church for a little bit, and then we talked about bunco
- 5 because that's how we knew each other, and this is years
- 6 and years ago. I mean, years and years ago. I used to
- 7 do coffee and doughnuts at Life Point Community Church,
- 8 so when she'd get her donut, we'd say, "Good morning."
- That was the extend of it.
- I would not call her a friend, but an 1.0
- 11 acquaintance, and just as we were just about finishing
- 12 the conversation, I said to her, "Do you work here?" And
- 13 she said, "No. I was here to see my son testify,
- 14 whatever Garren." And I said, "Okay. Nice to see you,"
- 15 and I left.
- THE COURT: Okay. 16
- JUROR NO. 3: And I realized it was somebody 17
- 18 that was involved.
- THE COURT: Well, first of all, I greatly
- 20 appreciate you telling us. I really, really do. And do
- 21 you believe that that conversation influences you in this
- 22 trial in any fashion?
- JUROR NO. 3: Absolutely not. 23
- THE COURT: Does it tend to make you believe

- 1 your seat.
- 2 JUROR NO. 3: I'd like to get something
- 3 first.
- THE COURT: Okay. We'll give you a moment to
- do that.
- JUROR NO. 3: Just going to grab a bottle of
- 7 water.
- 8 THE COURT: Thank you.
- THE BAILIFF: Can we let the audience in or
- 10 the people?
- THE COURT: Yes, sir, you may. 11
- Counsel still think we're looking okay for 12
- 13 Friday concluding?
- MR. GREGORY: Yes, Your Honor. 14
- 15 THE COURT: You know the place you're at,
- 16 so --
- MR. GREGORY: Yes. I would tell the Court I 17
- think I'm ahead of schedule. Yeah, we're on track. 18
- THE COURT: Well, you I don't know where we 19
- 20 are?
- 21 MS. BROWN: Yeah. I was going to say how far
- 22 ahead of schedule.
- THE COURT: All right. Well, we'll see. Why 23
- 24 don't we bring in the jury. Thank you very much.

Page 6

- 1 or disbelieve Investigator Garren, that conversation?
- JUROR NO. 3: No. 2
- 3 THE COURT: Has it impacted you in any
- 4 fashion regarding this trial?
- JUROR NO. 3: No. and I didn't even know if I
- 6 should mention it, but I thought there could have been
- someone who witnessed an encounter that could have 7
- thought it went on beyond that point. 8
- THE COURT: Well, you should have mention it.
- 10 You did exactly the right thing.
- JUROR NO. 3: Well, you had said people on 11
- 12 the board, and Sandy wasn't on the board, but -- and I
- 13 didn't even know she had -- I know people like to come
- 14 see trials, so I didn't have a clue.
- THE COURT: Absolutely, ma'am. Mr. Gregory, 15
- 16 do you have any questions?
- MR. GREGORY: No. 17
- THE COURT: Ms. Brown? 18
- 19 MS. BROWN: No, Your Honor.
- THE COURT: Ms. Martin, I think you did 20
- 21 exactly the right and honorable thing. There's no reason
- 22 to excuse you. We appreciate your participation.
- Now I'm going to bring in the rest of the
- 24 jury. You can go back and walk in with them or just take

- MS. BROWN: And, Your Honor, just in case
- 2 there's any witnesses in the courtroom, they need to be
- instructed on the rule of exclusion.
- THE COURT: Are there any witnesses in the
- 5 courtroom other than the family members I've talked to
- already? Okay. Thank you. The public is welcome.
- Good morning, all. Have a seat please.
- Thank you. Good morning to all of you. Ms. Martin, I
- forgot to ask, and I apologize. How is your mother?
- JUROR NO. 3: Much better. I think it was 10
- 11 blood pressure. She was very low again this morning, and
- 12 she couldn't get out of bed, so it's probably the blood
- 13 pressure that's affecting her. But she's a got caregiver
- that is coming in all day long.
- THE COURT: Very good. Thank you. To all of 15
- 16 the jurors, I want to apologize. We generally have that
- jury room cleaned up a little bit. Mr. Seddon and I went 17
- 18 in last knew night and cleaned up a few things, but
- generally the janitorial staff comes in and empties the
- garbage can. I note that that didn't happen last night,
- 21 but we'll make sure it does. We want you to be
- 22 comfortable back there. Those of you who left bottles of
- 23 water out here, we left them in place. If you want fresh
- 24 water, you're welcome to it, but I kind of presume that

· Page 12

Page 9

- 1 you left your bottles here because you wanted them. If
- 2 you don't and you want a fresh bottle, you're welcome to
- 3 that. Good morning to all of you.
- So will counsel stipulate to the presence of
- 5 the jury?
- MR. GREGORY: Yes, Your Honor. 6
- MS. BROWN: Yes, Your Honor. 7
- THE COURT: Okay. With that, Mr. Gregory,
- your next witness, please, sir.
- MR. GREGORY: Thank you, Your Honor. I'll 10
- 11 start with an exhibit first, Exhibit Number 140. That's
- 12 a certified copy of a Certificate of Death from
- 13 Mr. Leibel. I'd move for its admission.
- 14 THE COURT: May I see it, please?
- MR. GREGORY: Yes. 15
- THE COURT: Do you have any objection to it? 16
- MS. BROWN: No. Your Honor. 17
- THE COURT: 140 is admitted. 18
- 19 (Exhibit No. 140 was admitted into evidence.)
- MR. GREGORY: The State calls Ralph Burach. 20
- 21 Come on in, sir. If you would pause right there and face
- 22 the clerk for a moment. This is the clerk right here,
- 23 the lady who is standing. Raise your right hand, sir.
- 24

- 1 with Mr. Leibel.
- 2 A. Harry Leibel was my dearest and closest
- 3 friend. I knew the man for over 50 years. Our
- 4 relationship started back in Los Angeles at Fairfax High
- 5 School. We went to high school together, junior college,
- 6 practically grew up together, lived in the same community
- 7 for years. He encouraged me to move to Orange County. I
- 8 knew him in Orange County for years; knew his family
- exceptionally well. Harry Leibel was my closest and
- 10 dearest friend.
- 11 Q. Do you know when about in time Harry moved to
- 12 Tahoe?
- 13 A. Harry moved to Lake Tahoe, I believe, the me
- beginning of like 2001-2002, somewhere in there.
- 15 Q. How did that impact your contact with
- 16 Mr. Leibel?
- 17 A. It impacted it a little bit. Obviously, you
- 18 know, the distance was a bit of a problem, but it didn't
- stop me from using the phone and always calling my buddy
- 20 to see what was going on. We were very close.
- 21 O. And would you still be able to get together
- 22 sometimes even though he had moved up here?
- 23 A. Absolutely. I drove up and I saw Harry on
- 24 occasion a few times. I enjoyed the Lake Tahoe area.

Page 10

- 1 It's beautiful.
- 2 Q. And describe Harry's personality.
 - 3 A. Describe Harry's personality. Harry was one
 - 4 of a kind. He had a very up-tone personality. He loved
 - living. He was very intelligent. Him and I would share
 - many stories and discuss many different topics. Harry
 - was open minded about a lot of things. He was always
 - kind of searching for truths, and different kinds of
 - things. He had a very unique personality. He was very
 - fun person, very up-tone, and just a swell guy. A good
 - guy to be around. 11
 - 12 Q. Are you also familiar with Tatiana Leibel?
 - 13 A. Yes, I'm familiar with Tatiana.
 - 14 Q. And who is she? How do you know Tatiana?
 - 15 A. Well, obviously through Harry when they
 - 16 married and they started their relationship in Los
 - 17 Angeles. I met her then.
 - 18 Q. Are you familiar with Harry's children?
 - 19 A. I am very familiar. I am the Godson --
 - 20 Godfather to both of them, both Sharon and Justin.
 - 21 O. And they're both adults now?
 - 22 A. Yes, they are.
 - 23 Q. And were they children of Harry's by a prior
 - 24 marriage?

RALPH BURACH. 1

having been first duly sworn, was 2

examined and testified as follows: 3

THE COURT: Come over here and have a seat, 5

- 6 please, sir. THE WITNESS: Yes, sir. 7
- THE COURT: There's some water if you'd like. 8
- THE WITNESS: Thank you. 9
- 10 THE COURT: Mr. Gregory?

11

- DIRECT EXAMINATION 12
- BY MR. GREGORY:
- Q. Good morning, sir. Will you please state
- your full name.
- 16 A. My name is Ralph Baruch.
- 17 Q. How do you spell your last name?
- 18 A. B-a-r-u-c-h.
- 19 Q. And it's my understanding you're visiting us
- 20 today from Southern California?
- 21 A. Yes, sir. That is correct.
- 22 Q. Do you know Harry Leibel?
- 23 A. No know him very well.
- 24 O. Tell us a little bit about your relationship

- 1 A. By a different marriage, yes.
- 2 Q. And did you actually attend Harry and
- 3 Tatiana's wedding?
- 4 A. I did, yes, in the Marina Del Ray. I
- 5 attended. Yes.
- 6 Q. Are you familiar with Harry's religious
- 7 beliefs?
- 8 A. Yes, I am, to some degree. You know, Harry
- 9 was a member of the Jewish faith, and Harry also started
- 10 practicing and learning the Kabbalah, which is old Jewish
- 11 scriptures.
- 12 Q. Do you know to what extent he was involved
- 13 with that?
- 14 A. Very extensively. The Kabbalah, he got into
- 15 it very extensively in Los Angeles. He was actually an
- 16 instructor in the West L. A. Kabbalah Center and did a
- 17 lot of reading, and we talked about it openly. Harry was
- 18 very well-versed on Kabbalah.
- 19 Q. Are you familiar with that as well?
- 20 A. Not as well as he was, but through lectures
- 21 and stories with Harry, he turned me on to quite a few
- 22 things, and he brought me along.
- 23 Q. Do you know that religion's view of suicide
- 24 is?

- 1 Q. Anything that -- You said you sensed some
- 2 friction. Anything that shed light on that?
- 3 A. The money situation, some financial things
- 4 came up. He had been helping Tatiana's oldest Daughter
- 5 out, Lana, and he was going to stop doing that. He
- 6 wasn't going to be a part of that. He wasn't going to
- 7 subsidize them anymore, and that was causing a little bit
- 8 of friction.
- 9 Q. Okay. You said he visited them July 4th,
- 10 2013?
- 11 A. Yes, sir. That is correct.
- 12 Q. And was that up here in Lake Tahoe?
- 13 A. Yes, it was.
- 14 Q. How long did you stay?
- 15 A. I stayed maybe four days, five days. It was
- 16 a short stay.
- 17 Q. And you said when you talked with Harry,
- 18 Tatiana wasn't there. Was she there during the course of
- 19 your stay?
- 20 A. No. She was down taking care of her
- 21 daughter. Her daughter had just given birth to twins. I
- believe she was either living in, I think, Glendale or
- 23 the Pasadena area.
- 24 Q. So Southern California --

Page 14

Page 16

- 1 A. Totally unacceptable. It's a sin.
- 2 O. Describe Harry's relationship with Tatiana.
- 3 A. Well, at first, it was very good. It was a
- 4 good relationship, a loving relationship. They got along
- 5 exceptionally well. They were good together. Through
- 6 their years in Los Angeles, they got along very well.
- 7 They worked well together.
- 8 And then when they moved to Tahoe, I would
- 9 have to assume in the beginning it was good, but towards
- 10 the end, I sensed a little friction in the relationship.
- 11 Something was quite not right. Things were changing a
- 12 little bit, but I never got too personal with Harry.
- 13 That's a line I didn't like to cover or cross, you know.
- 14 If he wanted to tell me something, he would tell me
- 15 something, but it was changing a little bit. The
- 16 relationship was changing a little bit. I sensed a
- 17 little friction.
- 18 O. Okay. So I take it you said you didn't get
- 19 into it with him. You don't know what the problem was?
- 20 A. No, not in the beginning. Towards the end,
- 21 my last trip when I saw Harry was in 2013 around the July
- 22 4th weekend, and I had some discussion Harry about a few
- 23 things. Tatiana wasn't there at the time, but we talked
- 24 about a few things.

- 1 A. Yes, sir. That's correct. Yes.
- 2 Q. -- as well? When did you last speak with
- 3 Harry on the phone?
- 4 A. I spoke to my friend a week before the
- 5 murder.
- 6 MS. HENRY: Objection, Your Honor.
- 7 THE COURT: What's your objection?
- 8 MS. HENRY: The objection is is there's --
- 9 THE COURT: What's your legal objection?
- MS. HENRY: Assuming facts not in evidence.
- 11 THE COURT: The reference to "murder" will be
- 12 stricken.
- 13 MS. HENRY: Thank you, Your Honor.
- 14 THE COURT: And the jury is instructed to
- 15 disregard that.
- 16 Q. (BY MR. GREGORY:) You told investigators you
- 17 last spoke to him on February 20th. Does that sound
- 18 correct?
- 19 THE COURT: The objection was it's based on
- 20 supposition, not this witness's personal knowledge, would
- 21 be the appropriate objection. Thank you. And that's why
- 22 it was stricken. Go ahead.
 - MR. GREGORY: Understood.
- THE WITNESS: Could you repeat the question?

Page	17	•
------	----	---

- 1 THE COURT: Would you, please.
- 2 O. (BY MR. GREGORY:) Yes. You had told
- 3 investigators that the last conversation was on February
- 4 20th
- 5 A. Yeah, right around there, yeah. I had talked
- 6 to Harry then, yes.
- 7 Q. Okay. And then he passed away on the 23rd,
- 8 just three days later?
- 9 A. (Indicating.)
- 10 THE COURT: The witness is nodding his head.
- 11 Q. (BY MR. GREGORY:) Thank you. Nodding his
- 12 head in affirmative.
- 13 A. Yes, that's correct.
- 14 Q. How was Harry during that conversation?
- 15 A. Harry was okay. He kind of apologized to me.
- 16 When we had saw each other last during that 4th weekend,
- 17 he wasn't feeling quite well, and then he later explained
- 18 to me that he had gone to the doctor, and he was
- 19 suffering from blood poisoning, and he was on heavy-duty
- 20 antibiotics.
- 21 O. That's from back in July when you visited
- 22 him?
- 23 A. Yes, when I saw him. That's correct. And he
- 24 apologized to me. We didn't really do much. We

- 1 Q. Did you ever hear from Tatiana?
- 2 A. Never.
- 3 Q. Did that surprise you?
- 4 A. No, didn't surprise me.
- 5 Q. Okay. Why not?
- 6 A. You know, towards the end of the
- 7 relationship, I hardly spoke with her, you know. There
- 8 wasn't much communication. And usually when I did call
- 9 Harry, he would be the one that always answered the
- .0 telephone, so our conversation was between the both of
- 11 us.
- 12 Q. So predating the July 4th day when you came
- 13 to see him, when was the time prior to that you had seen
- 14 him? About how much separation in time?
- 15 A. Possibly a year, maybe two. We had been -- I
- 16 had been up with my wife to Tahoe to see him. I don't
- know if it was in '12 or '11. Some time had passed.
- MR. GREGORY: Thank you. Nothing further.
- THE COURT: Ms. Brown, Ms. Henry?
- 20 MS. HENRY: Thank you, Your Honor.
- 21
- 23

- 1 basically stayed in the house because I didn't really
- 2 want to do much to him. I didn't want to take him down
- 3 the hill because I knew he wasn't feeling well.
- 4 Q. How about during the course of this
- 5 conversation? Did you guys discuss his health at all
- 6 then?
- 7 A. No, that was about it. It was just that
- brief thing about the blood poisoning, and he was
- 9 starting to feel a little better because of the
- 10 medication.
- 11 Q. How did he sound to you?
- 12 A. He sounded okay. He sounded pretty good.
- 13 O. Did he sound like himself?
- 14 A. Yeah, he did. He did. He did. He was
- 15 basically up-tone, and I could understand him clearly.
- 16 Q. Anything about that conversation that raised
- 17 red flags or concerns --
- 18 A. No.
- 19 Q. -- for Harry's well-being?
- 20 A. No, none at all.
- 21 O. When did you hear of Harry's death?
- 22 A. I guess it was the middle of the week. I was
- 23 working, and I had just got home from work, and my wife
- 24 told me that Harry had been shot and killed.

- 1 CROSS-EXAMINATION
- BY MS. HENRY:
- 3 Q. Now, you had said that when you spoke with
- 4 Mr. Leibel, he indicated to you that he wasn't feeling
- 5 well on the last visit in the summer of 2013; correct?
- 6 A. Yes, that is correct.
- 7 Q. He had suffered from blood poisoning, that he
- 8 was on heavy antibiotics?
- 9 A. Yes, that's what he told me.
- 10 O. And being his best friend, you obviously know
- 11 that he had cancer a while back as well; correct?
- 12 A. That's correct. Yes.
- 13 Q. And he also had major surgery for that
- 14 cancer; correct?
- 15 A. Yes, ma'am. That is correct. Yes.
- 16 Q. And then I'm sure that you're also probably
- 17 aware that there might have been some issues with that
- 18 surgery?
- 19 A. Yes, there were.
- 20 O. Okay. And do you know who those issues were?
- 21 A. He had to visit the bathroom frequently.
- 22 Q. Very frequently; correct?
- 23 A. Yes, ma'am, he did.
- 24 Q. That it was very hard for him to leave the

Page 28

- 1 moved here, I went on with my life. And after I moved
- 2 here, he'd call. After he moved up to Lake Tahoe, he'd
- 3 call quite frequently, and over the years, it dwindled.
- 4 So that was our relationship.
- 5 Q. So it dwindled. During the last five years
- 6 of his life, how much did you have contact with him?
- 7 A. Well, the last five years, probably a half a
- dozen times. There was a four-year space where I never
- heard from him, and then out of the blue, about a week
- before his death. 10
- 11 Q. Let's talk about that out-of-the-blue
- 12 communication. How did that happen?
- 13 A. I got a message on Facebook from Harry that
- said something about, "How you doing? Can we talk? Can
- I call you?" So I answered back, "Sure. Here's my
- number." Well, he had my number. So he says, "How about
- 1:00 clock?" And I said, "That's fine." So he called. 17
- I spoke to him. Now you have to know there was nothing 18
- romantic between us at this time. We were just friends.
- 20 We had always been best friends, and we talked for a long
- time, and that was that.
- 22 O. I can tell you're emotional.
- 23 A. Yes.
- 24 O. Sorry to make you go through this. You said

- 1 MS. HENRY: Objection. Hearsay.
- 2 THE WITNESS: Pardon?
- MS. HENRY: She's saying what Mr. Leibel 3
- said 4
- THE COURT: Sustained. 5
- 6 Q. (BY MR. GREGORY:) Did he indicate anything
- about his relationship with Ms. Leibel?
- A. Well, he stated that he wished he had that,
- what I had, but he didn't. He said --9
- MS. HENRY: Objection. Hearsay. 10
- THE COURT: Sustained. 11
- 12 MR. GREGORY: Your Honor, it goes to his
- 13 state of mind.
- THE COURT: It's sustained. 14
- 15 O. (BY MR. GREGORY:) Okay. Anything else?
- THE COURT: The jury is instructed to 16
- 17 disregard that.
- Q. (BY MR. GREGORY:) Anything else about the 18
- conversation that caused you to concern?
- A. He basically told me he had --
- MS. HENRY: Objection. Hearsay. "He told 21
- me." 22
- 23 MR. GREGORY: Your Honor ---
- THE COURT: Sustained. 24

Page 26

- 1 you talked a long time. About how long did you talk?
- 2 A. Close to two hours.
- 3 O. Did how did Harry sound to you?
- 4 A. Fine. He was talking about a project he was
- working on, and they expected it to come to fruition real
- soon. And then we started talking about our -- we had at 6
- one time bought a fifth wheel and a truck and traveled
- across the country, and we started talking about some of
- the things that we did and he sounded pretty jovial.
- 10 O. Did he say anything that was of concern to
- you? 11
- 12 A. Actually, not of concern because everything
- seemed positive. The only thing he asked me how my
- husband was doing, how Ariel was doing, and I said he was 14
- great. He had told me about his cancer, going through 15
- his cancer thing, and I had had a liver transplant, so I 16
- was describing how my husband took such good care of me, 17
- how I was down to 84 pounds, and he'd carry me from my 18
- bed to the living room to the bathroom. He bathed me, 19
- cleaned me. I says, "He took such good care of me." And
- 20 even in the hospital, he would sit with me all day long 21
- for days because I'd be in there for months, and how well
- he took care of me and how much he loved me and 23
- everything. And he said --24

MR. GREGORY: -- I'm trying to elicit his

- state of mind regarding his marriage.
- THE COURT: I'm not going to allow that. 3
- 4 Q. (BY MR. GREGORY:) Okay. Did you have any
- children in common with Harry?
- 6 A. No.
- 7 O. And are you familiar with his -- Did he have
- a wife prior to you?
- 9 A. Yes.
- 10 Q. And who is she? Do you know?
- 11 A. Susan Leibel. She's now Susan Green. I
- raised her children, you know, Sharon and Justin, and we
- still today have always had a good relationship.
- O. Describe Harry's personality.
- 15 A. He was basically a happy type individual,
- 16 always happy, made the best out of something bad or made
- 17 you laugh when you were at your worst. He could be mean
- 18 as far as nothing physical. It was normally just verbal,
- and then he'd smile at you and hug you, and it was over
- with. In fact, I couldn't get him to fight. He'd never 20
- raise his voice, and I'm a voice -- very boisterous. So 21
- 22 I keep him going, and he wouldn't fight. He'd just sit
- back and say, "Okay. Just does that make you feel 23
- better?"

- 1 Q. Is there any posturing that he would do when
- 2 he'd have those verbal debates with you?
- 3 A. No.
- 4 Q. Okay. And when you said he was mean, I also
- 5 heard you say --
- 6 A. Mean verbally.
- 7 O. I also heard you say he didn't yell.
- 8 A. No.
- 9 Q. So he'd do it with a calm voice?
- 10 A. He never yelled at anybody.
- 11 MR. GREGORY: All right. Thank you. Nothing
- 12 further.
- 13 THE COURT: Cross, Ms. Henry?
- 14 MS. HENRY: Yes. Thank you, Your Honor.
- 15
- 16 CROSS-EXAMINATION
- 17 BY MS. HENRY:
- 18 Q. So when you said Harry was mean --
- 19 A. Verbally.
- 20 Q. Verbally. Just a sharp tongue?
- 21 A. Yes.
- 22 Q. Okay. Now, he contacted you by Facebook? He
- 23 found you on Facebook?
- 24 A. Yes, that's how he made contact with me.

- 1 Q. -- correct? Otherwise, you probably wouldn't
- 2 have divorced?
- з A. Right.
- 4 Q. And was that because his mom didn't like you?
- 5 A. It was because I wasn't Jewish.
- 6 Q. Okay. So she was very religious?
- 7 A. Yes.
- 8 Q. Didn't you say, when we spoke, didn't you
- 9 they you converted?
- 10 A. I converted. I went to the University of
- 11 Judaism on Mulholland Drive in L. A. And got my
- 12 certificate. It wasn't good enough.
- 13 Q. It wasn't good enough for her?
- 14 A. No. I had to be born Jewish.
- 15 Q. When he contacted you on Facebook, were you
- 16 surprised?
- 17 A. Yes.
- 18 Q. And do you check Facebook regularly?
- 19 A. No.
- 20 Q. Did you just happen to check Facebook?
- 21 A. I just happened to check Facebook, and it had
- 22 been there for a while.
- 23 Q. Okay. How long?
- 24 A. A week, two weeks. Something like that. The

- 1 Q. And prior to that contact, you hadn't had
- 2 contact with him, did you say, for four years?
- 3 A. About four years, yeah.
- 4 O. And but you always thought about him?
- 5 A. Well, I didn't think about it. No.
- 6 O. Didn't you say that you guys were best
- 7 friends?
- 8 A. We were best friends.
- 9 Q. So you ---
- 10 A. But, see, I left for a liver transplant. I
- 11 was Back East waiting for a liver and going through
- 12 everything that there has to be with that comes along,
- 13 out of your head and --
- 14 Q. Sure. And Harry, Mr. Leibel, he was the love
- 15 of your life; correct?
- 16 A. You might say that.
- 17 Q. And you believe that he loved you too when
- 18 you guys were married; correct?
- 19 A. It was never brought up, but I'm sure at some
- 20 degree, you know. You never lose -- These are people you
- 21 marry. You love them.
- 22 Q. And the only reason you were divorced was
- 23 because of his mom --
- 24 A. Yes.

- 1 date -- That's about how often I check Facebook.
- 2 Q. Okay. So you spoke with him about a week
- 3 before he had passed --
- 4 A. Yes.
- 5 Q. -- but you made contact with you --
- 6 A. Uh-huh.
- 7 Q. -- two or three weeks prior to that?
- 8 A. Probably on Facebook --
- 9 Q. Right.
- 10 A. -- but the day I read the Facebook I --
- 11 O. Okay. Sure. And then after that, you spoke
- 12 for a couple of hours?
- 13 A. Uh-huh.
- 14 Q. And when we had our conversation, you had
- 15 said that you guys reminisced for over two hours?
- 16 A. Well, it was about two hours, yeah.
- 17 Q. About two hours, and that was regarding?
- 18 MR. GREGORY: Your Honor, I'd object if
- 19 they're going to get into hearsay and ask about the
- 20 conversation.
- 21 THE COURT: Exactly. Sustained if you're
- 22 going to get the substance of conversations.
- 23 Q. (BY MS. HENRY:) So you reminisced --
- 24 A. Yes --

Page 33

- 1 Q. -- about old times?
- 2 A. -- about our travels.
- 3 Q. And you guys had traveled. Where did you
- 4 travel to?
- 5 A. Just across country. We went to every state
- 6 just about and spent a little time here and there.
- 7 Q. And had a great time doing that?
- 8 A. Yes.
- 9 Q. And you reminisced about that?
- 10 A. Yes.
- 11 MS. HENRY: Nothing further.
- 12 THE COURT: Anything else, Mr. Gregory?
- MR, GREGORY: Yes, Your Honor. I'd like to
- 14 ask the questions I was prohibited from asking before
- 15 given the nature of the defense's questioning.
- 16 THE COURT: No.
- 17 MR. GREGORY: Nothing further.
- 18 THE COURT: You may step down.
- 19 THE WITNESS: Am I excused from jury? I mean
- 20 from being a witness?
- 21 THE COURT: Yes, ma'am, you are. You may
- 22 stay in the courtroom, if you'd like.
- 23 THE WITNESS: Thank you.
- MR. GREGORY: The State calls Sharon Oren.

- 1 A. O-r-e-n.
- 2 Q. What do you do for a living?
- 3 A. I own Maccabee Arms here in Nevada.
- 4 Q. All right. And are you familiar with Harry
- 5 Leibel?
- 6 A. Yes, I am.
- 7 Q. How are you familiar with Mr. Leibel?
- 8 A. I met him a few years ago through business,
- 9 and then we became friends.
- 10 Q. And are you also familiar with Tatiana
- 11 Leibel?
- 12 A. I am.
- 13 Q. And how familiar are you with her?
- 14 A. Through Harry so, you know, I met both of
- 15 them at the same time, and most of our interaction.
- 16 majority of them were together through the family, wives.
- 17 Q. Did Harry's death surprise you?
- 18 A. No.
- 19 Q. Were you becoming -- Did you have concerns
- 20 for Harry during the latter portions of his life?
- MS. BROWN: Objection as to --
- 22 THE COURT: What is the objection?
- MS. BROWN: As to his concerns, the relevance
- 24 of his concerns.

Page 34

Page 36

- 1 THE COURT: Come on in, sir. If you would
- 2 pause right in front of the clerk, face the clerk, raise
- 3 your right hand, please.
- 4
- 5 SHARON OREN,
- 6 having been first duly sworn, was
- 7 examined and testified as follows:
- 8 TITE COLID
- 9 THE COURT: Come on up and have a seat up
- 10 here, please. Help yourself to some water, if you'd like
- 11 it.
- 12 THE WITNESS: Thank you. I'll be fine.
- THE COURT: Mr. Gregory?
- 14 THE WITNESS: I was in the service a long
- 15 time ago. Please don't call me sir.
- 16
- 17 DIRECT EXAMINATION
- 18 BY MR. GREGORY:
- 19 Q. Morning, sir. Can you please state your full
- 20 name?
- 21 A. Sharon Oren.
- 22 Q. Spell your first name, please.
- 23 A. S-h-a-r-o-n.
- 24 Q. And your last name?

- 1 THE COURT: The relevance. Okay. Why is
- 2 that relevant?
- 3 MR. GREGORY: Because he's going to be --
- 4 He's going to give background as to what his concerns
- 5 were that shed light on what was going on in Harry's life
- 6 that he's aware of.
- 7 THE COURT: I'll overrule it, but you're
- s going to have to tie it in.
- 9 MR. GREGORY:) Okay. Go ahead.
- 10 THE WITNESS: If you can repeat the question
- 11 again. Sorry.
- 12 Q. (BY MR. GREGORY:) Yes. Were you having
- 13 concerns for Harry towards the end of his life?
- 14 A. Yes. Yes, I did.
- 15 Q. What type of concerns?
- 16 A. I pretty much was afraid for his life.
- 17 Q. Okay. Why was that?
- 18 A. Unfortunately, seeing what was going on in
- 19 his life in the past, I would say almost couple of years,
- 20 and that I've seen with my eyes and I heard from him,
- 21 unfortunately, and the writing was on the wall.
- A JUROR: Your Honor, I'm having trouble
- 23 hearing what he's saying.
- 24 THE COURT: Sir, you're going to have so sit

(9) Pages 33 - 36

- 1 up, okay, and put your -- Understand that there's a
- 2 microphone right in front of you, sir, and I'm going to
- 3 ask you to speak a little bit louder if you would,
- 4 please.
- 5 THE WITNESS: Sure.
- 6 THE COURT: Thank you. Would you repeat your
- 7 answer.
- 8 THE WITNESS: Yes. Unfortunately because of
- 9 my interaction with Harry in the past couple years, the
- 10 writing was pretty much on the wall, so --
- 11 Q. (BY MR. GREGORY:) Explain that. I don't
- 12 know what that means.
- 13 A. Looking at the relationship between Harry and
- 14 Tatiana, conversations I had with Harry regarding --
- 15 regarding their marriage and their current situation.
- 16 Like I said, the concerns were definitely there.
- 17 Q. What were your worried was going to happen?
- 18 MS. BROWN: Objection. Relevance.
- 19 THE COURT: I'm going to sustain that, and
- 20 not on the relevance, but it's speculation. And I'm not
- 21 going to -- You're going to have to go to some specific
- 22 incident or something like that.
- 23 Q. (BY MR. GREGORY:) Okay. Did you give Harry
- 24 any warnings.

- 1 O. (BY MR. GREGORY:) Okay. How often did you
- 2 warn Harry?
- 3 A. I believe that the first real warning was
- 4 when I met with him in the Lake at the -- probably it was
- 5 Camp Richardson. There was another friend of ours who
- 6 was -- of mine from Los Angeles was present for the
- 7 conversation.
- 8 THE COURT: Wait a minute. Wait a minute.
- 9 First out when the most recent warning was.
- 10 Q. (BY MR. GREGORY:) When was the most recent
- 11 warning?
- 12 A. I will have to say it was roughly about a
- 13 month prior to the event.
- 14 THE COURT: Okay. That testimony is allowed.
- 15 I'm not going to go back.
- MR. GREGORY: And I'll end with that, Your
- 17 Honor. Thank you.
- 18 THE COURT: Do you have questions of this
- 19 witness, defense table?
- MS. BROWN: Yes, Your Honor.
- 21 THE COURT: Thank you.
- 22
- 24

Page 40

- 1 A. Yes.
- 2 Q. What were those warnings?
- 3 A. I told him that he basically needs to get
- 4 away from Tatiana, lock the door, get a divorce attorney
- 5 because I think she will kill him.
- 6 MS. BROWN: Objection.
- 7 THE COURT: Okay. It is important that if
- 8 you want to object that you need to state a legal basis
- 9 for that objection as opposed to just the fact that you
- 10 object to it. So do you have a legal basis that you'd
- 11 like to object to that testimony on?
- MS. BROWN: Again, it's relevance.
- MR. GREGORY: The relevance --
- 14 MS. BROWN: And speculation.
- 15 THE COURT: Mr. Gregory?
- MR. GREGORY: Your Honor, the cell phone
- 17 information we went through had an entry log for Harry
- 18 for February 25th saying that he was going to call a
- 19 locksmith, so I'm trying to get context to that. His
- 20 testimony that he had told Harry to lock her out is
- 21 relevant for that purpose.
- THE COURT: Then establish a timeframe
- 23 because right now, he's talked about two years, and
- 24 that's not going to tie it in.

- 1 CROSS-EXAMINATION
- 2 BY MS. BROWN:
- 3 O. Do you own Maccabee Arms?
- 4 A. I do.
- 5 Q. And was Mr. Leibel involved in guns?
- 6 A. Both Harry and Tatiana liked guns, yes.
- 7 O. I'm sorry?
- 8 A. Both Harry and Tatiana liked guns. That's
- 9 how I met them.
- 10 Q. So they both liked guns?
- 11 A. That is correct.
- 12 Q. And did you ever go shooting with them?
- 13 A. No.
- MS. BROWN: Thank you. I have nothing
- 15 further?
- 16 THE COURT: Mr. Gregory?
- 17 MR. GREGORY: Nothing further.
- 18 THE COURT: Sir, you may step down. Thank
- 19 you for being here today.
- MR. GREGORY: Your Honor, I'd like to check
- 21 on the availability of Steve Smith. If he's here, I'd
- 22 like to call him next.
- 23 THE COURT: Okay.
- MR. GREGORY: We'll go with Matt Noedel,

Page 41

1 please.

- 2 THE COURT: Mr. Noedel.
- 3 MR. GREGORY: Can I take a moment to see if

4 he's --

- 6 left to go check for you, sir.
- MR. GREGORY: Thank you.
- 8 THE COURT: I believe Mr. Schultz is looking
- 9 for him, so we'll give him a moment.
- 10 Come on in, sir. Step right up, and we're
- 11 going to swear you again here. Okay, Mr. Noedel. Would
- 12 you pause, please. Face the clerk.

13

17

- 14 MATHEW NOEDEL,
- 15 having been first duly sworn, was
- 16 examined and testified as follows:

18 THE COURT: Come on up and have a seat

- 19 please, sir.
- 20 MR. GREGORY: Good morning, sir.
- 21 THE WITNESS: Good morning.
- 22 23
- 24

.____

Page 42

- 1 DIRECT EXAMINATION
- 2 BY MR. GREGORY:
- 3 Q. Please state your full name and spell your
- 4 last name.
- 5 A. Matthew Noedel: N-o-e-d-e-l.
- 6 Q. And Mr. Noedel, we're going to be covering
- 7 two different subject matters, broad matters: Ballistics
- and reconstruction. I'd like to talk about the first
- 9 part of that, the ballistics part. What is your training
- 10 and experience regarding ballistics and firearms?
- 11 A. Well, specifically, my first level of
- 12 training involves my college education, Bachelor of
- 13 Science degrees in microbiology and medical technology
- 14 with a chemistry minor. I have a third Bachelor of
- 15 Science degree in forensic science from California State
- 16 University.
- 17 After obtaining my degrees, I worked for a
- 18 private forensic company for three years before I went
- 19 moved onto the Washington State Patrol Crime Laboratory
- 20 in Tacoma, Washington. That's where I first began
- 21 training in firearm and tool mark analysis. Training is
- 22 provided in the form of mentorship programs where senior
- 23 members of the crime lab provide training. It's also a
- 24 lot of external training from courses offered by firearm

- 1 manufacturers, FBI courses, ATF courses, and
- 2 participation in professional memberships and
- 3 organizations, for example, like AFTE, which is the
- 4 Association of Firearm and Tool mark Examiners; provide
- 5 annual training, conferences, publish journals, and are
- 6 basically the association that covers scientists like
- 7 myself who study firearm and tool mark and ballistic
- 8 issues as a primary part of their job responsibility. So
- 9 I'm a member of that organization and trained in those
- 10 fields with the state patrol for 15 years before I left
- 11 for starting my own company, which is how I'm employed
- 2 now as a private consultant in firearm, tool mark and
- 13 shooting scene reconstruction.
- 14 Within those organizations, there are
- 15 certifications. I carry certifications in firearm
- 16 examination, tool mark examination, gunshot residue, and
- 17 crime scene reconstruction. I also take proficiencies in
- 18 each of those areas every year to maintain a level of
- 19 expertise and experience. So basically, that involvement
- 20 is where my training comes from, where the experience and
- 21 practical application of firearm examination comes from,
- 22 working in the crime labs as well.
- 23 Q. Have you been trained in how to determine
- 24 distancing between barrel of a gun and an object that's

Page 44

- 1 hit with a projectile?
- 2 A. Yes. That's a common task that we are asked
- 3 to evaluate in forensic situations, and one of the
- 4 certifications deals with that aspect specifically, that
- 5 is, the gunshot residue certification.
- 6 Q. And have you also been trained in how to
- 7 identify whether a particular shell casing was fired out
- 8 of the gun?
- 9 A. Yes. Again, the practical application of
- that, of the ballistic science in the laboratory involves
- 11 microscopic analysis of microscopic pieces of information
- 12 that are left behind on bullets or cartridge cases that
- 13 come from the gun that fired it. So we study the
- 14 microscopic marks that are translated from a gun onto
- 15 something like a cartridge case where, say, the firing
- 16 pin has struck the cartridge case. That can leave
- 17 microscopic marks.
- So a big portion of the responsibility and
- experience in ballistic examination is studying those
- 20 marks and comparing knowns, marks that we make on purpose
- 21 by test firing a particular firearm, comparing those
- 22 knowns to evidence exhibits that are recovered from a
- 23 scene, from some scene, and the comparison of those
- 24 microscopic pieces of information is a big part of what's

(11) Pages 41 2290 (29

- 1 done in the forensic laboratory and ballistic
- 2 perspective.
- 3 Q. Did you have an opportunity to actually
- examine the gun that was used in this case?
- 5 A. I did.
- 6 O. Where did that take place?
- 7 A. That was at the Washoe County Crime
- 8 Laboratory in Reno.
- 9 Q. And were you able to determine whether the
- 10 gun was operable or not?
- 11 A. Yes.
- 12 Q. How did you do that?
- 13 A. Operability testing of the gun starts with a
- 14 visual inspection. Typically, we maintain a worksheet as
- 15 we go through that prompts us to check each of the
- 16 aspects. We do things like look down the barrel to make
- sure there's no obstructions blocking the barrel. We 17
- measure some of the characteristics of the firearm, for
- example, how hard it is to pull the trigger, what is the
- amount of pressure it takes to pull a trigger. We check
- the safeties, visually check them. And in doing all of 21 these visual assessment, we get an idea of how the gun is
- going to perform, if there's any problems that we can
- anticipate, and all of those visual assessments are spent

- 1 Q. (BY MR. GREGORY:) Mr. Noedel, this exhibit
- has already been marked into evidence. It is a replica
- gun of the that was used. I'm going to ask you to verify
- that, but I want you to know they pulled the firing pin
- out of it, but I would ask you to do a quick inspection,
- ascertain that it's not loaded, and that the firing pin
- has in fact been removed from it.
- 8 A. The firearm is not loaded, and the firing pin
- is not installed in the proper position. This gun cannot
- 10 fire in this condition.
- 11 Q. Not the actual gun that was used, but give us
- a general description of the gun.
- A. It's a -- It's essentially an exact copy of
- this firearm. This is a firearm that's mass produced.
- 15 It has some unique features. This particular design is
- made by a company called Rossi. They're in association 16
- with a company called Taurus, so it's Rossi slash Taurus
- out of Brazil. 18
- 19 And the interesting features about this gun
- 20 is it's essentially a revolver, which is something we
- typically see in handguns. A revolver refers to this 21
- rotating cylinder which is the position that holds the
- ammunition in line for firing. Usually we see this as a
- handgun type of a design, but what Rossi has done is they

Page 46

- 1 to work towards a point to whether or not we can actually test fire the gun. 2
- If we consider the gun as safe and reasonable 3
- to test fire, then take it to either an indoor water tank
- range of an outdoor range and load it up and actually
- shoot it to test the performance, the actual firing
- performance of the gun.
- 8 Q. Did you actually shoot this gun?
- 9 A. Yes.
- 10 O. And did it -- Was it working as it should?
- 11 A. Yes. This gun has no mechanical flaws or
- 12 failures with this gun at all.
- MR. GREGORY: Your Honor, I'm going to show 13
- 14 him Exhibit 119, which is the firearm that has been
- rendered inoperable. 15
- THE COURT: That's the duplicate firearm; 16
- correct? 17.
- MR. GREGORY: The what? 18
- THE COURT: The one that the sheriff's office 19
- 20
- MR. GREGORY: Yes, correct. 21
- THE COURT: Thank you. It has the firing pin 22
- 23
- MR. GREGORY: Yes.

- put a long stock on it to make it capable of shoulder
- firing, and instead of a short handgun barrel, it's got a
- full-length rifle barrel, so it's basically a revolving
- rifle, which is a fairly unique type of a design.
- In the late 1800's, there were some rifles
- that had this mechanism, but the modern guns, I don't
- know of anyone else who is making a revolving rifle in
- modern production gun.
- Q. Is Exhibit 118 a fair representation of the
- actual gun? 10
- 11 A. Yes, it is.
- 12 O. What's the name of the gun?
- 13 A. This is called a Circuit Judge.
- Q. And what kind of ammunition is it capable of 14
- 15 firing?
- 16 A. Another unique feature of this gun is it can
- fire both shotgun shells in 410 caliber, so that's the 17
- small the small-sized shotgun shells, or it can fire 45 18
- Colt. And it happens that the 410 shot shell and the 45
- Colt happen to have a similar profile of the size of the 20
- 21 cartridge case. That's why this gun can actually accommodate either the single type of projectile in a 45 22
- Colt or shotgun loads that are the smaller size, the 410 23
- caliber shotgun.

- 1 Q. For the layperson, what's the difference
- 2 between a 45 round and a 410 shotgun?
- 3 A. The 45 Colt is a single projectile. It's
- 4 designed to deliver typical construction, so it's a
- 5 cartridge case with gun powder, but a single projectile.
- 6 That's what a 45 Colt is designed to be. The shot shell
- 7 is a shell that is designed that the payload can be a
- single projectile, but you can basically dump anything
- you would like in a shot shell, so you can use multiple
- small pellets and load them in the shot shell and that 10
- shot would deliver all of those pellets downrange, or you 11
- could put four big pellets. The shot shell accommodates 12
- a variety of different types of projectile, where the 45 13
- Colt is always going to be just a single projectile.
- O. Can you just kind of tell us some of the
- terminology with this gun and point out the barrel, the
- muzzle, cylinder, different types of terminology, please.
- 18 A. Yeah. So basically, the barrel is the long
- portion. That's the part of the firearm that directs the 19
- bullet when you fire this gun. The bullets or 20
- projectiles, if it's a shot shell, go down the barrel and
- are directed on their way to their target. 22
- In this gun, we have this metallic rotating 23
- 24 piece is called the cylinder. This gun can accommodate

- doesn't have to do so much work. So single action is
- much lighter. It takes much less pressure in single
- action than it does in double action to fire. So single
- action is the easy way to fire. It takes about -- on the
- evidence gun, it takes about three or four pounds of
- pressure. Double action, because you're doing so much
- more work on the evidence gun, took about 13 or 14 pounds
- of pressure. So double action is quite a bit heavier,
- more difficult to pull through than single action.
- 10 THE COURT: Would you make the record clear
- 11 as to what he means by evidence gun because both guns are
- 12 in evidence.
- 13 Q. (BY MR. GREGORY:) If we could refer to this
- as the demonstration gun as opposed to the gun that was
- actually used.
- 16 A. Yes. The trigger pull pressures that I
- measured were on the gun that was recovered as evidence
- from the house. I haven't measured this gun on that. So
- when I talk about evidence gun, I'm talking about the gun
- recovered from the Leibel house.
- 21 Q. So all of the analysis and shooting of the
- 22 gun that you do was the gun that was taken from the crime
- 23 scene; correct?
- 24 A. Correct. The actual firearm, the test

Page 50

Page 52

- 1 five -- up to five shots, so there are five chambers
- 2 inside the cylinder, and each chamber is aligned one next
- to the other. The hammer is this small spur that comes
- back here. In this gun, you can either simply pull the
- trigger and the firearm will caulk and fire -- that's
- called double action -- or you can manually caulk into
- single action and manually caulk the hammer and fire it
- with single action. 8
- 9 Q. Let me ask you about that. So if you could
- release the hammer. Is there a difference in the how
- hard it is to pull the trigger between double action and 11
- single action?
- 13 A. Yes, there is, because in double action,
- double action refers to what happens when you pull the
- trigger. Two activities occur. What has to happen in 15
- double action is when you pull the trigger, it has to 16
- rotate the cylinder, caulk the hammer, and if you keep 17
- pulling it, ultimately fire. So double action, you have 18
- to pulling the trigger caulks the hammer and fires it.
- So you have to move the trigger farther to have all of 20
- 21 those mechanisms operate.
- In single action, the trigger is actually 22
- reset because you do half of the work externally by 23
- physically caulking the hammer. Now, pulling the trigger

- 1 firing, the manipulation, the measuring of the trigger
- pull was all done with the gun that was recovered from
- the scene, not the replica gun. 3
- MR. GREGORY: If you could just stand right 4
- there, I'd like you to demonstrate and close the 5
- cylinder. Your Honor, can he just step right there.
- 7 THE COURT: Certainly.
- MR. GREGORY: I would just like to have you 8
- demonstrate for the jury first double action. Go ahead
- and shoot it? 10
- THE COURT: One moment. I don't know which 11
- 12 of you is going to cross this witness, but whomever,
- 13 Ms. Brown, if you'd like to step around where you have a
- better view, you're welcome to do that as he engages in
- this demonstration.
- 16 Q. (BY MR. GREGORY:) So this in a double
- 17 action, as I understand it, the hammer is uncocked;
- 18 correct?
- 19 A. Correct. Double action starts with the
- 20 hammer at rest forward, and all of the activity is going
- to occur by pulling the trigger. So when I -- it's 21
- called dry firing. When I dry fire this gun because this
- gun cannot fire without a firing pin, when I dry fire
- 24 this gun, if you watch the cylinder, pulling the trigger

(13) Pages 49 - 52

Page 56

- is going to cause the cylinder to rotate, it's going to
- cause the hammer to caulk back, and if I pull all the way
- through, ultimately, the hammer will go as far back as it
- can go, and it will slam forward, and that would initiate 4
- a discharge if the gun were loaded.
- So in double action, access the trigger, once 6
- the cylinder rotates, the hammer goes back, and bang. So 7
- double action, I can fire this gun in double action. 8
- That's about -- on the gun recovered from the scene, 9
- that's about -- takes about 13 or 14 pounds of pressure 10
- to fire in double action because we're doing work 11
- internally to turn the cylinder, caulk the hammer, and 12
- load all of the mechanisms. 13
- 14 O. As far as trigger pulls go, what does 13
- pounds mean to the layperson?
- 16 A. Thirteen pounds, in reference to most
- resolving resolvers, this is essentially a revolver, 13 17
- pounds is a fairly typical, just slightly to the high end 18
- of the anticipated pressure that we would require. The
- way we measure that is we simply hang weights on there.
- So it's different than, say, hanging 13 pounds on the end 21
- of your finger and trying to lift it. It's a little 22
- easier than that because if the ergonomics of the grip 23
- and the gun and the squeezing mechanism allows us to do

- already done that manually, so it's much easier. On the
- gun that was recovered from the scene, that measurement
- was around three or four pounds, so it's five times
- easier, lighter, to pull it in single action to cause it
- to discharge.
- Q. You can go ahead and retake the stand,
- please. I'd like to talk to you a little bit about gases
- that are released upon a rifle being fired. Could you
- talk to us a little bit about that?
- A. Yes. What happens when a round of ammunition
- is discharged, whether it's a shotgun shell or a single
- projectile, the hammer falls and it hits the firing pin, 12
- and the firing pin strikes that cartridge on a little
- metallic piece called the primer. The primer is the 14
- small dab of explosive that when it's impacted by this 15
- metallic hammer and the firing pin strikes it, creates a 16
- little spark. That spark ignites the gunpowder. The 17
- gunpowder burns, and the pressure goes up. It's all
- contained inside this metallic chamber. 19
- The pressure has nowhere to go but out. So 20
- the pressure build, and this is all happening in an 21
- instant in a milliseconds. The pressure builds. The
- energy has to go somewhere, so what happens is the bullet
- jumps out of the cartridge case and into the barrel. The

Page 54

- that. So 13 pounds double action is about a normal
- double action pressure for all revolvers.
- 3 O. Could you go and ahead and demonstrate single
- action.
- 5 A. Single action requires me to do this
- activity. I have to caulk this hammer in some mechanism.
- So you'll see the cylinder is already rotated when I
- apply that pressure, so in single action, you'll see I'm 8
- manually caulking the hammer and manually rotating the
- cylinder, so I've now done at least half of the work 10
- required to organize for the shot. 11
- The other thing that you'll notice is in 12
- single action, the trigger is set way to the rear. It 13
- doesn't have to travel nearly as far, so it has to do 14
- much less work. Now that it's caulked in single action,
- 16 I simply pull the trigger, and it will fire.
- 17 Q. What is the trigger pull in single action?
- 18 Is it easier to pull it?
- 19 A. Much easier because you see in double action,
- it sits towards the middle. In single action, that
- trigger actually recesses almost an inch, about
- 22 three-quarters of an inch, and so it's much easier that
- 23 I'm doing much less work. I don't have to rotate the
- cylinder, and I don't have to caulk the hammer. I've

- 1 bullet is --
- THE COURT: One minute. One minute. 2
- THE INTERPRETER: This is the interpreter 3
- speaking. Your Honor, could the witness be instructed to
- slow down just a little bit. Thank you.
- THE WITNESS: Yes. 6
- 7 THE COURT: Did you hear that, sir?
- THE WITNESS: Yes, sir. 8
- THE COURT: Thank you. 9
- THE WITNESS: So once the cartridge is 10
- detonated, the pressure has gone up, and the projectile 11
- has jumped out of the cartridge case and into the barrel. 12
- It's directed down the barrel. Those gases are right 13
- behind it pushing this bullet at a very high velocity 14
- with high energy down the barrel on its way. 15
- What happens is the bullet then leaves the 16
- barrel, and it goes on the whatever it's going to hit. 17
- But following the bullet are all of those expanding gases 18
- and residues, and it's comprised of particles of gun 19
- powder. There are combustion products like nitrates.
- There are clouds of vaporous lead. We see it as smoke or 21
- soot. If you've seen a gun that has smoke coming out of 22
- the end, it's from those combustion products. Well, right at the muzzle, those combustion

Page 57

- products are moving as fast as the projectile. They're
- all moving the same rate together. What happens is
- because the projectile has all of the mass, it keeps
- going, but these gases and residues can only go a short
- 5 distance.
- So the principle behind the gases on the 6
- barrel, if an object is in close range to the end of the
- barrel, the bullet can go right into that object, and we
- can characterize the distribution of these residues that q
- follow the bullet. If we're very close to the muzzle, 10
- the residue pattern is very small. The farther we get, 11
- the more that residue pattern dissipates and gets bigger 12
- and bigger until it just doesn't reach any further. 13
- So we can do distance determination based on 14
- the distribution of gases that follow the bullet if a 15
- target intercepts those gases that follow the bullet. 16
- Because this is a revolver, there's another source of 17
- residues. All of that pressure that builds inside the
- chamber that's pushing the bullet down the barrel, 19
- because this revolver opens, there's a gap between the 20
- back of the barrel and the front of the chamber. It's
- called the cylinder gap. It's this little line that is 22
- right here. 23
- 24 So in fact, the bullet or the shotgun

- This gun actually had designed these little
- metallic wings to try to help reduce that, and it
- actually pushes the gases forward. So if your hand is in
- proximity to that cylinder gap, you can get those gases.
- and I in fact had that firsthand experience by holding my
- hand out of position at during my test firing.
- O. Let me ask you at this stage, because we're
- talking about the gases, did you also have an opportunity
- to look at the robe that was being worn by Mr. Leibel?
- 10 A. I did.
- 11 O. An did you have an opportunity to --
- 12 THE COURT: One minute.
- 13 MS. BROWN: Objection. Testifying to items
- 14 not in evidence.
- 15 THE COURT: Overruled. He just asked if he
- looked at it.
- Q. (BY MR. GREGORY:) You had an opportunity
- look at the robe?
- A. I did.
- 20 Q. Did you have an opportunity to look at the
- right sleeve of the robe?
- 22 A. Yes, I did.
- 23 O. Did you conduct any examinations of that for
- 24 these gases that you've been talking about?

Page 58

Page 60

- pellets, whichever is being fired, have to jump out of
- the cylinder, that little short gap across, to get into
- the barrel. These gases, remember, are very high
- pressure. They're going as fast as the bullet. They
- escape out the sides. So not only do we have gases
- following the bullet out the barrel, we have gases that
- are blasted out of the side called cylinder gap gases. 7
- Again, if an object is in close proximity to 8
- the side of this gun, those gases can be detected because
- they will actually impact and leave images of smoke or
- soot or residues, and they could even leave a product 11
- called stippling, which is actual punctate gunpowder 12
- particles that can hit your skin and leave a little mark. 13
- Stippling can occur on a barrel as well. 14
- O. Can this particular gun cause stippling to
- somebody who is firing the gun?
- 17 A. Yes. Yes, it can. If you -- When you're
- firing this gun, if you put a part of your body in close
- proximity to the cylinder gap, those gases will come out, 19
- and they can impact your wrist. While I was test firing 20
- the gun recovered from the scene, I actually had my hand 21
- out of position and stippled my own wrist and created 22 these little punctate marks because my wrist got too
- close to the cylinder gap. 24

- 1 A. I did.
- THE COURT: Just a minute.
- 3 MS. BROWN: I'd still object. He's
- testifying concerning items not in evidence.
- THE COURT: He can testify as to what he did.
- Yes, he can. You're overruled. 6
- THE WITNESS: Yes, I tested the entire length
- of the right sleeve of the robe for the presence of
- gunshot residue, whether it be following out of the
- barrel or cylinder gap residues from being in close
- proximity to the side of the gun. 11
- 12 Q. (BY MR. GREGORY:) Okay. If the gun had been
- fired by Mr. Leibel himself, would you expect to have
- seen anything, any gas particles on the robe sleeve?
- A. I don't think we would see them on the robe
- sleeve because the sleeves are of his robe are kind of 16
- 17 the half to three-quarter. In other words, it's not like
- a dress shirt that goes all the way to his wrist. It's a 18
- shortened one. So if the robe was adjacent to it, it
- could receive those gases. But I'm not sure the sleeves 20
- were long enough, given that the characteristics that I 21
- believe would have to be met for him to handle the 22

firearm and shoot. I don't think -- I think the sleeve

would be too short, and it would put his skin in

23

- 1 proximity.
- 2 O. If his arm was uncovered then, would
- 3 stippling be a possibility on his arm if he had shot
- 4 himself?
- 5 A. Yes. If his bare skin is adjacent to that
- 6 cylinder gap, those gases are going to come out. It's
- 7 not a maybe proposition. They will come out, and if his
- 8 arm is close enough to the side of the firearm at the
- 9 cylinder gap, he will get marked as I did.
- 10 O. And Dr. Kubiczek testified he did not see any
- 11 stippling on Harry's right arm. Are you familiar with
- 12 that?
- 13 A. I understand that to be true.
- 14 Q. Did you have an opportunity to measure the
- 15 gun that was taken from the crime scene?
- 16 A. Yes, I did.
- 17 MR. GREGORY: May I approach, Your Honor?
- 18 THE COURT: What do you have there?
- MR. GREGORY: Exhibit 141.
- 20 THE COURT: Thank you, sir.
- MR. GREGORY: Would you like to see it, Your
- 22 Honor?
- 23 THE COURT: Thank you, sir.
- 24 Q. (BY MR. GREGORY:) Showing you what's been

- 1 cocked into single action, and it shows the same ruler,
- 2 and it's meant to show the distance of the trigger travel
- 3 and the distance of the end of the gun to the position of
- 4 the trigger in either condition that the firearm can
- 5 maintain.
- 6 Q. What was the distance -- So you're measuring
- 7 the end of the -- the very end of the barrel?
- 8 A. Correct. I'm going right from the exact end
- 9 or the muzzle of the barrel to the start of the trigger.
- MR. GREGORY: Your Honor, may I just hold
- 11 this up for the jury?
- 12 THE COURT: Sure. Does that not work for
- 13 you?
- MR. GREGORY: It's not going. I need to get
- 15 it ---
- 16 THE COURT: It's warming up.
- 17 Q. (BY MR. GREGORY:) It's warming up, or I
- 18 don't know how to turn it on. One or the other.
- So the top photo again is -- just before I
- 20 show it to them -- the top photo?
- 21 A. The top is double action. The hammer is at
- 22 rest. The bottom is single action. The hammer has been
- 23 caulked.
- 24 Q. Thank you. And in the above photo when the

Page 62

- 1 marked as 141. What is that?
- 2 A. This is -- These are two images that I took
- 3 at the forensic laboratory while I was analyzing the
- 4 recovered firearm. And specifically, it's a --
- 5 THE COURT: Don't say what it shows.
- 6 THE WITNESS: Sorry.
- 7 O. (BY MR. GREGORY:) Does that photograph
- 8 accurately depict your measurements of the gun?
- 9 A. Yes.
- 10 MR. GREGORY: I'd move for admission of
- 11 Exhibit 141.
- MS. BROWN: No objection, Your Honor.
- 13 THE COURT: It's admitted. Go ahead.
- 14 Q. (BY MR. GREGORY:) Can you -- I'm going to
- 15 get the projector going, but can you tell us -- there's
- 16 two photographs there; correct?
- 17 A. Yes.
- 18 Q. What do they -- What's the top photograph
- 19 show?
- 20 A. The top photograph is depicting the recovered
- 21 firearm from the scene as it's at rest in double action,
- 22 and it has a ruler to show the distance from the end of
- 23 the gun to the trigger.
- 24 The lower image shows the same firearm, but

Page 64

- 1 hammer is uncocked, what did you determine the distance
- 2 to be?
- 3 A. The straight line distance from the muzzle to
- 4 the trigger is approximately 21 inches.
- 5 Q. And then in the bottom photo, how did the
- 6 distance change when you go into the cocking the gun?
- 7 A. The single action image, the distance from
- 8 the muzzle to the trigger, is 22 inches.
- 9 O. I'll return that exhibit. What direction
- 10 does that cylinder travel?
- 11 A. The cylinder is designed and rotates
- 12 counterclockwise, or from the shooter's perspective to
- 13 the left.
- 14 Q. Did you have an opportunity to actually
- 15 inspect the ammunition that was taken out gun?
- 16 A. Yes. I did.
- 17 Q. And what did you -- Tell us a little bit
- 18 about that ammunition.
- 19 MS. BROWN: Your Honor --
- 20 THE COURT: Wait a minute.
- 21 MS. BROWN: -- I'm going to object again.
- 22 He's testifying concerning items that are not in
- 23 evidence. There's been no chain of custody established
- 24 for them. He refers to them as, for example, Mr. Leibel

Page 65

- 1 robe. We have no testimony concerning that.
- 2 THE COURT: Well, actually, there have been
- 3 photographs introduced depicting Mr. Leibel in a robe.
- 4 MS. BROWN: And how do we know -- There's no
- 5 authentication to these objects, Your Honor.
- 6 THE COURT: Mr. Gregory, do you have a
- 7 response?
- 8 MR. GREGORY: Your Honor, there's no
- 9 requirement to actually move in an object that he's
- 10 observed and can testify that he observed. There's no
- 11 requirement that the actual object be moved into
- 12 evidence.
- MS. BROWN: But we need some --
- 14 THE COURT: Well, just a minute. I don't
- 15 need it argued. The argument essentially has to do with
- 16 how do we know that the robe that he observed was the one
- 17 that was in the photograph. You can clear that up, and
- 18 you can have him testify as to what robe he observed or
- 19 you get to cross examine him on that. I'm going to allow
- 20 him to testify.
- MS. BROWN: Your Honor, I'm going to then
- 22 lodge a standing objection to all of this testimony.
- THE COURT: There are no standing objections.
- 24 You can object to any questions you want.

- 1 removed and packaged, and they came with a photograph
- 2 showing how they were positioned in the firearm.
- 3 Those components that were from the firearm,
- 4 the recovered firearm itself, were a fired 45 Colt
- 5 cartridge case, a fired 410 shot shell, and then two
- 6 unfired rounds of 45 Colt, and one more unfired round of
- 7 410 shot shells. There was a total of five components.
- 8 It was one represented in each chamber of the firearm.
- 9 Q. The fired 45 round, did you have an
- 10 opportunity to examine it?
- 11 A. Yes.
- 12 Q. And do you have an opinion whether it was
- 13 fired out of the gun that was taken from the crime scene?
- 14 A. Yes. I test fired the firearm recovered and
- 15 did a microscopic comparison of the firing pin marks and
- 16 the tool marks are left behind by the gun recovered from
- 17 the scene, and that cartridge case recovered from the
- 18 firearm was fired in the gun.
- 19 Q. And how about the 410, the fired 410
- 20 ammunition? Did you have an opportunity to evaluate it?
- 21 A. I did.
- 22 Q. And do you have an opinion regarding whether
- 23 it was fired from the gun and removed from the crime
- 24 scene?

Page 66

Page 68

- MS. BROWN: I'm going to object again to any
- 2 reference to a robe that's not been identified as being
- 3 taken into evidence.
- 4 THE COURT: I understand your objection.
- 5 Thank you.
- 6 Q. (BY MR. GREGORY:) Your report refers to a
- 7 robe that you received up at the crime lab?
- 8 A. Yes.
- 9 Q. And it came to you along with the firearm;
- 10 correct?
- 11 A. Correct.
- 12 O. Under the same case number?
- 13 A. Yes.
- 14 Q. And what about the ammunition that we were
- 15 just about ready to discuss?
- 16 A. In the same submission, I received a number
- 17 of different pieces of ammunition and ammunition
- 18 components.
- 19 Q. And you had an opportunity to observe that
- 20 ammunition?
- 21 A. I did examine the ammunition, yes.
- 22 Q. Describe what you observed.
- 23 A. One of the submissions was the actual
- 24 components that were loaded in the firearm and had been

- 1 A. Yes. It also matches the test fires, the
- 2 known samples test fired in the gun, so it was also
- 3 identified as having been fired in the submitted rifle.
- 4 Q. The 410 ammunition that was unfired, can you
- 5 tell us anything about the characteristics of that in
- 6 terms of how many projectiles were inside?
- 7 A. Yes. It's a brand made by Federal Cartridge
- 8 Company, and it's specifically called triple ought buck,
- 9 and that's a 000-buck shot, and it's a type of large
- 10 projectile. There are four pellets in that load that
- 11 encompasses the entire shot shell. Those four pellets
- 12 are contained inside of a plastic sleeve, or we call it a
- 13 wad, and that's the payload or the projectiles that the
- 14 rounds are able to deliver, so it's four stacked one on
- 15 top of another, copper-coated pellets. Each one is about
- 16 .36 inches in diameter, so about a third of an inch in
- 17 diameter; four of them stacked in a linear fashion.
- 18 Q. Now, compare that to the 45 round. Can you
- 19 tell us about it?
- 20 A. The 45 long Colt round is a specialty type of
- 21 a round. It is a single projectile as expected, but the
- 22 type of projectile is unique. It's different than what
- 23 we typically see as a single projectile, which might just
- 24 be a led round-nosed bullet or maybe a copper jacket

(17) Pages 65-68 2968 75

- bullet. This is a bullet that is designed to fragment
- upon impact with soft tissue, so it has a very unique
- characteristics. And as a matter of fact, it's not in 3
- production in that caliber anymore, so it's kind of hard
- to find. It's a very unique round comprised of a copper
- jacket that has softer tungsten and led fragments on the
- inside with a cap on the top; the idea being that when
- that projectile impacts something like soft tissue, it 8
- can break apart and create multiple wound channels 9
- instead of like a single projectile that doesn't break 10
- apart creates one wound path. So it's a fragmenting
- round, a fairly unique design of cartridge.
- 13 Q. During the course of your experience, have
- you had an opportunity to shoot that type of round?
- 15 A. Yes.
- 16 O. And based on your training and experience,
- 17 can you tell us how that type of round would be expected
- to function if shot into a body?
- 19 A. The round is very effective. In testing that
- I've done by shooting into ballistics gelatin that I've 20
- done before the experimenting with this particular case,
- but what the round can do is when it hits something with
- a lot of liquid content, high hydraulic something like a
- body or an animal, it breaks apart very effectively, and

- fragment, each of those fragments carries some of that
- velocity and energy, and so what arrives to a target with
- a lot of energy is quickly dissipated as each fragment
- carries some of the energy away from the main mass.
- So you wind up with multiple smaller
- lower-velocity, lower-energy projectiles inside the wound
- as opposed to a single massive projectile that stays all
- as one. So the energy dissipates through the wound track
- that it creates.
- Q. Did you have an opportunity to weigh the gun
- from the crime scene?
- 12 A. I did not weigh it specifically. I have a
- catalog entry that references what the gun weight is.
- Q. Do you know what that is? And that's from 14
- the manufacturer, are you talking about?
- 16 A. Correct. The manufacturer's catalog has
- that, and I believe it's around five and a quarter 17
- pounds. I would have to refer to the catalog to refresh. 18
- Q. And if you could lift the gun up, where is 19
- the weight of that gun centered?
- 21 A. It's designed -- Most of the weight is here
- on what we call the receiver that holds the frame and the
- cylinder. These are all metallic parts because they have 23
- to contain the pressure of a gunshot, so they're very

Page 70

- heavy, very sturdy, very thick metal. So the bulk of the
- mass is toward the center of this gun, and this is a
- wooden sock, so it's a little bit lighter, and of course
- the barrel is metal, but not as much metal as is in the
- center of this gun.
- Q. Now, going back to the gases that escape from
- the muzzle upon firing, in an enclosed room, what would
- happen to those gases?
- A. Well, the gases typically, by way of example,
- where the bullet might have the ability to go a mile or 10
- farther, the gases can only go a matter of feet. Maybe
- the lighter components of the products that follow the 12
- bullet can just travel inches. 13
- 14 The heavier particles like the actual pieces
- of gunpowder can travel maybe four or five feet before 15
- they begin to fall off. And ultimately, as they mix with 16
- the air, they just fall off and are laying on the ground 17
- or laying in the environment in which the shot occurred 18
- 19 unless, of course, something is close to the muzzle that
- intercepts those gases. 20
- 21 Q. Can particles that are left be transferred at
- all? 22
- 23 A. Yes, they can. Those particles that are just
- dissipated in a shooting environment are free to be

Page 72

all of the payload flies through the air as one single projectile, but when it impacts soft tissue, it begins to

break apart, and you get multiple fragments. 3

Now, they still continue along that path of

- momentum they have, but now they're fragmenting, and each 5
- one of those little fragments is carrying some of the 6
- energy of that original shot. So it flies through the
- air as a single projectile, gets to the target, and then В
- breaks apart. If it doesn't hit something like soft 9
- tissue, like let's say it hits drywall or wood, it stays 10
- together. So the idea being you can shoot this round 11
- through a significant object and still keep it together 12
- with all of its energy together, but when it hits
- something soft, that's when it fragments and breaks 14
- apart. And that's how this projectile is designed to 15
- 16 perform.
- 17 Q. What happens to the speed and energy of the
- projectiles as they travel through a body?
- 19 A. The projectile is at its maximum velocity and
- energy right as it leaves the barrel. It can never get 20
- more energy and velocity than what it has at that point. 21
- So when this projectile travels through the air, it's 22
- beginning to slow down, but not a lot. When it hits
- something significant like soft tissue and begins to

Pages 69 - 72 (18)

- 1 transferred. They can be tracked on shoes or clothing.
- 2 You can transfer those particles. They will exist --
- 3 Imagine it as if we had some pepper; we threw some pepper
- 4 on the floor. We could step in it, and we could move
- 5 pepper around, and maybe if we sat down on the floor, we
- might transfer pepper that way. Well, the gunpowder
- 7 particles are similar. They're present, and they can be
- transferred and moved around.
- O. What happens -- You talked about energy going
- away from the muzzle. Is there any resultant energy
- going backwards?
- 12 A. Yes.
- 13 O. Tell us about that.
- 14 A. You may be familiar with the statement for
- every action, there's an equal and opposite reaction.
- It's a law of physics. As we apply that to discharge of 16
- a firearm, the action would be the bullet going down the 17
- barrel. So that action has to have an equal and opposite
- reaction. So for all of the energy that's pushing the
- bullet down the barrel toward its target, there's an 20
- equal amount of energy pushing the gun back away, and so 21
- that's what we call recoil energy. That's the felt gun 22
- moving away as these equal and opposite energies come
- back for balance and equilibrium.

- 1 just fallen off. I can then compare the series of
- distance tests from small close-range to big distant
- range, and compare that to the article of clothing or the
- article that I'm comparing it to. In this case, it was a
- 5 robe.
- 6 We process the robe and look at what size of
- 7 the pattern is on the robe, and then we simply compare it
- and go along this range of known distances and see what
- distance does the robe match the known test fires, and
- that's the result that we then report.
- 11 O. Okav. Did you have an opportunity to
- 12 determine which round was fired first, either the 45
- 13 round or the 410?
- 14 A. Yes.
- 15 Q. And which? What was your opinion in that
- 16 regard?
- 17 A. The documentation from when they unloaded the
- gun identifies that the first round was the 45 Colt.
- This gun rotates counterclockwise, and so they documented
- 20 how they found the gun. And so if we just simply work
- backward, two positions over is where the 45 Colt was. 21
- two positions to the left. One position over was the
- 23 410. So as that cylinder rotates, that means the 45 Colt
- was fired. The gun was fired again. That second shot

Page 74

- 1 O. You talked earlier about having the ability
- 2 to determine distances between the muzzle and an object
- that's been struck with the projectile. Did you have an
- opportunity to do that type of analysis with the gun that
- was taken from the crime scene?
- 6 A. Yes, I did.
- 7 Q. How did you go about doing that?
- A. The process to conduct that test involves
- getting similar type of ammunition. The burn rate and
- the performance of the ammunition is very important, so 10
- it's important that we have the same kind of ammunition
- and the actual firearm from the scene. And then what we 12
- do is begin to take test fires at known distances, so we
- 13
- put a panel. We call it a witness panel. It's just a 14
- fabric panel, and we put it at distances starting with, 15
- say, contact, and then we back the panel up three or six 16
- inches at various increments, and we take a test shot at
- each of those various distances.
- Then we have -- so from those panels, we can 19
- lay out a range. When we're very close to the muzzle, 20
- the soot and the residue is very small. It's the same 21
- diameter as the barrel. The farther we get away, the 22
- more those residues dissipate and the bigger the pattern
- gets until we get no pattern at all where the gases have

- 1 was the 410. The cylinder rotated, and then in this
- case, the gun was cocked a third time, introducing but
- not discharging a next round in line.
- 4 Q. Dr. Kubiczek had testified that Harry Leibel
- 5 had one gunshot under his right armpit, and then there
- was another series of injuries that went through his hand
- and through the shoulder. Did you have an opportunity
- look at the x-rays involved in this case?
- 9 A. Yes, I did.
- 10 Q. And did those -- do you have an opinion
- 11 regarding -- Did you see any projectiles in the x-rays?
- 12 A. Yes, I did.
- 13 Q. And do you have an opinion regarding which
- ammunition those would be most consistent with?
- 15 A. The x-ray is consistent with the performance
- of a 45 Colt, which was the first shot fired. The x-ray
- demonstrated small fragments. And in fact, what the 17
- doctor recovered and submitted to the lab were these 18
- actual small fragments that I examined in the laboratory,
- so those little fragments of copper and lead and tungsten
- that he removed from the body that are imaged in the
- x-rays are from the 45 Colt that was associated with this 22
- 23 gun.
- 24 Q. So talking about that shot, the 45 Colt round

- 1 in the torso, did you have an opportunity to determine
- 2 the distance?
- з A. Yes.
- 4 Q. How did you go about doing that?
- 5 A. Start with a visual inspection. Well, first
- 6 I needed to know what was the layers of clothing, what
- 7 was Harry wearing, Harry Leibel wearing. The
- 8 documentation clearly shows that he had this robe was on
- 9 the exterior, so that's where we start.
- 10 THE COURT: Okay. I'm going to stop you now.
- 11 We're going to take the morning break, and we'll come
- 12 back. We'll pick that up. We're going to be in recess
- 13 for 15 minutes. And during this recess, you are
- 14 admonished -- sit down, please, sir -- not to talk or
- 15 converse among yourselves or with anyone else on any
- 16 subject connected with this trial.
- You're not to read, watch, or listen to any
- 18 report of or commentary on the trial or any person
- 19 connected with this trial by any medium of information
- 20 including, without limitation, newspapers, television,
- 21 radio, or Internet. You're not to form or express any
- 22 opinion on any subject connected with the trial until the
- 23 case is finally submitted to you. We'll be back in
- 24 session at a quarter till. Thank you.
- Page 78
- 1 MR. GREGORY: Your Honor, on that, the next
- 2 phase of his testimony is going to involve a
- 3 demonstration with the couch. If we could take a longer
- 4 recess, we could get that established during the recess.
 - THE COURT: You mean move the couch?
- 6 MR. GREGORY: Move the couch and set up a
- 7 demonstration.
- 8 THE COURT: We'll give you a 20-minute minute
- 9 recess. Thank you.
- 10 (Recess was taken.)
- 11 -000-

5

- 12 THE COURT: Okay. We're back in session in
- 13 14-CR-62. Mr. Gregory is here for the State. Ms. Brown
- 14 and Ms. Henry are here for the defense. Ms. Leibel is
- 15 here together with her interpreter, and we are prepared
- 16 to go forward. Mr. Noedel is on the stand, and let's
- 17 bring in the jury.
- 18 As we are waiting for them to come in, I'm
- 19 going to remind the audience that there is no recording
- 20 allowed in here, either audio or audio and visual. So if
- 21 someone has an iPad or something like that, you're
- 22 welcome to take notes on it and use your phone to take
- 23 notes on, but you are not welcome to engage in any
- 24 recording, and I'll just make that point. Any recording

- 1 that is done in violation of that rule will result in me
- 2 confiscating your equipment, and you will lose it
- 3 permanently.
- 4 Thank you, Ladies and Gentlemen. Have a
- 5 seat, please and relax. Counsel stipulate to the
- 6 presence of the jury?
- 7 MR. GREGORY: Yes, Your Honor.
- 8 MS. BROWN: Yes, Your Honor.
- 9 THE COURT: Ladies and Gentlemen, it took a
- 10 little bit longer than I said, but as you can see, we did
- 11 some furniture moving during that period of time.
- 12 Actually, I didn't. I didn't lift anything.
- 13 Mr. Gregory? I'll speak up. I said I didn't
- 14 lift anything.

15

17

- A JUROR: Okay. Good.
- 16 THE COURT: Sir?
- 18 CONTINUED DIRECT EXAMINATION
- 19 BY MR. GREGORY:
- 20 Q. Thank you, Your Honor. Mr. Noedel, when we
- 21 broke, we were talking about your opinions regarding
- 22 distance, and you were talking about the shot to Harry's
- 23 right side first shot. Did you have an opinion regarding
- 24 the distance as it relates to that shot?
- Page 80

Page 79

- 1 A. Yes, I did.
- 2 O. What was your opinion?
- 3 A. The absolute range is farther -- the gun was
- 4 farther away than contact with the side of the road, but
- 4 lattice away than contact with the side of the road, ou
- 5 closer than 18 inches. And to narrow that down on my
- 6 range, it's most like the test targets that I generated
- 7 in the two to six-inch range. So the distance that the
- 8 end of the gun was from the side of the road is best
- 9 characterized to be the range of about two to six inches.
- 10 Q. So two to six inches is the best, but out to
- 11 18?
- 12 A. Yes, because when we're doing that type of
- 13 test, I have to be certain that I encompass any
- 14 conceivable range that could be represented on the test
- 15 fires, and the range sometimes has some overlapping
- 16 distances. For example, my nine-inch target overlaps a
- 17 little with my 12-inch. They're hard to differentiate.
- 18 So I go to a rate, a distance that I'm absolutely sure is
- 19 -- can't be the same as the robe. That's my 18. And I
- 20 go to my closest distance that I'm absolutely sure it can
- be, can't be contact. But to focus that, because that is a wide range, I look at the pattern that was processed on
- 23 the clothing to my test targets, and that's where get the
- two to six-inch range for the distance of the gun, best

22991 78

Page 81

- 1 fitting with the tests that I generate.
- 2 Q. So when you say the distance of the gun, can
- 3 you show the muzzle of the gun?
- 4 A. Yes. The muzzle is the exit end of the gun
- 5 here. And so when distance testing, I'm trying to
- 6 determine this range here, forward of the muzzle to how
- 7 far away the object was when the gases arrived to them.
- 8 Of course there's a hole in the object that let the
- 9 bullet go through, and I'm looking at the interception of
- 10 gases around the hole, and that's what I'm going to
- 11 evaluate. So I'm looking, in this case, we're somewhere
- 12 farther than approximately two inches out from the muzzle
- 13 but closer than about six inches.
- 14 Q. And did you also have an opportunity to do
- 15 distance analysis on the shot to his hand and shoulder?
- 16 A. Yes.
- 17 Q. Tell us about how you went about that
- 18 analysis.
- 19 A. It's a similar process. The pattern that was
- 20 present on the left hand of Mr. Leibel can be compared to
- 21 known patterns. I needed to know that that was in fact a
- 22 shot from the shotgun because different ammo will have
- 23 different ranges associated with it. So there was a
- 24 component, that plastic sleeve called the wad, was still

- 1 here.
- 2 Q. Thank you. And previously, I indicated we
- 3 were going to get into a separate area altogether, and
- 4 that is reconstruction. What is accident or what is
- 5 reconstruction, scene reconstruction?
- 6 A. Scene reconstruction is a branch of forensic
- 7 science that involves assembling and testing elements of
- 8 the whole of an event where laboratory analysis basically
- 9 looks at the specific components. That provides the
- 10 basis on which we can attempt a scene reconstruction.
- 11 So scene reconstruction is a process whereby
- 12 using the evidence, you set out to try to answer
- 13 questions about the whole of the event. And so
- 14 reconstruction is a process and a method that uses a
- 15 scientific method. We pose a hypothesis, we look for
- 16 what data we have, distance data, whatever physical
- 17 evidence is, dimensions of the room, and we test how
- 18 these elements can come together and try to reconstruct
- 19 things that are of question in a given case.
- 20 Q. How long has reconstruction been around?
- 21 A. Reconstruction is as old as forensics itself.
- 22 It's always been the ultimate goal of any forensic
- 23 analysis to have a reconstruction. So formal forensic
- 24 science has, particularly with shooting reconstruction,

Page 82

Page 84

- present in his wound. So I knew that that hand and the deposits on the hand were associated with the shotgun.
- 3 So then I take the evidence gun and the shot shells of
- 4 the appropriate size and do another series of patterns of
- 5 known distances from contact out to maybe as far as two
- 6 feet and compare the size and density and distribution of
- 7 the residues on his hand to the size and density of the
- 8 patterns that I test fired in the laboratory.
- 9 Q. And what was your opinion regarding the
- 10 distance of that shot?
- 11 A. It's again greater than contact. Farther
- 12 away than contact, but closer than -- I think closer than
- 13 six inches; most like my three-inch test targets. So the
- best distance that matched my test fires, my known
- 15 distances, was the three inch. So the hand is
- 16 essentially in that range, about approximately three
- 17 inches away from the end of the gun when the shotgun shot
- 18 was delivered.
- 19 O. So the muzzle would be -- if you could
- 20 demonstrate approximately the muzzle to the back of the
- 21 hand.
- 22 A. So the muzzle to the back of the hand would
- 23 be somewhere in this range. That's approximately two
- 24 inches and maybe as far as six inches, so somewhere in

- 1 has gone on for the last 125 years. Reconstruction as a
- 2 formal branch of forensic science has really come into
- 3 its own in the last about 25 years, but virtually every
- 4 scene that someone is assembling and telling -- trying to
- 5 figure out a sequence is actually doing a reconstruction.
- 6 Q. Is it accepted as a formal branch of forensic
- 7 science?
- 8 A. Yes, it is.
- 9 Q. How long -- Well, tell me about your training
- 10 and experience regarding reconstruction.
- 11 A. My first introduction to shooting scene
- 12 reconstruction started when I was working with the state
- 13 patrol crime laboratory. I was a firearm examiner inside
- 14 the lab, but I also had a responsibility to go tend to
- 15 crime scenes. So I used to have a dual responsibility,
- 16 and in attending crime scenes, not only did I process and
- 17 collect objects, but began to get involved with the
- 18 reconstruction aspects.
- 19 Of course there's training, a lot of training
- 20 and mentorship from senior investigators and detectives
- 21 and other people doing reconstruction, but there are
- 22 certainly formal courses that I've taken in the processes
- 23 and what you look for in reconstruction, how you sequence
 - 4 events, what do you look for. So there's training there.

(21) Pages 81 - 84

- 2 avenues that I'm involved with.
- 3 There's also an association, a professional
- 4 organization called the Association For Crime Scene
- 5 Reconstruction. Next week is our 25th anniversary in
- 6 that organization. I'm the past president of that
- 7 organization. That's a group of practitioners, I'll say,
- 8 not only forensic scientists, but they're also detectives
- 9 in that group, private consultants, public officials, and
- 10 we meet annually and have training conferences, and we
- 11 publish a journal where we release how people are
- 12 approaching crime scenes. So it's a legitimate as any
- 13 branch of science of forensic sciences where you might
- 14 have a DNA analysis, a firearms analysis. Reconstruction
- 15 is one of those branches that I maintain expertise in.
- 16 Q. What is your certification in reconstruction?
- 17 A. The International Association for
- 18 Identification. The IAI has a certification in crime
- 19 scene reconstruction. It's a written test followed by a
- 20 practical test, and I'm certified by that organization in
- 21 reconstruction.
- 22 Q. How many others are certified?
- 23 A. They are only about 17 people that have
- 24 passed that certification to date, so I'm one of 17.

- 1 scene respondents is to document that scene, and of
- 2 course the reconstruction is only as good as the scene
 - 3 documentation.
 - 4 Q. And were you provided with measurements that
 - 5 were taken by Joey Lear?
 - 6 A. Yes, I was.
 - 7 Q. And you used those and incorporate those into
- 8 your reconstruction?
- 9 A. I did.
- 10 Q. Ultimately, were you able to do a
- 11 reconstruction in this case?
- 12 A. Yes. One thing that needs to be understood
- 13 about reconstruction is not necessarily and typically not
- 14 going to play out like a movie where I can account for
- 15 everything that happens from start to finish of an event,
- 16 but we can test specific elements. So there was
- 17 sufficient data and documentation to test various
- 18 elements, so that aspect of a reconstruction could be
- 19 done. It won't tell you how the entire event played out
- 20 from start to finish.
- 21 Q. Were you able to do a reconstruction --
- 22 A. Yes.
- 23 Q. -- in this case? Did you feel like you had
- 24 ample information to be able to do that?

Page 86

- 1 Q. You were asked to perform a reconstruction in 1 A.
- 2 this case?
- з A. Yes.
- 4 O. How did you go about obtaining data?
- 5 A. The first thing to start with a
- 6 reconstruction is to gather information about the case,
- 7 so I requested things like the police reports, the
- 8 autopsy reports, the original scene photographs and the
- 9 scene documentation, notes and maps and things were made
- 10 at the house. Of course I was not at the house the dare
- 11 the scene was processed. I'm relying on that information
- that was recorded, so statements offered by individuals
- 13 what's being said, what's being alleged about this case.
- And in that data, then we can begin to look
- 15 for where are there issues that physical evidence can
- 16 help answer and thereby reconstruct. So that's the
- 17 process, and that's the information for any types of
- 18 information that document or talk about the scene. And
- 19 then we can test it using reconstruction processes.
- 20 Q. So you said obviously you weren't out at the
- 21 crime scene; correct?
- 22 A. Correct.
- 23 Q. So you rely on what others report; correct?
- 24 A. Correct. That's the function of the crime

- 1 A. Yes, for the specific questions that were
- 2 being considered in this case, there's plenty of data to
- 3 consider and evaluate.
- 4 O. What were the considerations that you were --
- 5 questions that you were going to answer?
- 6 A. The big question of this event was was this
- 7 shooting a suicide or was it a homicide. In other words,
- 8 somebody shoot -- did Harry Leibel shoot himself or did
- 9 somebody else shoot him. And so that's a huge question,
- 10 so we have to break that down for reconstruction and make
- 11 it into more smaller manageable questions like
- 12 sequencing: Which shot was first. How did that bullet
- 13 perform. What does the performance of that bullet tell
- us about positions, locations of people, where are the
- 15 bloodstains. We can begin to -- where are the
- 16 bloodstains. We can begin to piece these pieces of
- 17 documentation together and draw a picture about these
- 18 elements.
- 19 THE COURT: Sir. Again, I'm going to ask you
- 20 just to slow down a little bit.
- 21 THE WITNESS: Yes, sir.
- 22 THE COURT: I know that you have a lot of
 - 3 information you want to get out, but it has to be
- 24 conveyed also.

Page 89

- 1 THE WITNESS: Yes, sir.
- 2 THE COURT: And so slow down a little bit.
- 3 Thank you very much, sir.
- 4 THE WITNESS: Okay. So that's the process.
- 5 That was the big question that we were set out to answer.
- 6 And so using the data like the distance that was measured
- 7 from the robe and the hand, the path of the bullet that
- 8 went through the couch, all of those pieces are elements
- 9 that we are going to use to try to reconstruct the actual
- 10 delivery of the two gunshots.
- 11 Q. (BY MR. GREGORY:) Now, in addition to the
- 12 data that you reviewed, you also, as we already know, you
- actually handled the weapon that was used; correct?
- 14 A. Yes. That was a big advantage to be able to
- 15 actually work with the actual recovered firearm and test
- 16 fire it and examine how it performs.
- 17 Q. Did you also have an opportunity examine the
- 18 couch?
- 19 A. I did.
- 20 O. And the end table that's here?
- 21 A. Yes.
- 22 Q. And did you have an opportunity to visit the
- 23 residence?
- 24 A. I did. The residence was vacant by time I

- MR GREGORY: Just one.
- 2 MR. GREGORY: Would you like that see that
- 3 one first, Your Honor?
 - THE COURT: I would. Thank you. Thank you,
- 5 sir.
- 6 Q. (BY MR. GREGORY:) I'm going to show you
- 7 what's been marked as Exhibit Number 142. What does
- B photograph depict?
- 9 A. This is a composite of two different images:
- 10 One of Harry Leibel's right arm, and the other one is the
- 11 photograph that I took of the length from muzzle to
- 12 trigger.
- 13 Q. Are those photographs accurate
- 14 representations of who you observed in doing your
- 15 reconstruction?
- 16 A. Yes.
- 17 MR. GREGORY: Your Honor, I'd move for
- 18 admission.
- 19 THE COURT: Any objection?
- 20 MS. BROWN: No objection, Your Honor.
- 21 THE COURT: 142 is admitted.
- 22 Q. (BY MR. GREGORY:) Publishing 142. Dim the
- 23 light, please. All right. Let's go through the couch
- 24 has been set up. Did you set this up during the break?

Page 90

Page 92

- 1 was able to go, but I wanted to just see the spatial
- 2 relationships and verify some of the measurements that
- 3 were recorded from the original scene and just as a way
- 4 to check the arrangement and validity of the issues that
- 5 we were testing.
- 6 Q. And did you ultimately arrive at an opinion
- 7 in this case?
- в A. Yes.
- 9 O. Are your opinions that you're going to offer
- 10 today within a reasonable degree of scientific certainty?
- 11 A. Yes, they are.
- 12 O. Thank you. And those opinions were in a
- 13 report that was generated?
- 14 A. That is correct.
- 15 Q. I wanted to ask you, was part of the
- 16 information you obtained, we know you measured the gun.
- 17 Did you also have any kind of data referencing the length
- 18 of Mr. Leibel's arm?
- 19 A. Yes, I did.
- 20 Q. And was that through photography that you'd
- 21 received?
- 22 A. Yes. Autopsy photographs recorded the length
- 23 of his arm.
- 24 THE COURT: Are these new?

- 1 A. Yes.
- 2 Q. Can you tell us what you were trying to
- 3 achieve with this setup.
- 4 A. Part of the reconstruction involved this
- 5 bullet path analysis. And in this event, we have the
- 6 shotgun pellet, the shot that was responsible from the
- 7 shotgun shot, which was the second shot, after leaving
- 8 the gun, perforating the hand, and eclipsing the left
- 9 shoulder, those pellets continued into and through the
- 10 couch, out the back of the couch and into the wall.
- When we have these multiple points along the
- 12 path of a bullet, we can connect those, follow the line
- 13 back, and it gives up an idea of where the firearm would
- 14 be located at the beginning of that path. So that's the
- 15 trajectory analysis. That's the value of recording this
- 16 path that went through the couch and into the wall behind
- 17 the couch.
- 18 Q. And the jury can't see it. You have a box
- 19 set up behind the couch where the rod goes into. What's
- 20 that represent?
- 21 A. The scene documentation shows how far up the
- 22 wall the pellets entered. And so what we've done rather
- 23 than build a wall here, we're just using a small box, the
- 24 box is into the wall approximately ten inches up from the

(23) Pages 89 - 92 2302 81

Page 96

Page 93

- ground, and so we've put a hole in the box ten inches up and given a place for the rod to connect to, so the rod
- is connecting a box that represents where the wall would
- 4
- 5 THE COURT: Mr. Gregory, since there hasn't
- been an objection to that testimony, I'm going to allow 6
- the jurors to step down from the jury box, walk around.
- come around the couch, see the box that's being 8
- demonstrated to them, and walk back up. I'd ask you be 9
- careful not to kick the box, but you can walk around see 10
- what the box is talking about. 11
- Mr. Gregory, you may proceed. 12
- MR. GREGORY: Thank you, Your Honor. 13
- 14 THE COURT: There's a number of red lines and
- dots, and those come from touching your screen up there. 15
- Thank you, sir.
- 17 O. (BY MR. GREGORY:) Sir, looking at your
- report, there's a section called bullet path analysis.
- And I'd like to talk about the first shot first, which
- would be the one to the torso. Who can you tell us about
- the bullet path analysis that you performed?
- 22 A. In examining the first shot, prior to that,
- the first thing we know is that the first shot, because
- of the sequence of the load that was in the chamber, we

- pellets continue upward toward his left shoulder, and
- near the end of that pellet path and the fragments' path.
- if his arm is down, the pellets make a right turn and go
- down his arm, but the pellets end at his -- at the inside
- of his left arm.
- 6 And so in evaluating that and knowing how
- this ammunition performs, I expect these pellets to
- continue trying to go on a straight line. So how do I
- resolve a pellet that's -- the pellets or fragments that
- seem to have turned 100 degrees downward? Well, by
- raising the arm, I can create a continuous 15 to 11
- 20-degree upward path and resolve how I think the bullets
- should be performing. 13
- I could see no reason for the bullets to take 14
- a right turn if the arm was down. So for the bullets to 15
- end up here and maintain their energy path as they're 16
- fragmenting for the fragments to maintain their path, I 17
- think the arm has to be raised to give you a linear
- 19 straight line path to where fragments were located and
- one fragment actually exited inside of the arm. 20
- Q. If his left arm was raised in such a manner,
- would you agree with me that there would be no way for
- his left hand to be in contact with the weapon?
- 24 A. Correct. In my opinion, his left hand cannot

Page 94

- know it was the one that had gone two positions to the be handling the firearm.
 - Q. And tell us about, a little bit about the
 - bullet path travel for second shot.
 - A. The second shot we know is the shotgun shot,
 - and the projectiles start in the gun as a stack of four
 - triple ought buck pellets. They travel down the barrel
 - in their plastic sleeve, and about three or approximately
 - three inches out of the barrel, they encounter Harry's
 - left -- the back of Harry's left hand. That column of
 - pellets perforates through his hand, and in doing so.
 - that plastic sleeve called the wad, part of that breaks 11
 - 12 off and actually sticks in his wound.
 - The pellets, which are the most massive part 13
 - of that projectile set, continue on, exit toward the base
 - of his thumb, and continue in essentially a straight line

 - and eclipse the top of his left shoulder. That's 16
 - photographed and described in the postmortem autopsy 17
 - report. After eclipsing the top of his shoulder, they
 - continued into the hole, creating the front hole in the
 - surface of the couch, tunneled through the structures
 - inside the couch, came out the backside of the couch, 21
 - finally ran into the wall where they ran out of energy 22
 - and were trapped in the wall. 23
 - There's a stud actually in the construction

- left was the 45 Colt. It's that unique type of
- ammunition that fragments upon impact with soft issues.
- So in examining that bullet path, we know where the
- bullet entered as a single projectile. It travels
- through the air as a single projectile and that began to
- break apart when it hit the soft tissue of Harry Leibel's 7
- side. 8

9

What we can see from the description by the doctor and the fragments that he recovered along the 10

wound track and from the x-rays that he took of the body, 11

we can see a trail of all of those fragments. And when 12

- you look at the trail of fragments that connect from the entry wound to his side, they eclipse upward and across
- inside of his body across his chest striking whatever 15
- organs they come across. The bullet is breaking apart 16
- into smaller fragments. Each little fragment is carrying 17
- a portion of the energy, and so they're slowing down. 18 They're running out of energy as they break apart and get
- smaller, and they continue to eclipse upward and across 20
- the inside of his body. 21
- 22 If you put a protractor and measure that
- angle, it's about 15 degrees relative to straight across
- his body, about 15 degrees to 20 degrees upward. The

Page 100

Page 97

- 1 of the wall, and that helped stop the projectiles so they
- 2 -- so that's the path that we know the second set of
- 3 projectiles. There's actually four pellets in that
- 4 shotgun load.
- 5 Q. Now, you've already testified this was not a
- 6 contact wound. Could you demonstrate what contact would
- 7 be there with the muzzle.
- 8 A. Contact is literally the gun touching the
- 9 structure that is involved. And when you have a contact
- type of a gunshot wound, there's no time for the residues
- 11 to expand. So with a contact gunshot wound, you can get
- 12 a lot of tearing and a lot of damage, but from the
- 13 residue perspective, the residues would all be blown
- 14 right into the wound. He doesn't have that on his left
- 15 hand, there's an actual -- there's a big pattern of what
- 15 hand, there's an actual -- there's a org pattern or what
- 16 we call soot, basically vaporous led and products that
- 17 followed those pellets out.
- For that to have enough time for that soot to
- 19 spread out and distribute on his hand, he can't be
- 20 touching the gun. He has to be moved back. But he can't
- 21 be so far away that the residues don't reach him. So
- 22 he's right there in that approximately three-inch
- 23 distance is where we see heavy soot residues with some
- 24 gunpowder particles in a distribution about the size that

- 1 path of the bullet. Could you demonstrate where the gun
- 2 would have been, in your opinion?
- 3 A. Yes. Because we have this trajectory, we
- 4 know the bullets will travel in a straight line as they
- 5 are traveling through this arrangement, so we have to
- 6 position the firearm. You can imagine we can extend this
- 7 line. We have to position this firearm somewhere along
- 8 this yellow line. In between the firearm and the back of
- 9 the couch, we have to put Harry Leibel, and we have to
- .0 arrange that in a circumstance that the left hand, the
- 11 back of the left hand, is approximately three inches away
- 12 from the gun.
- So when we put all of that together, assuming
- 14 that Harry Leibel is in fact on the couch where his blood
- .5 was where the shot is, the gun has to be somewhere in
- 16 this general vicinity, somewhere right in here, by the
- 17 time we put his body there. His shoulder has to be right
- on -- right beneath the yellow rod because he has that
- 19 eclipsing wound here. So when he was on this couch, he's
- 20 positioned in a manner such that his left shoulder is
- 21 here just under this line here, and his left hand is
- 22 forward of his shoulder in some capacity; the back of his
- 23 hand presented to the gun. So it's this kind of an
- 24 arrangement, and there is -- there's also a range with

- was represented on his left hand.
- 2 O. So given that opinion, could his left hand
- 3 have been in contact with the barrel of the gun at the
- 4 moment the gun was shot?
- 5 A. No.
- 6 MR. GREGORY: Your Honor, may he step down to
- 7 the couch?
- 8 THE COURT: He may.
- 9 MR. GREGORY: And we will need, if you could
- 10 bring the demonstration gun with you, please.
- 11 THE COURT: But the record should reflect
- 12 exactly what exhibits that you have down there.
- MR. GREGORY: Thank you. He has Exhibit 118,
- 14 I believe. The end table is Exhibit 121.
- 15 THE COURT: It's right back here, sir.
- 16 MR. GREGORY: Thank you. And Exhibit
- 17 Number 120. 119 is the demonstration gun. Thank you.
- 18 THE COURT: So he has Exhibits 119 --
- 19 MR. GREGORY: Correct.
- THE COURT: -- 118 and 120; is that correct?
- 21 MR. GREGORY: Yes.
- 22 THE COURT: Proceed, sir.
- 23 Q. (BY MR. GREGORY:) Talking about what would
- have been the second shot, and you just talked about the

- 1 trajectory rods. We account for plus or minus five
- 2 degrees or so because there is some error. Of course we
- 3 can move this. So we come up with a zone for that shot.
- 4 The rifle was positioned somewhere in this zone, and at a
- 5 time when the left hand was forward the barrel and the
- 6 left shoulder was just on the bottom of that yellow path.
- 7 Q. Thank you. You can retake the stand.
- 8 Mr. Noedel, what was your ultimate opinion in this case?
- 9 A. Well, ultimately, piecing together all of the
- 10 different components that I've examined for the
- 11 reconstruction, in my opinion, because of the reach and
- 12 the elements that have to be met, the distance
- 13 determinations and all of those elements, I think that
- 14 the best explanation is that Harry did not shoot himself.
- 15 Harry Leibel did not shoot himself. It creates much
- 16 easier logistics if someone else delivered the shots,
- 17 both shots to Harry Leibel.
- 18 O. What do you mean by that, what you just
- 19 stated about the movements? In your scenario, your
- 20 opinion is that it was most likely he didn't shoot
- 21 himself. Describe for me what his movements would be
- 22 during the course of the two shots.
- 23 A. So knowing the sequence, we have to arrange a
- 24 situation where the firearm is close to the side of his

Page 103

- 1 body, so let's estimate two to six inches from the side
- 2 of his body, and left arm has to be up.
- 3 So when the first shot eclipses his body,
- 4 pellets go in, and then he moves to this position to
- 5 present his left hand, eclipse his left shoulder, and
- 5 present his left hand, compse his left shoulder, and
- 6 continues into the couch. So he has to present the left,
- 7 or I'm sorry, present his right side, and then present
- 8 his shoulder. So that's, as I'm demonstrating, that
- 9 twist is the kind of movement that Harry would have to
- 10 achieve, assuming that the shooter is not moving
- 11 dramatically through the scene. And we know that the
- 12 shooter had to be close to Harry.
- 13 Q. And were you provided with information
- 14 regarding the position of the hammer when the gun was
- 15 found?
- 16 A. Yes, I was.
- 17 Q. And what was the position of the hammer?
- 18 A. After the second shot and the way the gun was
- 19 found, the hammer was in the cocked position. So the
- 20 caulking of the gun takes that specific movement.
- 21 Somebody had to physically caulk the hammer back and
- 22 prepare it for a third shot, which was not delivered.
- 23 Q. And your opinion regarding this case, again,
- 24 is to a reasonable degree of scientific certainty?

- 1 laboratory. So that's a contract that whereby I come
- 2 down from my home near Seattle, Washington, I come down
- 3 one week a month and have been doing so for about the
- 4 last four years.
- 5 Q. And when you work the Washoe County Crime
- 6 Lab, then you're basically you're compensated out of
- 7 county funding?
- 8 A. Correct. Grant money that the laboratory has
- 9 secured.
- 10 Q. And within your own company, then you are
- 11 basically a vendor?
- 12 A. Yes, in a sense. I consult for attorneys all
- 13 over the country on primarily shooting scene incidents.
- 14 Q. And in this instance, you were contacted by
- 15 Mr. Gregory at the DA's office concerning doing the
- 16 reconstruction in this case?
- 17 A. That is correct.
- 18 Q. And when did that occur?
- 19 A. My recollection was it was concurrent with
- 20 the laboratory examination as the case was developing and
- 21 these objects were in the lab.
- 22 Q. Which laboratory?
- 23 A. The Washoe County Forensic Laboratory.
- 24 Q. Which laboratory report?

Page 102

- 1 A. Yes, it is.
- 2 MR. GREGORY: Thank you. Nothing further.
- 3 THE COURT: Ms. Brown?
- 4
- 5 CROSS-EXAMINATION
- 6 BY MS. BROWN:
- 7 O. So it's to a reasonable degree of scientific
- 8 certainty that Mr. Leibel being killed by another person
- 9 is the best explanation?
- 10 A. Yes.
- 11 Q. When you prepared or when you did the
- 12 ballistics testing, you where were you working at?
- 13 A. Physically, I was located in the Washoe
- 14 County Forensic Laboratory in Reno.
- 15 Q. And can you describe -- you've testified you
- 16 have your own company, Noedel Scientific, and then you
- 17 also work at Washoe County?
- 18 A. Correct.
- 19 O. Could you explain that relationship?
- 20 A. Yes. Part of my forensic consulting is I
- 21 provide a lot of training, I teach a lot of courses, and
- 22 I had an opportunity to be invited to, on a contract
- 23 basis, to work at Washoe County to help reduce their
- 24 backlog and to help train new firearm examiners at their

- 1 A. The ballistic report that talks about the
- 2 bullets, the cartridge cases, the firearm, and the
- 3 distance testing. While that testing was going on, I was
- 4 contacted, and we discussed can a reconstruction be done,
- 5 and if so, how do we get that done, but the laboratory
- 6 specifically does not offer reconstruction as one of
- 7 their forensic services. So I do reconstruction as part
- 8 of my business, so I said since I'm working on the case
- 9 in the lab, perhaps I can just do a reconstruction
- 10 outside of the lab as Noedel Scientific.
- 11 Q. And you ultimately prepared a report in this
- 12 case on January 15th of this year?
- 13 A. Yes.
- 14 Q. And how much were you paid for doing the
- 15 reconstruction in this matter?
- 16 A. My hourly rate for consulting with Washoe is
- 17 \$150 an hour, and so the reconstruction aspect, probably
- 18 somewhere on the order of 20 or 30 hours that so far,
- 19 I've been covered have been covered in the grant money
- 20 with Washoe, Washoe contract money.
- 21 Q. So Washoe County doesn't do crime scene
- 22 reconstruction, but you received compensation through
- 23 Washoe County for doing the reconstruction?
- 24 A. Well, for my time in the laboratory. When

Page 108

Page 105

- 1 I'm here in Reno and checking in or going into the
- 2 laboratory, which is where I did a lot of this
- 3 reconstruction, that was billed to the county. A lot of
- 4 the reconstruction work was done on my computer and at
- 5 home for which there is no bill. There is no invoice.
- 6 Q. So other than what you were paid through
- 7 Washoe County, you receive nothing else for this?
- 8 A. That's correct. I do intend to try to get
- reimbursement for my travel for this testimony.
- 10 Q. Now, going back first to the ballistics
- 11 report, you were talking about the cylinder gases that
- 12 escape from the gap around the cylinder?
- 13 A. Yes.
- 14 Q. And you said you tested the robe that you
- 15 viewed and weren't able to find any indication of
- 16 stippling of gases?
- 17 A. Correct. I didn't find any cylinder gap-type
- deposits on the robe.
- 19 O. On the robe sleeves?
- 20 A. On the sleeves. Yes.
- 21 Q. But you said that was because these are
- 22 three-quarter type sleeves, and so they wouldn't be down
- 23 near that area?

1 they're not there.

24 A. That would be one good explanation as to why

- 1 stippling, if there's some other indication, what --
- 2 A. Yes, a black soot appearance.
- 3 Q. And you talked about the manner in which this
- exhibit, is it 119?
- THE COURT: I don't know. Which one do you
- 6 want?
- 7 MS. BROWN: The gun, the demo gun.
- A THE CLERK: Yes. It's 119.
- 9 Q. (BY MS. BROWN:) When you were talking about
- 10 the way the gun, the actual evidentiary gun, 118 was
- 11 loaded, and you said there was alternating rounds with a
- shot and the 45 shot, 45?
- 13 A. Yes.
- 14 Q. Is that any type of typical loading?
- 15 A. Yes. You're free to put any sequence or any
- 16 order. Some people load guns with for a purpose.
- Sometimes they're just random sequencing of like a
- revolver. Sometimes you'll see where you have the highly
- fragmented bullet followed by the shot shells, so the
- idea being if the fragmenting bullet doesn't work
- properly, then you have a different design shot next, and
- another fragmenting bullet, and another shot. So some
- people believe that loading in that manner gives them
- more versatility in the order in the way that the firearm

- 1 can perform.
- 2 Q. And is it -- Is that type of pattern typical
- 3 for loading for home protection with that type of gun?
- 4 A. Sure. You can load a revolver in a sequence
- 5 like that for any purpose.
- 6 Q. But is it typical for home protection?
- 7 A. No. I don't think there is a typical
- revolver load. I would say the most typical revolver
- load would be the same ammunition all the way through all
- 10 five cylinders. So this is -- This appears to be because
- 11 of a specific sequence.
- 12 Q. And you don't know if Mr. Leibel does that
- 13 specific sequence or if anybody else does that specific
- 14 sequence?
- 15 A. I do not know that:
- 16 Q. So there's no implication from that sequence?
- 17 A. Correct. The sequence is --
- 18 Q. And both -- All guns have some degree of
- 19 recoil: is that correct?
- 20 A. Yes.
- 21 O. And that would include long guns, handguns?
- 22 A. Yes.
- 23 Q. When you were doing the test firing for the
- 24 robe itself, you said you used fabric panels at different

- 2 Q. And you said there could be a possibility
- 3 that you would find something similar on arms that were
- 4 close to a firearm that had been fired?
- 5 A. Yes. If your arm or wrist is close enough t
- 6 the cylinder gap when the gun is discharged, you will get
- 7 residues at that location.
- 8 Q. You said it was a possibility?
- 9 A. Correct. If your arm is close enough, you
- 10 will get the residues.
- 11 O. Okay. And stippling is different from
- 12 residue; correct?
- 13 A. Yes.
- 14 Q. Okay. So you can get stippling?
- 15 A. You can.
- 16 O. But not in all cases?
- 17 A. Not necessarily in all cases. No.
- 18 O. And with the residue, would that always be
- visually? Would you be able to see that visually, or
- would that require other testing?
- 21 A. When it was visual, when I was stippled by
- 22 the cylinder gap --
- 23 O. I'm not talking about the residue. I'm
- 24 talking about just the residue itself. If you don't get

- 1 distances. What type of fabric were you using?
- 2 A. For the comparison to the robe, I was using
- 3 terry cloth panels, and for the comparison to the hand, I
- 4 was shooting into a type of filter paper called bench
- 5 coat, and it's coated on one side and a dense paper on
- 6 the other side.
- 7 Q. And so the paper itself is not the same as
- 8 flesh; is that correct?
- 9 A. That's correct.
- 10 Q. And when you do -- You said you do these test
- 11 patterns at as a series of inches --
- 12 A. Yes.
- 13 Q. -- so that you can make comparisons. And
- when you're to the point of doing comparisons between
- 15 using a photograph or actual -- a photograph of the
- 16 object that was actually hit?
- 17 A. With the robe, I had the actual exhibit, the
- 18 actual robe. I don't have access to his hand, so I used
- 19 the photograph of his hand, and I used the actual robe
- 20 for each respective analysis.
- 21 Q. And then based on either the actual robe --
- 22 (Brief interruption.)
- THE COURT: One moment. Ma'am, can we turn
- 24 that off, please.

- 1 Q. So there is some degree of subjectivity in
- 2 this because you're using a visual site. It's not like
- 3 you feed information into a computer and it pops out.
- 4 A. That's correct. That's why distances are
- 5 always reported as a range.
- 6 Q. And you noticed in your report on the robe
- 7 there were two, I believe it was, two separate defects in
- 8 your --
- 9 A. There were multiple defects through the robe;
- 10 two -- essentially two positions that were consistent
- 11 with the passage of a projectile.
- 12 Q. I'm sorry. Two through the mid right side
- 13 and the right belt loop?
- 14 A. Yes.
- 15 Q. Where were two holes? Was it through the
- 16 belt loop? Through the belt? What was the position?
- 17 A. On his robe, it was a very heavy terry cloth
- 18 type of robe, and it has a sewn belt loop. The shot that
- 19 -- the first shot, the one that entered his right side,
- 20 entered, eclipsed right at where that belt loop is sewn
- 21 to the main fabric. So it's right at the interaction --
- 22 the hole was right at the intersection of those two
- 23 pieces, the belt loop being sewn to the fabric.
- 24 Q. So it was a single entry shot that hit two

Page 110

Page 112

- 1 A JUROR: Sorry.
- 2 THE COURT: It's okay. I'm going to ask you
- 3 to leave that in the jury room.
- 4 A JUROR: I will after this, sir.
- 5 THE COURT: Thank you.
- 6 O. (BY MS. BROWN:) And then you're comparing
- 7 photographs in a sequence at the actual item itself to
- 8 try to determine which pattern best fits what you see on
- 9 either on the object or in the photograph of the hand; is
- 10 that correct?
- 11 A. The only photograph that I used was the
- 12 photograph of Harry Leibel's hand. The other targets I
- 13 have right in front of me, so I don't -- I do take a
- 14 photo at the end of the analysis, but I'm directly
- 15 comparing the photograph of his hand to the targets that
- 16 I just shot and then seeing where the densities are.
- 17 Q. Okay. So you're visually comparing your test
- 18 pattern with your actual observations of the robe or a
- 19 photograph of that?
- 20 A. That's correct.
- 21 Q. And based on those visual observations, then
- 22 you're making your best determination of the distance; is
- 23 that correct?
- 24 A. That's correct.

- 1 different pieces of fabric?
- 2 A. There is -- yes, it eclipsed the belt loop
- 3 and continued in, but I think there was also a partial
- 4 fold because there was a secondary hole near it. But we
- 5 know there was only one projectile. So the way we get
- 6 two holes from one projectile is if there's a fold at the
- 7 time that that bullet goes through when we flatten it
- 8 out, as we do in the laboratory, there were once folded
- 9 together, and now we flatten them out and we see it as
- 10 two holes.
- 11 Q. And do you recall how far apart those holes
- 12 were?
- 13 A. I would have to refer to my notes. Maybe a
- 14 quarter of an inch apart.
- 15 Q. And then the distance estimates you came up
- 16 with for the pattern on the robe was two to six inches
- 17 away from the barrel of the gun?
- 18 A. Correct. I think that's the best distance
- 19 based on my test fires.
- 20 Q. And on the robe side, there was some kind of
- 21 fold in the material that caused two distinct holes?
- 22 A. I believe that to be true.
- 23 Q. And then on the injury that was to the hand,
- 24 it was your opinion that it was most likely three inches

Page 113

- 1 away from the hand?
- 2 A. Correct.
- 3 Q. When you were doing the -- got to the point
- 4 of doing the crime scene reconstruction, you relied on
- 5 information from several different sources; is that
- 6 correct?
- 7 A. That's correct.
- 8 Q. And you had the autopsy photos?
- 9 A. I did.
- 10 Q. And some police reports?
- 11 A. Yes.
- 12 Q. And you also had measurements that were taken
- 13 by Joey Lear?
- 14 A. I did.
- 15 O. And Joey Lear was one of the forensic
- 16 investigators with the Washoe County Crime Lab?
- 17 A. Yes, he is.
- 18 O. And he was the one that responded, to your
- 19 knowledge, to the scene the night of February 23rd to
- 20 perform measurements and to initially put the trajectory
- 21 rods in place?
- 22 A. Yes.
- 23 Q. And do you have contact with Joey Lear
- 24 through your dealings with Washoe County Crime Lab?

- 1 A. Yes.
- 2 Q. And at that point, the sofa was in place in
- 3 the actual location where this incident happened; is that
- correct?
- 5 A. Yes.
- 6 Q. And the wall, we've heard testimony that a
- 7 portion was taken out of the wall to preserve the defect
- 8 in it?
- 9 A. Yes, I understand that to be true.
- 10 Q. And so when he was there, this wall was still
- 11 intact; is that correct?
- 12 A. Other than the bullet hole in the wall, I
- 13 don't believe it had been cut as yet.
- 14 Q. As yet? And at that point, he did
- 15 measurements of the room that you eventually relied on;
- 16 is that correct?
- 17 A. Yes.
- 18 Q. And showing you Exhibit 100, is this one of
- 19 the documents you relied on to get measurements?
- 20 A. Yes.
- 21 Q. And in Exhibit 101, was this the other
- 22 document sent to you by Mr. Lear to rely on to get
- 23 measurements?
- 24 A. Yes, these are his raw notes.

Page 114

Page 116

- 1 A. Yes, I did.
- 2 O. And what type of contact do you have?
- 3 A. I met Joey while I was working in the
- 4 laboratory. He worked in the crime scene response
- 5 section. And so initially, I met him just in passing
- because we're working across the hall from each otherwhen I'm in Reno. And that's the extent of how much I
- 8 knew about Joey.
- 9 O. But he's in the forensic division of the
- 10 Washoe County Crime Lab?
- 11 A. He was. I believe he's moved on to other
- 12 responsibilities.
- THE COURT: There was an exhibit up there.
- 14 MS. BROWN: I lifted it off.
- 15 THE COURT: Where did we put it?
- 16 MS. BROWN: Just right to the right.
- 17 THE COURT: Could we return it to the clerk,
- 18 please, unless you intend to use it, ma'am.
- MS. BROWN: I may intend to use it, Your
- 20 Honor.
- THE COURT: Then go ahead and do that.
- 22 Q. (BY MS. BROWN:) And from the reporting you
- 23 received, Mr. Lear was on the scene of the day that this
- 24 happened?

- 1 Q. And there's no indication, as to the couch
- 2 that's shown reclined in this document, they're showing
- 3 it was actually the right-hand side of the couch where
- 4 they documented this?
- 5 A. Yes, that's correct.
- 6 O. And there's no indication when they were
- 7 doing the actual measurements of if they had at one point
- B leaned the couch back what degree of angle they would
- 9 have created?
- 10 A. Correct. If they were leaning the couch
- 11 back, I don't know what the process is.
- 12 THE COURT: Can we just make the record clear
- 13 that when you say right-hand side, that's means if you're
- 14 standing in front of it and viewing it as opposed to if
- 15 you're sitting on it.
- MS. BROWN: Thank you, Your Honor.
- 17 THE COURT: Do you agree with that, ma'am?
- 18 MS. BROWN: Yes.
- 19 THE COURT: Okay. Thank you.
- 20 Q. (BY MS. BROWN:) And you were provided the
- 21 photographs that they used in conducting the measurements
- 22 in their trajectory measurements; is that correct?
- 23 A. Yes.
- 24 Q. I'm showing you what's Exhibit Number 27.

(29) Pages 113 - 116 2308 87

- 1 Are you familiar with that photograph?
- 2 A. Yes, I am.
- 3 Q. And this was one of the photographs that
- 4 Mr. Lear introduced yesterday that he used to testify
- 5 from?
- 6 A. I understand that to be a photograph taken
- 7 when they were processing the crime scene.
- 8 Q. And at this point in this photograph, the
- 9 trajectory rod was not lining up against where the defect
- 10 is down towards floorboard; is that correct?
- 11 A. That's correct.
- 12 Q. And Exhibit Number 28, there's a different
- 13 view, and in Exhibit 28, the trajectory rod is coming out
- 14 of the back of the couch and actually fitting in that
- 15 hole in the defect in the wallboard; is that correct?
- 16 A. That's correct. That's the proper
- 17 trajectory.
- 18 Q. And when Mr. Lear testified yesterday, he
- 19 explained that the difference between Exhibit Number 27
- 20 and Exhibit Number -- Exhibit Number 27 and Exhibit
- 21 Number 28 where there's no patch? The wall between --
- 22 THE COURT: I think both of you have muted
- 23 your microphones, I'm advised.
- 24 MS. BROWN: Mine is on.

- 1 angles of the trajectory in a way that's different from
- 2 what you've testified to. It was different; correct?
- 3 A. Yes, I did not -- Obviously, I'm not
- 4 weighting the couch, pushing back on the couch.
- 5 Q. And as you've testified before, there's two
- 6 distinct injuries in this case; correct?
- 7 A. Yes.
- 8 Q. And one of them is through the chest wall
- 9 into the chest?
- 10 A. Correct.
- 11 O. And then the other one is to the wrist and
- 12 shoulder?
- 13 A. Yes.
- 14 THE COURT: Ms. Brown, I hate to interrupt
- 15 you, ma'am, and I apologize for that, but it appears to
- 16 be noon. Would this be a good time for you to --
- MS. BROWN: That would be fine, Your Honor.
- 18 THE COURT: -- take a break? Okay. And
- 19 we're going to take our noon recess right now. Because
- 20 of a couple other issues that the attorneys have told me
- 21 about, we're going to recess for an hour and a half, and
- 22 that will be until 1:30.
- So during this 90-minute recess, you are
- 24 admonished not to talk or converse among yourselves or

Page 118

4

- 1 THE COURT: There you go. The ones on the
- 2 table, you mean?
- 3 THE CLERK: She got it.
- 4 THE COURT: The ones on the table. Oh, Jamie
- 5 take care of it. Do you have yours, Mr. Gregory? Got
- 6 it? Thank you both.
- 7 O. (BY MS. BROWN:) And Mr. Lear explained the
- 8 difference between Exhibit Number 27 where there's no
- 9 match between the trajectory rod and the wall and Exhibit
- 10 Number 28 where there is -- the trajectory rod can be
- 11 inserted in the hole in the wall was that they put weight
- 12 of a body on the couch in order to get their trajectory.
- 13 A. He may have said that. I don't think -- I
- 14 don't think that that's completely accurate based on what
- 15 I understand about this bullet path.
- 16 Q. Okay. And showing you what's been marked as
- 17 Exhibit Number 130. Mr. Lear identified this photograph
- 18 as the way they weighted the couch in order to get that
- 19 trajectory rod to go through both holes in the couch and
- 20 to line up with the hole in the wall. He said it was the
- 21 body weight that pushed the couch back so they can get
- 22 that position measuring the trajectory.
- 23 A. Okay.
- 24 O. Okay. So they were able to reproduce the

- 1 with anyone else on any subject connected with this
- 2 trial. You're not to read, watch, or listen to any
- 3 report of or commentary on the trial or any person
- 4 connected with this trial by any medium of information,
- 5 including, without limitation, newspapers, television,
- 6 radio, or Internet. You're not to form or express any
- 7 opinion on any subject connected with the trial until the
- 8 case is finally submitted to you.
- 9 Mr. Noedel, you are going to remain under
- 10 oath. You're not to discuss your testimony with anyone
- 11 except the three attorneys.
- 12 THE WITNESS: Yes, sir.
- 13 THE COURT: Ladies and Gentlemen, have a good
- 14 lunch. I'll see you at 1:30. Thank you very much.
- 15 (Recess was taken.)
- 16 THE COURT: We're back in session in
- 17 14-DI-62. Mr. Gregory is here for the State. Ms. Brown
 - and Ms. Henry are here for the defense. Ms. Leibel is
- 19 here together with her interpreters, and I guess we're
- 20 ready to bring in the jury. Are you ready, Mr. Gregory?
- MR. GREGORY: Yes, Your Honor.
- THE COURT: Bring them in. Good afternoon,
- Ladies and Gentlemen of the Jury. I trust you had time for a nice lunch. You may have a nice seat. Thank you.

Page 121

- Parties stipulate to the presence of the
- 2 jury?
- 3 MR. GREGORY: Yes, Your Honor.
- 4 MS. BROWN: Yes, Your Honor.
- 5 THE COURT: Very well. Ms. Brown, would you
- 6 like to pick up?
- 7
- 8 CONTINUED CROSS-EXAMINATION
- 9 BY MS. BROWN:
- 10 Q. Before we took a break, we were talking about
- 11 Mr. Lear when he was doing his trajectory, doing the
- 12 photographs for the trajectory. He was able to get that
- 13 couch with the trajectory rod to line up with it into the
- 14 hole in the wall by putting weight on the couch, but that
- was in the middle of a location; is that correct?
- 16 A. They did position a person in the middle of
- 17 the couch and take pictures of that.
- 18 Q. Okay. Did you align that in another -- the
- 19 couch the trajectory rod and the wall in a different way
- by reclining the couch to a certain degree?
- 21 A. Yes.
- 22 Q. And so that couch is able to be manipulated
- 23 just by its very movement of being a recliner; is that
- 24 correct?

- 1 O. Did you view the section of wall that they
 - 2 had or Deputy Halsey had taken out of the wall up at the
 - 3 Lake house?
 - 4 A. No, just the photographs of that of that
 - 5 piece.
 - 6 Q. And in order to view the scene, you had to go
 - 7 to 452 Kent Way up at Lake Tahoe and look at what at that
 - 8 the point in time was an empty house?
 - 9 A. That's correct.
 - 10 Q. And that was the same timeframe, four to six
 - 11 weeks ago?
 - 12 A. That's correct.
 - 13 Q. And then using these various elements, try to
 - 14 put them back together in sequence to arrange what you
 - 15 believe to be an accurate representation of the scene?
 - 16 A. That's correct.
 - 17 O. So it's possible for two different people
 - 18 looking at the same circumstance to come up with
 - 19 different ways to align that trajectory rod into the wall
 - 20 through the couch. Mr. Lear had one way, you have
 - 21 another?
 - 22 A. I don't think so. To establish the bullet
 - 23 path through the couch, you have to connect the entry
 - 24 hole and the exit hole, which is what Mr. Lear did.

Page 122

- 1 A. That's correct.
- 2 O. And Mr. Lear manipulated it one way. You
- 3 manipulated it another?
- 4 A. I don't know how Mr. Lear maneuvered the
- 5 couch when he was there.
- 6 Q. Okay. We'll stick with you. In order to get
- 7 that trajectory, you had to position the couch in a
- 8 somewhat reclined position?
- 9 A. That's correct.
- 10 O. When was it you first viewed the couch?
- 11 A. I don't recall the exact date, but it was
- 12 about six weeks ago.
- 13 Q. And where was it at when you saw it?
- 14 A. It was here in this building in a meeting
- 15 room, a vacant meeting room downstairs.
- 16 Q. And prior to it being placed in that vacant
- 17 meeting room, you don't know where it had been?
- 18 A. That's correct.
- 19 Q. And you don't know if it was -- there was any
- 20 differences from the time it was at the scene to the time
- 21 you viewed it?
- 22 A. Correct. I don't know the history of the
- 23 couch from the time it left the house to the time I
- 24 viewed it here in the building.

- 1 Seeing somebody on the couch for me, in my assessment, I
- 2 don't see the need to seat someone on the couch, so I
- 3 don't know why Mr. Lear went through that process. The
- 4 entry and the exit hole are the same as they appeared in
- 5 photographs of the scene, so that's how a trajectory is
- 6 documented and measured, is by connecting the multiple
- 7 points along the line.
- 8 O. And you testified in the first shot that went
- 9 through the trunk and out had an exit wound in the arm,
- 10 that it was your opinion that that arm had to be extended
- 11 at the time of the shot?
- 12 A. Yes, raised. Not necessarily extended. I
- 13 don't know what from the elbow to the wrist, but where
- 14 the projectile fragments ended, I believe the arm has to
- 15 be raised in order to complete the path, the straight
- 16 line path of fragments through his body.
- 17 O. And Dr. Kubiczek testified it was possible
- 18 that the arm was bent and there was some deflection off
- 19 the wall.
- 20 MR. GREGORY: Your Honor, that misstates his
- 21 testimony. The last part of what she said misstates his
- 22 testimony.
- 23 THE COURT: Well, first of all, that's a
- 24 statement, not a question, so it's simply not a question,

- and Counsel isn't testifying. The jury will have their
- own recollection as to the doctor's testimony. This 2
- witness was not present, so unless there's a question
- 4 associated, we'll move on.
- 5 Q. (BY MS. BROWN:) Thank you, Your Honor.
- Showing you Exhibit 14. Sorry. 54. Do you
- 7 recognize that photo?
- B A. Yes, I do.
- 9 O. And what is that?
- 10 A. This is the photo that was taken by someone
- 11 at the medical examination and autopsy of Harry Leibel.
- 12 Q. And that was an attempt to show the length of
- 13 his arm?
- 14 A. Correct. My understanding is that the
- 15 purpose of the photo was to have scale of the length of
- 16 his arm.
- 17 O. And showing you Exhibit Number 55. This
- 18 shows an extension out to his middle finger to try to get
- 19 the full range of his hand?
- 20 A. Correct.
- 21 O. And so with the middle finger, that would be
- 22 a 24-inch range?
- 23 A. Yes, from the start of the tape measure
- 24 tucked in his armpit to the extension of the middle

- 2
- 3 Q. The robe that was discussed, you received
- 4 that up at the crime lab?
- 5 A. Yes, I did.
- 6 Q. And do you recall the number that the crime
- 7 lab attributed to that article?
- 8 A. I would need to refer to my notes. I don't
- 9 recall the number.
- 10 O. May I show you your notes?
- 11 A. Please.
- 13 Well, just see if that refreshes your recollection.
- 14 A. Yes, it does.
- 15 O. And what was the number?
- 16 A. The control number is W283405, black
- 17 bathrobe.
- 19 number 143. Can you indicate what that is, please? Go
- 20 ahead and take a look.
- 21 A. This is the package that contains if black
- 22 bathrobe.
- 23 O. And does it have the control number on there
- 24 that you just recited?

- 1 finger was documented to be 24 inches.
- 2 O. And you know that you can gain more in your
- 3 reach just by the flexibility of your body; correct?
- 4 A. That's true.
- 5 O. And so if I drop this shoulder, I've
- 6 lengthened my arm?
- 7 A. Yes.
- 8 O. And if I bend in a certain way, I can reach
- 9 something out here that I couldn't have reached with just
- 10 the length of my arm; is that correct?
- 11 A. That's correct.
- 12 Q. And you said during reconstruction, you can't
- 13 always account for every little detail; is that correct?
- 14 A. That's correct.
- 15 Q. You have to go with the best you can do with
- 16 the solid evidence you have?
- 17 A. Correct. If you don't have enough
- 18 information about the particular question, you may not be
- able to address it. 19
- MS. BROWN: Thank you. I have nothing 20
- 21 further.
- THE COURT: Mr. Gregory? 22
- 23
- 24

- 1 A. Yes, it does.

- 5 A. Yes, I do.

- 9 A. Yes, I did.
- 11 A. I did.
- 12
- 13
- 14

- 17 A. Yes, it does.
- 18 MR. GREGORY: Move for admission.
- MS. BROWN: No objection, Your Honor. 19
- THE COURT: Then it will be admitted. 20
- 21 Q. (BY MR. GREGORY:) What does that photograph
- 23 A. While I was examining the couch, this idea of
- 24 what does weighting the couch and how do these -- the

Page 129

- seat portion and the back portion, how do they work
- 2 together, and does weighting the couch change any
- 3 directions significantly that might lead to a different
- 4 position of the couch at the scene.
- 5 So we reconstructed the bullet path, and then
- 6 with the rod in place, we used a laser to point to the
- 7 site where the bullet path goes. Then we had a person
- 8 who happen to weigh approximately 185 pounds sit on the
- 9 couch in a similar position that would have been required
- 10 for Harry Leibel to be positioned when the shot eclipsed
- 11 his shoulder, and then we looked to see how far the
- 12 yellow rod moved based on our stationary laser pointer.
- 13 So it was a way to measure how much influence there is by
- 14 weighting and seating and leaning back on the couch.
- 15 Q. Dr. Kubiczek testified that Harry's weight
- 16 was 170 pounds. Do you recall the weight of the subject
- 17 that you used?
- 18 A. Yes. The person that was with weighs 185
- 19 pounds.
- 20 O. A little bit heavier?
- 21 A. Fifteen pounds heavier than the documented
- 22 weight.

10

- 23 Q. So with a heavier subject on it, if you could
- 24 look at this photograph and explain what you were just

- THE COURT: Thank you.
- 2 MR. GREGORY: You're welcome. Your Honor, I
- 3 don't have further questions. However, I will need to
- 4 recall this witness to talk about one other item of
- 5 evidence that's being brought up.
- 6 THE COURT: I understand. First of all, do
- 7 you have any recross?
- 8 MS. BROWN: No. Your Honor.
- 9 THE COURT: Sir, you may step down. But,
- 10 Mr. Noedel, I don't want you to leave the premises. I
- 11 also admonish you I don't want you to talk about your
- testimony to anyone other than the three attorneys here
- 13 in this room. Do you understand that, sir?
- 14 THE WITNESS: Yes, sir.
- 15 THE COURT: Thank you very much. I'm sure
- 16 that there's probably someplace that you were waiting or
- 17 staging before you came here. You can return to that
- 18 area and make sure that you're available for us. Thank
- 19 you, sir.
- 20 MR. GREGORY: Now, Your Honor, I'll like to
- 21 recall Mr. Noedel.
- 22 THE COURT: Okay. Sir, I would remind you
- 23 that you're still under oath.
- 24 THE WITNESS: Yes, sir.

Page 130

Page 132

- 1 telling us about.
- 2 A. Yes. So as we view that photograph, the
- 3 model that we had that weighs 185 pounds, we put him in a
- 4 tie-back suit to protect his clothing from the blood
- 5 that's present on there, so you see -- that's present on
- 6 the couch. So if you look at the left edge of the
- 7 picture, you're actually looking at his left arm and left
- side. That's just captured to the left. That's the
- 9 white-looking material. That's the model's left side.
 - The yellow trajectory rod that's sticking out
- 1 toward the left is this trajectory rod placed back when
- 12 this analysis was going on. And the green dot that's
- 13 above and to the right of the trajectory rod is where the
- 14 trajectory rod was before he sat down on it. So the
- 15 trajectory rod was originally approximately one inch up
- 16 and one inch over. When he weights and sits on it, it
- 17 lowered it and moved it to the left by about one inch.
- When he gets up off the of the couch, that
- 19 couch cushion actually relaxes back to where the yellow
- 20 probe will go right back to where that green dot is. So
- 21 we get about an inch or so of movement in two directions
- 22 when we have 185-pound person load the seat.
- MR. GREGORY: Your Honor, I'm going to return
- 24 Exhibit 145. There were also Exhibits 141, 54 and 55.

- 1 THE COURT: Thank you.
- **3** FURTHER EXAMINATION
- 4 BY MR. GREGORY:
- 5 O. Mr. Noedel, if that particular gun, you
- 6 talked about how gases escape out of that cylinder to the
- 7 extent that it stippled you when you shot the gun. If
- 8 that cylinder were laying on a couch like that, would you
- 9 expect to be able to find any kind of those gases on the
- 10 couch?

2

- 11 A. Yes. The cylinder gap gases that blast out
- 12 the sides could be a useful piece of reconstruction if we
- can find them because it would help us position the
- 14 firearm, knowing that it would have to be adjacent to or
- 15 laying on the couch or the surfaces.
- 16 Q. Did you have an opportunity to examine the
- 17 blanket that was laying on this couch?
- 18 A. Yes, I did.
- 19 Q. Showing you Exhibit Number 146. First, if
- 20 you could describe where did that examination take place?
- 21 A. That also took place here in this building in
- 22 the utility room or examination room that they have
- 23 available downstairs.
- 24 Q. Okay. And if you could look at this exhibit

(33) Pages 129 - 132 23) 2 9

1	and let me know if that's the what it is.	1	finally released?
2	A. Yes. This is the exhibit that I examined	2	MR. GREGORY: Yes, Your Honor.
3	that day here in the building, and this is a blanket that	3	THE COURT: Do you intend to call him?
4	had been draped over the arm of the couch at the time of	4	MS. BROWN: No, Your Honor.
5	the initial scene processing. It's captured in	5	THE COURT: Sir, you are released. Thank you
6	photographs of the original scene, and it was tucked in	6	for your appearance.
7	and over the arm and involved with the seat that was	7	THE WITNESS: Thank you.
8	adjacent to the bullet path.	8	MR. GREGORY: The State would call
9	MR. GREGORY: Move for the admission of 146.	9	Investigator Schemenauer.
10	MS. BROWN: No objection.	10	THE COURT: Sir, if you would come forward
11	THE COURT: 146 is admitted.	11	before the clerk.
1	Q. (BY MR. GREGORY:) What were your	12	
13	observations regarding that blanket?	13	JEFF SCHEMENAUER,
	A. It was kind of a two-step process. First	14	having been first duly sworn, was
15	using the photographs of the scene documentation to show	15	examined and testified as follows:
16	exactly how that blanket was organized on the arm of the	16	
17	chair at the time of the event, we found those locations	17	THE COURT: Come on up and have a seat up on
18	based on landmarks and the shapes of the bloodstains. So	18	the witness stand. There's some water there if you like.
19	we knew exactly which part was over the arm as opposed to	19	THE WITNESS: Thank you, Your Honor.
20	which part was tucked in.	20	THE COURT: You're welcome, sir.
21	Then I used a process where of looking for	21	
22	the cylinder gap gases, the evidence of a deposit of soot	22	,
23	from the cylinder gap which can look like a stripe of	23	
24	black or dark-colored soot material. Doing that	24

Page 137

- 1 by my name on the chain of custody.
- 2 Q. And does it indicate on the chain of custody
- 3 that that item ultimately went up to the Washoe County
- 4 Crime Lab?
- 5 A. It does.
- MR. GREGORY: Thank you. I'd move for
- 7 admission, Your Honor.
- 8 MS. BROWN: No objection, Your Honor.
- 9 THE COURT: It's admitted. What was the
- 10 number again? Please tell me.
- 11 THE CLERK: 142.
- 12 MR. GREGORY: 28 --
- 13 THE COURT: 143.
- MR. GREGORY: Oh, not the lab number.
- 15 THE COURT: No.
- 16 MR. GREGORY: Yes. It's 143.
- 17 THE COURT: Thank you, sir. 143 is admitted.
- 18 (Exhibit No. 143 was admitted into evidence.)
- MR. GREGORY: No further questions.
- 20 THE COURT: Cross?
- MS. HENRY: No questions.
- 22 THE COURT: Investigator, you may step down.
- 23 Thank you for being here.
- MR. GREGORY: May I have one moment, Your

- 1 A. Since retired.
- 2 Q. All right. What was your role up at the
- 3 crime scene on February 23rd, 2014 up at 452 Kent Way?
- 4 A. My role at that time was to process the crime
- 5 scene, which in this case was photographing and
- 6 collecting evidence.
- 7 Q. Do you recall collecting a blanket -- Well,
- 8 first of all, do you recognize in couch right here,
- 9 Exhibit Number 120?
- 10 A. Yes, I do.
- 11 Q. And what do you recognize it from?
- 12 A. The living room at the Kent address.
- 13 Q. Did you help seize the couch and collect it
- 14 for evidence?
- 15 A. Yes, I did.
- 16 Q. What did you do with the couch?
- 17 A. It was taken to a storage lot and put in a
- 18 sealed locker.
- 19 Q. Do you recall how you packaged it?
- 20 A. A moving company assisted with that, and it
- 21 was covered with -- It was sealed with Saran wrap and
- 22 taped.
- 23 Q. And stored in a secure location?
- 24 A. Yes.

Page 138

- 1 Honor, to check on my witnesses?
- 2 THE COURT: You may.
- MR. GREGORY: John Barden is the next
- 4 witness, Your Honor.
- 5 THE COURT: Mr. Barden, you can just wait
- 6 right there and she'll swear you in. Would you face the
- 7 clerk.
- 8 JOHN BARDEN,
- 9 having been first duly sworn, was
- 10 examined and testified as follows:
- 11
- THE COURT: Would you come up and have a seat
- 13 up here please, sir. Help yourself to some water.
- 14
- 15 DIRECT EXAMINATION
- 16 BY MR. GREGORY:
- 17 Q. Sir, please state your full name and spell
- 18 your last name.
- 19 A. John Barden: B-a-r-d-e-n.
- 20 O. And back in February of 2014, what were you
- 21 doing?
- 22 A. I was an evidence technician. I was employed
- 23 by the Douglas County Sheriff's Office.
- 24 Q. Since retired; correct?

- 1 Q. Do you recall or did you collect any items
- 2 from the couch?
- 3 A. Yes, I did.
- 4 Q. What did you collect from the couch?
- 5 A. I collected two pillows and one blanket and
- 6 also a rifle.
- 7 Q. Do you recall what you did with the blankets
- 8 or the blanket?
- 9 A. Yes. I transported it back to the sheriff's
- 10 office where I put it in a paper bag and booked it.
- 11 Q. Showing you what's been marked as 146. Just
- 12 bring it over to the side here. Can you take a look at
- 13 that --
- 14 A. Yes.
- 15 Q. -- and tell me what it is?
- 16 A. It's the blanket from the couch.
- 17 O. Okay. And how do you know that?
- 18 A. Because it's marked on the front of it,
- 19 "Couch Blanket."
- 20 O. And did you put an evidence number on that?
- 21 A. Yes, I did.
- 22 Q. What's the number?
- 23 A. The number is 868. The entire number is 14 E
- 24 as in Edward, V as in Victor 00868.

- 1 Q. Okay. Thank you. Can you just take a look
- 2 at the chain of custody on that.
- з A. Yes.
- 4 Q. And does it indicate that Ed Garren checked
- 5 that out at some point, if you can decipher it.
- 6 A. Well, I can read the last line where he
- returned it to me on January the 30th.
- 8 O. If you can't tell, don't guess.
- 9 A. Yeah.
- 10 Q. Okay.
- 11 A. That's not correct. It looks like my name,
- 12 but apparently it's not.
- MR. GREGORY: Okay. Thank you. I have
- 14 nothing further.
- MS. BROWN: No questions, Your Honor.
- 16 THE COURT: Mr. Barden, thank you for being
- 17 here. Enjoy your retirement.
- 18 THE WITNESS: Thank you.
- 19 MR. GREGORY: Now, Your Honor, I'll like to
- 20 recall Mr. Noedel.
- 21 THE COURT: Okay. Sir, I would remind you
- 22 that you're still under oath.
- 23 THE WITNESS: Yes, sir.
- 24 THE COURT: Thank you.

- 1 that day here in the building, and this is a blanket that
 - 2 had been draped over the arm of the couch at the time of
 - 3 the initial scene processing. It's captured in
 - 4 photographs of the original scene, and it was tucked in
 - 5 and over the arm and involved with the seat that was
 - 6 adjacent to the bullet path.
 - 7 MR. GREGORY: Move for the admission of 146.
 - 8 MS. BROWN: No objection.
 - 9 THE COURT: 146 is admitted.
 - 10 Q. (BY MR. GREGORY:) What were your
 - 11 observations regarding that blanket?
 - 12 A. It was kind of a two-step process. First
 - 13 using the photographs of the scene documentation to show
 - 14 exactly how that blanket was organized on the arm of the
 - 15 chair at the time of the event, we found those locations
 - 16 based on landmarks and the shapes of the bloodstains. So
 - we knew exactly which part was over the arm as opposed to
 - 18 which part was tucked in.
 - 19 Then I used a process where of looking for
 - 20 the cylinder gap gases, the evidence of a deposit of soot
 - 21 from the cylinder gap which can look like a stripe of
 - 22 black or dark-colored soot material. Doing that
 - 23 visually, I didn't see anything, but there were some
 - 24 stains here and there, so it went one step further, and

- 1 FURTHER EXAMINATION
- 2 BY MR. GREGORY:
- 3 Q. Mr. Noedel, if that particular gun, you
- 4 talked about how gases escape out of that cylinder to the
- 5 extent that it stippled you when you shot the gun. If
- 6 that cylinder were laying on a couch like that, would you
- 7 expect to be able to find any kind of those gases on the
- 8 couch?
- 9 A. Yes. The cylinder gap gases that blast out
- 10 the sides could be a useful piece of reconstruction if we
- 11 can find them because it would help us position the
- 12 firearm, knowing that it would have to be adjacent to or
- 13 laying on the couch or the surfaces.
- 14 O. Did you have an opportunity to examine the
- 15 blanket that was laying on this couch?
- 16 A. Yes, I did.
- 17 O. Showing you Exhibit Number 146. First, if
- 18 you could describe where did that examination take place?
- 19 A. That also took place here in this building in
- 20 the utility room or examination room that they have
- 21 available downstairs.
- 22 Q. Okay. And if you could look at this exhibit
- 23 and let me know if that's the -- what it is.
- 24 A. Yes. This is the exhibit that I examined

- 1 there's a chemical color test that you can perform that
- 2 will reveal the vaporous lead and the types of materials
- 3 that blast out of the side of the cylinder car gap if
- 4 there is there, so if it wasn't adjacent; processed using
- 5 those chemical, and then didn't find any deposits that
- 6 are consistent with cylinder gap or that would indicate
- 7 that a firearm was adjacent or laying on the blanket that
- 8 was over the arm of the couch.
- 9 MR. GREGORY: Thank you. Nothing further.
- 11 RECROSS EXAMINATION
- 12 BY MS. BROWN:
- 13 O. Are you referring to laying on the couch or
- 14 blanket of the couch when it was fired?
- 15 A. Correct. Yes. At the time it was fired,
- 16 there were no cylinder gap gases on the blanket while it
- 17 was on the couch.
- MS. BROWN: Okay. Thank you. I have nothing
- 19 further.

10

- 20 THE COURT: Redirect?
- MR. GREGORY: No, Your Honor. Thank you.
- THE COURT: Mr. Noedel, thank you. Is he
- 23 finally released?
- MR. GREGORY: Yes, Your Honor.
