## IN THE SUPREME COURT OF THE STATE OF NEVADA

SANDRA CAMACHO; AND ANTHONY CAMACHO,

Petitioners,

vs.

THE EIGHTH JUDICIAL DISTRICT COURT OF THE STATE OF NEVADA, IN AND FOR THE COUNTY OF CLARK; AND THE HONORABLE NADIA KRALL, DISTRICT JUDGE,

Respondents,

and

PHILIP MORRIS USA, INC., a foreign corporation; R.J. REYNOLDS TOBACCO COMPANY, a foreign corporation, individually, and as successor-by-merger to LORILLARD TOBACCO COMPANY and as successor-ininterest to the United States tobacco business of BROWN & WILLIAMSON TOBACCO CORPORATION, which is the successor-by-merger to THE AMERICAN TOBACCO COMPANY; LIGGETT GROUP, LLC., a foreign corporation; and ASM NATIONWIDE CORPORATION d/b/a SILVERADO SMOKES & CIGARS, a domestic corporation; LV SINGHS NC. d/b/a SMOKES & VAPORS, a domestic corporation,

Real Parties in Interest.

PETITIONERS' APPENDIX VOLUME 48 (NOS. 7179-7283)

Fan Li, Esq. Nevada Bar No. 15771 KELLEY | UUSTAL 500 N. Federal Hwy., Ste. 200 Fort Lauderdale, Florida 33301 (954) 522-6601 – Telephone klw@kulaw.com

Attorneys for Petitioners, Sandra Camacho and Anthony Camacho

- the first time in a person's lifetime they used a particular
- 2 substance, correct, Dr. Proctor?
- 3 A. Right. Apparently at what age.
- Q. Okay. And then in 2000 -- I mean, then on page 26,
- 5 you go down, and it says, "Among people aged 12 or older in
- 6 2019, 1.6 million people initiated smoking -- cigarette
- 7 smoking in the past 12 months, i.e., and never before the past
- 8 12 months, which was lower than the number in most years from
- 9 2002 through 2018. The number of people aged 12 or older in
- 10 2019, who initiated cigarette smoking in the past year
- 11 averaged to about 4,400 people each day." Did I read that
- 12 correctly?
- 13 A. Yes. So 4,000-some people are starting smoking
- 14 every day.
- 15 Q. "Among young adults aged 18 to 25 in 2019, 1 million
- 16 people initiated cigarette smoking in the past 12 months."
- 17 Did I read that correctly?
- 18 A. Yeah. Could you go up to the top of that column? I
- 19 want to make sure we got that right. I'm not sure I
- 20 understood that.
- 21 The number of people age 12 or older who initiated
- 22 smoking in the past year averaged 4,400 people each day.
- 23 Okay. I got that.
- Q. Averaged to about 4,400 people each day, right?
- 25 A. Right.

- 1 Q. Okay. "Among young adults aged 18 to 25" -- did I
- 2 read that already? Yes.
- 3 Okay. "Among adults aged 26 or older in 2019,
- 4 90,000 people initiated cigarette smoking in the past 12
- 5 months or an average of about 250 new cigarette smokers aged
- 6 26 or older each day." Did I read that correctly --
- 7 A. Right. Yes.
- 8 Q. Okay. Adding all of these up, that is a total of
- 9 1,631,000 new initiates to smoking, correct?
- 10 A. Every year, yes.
- 11 Q. Or of that number of -- new initiates, 541,000
- 12 initiated cigarette smoking before the age of 18, correct?
- 13 A. Yes.
- 14 Q. And 1,000,090 initiated cigarette smoking after they
- 15 turned 18, correct?
- 16 A. I believe so, yeah.
- 17 Q. Would you accept my math that 1,090 is 67 percent of
- 18 1,631 thousand?
- 19 A. Yes.
- 20 Q. Would you agree that in this country about
- 21 two-thirds of people who first initiate combustible cigarette
- 22 smoking do so after they turn 18 years of age?
- 23 A. Say it again.
- Q. Would you agree that in this country about
- 25 two-thirds of people who first initiate combustible cigarette

- smoking do so after they turn 18 years of age?
- A. I would have to double-check that. That doesn't
- 3 ring true to me somehow.
- 4 Q. Okay. Even though the numbers we just showed had
- 5 more people initiating smoking after the age of 18 than before
- 6 the age of 18?
- 7 A. Again, I would just have to double-check it.
- 8 Q. Okay. What would you do to double-check it?
- 9 A. Well, just to make sure we've done all the math
- 10 right. That's all. I just don't want to do it on the fly
- 11 here --
- 12 Q. Okay. Would you agree that today most people in
- 13 this country first initiate combustible cigarette smoking when
- 14 they are aged 18 or older?
- 15 A. No. That's the problem. That's what's causing me
- 16 pause. I -- I wasn't aware that -- if that's true, that must
- 17 be very recent.
- 18 Q. Okay.
- 19 A. That's why I want to double-check it.
- 20 Q. Other than going through this article itself, what
- 21 else would you need to do to double-check?
- 22 A. Well, just to double-check that, you know -- has it
- 23 really changed dramatically. Because in the past, most people
- 24 began by 18, so I want to find out when that changed, if that
- 25 changed, that sort of thing.

- 1 Q. Okay. All right. So, also on page 26, it talks
- 2 about initiation of alcohol use and states that among
- 3 adolescents -- sorry. "Among adolescents aged 12 to 17, the
- 4 number of past year initiates" -- well, I'll go ahead and
- 5 start from the top. I'm sorry.
- 6 Also talks about initiation of alcohol use. And it
- 7 starts out: "Among people aged 12 and older in 2019, 4.9
- 8 million people initiated alcohol use in the past 12 months,
- 9 not counting sips from another person's drink. Among
- 10 adolescents aged 12 to 17, the number of past year initiates
- of alcohol use declined from 2.6 million adolescents in 2002,
- 12 to 2.3 million adolescents in 2019." Did I read both of those
- 13 correctly?
- 14 A. Yes.
- 15 Q. Would you agree that in this country more than half
- 16 of people who first initiate combustible cigarette smoking do
- 17 so before they turn 18 years of age?
- 18 A. Say that again, please.
- 19 Q. Yeah. I mean, is it your position that more than
- 20 half of people who first initiate combustible cigarette
- 21 smoking do so before they turn 18 years of age?
- 22 A. That's my understanding.
- 23 Q. Okay. Now, if we go down to page 17, it goes on to
- 24 say, "Among young adult aged 18 to 25, the number of past year
- 25 alcohol use initiates increased from 1.2 million people in

- 1 2002, to 2.4 million people in 2019." Did I read that
- 2 correctly?
- 3 A. Yes.
- Q. Goes on to say, "Among adults aged 26 or older, the
- 5 number of past year initiates of alcohol use in 2019, 205,000
- 6 people was similar to the numbers in most years from 2002
- 7 through 2018." Did I read that correctly?
- 8 A. Yes.
- 9 Q. Okay. So, if we continue on, it talks about
- 10 substance use disorders in the past year as well. And it
- 11 says, "Substance use disorders, SUDs, are characterized by
- 12 impairment caused by the recurrent use of alcohol or other
- drugs or both, including health problems, disability and
- 14 failure to meet major responsibilities at work, school or
- 15 home. The 2019 NSDUH included a series of questions to
- 16 estimate the percentage of the population aged 12 or older who
- 17 had at least one SUD in the past 12 months, subsequently
- 18 referred to as an SUD or past year SUD, except when SUDs refer
- 19 to more than one substance, such as an SUD for the misuse of
- 20 specific prescription drugs. SUD questions classify people as
- 21 having an SUD in the past 12 months based on criteria
- 22 specified by the Diagnostic and Statistical Manual of Mental
- 23 Disorders, 4th edition, DSM-IV. Respondents were asked SUD
- 24 questions if they previously reported use of alcohol or
- 25 illicit drugs in the past 12 months. Illicit drugs include

- 1 the use of marijuana, cocaine, including crack, heroin,
- 2 hallucinogens, inhalants and methamphetamines, as well as the
- 3 misuse of prescription stimulants, tranquilizers or sedatives,
- 4 e.g., benzodiazepines, and pain relievers." Did I read that
- 5 correctly?
- 6 A. Yes.
- 7 Q. The criteria specified in the DSM-IV, correct?
- 8 That's the criteria they used?
- 9 A. Yes.
- 10 Q. Okay. Says, "Alcohol use disorder was defined as
- 11 meeting DSM-IV criteria for either dependence or abuse for
- 12 alcohol. Respondents who used alcohol on 6 or more days in
- 13 the past 12 months were classified as having dependence, even
- 14 if they met three or more of the seven dependence criteria as
- 15 a -- having abuse if they did not meet the criteria for
- 16 alcohol dependence but met one or more of the four abuse
- 17 criteria. Relevant definitions for alcohol use disorder can
- 18 be found in the glossary." Correct? Did I read that
- 19 correctly?
- 20 A. Close enough.
- 21 Q. Okay. Thank you.
- Would you agree that it is estimated that over
- 23 400,000 adolescents under the age of 18 have an alcohol use
- 24 disorder?
- 25 A. Apparently, by this, yes. By this criteria.

- 1 Q. Would you agree that the estimated number of
- 2 adolescents with alcohol use disorder is about five times
- 3 higher than the estimated number of adolescents who are daily
- 4 smokers of tobacco-burning cigarettes?
- 5 A. That sounds about right.
- 6 Q. Okay. I want to go to table -- or Figure 37. This
- 7 figure is: "Alcohol use disorder in the past year among
- 8 people aged 12 or older, 2002 to 2019." Do you see that?
- 9 A. Yes.
- 10 Q. Even though alcohol is still heavily advertised on
- 11 television, alcohol use disorder has, in fact, declined among
- 12 people aged 12 or older, correct?
- 13 A. Apparently.
- 14 Q. Over here on the right it says, "This -- illicit
- 15 drug use disorder. This section presents overall estimates
- 16 for illicit drug use disorder. It then provides SUD estimates
- 17 for selected specific illicit drugs. Illicit drug use
- 18 disorder was defined as meeting DSM-IV criteria for either
- 19 dependence or abuse for one or more of the following illicit
- 20 drugs: Marijuana, cocaine, heroin, hallucinogens, inhalants,
- 21 methamphetamines, and -- or" -- sorry -- "or prescription
- 22 psychotherapeutic drugs that were misused, i.e., stimulants,
- 23 tranquilizers or sedatives and pain relievers." Did I read
- 24 that correctly?
- 25 A. Yes.

- 1 Q. It also says, "Among people aged 12 or older in
- 2 2019, 3 percent, or 8.3 million people, had at least one
- 3 illicit drug use disorder in the past year." Did I read that
- 4 correctly?
- 5 A. Yes.
- 6 Q. Then if you go down to the aged 12 to 17, it says,
- 7 "Among adolescents aged 12 to 17 in 2019, 3.6 percent, or
- 8 894,000 people, had an illicit drug use disorder in the past
- 9 year." Did I read that correctly?
- 10 A. Yes.
- 11 Q. If you go down to page 36, it specifically addresses
- 12 something called a "marijuana use disorder." Do you see that?
- 13 A. Yes.
- 14 Q. It says, "Among people aged 12 or older, the
- 15 percentage with a past year marijuana use disorder was 1.8
- 16 percent in 2002, or 4.3 million people, and 2019, or 4.8
- 17 million people, but showed declines in some years. Although
- 18 this population in 2019 -- among this population in 2019, the
- 19 percentage who had a marijuana use disorder in the past year
- 20 was similar to the percentage in each year from 2002 through
- 21 2013, but it was higher than the percentages in most years
- 22 from 2014 to 2018." Did I read that correctly?
- 23 A. Yes.
- Q. Okay. And in the aged 12 to 17 section, it says,
- 25 "Among adolescents aged 12 to 17, the percentage with a past

- 1 year marijuana use disorder declined from 4.3 percent, or 1.1
- 2 million people, in 2002, to 2.8 percent, or 699,000 people, in
- 3 2019." Did I read that correctly?
- 4 A. Yes.
- 5 Q. Would you agree that an estimated 700,000
- 6 adolescents under the age of 18 have a marijuana use disorder
- 7 as described in this document?
- 8 A. As -- per that definition, yes.
- 9 Q. Would you agree that the estimated number of
- 10 adolescents with a marijuana use disorder exceeds the number
- 11 of adolescents who reported smoking at least one
- 12 tobacco-burning cigarette in the past month?
- 13 A. Yes. But, again, it's apples and oranges because
- 14 you're comparing use over a past year for marijuana and use
- 15 over the past 30 days for cigarettes. That's not really a
- 16 fair comparison.
- 17 Q. Okay. Would you agree that the estimated number of
- 18 adolescents with a marijuana use disorder is about nine times
- 19 higher than the estimated number of adolescents who are daily
- 20 smokers of tobacco-burning cigarettes?
- 21 A. Again, I think there's a -- somewhat of an improper
- 22 comparison being made, but the raw numbers, I would agree
- 23 with.
- Q. All right. There's a table here, table -- figure,
- 25 sorry -- Figure 39, "Marijuana use disorder in the past year

- 1 among people aged 12 or older." And then there's a table,
- 2 "Marijuana use disorder in the past year among people aged 12
- 3 or older." So I'm going to focus on the table. Here. And
- 4 ask you. You see that this shows that -- let me see.
- 5 Let me ask you this. The marijuana legalization
- 6 movement has not had much of an impact on marijuana use
- 7 disorder because the percentages haven't gone up since 2002,
- 8 and, in fact, have gone down, correct?
- 9 A. In terms of use of marijuana?
- 10 Q. Yes.
- 11 A. I think that's correct.
- 12 Q. Okay.
- 13 A. I think they're counting all use as a disorder,
- 14 strangely, but, yeah.
- 15 Q. Have you looked at how they defined "use disorder"
- 16 in the DSM-IV?
- 17 A. Not apart from what they're saying here. I think
- 18 they're --
- 19 Q. Okay.
- 20 A. -- giving it a definition here.
- 21 Q. Okay. So then we go to page 40. And then there's a
- 22 section, "Substance use disorder, alcohol and illicit drugs."
- 23 "Among people aged 12 or older, the percentage with a past
- 24 year SUD, i.e., alcoholic use disorder, illicit drug use
- 25 disorder or both, remained stable between 2015 and 2019. In

- 1 2019, 20.4 million people aged 12 or older, or 7.4 percent of
- 2 this population, had an SUD in the past year, including 14.5
- 3 million who had an alcoholic use disorder and 8.3 million who
- 4 had an illicit drug use disorder. Among the 8.3 million
- 5 people with a past year illicit drug use disorder, 4.8 million
- 6 people had a marijuana use disorder and 1.4 million people had
- 7 a prescription pain reliever use disorder." Did I read that
- 8 correctly?
- 9 A. Yes.
- 10 Q. And then, of course, on the next page, it goes down
- 11 to break this up from -- in the group age 12 to 17. "Among
- 12 adolescents aged 12 to 17 in 2019, 4.5 percent, or 1.1 million
- 13 people, had a past year SUD." Did I read that correctly?
- 14 A. Yes.
- 15 Q. You would agree that an estimated 1.1 million
- 16 adolescents under the age of 18 have a substance use disorder
- 17 to either alcohol or illicit drugs according to this criteria?
- 18 A. Apparently.
- 19 Q. Would you agree that the estimated number of
- 20 adolescents with a substance use disorder to either alcohol or
- 21 illicit drugs is nearly twice the estimated number of
- 22 adolescents who smoked at least one tobacco-burning cigarette
- 23 in the past month?
- A. Well, yeah, except one is comparing behavior over a
- 25 past year; the other is comparing it to just behavior over a

- 1 last month. So it's not really a fair comparison.
- Q. Would you agree that the estimated number of
- 3 adolescents with a substance use disorder to either alcohol or
- 4 illicit drugs is about 14 times higher than the estimated
- 5 number of adolescents who are daily smokers of tobacco-burning
- 6 cigarettes?
- 7 A. Again, it seems like an apples and orange
- 8 comparison. I agree with the underlying data but not with the
- 9 comparison.
- 10 Q. Okay. All right. So I have one more, Dr. Proctor.
- 11 I think it's back here on page 40.
- 12 Okay. Page 40, aged 12 to 17. This is on the
- 13 opioid use disorder. "Among adolescents aged 12 to 17, the
- 14 percentage with a past year opioid use disorder decreased
- 15 from .6 percent, or 153,000 people, in 2016, to .3 percent, or
- 16 87,000 people, in 2019. Except for 2016, these estimates in
- 17 2019, were similar to the estimates in 2015 to 2018." Did I
- 18 read that correctly?
- 19 A. Yes.
- 20 Q. Would you agree that the estimated number of
- 21 adolescents with an opioid use disorder is nearly twice the
- 22 estimated number of adolescents who are daily smokers of
- 23 tobacco-burning cigarettes?
- A. No. Again, I think there's an improper comparison
- 25 over the time period. In other words, the regular smoking, I

- 1 think, is over the past 30 days. But here, you've got a --
- 2 the opioid use is over the past year. So I'm not comfortable
- 3 with the comparison, though I -- I agree with the underlying
- 4 data.
- 5 Q. Okay. We may come back and compare those. And make
- 6 a note.
- 7 All right. I'm going to continue on with this
- 8 document -- and we're going to talk about substance use
- 9 treatment in the past year, Dr. Proctor. "Substance use
- 10 treatment is intended to help people address problems
- 11 associated with their use of alcohol or illicit drugs, i.e.,
- 12 not counting tobacco use, including mental -- medical problems
- 13 associated with the use of alcohol or illicit drugs. The 2019
- 14 NSDUH provided two principal measures related to substance use
- 15 treatment in the past year: A, the need for substance use
- 16 treatment; and B, the receipt of substance use treatment. The
- 17 survey also collected information on the types of settings
- 18 where people received treatment and issues associated with
- 19 people needing substance use treatment but not receiving it."
- 20 And then it goes on to have the, "Need for substance use
- 21 treatment. SAMHSA classifies people as having a need for
- 22 substance use treatment if they had an SUD in the past year or
- 23 if they received substance use treatment at a specialty
- 24 facility within the past year." Did I read that correctly?
- 25 A. Yes.

- 1 Q. And, of course, then it goes to break it down by
- 2 ages. In the aged 12 to 17 category, it says, "Among
- 3 adolescents aged 12 to 17 in 2019, 4.6 percent, or 1.1
- 4 million, needed substance use treatment in the past year.
- 5 These estimates in 2019, were similar to the estimates in 2015
- 6 to 2017, but they were higher than the estimates in 2018."
- 7 Did I read that correctly?
- 8 A. Yeah. But I have to say it's bizarre because
- 9 they're excluding tobacco as if people using tobacco don't
- 10 need substance use treatment. There's a very odd separation
- 11 of tobacco in that -- on that page.
- 12 Q. Well, would you agree that the number of adolescents
- 13 that the federal government estimates has a need for substance
- 14 abuse use treatment for either alcohol or illicit drugs is
- 15 nearly twice the estimated number of adolescents who smoked at
- 16 least one tobacco-burning cigarette in the past month?
- 17 A. Yeah. But it's a crazy idea that the smokers don't
- 18 need substance use treatment. It's bizarre that they're
- 19 segregating that out.
- 20 O. Would you agree that the number of adolescents that
- 21 the federal government estimates have a need for substance
- 22 abuse -- use treatment for either alcohol or illicit drugs is
- 23 about 14 times higher than the estimated number of adolescents
- 24 who are daily smokers of tobacco-burning cigarettes?
- 25 A. Your math could well be right.

- 1 O. Okay. And keep going down to page --
- 2 A. But, again, I don't accept the categories.
- 3 Q. Understood.
- 4 Receipt of substance use treatment. Okay. This is
- 5 a long one. Bear with me.
- 6 ATTORNEY HENNINGER: Lisa, you'll get copies of all
- 7 these, I promise.
- 8 BY ATTORNEY HENNINGER:
- 9 Q. "NSDUH respondents who used alcohol or illicit drugs
- 10 in their lifetime were asked whether they ever received
- 11 substance use treatment. And those who received substance use
- 12 treatment in their lifetime were asked whether they received
- 13 treatment in the past 12 months prior to the survey interview,
- 14 i.e., in the past year." Okay. So, these are respondents who
- 15 used drugs or alcohol and who have received treatment for
- 16 drugs and alcohol, correct, Doctor?
- 17 A. Nontobacco drugs.
- 18 Q. Yeah. "Receipt of any substance use treatment
- 19 includes substance use treatment received in the past year at
- 20 any location, such as a hospital, paren, inpatient, closed
- 21 paren, rehabilitation facility, outpatient or inpatient,
- 22 mental health center, emergency room, private doctor's office,
- 23 prison or jail, or self-help group, e.g., Alcoholics Anonymous
- 24 or Narcotics Anonymous, closed paren. The 2019 NSDUH also
- 25 collected information on the receipt of substance use

- 1 treatment at a specialty facility. Substance use treatment at
- 2 a specialty facility is included in the estimates of any
- 3 substance use treatment because a subset of the treatment
- 4 locations was categorized as specialty facilities -- at a
- 5 specialty facility was defined as a substance use treatment
- 6 received by a respondent at a hospital, paren, only as an
- 7 inpatient, closed paren, a drug or alcohol rehabilitation
- 8 facility, as an inpatient or outpatient, or mental health
- 9 center." Did I read that correctly?
- 10 A. Yes.
- 11 Q. And, of course, then it goes to the aged 12 to 17
- 12 and states, "Among adolescents aged 12 to 17 in 2019, .7
- percent, or 172,000 people, received any substance use
- 14 treatment in the past year. These estimates in 2019, were
- 15 similar to the estimates in 2015 to 2018." Did I read that
- 16 correctly?
- 17 A. Yes.
- 18 Q. Would you agree that an estimated 172,000
- 19 adolescents under the age of 17 actually received treatment
- 20 for alcohol or illicit drug use each year?
- 21 A. Apparently. That's what the data says.
- 22 Q. Would you agree that about twice as many adolescents
- 23 under the age of 18 received treatment for alcohol or drug use
- 24 than are daily smokers of tobacco-burning cigarettes?
- 25 A. It's just such an apples and orange comparison. The

- 1 numbers, I think, are correct, but it's -- I just don't really
- 2 like the comparison.
- 3 Q. I mean, why not? I mean, you have a comparison of
- 4 groups of 12 to 17-year-olds who were asked a variety of
- 5 questions. One is whether or not they smoke, and one is
- 6 whether or not they've received treatment for alcohol or drug
- 7 use. And they respond --
- 8 A. Yeah, but they -- the comparison would be how many
- 9 of the people who are getting treated, you know, for the
- 10 different substances. So there -- what you want to do is know
- 11 how many people are being treated for tobacco use disorder
- 12 versus these other substance abuse disorders, and that's not
- 13 what's being compared at all. So I think it's a bizarre
- 14 comparison.
- 15 Q. No. But what I am comparing are the number of
- 16 adolescents aged 12 to 17 in the United States who have
- 17 reported receiving substance use treatment in the past year
- 18 versus the number of adolescents aged 12 to 17 who have
- 19 reported smoking a combustible cigarette within the last --
- 20 A. Yeah. But, apparently, none of those people, or at
- 21 least we don't know, of those people smoking are getting any
- 22 treatment for their abuse disorder because it's not even
- 23 counted. Like where is the data in this report on how many of
- 24 these smokers are getting treatment for their substance use
- 25 disorder? It's not even mentioned, I don't think.

And but how does that factor in, in comparing the 1 Q. 2 numbers of people who actually sought treatment for alcohol 3 and drug use with the numbers of people who smoke cigarettes? 4 Because what you want to know is -- you have two 5 different types of disorder. You have alcohol and these 6 illicit drugs, and then you have tobacco disorder. You want 7 to know who's getting more help, and apparently, the tobacco 8 people are not getting any help. They're not even counted, I 9 think, in terms of substance use treatment. So that's --10 Q. But -- it's not a matter of whether or not 11 they're -- they have a tobacco use disorder. It's by simple 12 math, isn't it true, that there are more 12 to 17-year-olds, 13 just by the numbers, who have received some type of substance abuse training to alcohol and drugs, not tobacco, than are 14 15 current daily smokers of tobacco-burning cigarettes? 16 Yeah. Again, it's -- I agree with the math, but 17 it's apples and oranges. I don't think there's -- I don't think it's a legitimate comparison. 18 19 Q. Okay. 20 But I agree with your numbers. Α. And if we go down to page 52, we go to the 18 to 25, 21 Q. 22 it says, "Among young adults aged 18 to 25 in 2019, 1.7 23 percent, or 578,000 people, received any substance use treatment in the past year. These estimates in 2019, were 24 similar to the estimates in 2015 to 2018." Would you agree 25

- that the estimated 578,000 young adults aged 18 to 25 actually
- 2 receiving treatment for alcohol and drug -- year is what's
- 3 reflected in this document?
- A. Yes, yes. But, again, apparently, the tobacco users
- 5 are getting no help, and they're not even counted as -- as --
- 6 as users.
- 7 Q. Would you agree that the estimated number of persons
- 8 under the age of 26 in this country who receive treatment each
- 9 year for alcohol or illicit drug use is about three-quarters
- 10 of a million?
- 11 A. Well, this figure here has 578,000.
- 12 Q. Uh-huh.
- 13 A. So that would be about two-fifths of a million,
- 14 maybe.
- 15 Q. Okay --
- 16 A. I mean three-fifths of a million.
- 17 Q. All right.
- 18 A. Little bit less than that.
- 19 Q. All right. Well, believe it or not, we actually are
- 20 done with Exhibit 16 --
- 21 A. A fond farewell.
- Q. -- so, we are going to go to Exhibit 17, which I
- 23 will pull up momentarily.
- 24 (Exhibit No. 17 was marked for identification.)
- 25 BY ATTORNEY HENNINGER:

- 1 Q. Okay. All right. Can you see this, Dr. Proctor?
- 2 A. In principal --
- 3 Q. In principal. I know. I'll blow it up here for you
- 4 in a second. I'm going to represent to you for right now,
- 5 until I blow it up, that this is Exhibit PMU 99460, which is
- 6 Exhibit 17 to this deposition. It is a Baxter Bulletin
- 7 article entitled, "Higher Death Rate for Cigarette Smokers."
- 8 It's The Baxter Bulletin, Mountain Home, Arkansas, dated
- 9 November 4th, 1954. I'm now going to try to blow this up for
- 10 you, Dr. Proctor, so you can at least see -- hopefully, you
- 11 can see the November 4th, 1954, date at the top. And The
- 12 Baxter Bulletin, Mountain Home, Arkansas. Do you see that --
- 13 A. That -- yeah. That's a classic. I'm sure we've all
- 14 read The Baxter Bulletin from 19 whatever.
- 15 Q. Exactly, exactly.
- 16 And if I were to ask you why -- if you know why I'm
- 17 showing you something from The Baxter Bulletin, Mountain Home,
- 18 Arkansas, do you know if any of the Plaintiffs, either
- 19 Mr. Tully or Mrs. Geist, lived in Mountain Home, Arkansas, or
- 20 anywhere near Arkansas?
- 21 A. That would be my assumption; otherwise, you wouldn't
- 22 have showed it.
- Q. Okay. But you don't have any information on that
- 24 one way or another, right?
- 25 A. Correct.

- 1 Q. All right. So, let me go down to the article. If I
- 2 can get my -- where's my -- okay. There you go. I'm going to
- 3 try to zoom in on this a little bit better for both of our
- 4 sakes, Doctor.
- 5 Do you -- can you see that okay?
- 6 A. Barely.
- 7 Q. I'll try a little bit better. And then --
- 8 A. That's better.
- 9 Q. -- there we go.
- 10 Okay. The article says, "The American Cancer
- 11 Society recently cleared up most of the confusion about health
- 12 and cigarette smoking when it reported that deaths among
- 13 cigarette smokers from 50 to 70 years of age are as much as 75
- 14 percent higher than those among nonsmokers. The report was no
- 15 tentative or qualified report." Did I read that correctly?
- 16 A. Yes.
- 17 Q. It goes on to say down here, "Originally, the
- 18 American Cancer Society intended to wait another year before
- 19 reporting on the study, but officials of the society report
- 20 that cigarette smokers were found to have so much higher death
- 21 rates that they didn't think they could withhold the
- 22 information another year. They also said that they were
- 23 releasing the information because we are thinking of saving
- 24 our lives." Did I read that correctly?
- 25 A. Yeah. "Saving lives."

- 1 O. "Saving lives." Thank you.
- 2 And you know what now -- now that we've kind of read
- 3 a little bit about this, I assume you know exactly what
- 4 they're talking about because you and I have talked about it a
- 5 number of times at trial: The American Cancer Society --
- 6 A. Correct. Yeah. This is the summer 1954
- 7 announcement of the Hammond and Horn prospective study
- 8 results.
- 9 Q. Okay. And in this, it's reported at least in this
- 10 article that -- that the Hammond and Horn study results that
- 11 lung cancer deaths were at least three times and possibly nine
- 12 times as common among cigarette smokers as nonsmokers,
- 13 correct?
- 14 A. Yes.
- 15 Q. Okay. I'm going to -- here's Deposition Exhibit 18
- 16 will be our next one.
- 17 (Exhibit No. 18 was marked for identification.)
- 18 BY ATTORNEY HENNINGER:
- 19 Q. And here you go. It's another oldie, but goodie.
- 20 From The Baxter Bulletin, Mountain Home, and I'll
- 21 blow it up. Let's see -- let's first focus on the time. This
- 22 is from Thursday, June 2nd, 1960. Do you see the date on
- 23 that?
- 24 A. Yes.
- 25 Q. And the article I'm talking about -- I'm going to

- 1 blow this up some more here. Because it's a little hard to
- 2 see -- whoops.
- 3 Okay. Is: "Comments on the County Beat." Do you
- 4 see that, Dr. Proctor?
- 5 A. Yes.
- 6 Q. Okay. And then it continues, and there's a little
- 7 star separating it. And it stays, "The latest warning on
- 8 cigarette threat comes from National Tuberculosis Association,
- 9 which has issued a statement on these three points: There is
- 10 an alarming increase in deaths from lung cancer; two,
- 11 cigarette smoking is a major cause of lung cancer; three, the
- 12 risk of lung cancer increases with the number of cigarettes
- 13 smoked." Did I read that correctly?
- 14 A. Yes.
- 15 Q. So this June 2nd, 1960, Baxter Bulletin article
- 16 reports that cigarette smoking is a major cause of lung cancer
- 17 and that the risk of lung cancer increases with the number of
- 18 cigarettes smoked, correct?
- 19 A. Yes.
- Q. The article also goes on to say -- let's see.
- 21 Okay. Up here, "Just as discouraging to those of us
- 22 who can't or won't give up the habit is another statement in
- 23 the report, which says that although research is in progress,
- 24 'no present method of treating tobacco or of filtering the
- 25 smoke has been proved to reduce the harmful effect of

- 1 cigarette smoking. Up to now, these harmful effects can be
- 2 avoided only by not smoking cigarettes.'" Did I read that
- 3 correctly?
- 4 A. Yes.
- 5 Q. And this June 2nd, 1960, Baxter Bulletin article
- 6 reports there's no present method of treating tobacco or
- 7 filtering the smoke has been proven to reduce the harmful
- 8 effect of cigarette smoking, correct?
- 9 A. Yes.
- 10 Q. And this article also says that the only way to
- 11 avoid those harmful effects is by not smoking cigarettes,
- 12 correct?
- 13 A. Right. I mean, there are other ways that they don't
- 14 seem to know about. You could make them noninhalable or
- 15 noncombustible or nonaddictive. And, certainly, elements of
- 16 that were already known.
- 17 Q. I'm going to go on now to Deposition Exhibit Number
- 18 19.
- 19 (Exhibit No. 19 was marked for identification.)
- 20 BY ATTORNEY HENNINGER:
- 21 Q. And this is another Baxter Bulletin article and the
- 22 date -- I'll blow it up some -- is October 11th, 1962. Do you
- 23 see that?
- 24 A. Yes.
- Q. Okay. I'm going to blow up down here so maybe we

- 1 can -- "Dr. Peale speaks at medical event." Do you see where
- 2 I have that highlighted?
- 3 A. Yes. Norman Vincent Peale.
- Q. Okay. And then it goes on to -- in this, it talks
- 5 about -- maybe so it's a little easier to see. He talks about
- 6 Ochsner from the Ochsner Clinic in New Orleans. Let me find
- 7 that part for you, Doctor?
- 8 A. Yeah. I see it. Yeah. It's --
- 9 Q. Oh, you do?
- 10 A. Yeah. If you go in -- right above that "Act 1"
- 11 headline, "Act 1 benefits" --
- 12 Q. Oh. There we go.
- 13 A. -- there.
- 14 Q. Thank you.
- "Dr. Alton Ochsner" -- I'm going to blow that up --
- 16 "of the Ochsner Clinic at New Orleans told the festival goers
- 17 the risk of cigarette smoker incurring lung cancer is eight
- 18 times as great as that of a nonsmoker. The festival group
- 19 awarded the special certificate of honor to Danny Thomas after
- 20 that." Do you see where I read that?
- 21 A. Yes.
- Q. All right. So, I'm going to go to another exhibit.
- 23 Dr. Proctor, this is going to be Exhibit Number 20, I believe.
- 24 (Exhibit No. 20 was marked for identification.)
- 25 BY ATTORNEY HENNINGER:

- O. All right. This is termed, "Health Hazard Federal
- 2 Report Scores Smoking." This is from the Muscatine Journal,
- 3 January 11th, 1964. Have you ever heard of the Muscatine
- 4 Journal of -- do you know where it's from?
- 5 A. No, I don't.
- 6 Q. Okay. All right. Well, what you see is that this
- 7 is -- it's actually an article. What this little "AP" means,
- 8 it's an Associated Press article that was picked up in a local
- 9 newspaper, correct?
- 10 A. Exactly.
- 11 Q. And this reports that "smoking cigarettes is a
- 12 health hazard that calls for corrective action and is a major
- 13 cause of lung cancer and other death-dealing disease,
- 14 especially in men, a blue-ribbon federal panel reported
- 15 yesterday. In short, the panel indicated the more you smoke,
- 16 the greater your risk of an early death." I read that
- 17 correctly, correct?
- 18 A. Yes.
- 19 Q. And I assume we all know what they're talking about,
- 20 this blue-ribbon panel is --
- 21 A. Yeah. They're talking about the Surgeon General's
- 22 report.
- Q. Okay. And then it goes on to outline some of the
- 24 highlights from the Surgeon General's report. It goes on to
- 25 say, "Number one, cigarette smoking far outweighs other causes

- 1 of lung cancer in men and the data for women point in the same
- 2 direction." Number four is: "The risk of lung cancer
- 3 increases the longer you smoke and the more cigarettes you
- 4 smoke in a day. It lessens if you quit smoking." Number
- 5 five: "Cigarette smoking is the most important cause of
- 6 chronic bronchitis, the coughing, irritation of the bronchial
- 7 tubes, and increases the risk of death from heart -- from
- 8 death from that disease." Did I read that correctly?
- 9 A. Yes.
- 10 Q. Okay. This January 11th, 1964, Muscatine Journal
- 11 article reports on the 1964 Surgeon General's conclusion that
- 12 the risk of lung cancer increases the longer you smoke and the
- 13 more cigarettes you smoke in a day, correct?
- 14 A. Yes.
- 15 Q. And this article reports on the 1964 Surgeon
- 16 General's conclusion that cigarette smoking is the most
- 17 important cause of chronic bronchitis as well, correct?
- 18 A. Yes.
- 19 Q. Okay. Okay. Let's see -- all right. Give me one
- 20 second, Dr. Proctor. I apologize. I'm looking for the --
- 21 okay. Let me -- okay.
- 22 So, Exhibit Number 20 [sic] -- I'm going to share --
- 23 show you right now, Doctor -- okay. This is Exhibit Number
- 24 20, and it is entitled, "Teachers Told Warn Students of
- 25 Smoking." And I'll represent to you -- whoops. Don't have

- 1 the thing. Oh, yes. Here it is.
- 2 This is from the Arkansas Gazette, Sunday, April
- 3 3rd, 1960. Do you see that date?
- 4 A. Yes.
- 5 Q. Okay. And this, again, is one of those -- it's a
- 6 little bit more difficult to see, but it looks like one of
- 7 those AP, Associated Press, articles, does it not?
- 8 A. It does.
- 9 Q. Okay. And it goes on to say, "'Science teachers
- should warn their students never to smoke cigarettes,' says a
- 11 cancer expert." Did I read that correctly?
- 12 A. Yes.
- 13 Q. So this 1960 -- April 1960, Arkansas Gazette article
- 14 says -- teachers should warn their students never to smoke
- 15 cigarettes, correct?
- 16 A. Yes.
- 17 Q. And then in the second paragraph, it goes on to say,
- 18 "'There is no method of treating tobacco or filtering smoke
- 19 that appreciably reduces the cancer risk, 'Dr. John Heller
- 20 told the National Science Teachers Association convention this
- 21 week. Heller is the director of the National Cancer Institute
- 22 at Bethesda, Maryland." Did I read that correctly?
- 23 A. Yes.
- Q. So this 1960 Arkansas Gazette article reports that
- 25 Dr. Heller, director of the National Cancer Institute, said

- 1 that there is no method of treating tobacco or filtering --
- 2 (inaudible) --
- 3 (Certified Stenographer clarification.)
- 4 BY ATTORNEY HENNINGER:
- 5 Q. This April 1960, Arkansas Gazette article reports
- 6 that Dr. Heller, director of the National Cancer Institute,
- 7 said there is no method of treating tobacco or filtering smoke
- 8 that appreciably reduces the cancer risk, correct?
- 9 A. Yeah. It's a paraphrase, but he apparently said
- 10 something like that.
- 11 Q. "Findings" -- the article also says -- and it says
- 12 here -- these are in quotes right here -- "'Findings imply
- 13 that persons who have never smoked at all have the best chance
- 14 of escaping lung cancer, 'he said." Did I read that
- 15 correctly?
- 16 A. Yes.
- 17 Q. Okay. Let me go to another exhibit. This will be
- 18 Exhibit 21, I believe.
- 19 (Exhibit No. 21 was marked for identification.)
- 20 BY ATTORNEY HENNINGER:
- 21 Q. And the good news, Dr. Proctor, is I'm running out
- 22 of exhibits, so that -- we should all be happy about that.
- A. Sounds good.
- Q. Including myself.
- 25 All right. This is -- Exhibit 21 is an article

- 1 entitled, "Teachers to View Films at Cancer Society Event."
- 2 And it's down here -- and I'll see if we can blow it up. But
- 3 it's a little bit hard to read, but if I represented that this
- 4 was also from the Muscatine Journal dated March 7th, 1964, do
- 5 you have any reason to doubt that I'd represent this
- 6 accurately right now?
- 7 A. No.
- 8 Q. Okay. Trust me --
- 9 A. I always trust you.
- 10 Q. So it goes on to say -- the article says, "East
- 11 Central Iowa teachers" -- and do you have any idea whether or
- 12 not Ms. -- Mrs. Geist or Mr. Tully had any connection to Iowa?
- 13 A. No, but I can infer that from your question.
- 14 Q. "East Central Iowa teachers will -- a new film and
- 15 film strip on the smoking and lung cancer relationship
- 16 Tuesday, March 17 at Hotel Roosevelt, Cedar Rapids. Biology
- 17 teachers, coaches, student counselors and other teachers in
- 18 Muscatine County have been invited to attend." Did I read
- 19 that correctly?
- 20 A. Yes.
- 21 Q. The article also states that "Dr. Brown explained
- 22 that the new film strip, 'I'll Choose the High Road,' is for
- 23 students at the sixth grade level and attempts to warn those
- 24 students about the health risks of smoking before they start.
- 25 The film, 'Is Smoking Worth It?' is designed for junior and

- 1 senior high students. 'We want these young people to know the
- 2 facts about smoking, which the cancer society attempts to
- 3 teach instead of preach,' says Brown." Did I read that
- 4 correctly?
- 5 A. Yes.
- 6 Q. So this March 1964, Muscatine Journal article is
- 7 reporting on anti-smoking films for students for sixth grade,
- 8 junior and senior high school students, correct?
- 9 A. Yes.
- 10 Q. And that would be from sixth grade all the way up
- through high school, correct?
- 12 A. Yes.
- 13 Q. Okay. Let's go on to another article. This will be
- 14 Exhibit 22.
- 15 (Exhibit No. 22 was marked for identification.)
- 16 BY ATTORNEY HENNINGER:
- 17 Q. Okay, Dr. Proctor. I have Exhibit 22 up on the
- 18 screen. This is from the Arkansas Gazette dated June 15th,
- 19 1968. It's entitled, "Programs Urged Against Smoking." The
- 20 article says -- I'll blow it up some since it's a tiny -- can
- 21 you read that okay, Dr. Proctor?
- 22 A. Yes.
- Q. Okay. It says, "County tuberculosis and respiratory
- 24 disease committees of the Arkansas Tuberculosis and
- 25 Respiratory Disease Association were urged Friday by the

- 1 association's executive committee to develop and sponsor
- 2 active programs to prevent young people from becoming smokers
- 3 and to convince smokers they should stop." Did I read that
- 4 correctly?
- 5 A. Yes.
- 6 Q. And then it goes on to say, "The association, whose
- 7 president is William H. Wyatt, endorsed findings of the United
- 8 States Public Health Service and other medical groups that
- 9 cigarette smokers die younger than nonsmokers and risk
- 10 disability from lung cancer, chronic bronchitis, emphysema,
- 11 coronary heart disease and other diseases in proportion to the
- 12 number of cigarettes smoked daily and the number of years a
- 13 person has smoked. Stopping smoking, the committee said,
- 14 'almost always improves lung function and reduces or stops
- 15 cough and sputum production.' It also 'clearly reduces the
- 16 risk of illness or death from coronary heart disease, lung
- 17 cancer and emphysema." Did I read that correctly?
- 18 A. Yes.
- 19 Q. This June 1968, Arkansas Gazette article reports
- 20 that cigarette smokers die younger than nonsmokers and the
- 21 risk of disability from lung cancer, chronic bronchitis and
- 22 emphysema, and coronary heart disease, correct?
- 23 A. Yes.
- Q. Okay. I was going to keep plowing through, but I
- 25 apologize because I need a comfort break. So I'm going to go

- 1 ahead and take a break here. And can we go ahead and make it
- 2 until 4:30. Is that okay?
- 3 A. That's fine with me.
- 4 (Brief recess taken from 4:17 p.m. to 4:32 p.m.)
- 5 BY ATTORNEY HENNINGER:
- 6 Q. So I'm going to continue. I'm going to put up on
- 7 the screen now, Dr. Proctor, what will be marked as Deposition
- 8 Exhibit 23.
- 9 (Exhibit No. 23 was marked for identification.)
- 10 BY ATTORNEY HENNINGER:
- 11 Q. And, you know, I looked on this, and I'll also tell
- 12 you it is an Exhibit ABF 001434, but this doesn't have where
- 13 it was published. So I'm going to represent to you,
- 14 Dr. Proctor, that this was published in the Muscatine, Iowa,
- 15 Journal in November 15th, 1977. Can you accept that
- 16 representation?
- 17 A. Yes.
- 18 Q. Okay. It is called -- the article is entitled,
- 19 "Smokeout Thursday." And it goes on to say, "A proclamation
- 20 has been issued by Mayor Evelyn" -- I'm not even going to
- 21 attempt to butcher her name, S-C-H-A-U-L-A-N-D -- "urging
- 22 Muscatine smokers to join in a day of freedom from cigarettes
- 23 Thursday." And that's something that you and I have talked
- 24 about at trial. You've testified about it. It's called, "The
- 25 Great -- the American Cancer Society's Great American

- 1 Smokeout," correct?
- 2 A. It is.
- 3 Q. And as this article reflects, "That is a day the
- 4 American Cancer Society has set aside for the Great American
- 5 Smokeout, and it's a statewide campaign aimed at getting
- 6 pledges from smokers willing to go a day without cigarettes."
- 7 Did I read that correctly?
- 8 A. Yeah. That's actually nationwide.
- 9 Q. Yes. But I guess since they're reporting it,
- 10 they're focused on the statewide efforts of Iowa, correct?
- 11 A. Yes.
- 12 Q. And this is a day that was a national campaign that
- 13 received some publicity of trying to get smokers to put down
- 14 smoking for at least one day, correct?
- 15 A. Yes.
- 16 Q. Okay. Then it goes on to say, "In connection with
- 17 the event, the American Cancer Society will have a display of
- 18 an opticscoptic lung" -- and it's O-P-T-I-C-S-C-O-P-T-I-C --
- 19 "lung at the Musser Public Library on Wednesday and Thursday
- 20 and the Muscatine Mall on Friday and Saturday. The lung shows
- 21 a normal lung, cancerous lung and a lung from -- with
- 22 emphysema." Did I read that correctly?
- 23 A. Yes.
- Q. This November 1977, Muscatine, Iowa, Journal article
- 25 is reporting on the American Cancer Society's Great American

- 1 Smokeout, correct?
- 2 A. It is.
- 3 Q. And it's also reporting that they were displaying
- 4 normal lungs, cancerous lungs and emphysematous lungs in the
- 5 community, correct?
- 6 A. Yes.
- 7 O. Okay. And it was common for the -- sorry. It was
- 8 common for the American Cancer Society to have such displays
- 9 in communities to demonstrate the harms of smoking, correct?
- 10 A. I've seen them elsewhere.
- 11 Q. All right. So, I'm going to go to Exhibit 24 now.
- 12 (Exhibit No. 24 was marked for identification.)
- 13 BY ATTORNEY HENNINGER:
- 14 Q. Okay. It's sort of on this same topic. We see
- 15 "Dear Abby" from the Iowa City Press Citizen from November
- 16 19th, 1986, correct?
- 17 A. Yes.
- 18 Q. Okay. I'll blow it up so you can see it a little
- 19 better.
- 20 "Anyone can live without cigarettes for a day." Let
- 21 me see if I can get it to go up a little bit.
- 22 And that was an article in the "Dear Abby" column,
- 23 correct?
- 24 A. Yes.
- Q. It goes on -- let me see -- to say here, "Tomorrow

- 1 will mark the tenth annual Great American Smokeout, an upbeat,
- 2 good-humored, one-day campaign to encourage smokers to quit
- 3 smoking for 24 hours -- just to prove that they can do it.
- 4 The idea was conceived by the American Cancer Society, which
- 5 insists that anyone who can live without a cigarette for 24
- 6 hours can quit forever. If you're hooked on cigarettes or
- 7 cigars and you really want to quit, why not start tomorrow --
- 8 just for 24 hours?" Did I read that correctly?
- 9 A. Yes.
- 10 Q. The article says as a smoker -- and it goes on --
- 11 let's see -- in here, but there's a portion in here and we can
- 12 find it in a second -- that says as a smoker you are ten times
- 13 more likely to die of lung cancer than a nonsmoker. Is that
- 14 something that would be reported in this type of article?
- 15 A. Yes.
- 16 Q. For example, it says it accounts -- it goes on to
- 17 say, "The following information may motivate you: According
- 18 to John" -- Banzhaf?
- 19 A. Yes --
- 20 Q. "The III, who is the executive director of the ASH,
- 21 Action on Smoking and Health, in Washington, lung cancer is
- 22 the single largest contributor to the total cancer rate. It
- 23 accounts for 25 percent of all cancer deaths in the United
- 24 States. It is estimated that" -- sorry. My contact is
- 25 messing up -- "85 percent of all lung cancer cases are due to

- 1 cigarette smoking. As a smoker, you are ten times more likely
- 2 to die of lung cancer than a nonsmoker." Did I read that
- 3 correctly?
- 4 A. Yes.
- 5 Q. Okay. We're going to go to Exhibit Number 25.
- 6 (Exhibit No. 25 was marked for identification.)
- 7 BY ATTORNEY HENNINGER:
- 8 Q. Does that show, "Saturday, Jackie Carlson"?
- 9 A. Yes.
- 10 Q. Okay. Because when I click my little thing, it
- 11 still showed the other -- the "Dear Abby," so I wanted to make
- 12 sure.
- 13 So I believe this is Exhibit 24 [sic]. And it is,
- 14 "Women and smoking," Muscatine, Iowa, Journal, May 23rd, 1981.
- 15 See if I can make it smaller, if it shows that. I'll go
- 16 ahead -- there's the Muscatine, Iowa, Journal, Saturday, May
- 17 23rd, 1981. It is also an exhibit identified as ABF 001470.
- 18 But I'll go a little bit smaller. There we go.
- 19 The article says that "women's smoking patterns are
- 20 becoming more like men's, and more women are developing lung
- 21 cancer. During the past ten years, women's death rates from
- 22 lung cancer have doubled according to the American Cancer
- 23 Society" -- sorry, let me go down -- "scientists know that 80
- 24 percent of lung cancer cases in the United States are caused
- 25 by cigarette smoking. The risk increases with the amount and

- 1 length of time smoked and decreases gradually after a smoker
- 2 breaks the habit." Did I read that correctly?
- 3 A. Yes.
- 4 Q. All right. Okay.
- 5 ATTORNEY HENNINGER: And, Lisa, did I accidentally
- 6 refer to that last exhibit -- is that 24 or was that 25?
- 7 (Off the record discussion.)
- 8 BY ATTORNEY HENNINGER:
- 9 Q. Okay. So, now, we're at Exhibit 26.
- 10 (Exhibit No. 26 was marked for identification.)
- 11 BY ATTORNEY HENNINGER:
- 12 Q. And this should be a Saturday, October 15th, 1983,
- 13 article from the Iowa City Press Citizen up in the top right.
- 14 Is that what you're seeing on your screen, Dr. Proctor?
- 15 A. Yes. On the cartoon page.
- 16 Q. Yes. And then there's a thing that says, "Timothy
- 17 Johnson." Do you see that?
- 18 A. Yes.
- 19 Q. Okay. And it says, "Lung cancer catching up to
- 20 breast cancer as killer." Did I read that correctly?
- 21 A. Yes.
- Q. All right. So let me go see if I can't blow this up
- 23 some.
- Okay. So the first paragraph says, "It's apparent
- 25 lung cancer is slowly but surely catching up with breast

- 1 cancer and soon may be the number one cancer killer of
- 2 American women." Did I read that correctly?
- 3 A. Yes.
- Q. And it goes on it give some statistics, "As recently
- 5 as 1978, 34,000 American women died of breast cancer a year,
- 6 while 24,000 died of lung cancer. This year, an estimated
- 7 37,200 women will die of breast cancer, while 34,000 will die
- 8 of lung cancer." Did I read that correctly?
- 9 A. Yes.
- 10 Q. Then it also goes on to talk about -- down here in
- 11 this paragraph, "The reason for the dramatic increase in lung
- 12 cancer that has occurred in American women since World War II
- 13 can be pinpointed quite easily, colon, Cigarette smoking."
- 14 Did I read that correctly?
- 15 A. Yes.
- 16 Q. Let's see. I'm trying to find -- okay. Then it
- 17 goes on to state that -- down here -- I'm trying to figure it
- 18 out, but this doctor or this Timothy Johnson -- do you know
- 19 whether or not he is a doctor or not?
- 20 A. I don't.
- 21 Q. Okay. Let me find it. If I were to -- oh, here it
- 22 is. Sorry. Found it.
- 23 Do you see here kind of the italicized portion?
- 24 A. Yes.
- 25 Q. Says, "Dr. Johnson is the director of Lay Health

- 1 Information at Harvard University Medical School and holds
- 2 joint clinical instructor positions in medicine at Harvard and
- 3 the Massachusetts General Hospital." And then it goes on to
- 4 say, "Questions should be mailed to Dr. Timothy Johnson, care
- 5 of the Chicago Tribune." Did I read that correctly?
- 6 A. Yes.
- 7 Q. All right, Dr. Proctor. We're going to go to
- 8 Exhibit 27.
- 9 (Exhibit No. 27 was marked for identification.)
- 10 BY ATTORNEY HENNINGER:
- 11 Q. Which I believe is the last exhibit I have to show
- 12 you.
- 13 A. Great.
- 14 Q. At least the last one that -- I have here in my
- 15 arsenal, I believe. Here we go.
- 16 All right. This is another article -- Number 27 is
- 17 an article. Says, "Iowa City Press Citizen, Monday, April
- 18 8th, 1980." Do you see that up in the right-hand corner, sir?
- 19 A. 1985.
- 20 Q. Yeah. "Study links rise in lung cancer rate to
- 21 smoking," that's the title of the article, correct?
- 22 A. Yes.
- Q. Says, "A rapid rise in lung cancer among Iowa women
- 24 can be blamed on an increase in cigarette smoking by women,
- 25 according to a study by the -- by an agency affiliated with

- 1 the University of Iowa. The study conducted by the Iowa
- 2 Health Registry showed the rate of lung cancer among Iowa
- 3 women is rising faster than any other type of cancer in the
- 4 state." Did I read that correctly?
- 5 A. Yes.
- 6 Q. Okay. For now, Dr. Proctor, I'm going to look
- 7 through my notes, but I am going to thank you for your time
- 8 and say that, subject to anything showing up on my notes, I'm
- 9 going to pass you to the next person for questioning. Thank
- 10 you?
- 11 A. Okay. Thank you.
- 12 ATTORNEY RUIZ: Bruce, is that me?
- 13 ATTORNEY TEPIKAN: Yeah. At this point,
- Dr. Proctor, I don't have any questions for you.
- 15 THE WITNESS: Great. Thank you.
- 16 CROSS-EXAMINATION
- 17 BY ATTORNEY RUIZ:
- 18 Q. Good afternoon, Dr. Proctor. My name is Maria --
- 19 A. Good afternoon.
- Q. -- Ruiz. I do believe we've met at some trial, but
- 21 I couldn't even tell you when. But it's nice to see you
- 22 again. I just have a couple of questions for you.
- 23 A. Okay.
- Q. Based on your review of the record in this case,
- 25 you're aware that Martin Tully never used a cigarette

- 1 manufactured by Liggett, right?
- 2 A. That's my understanding.
- Q. Okay. So, you would agree with me that there's
- 4 nothing that Liggett would have put out into the public that
- 5 would have caused Mr. Tully to begin smoking?
- 6 A. No --
- 7 ATTORNEY REYES: Object to form.
- 8 A. -- I wouldn't agree with that. I mean, the --
- 9 (Certified Stenographer clarification.)
- 10 A. No. I would not agree with that because, you know,
- 11 an ad for one is also an ad for all in the sense, and Liggett,
- 12 of course, was promoting its own cigarettes and from time to
- 13 time was also involved in the conspiracy. And, therefore,
- 14 anything that Liggett is doing pursuant to that conspiracy is
- 15 also creating a culture of acceptance for cigarettes, so I
- 16 would not agree with the way you phrased your question.
- 17 BY ATTORNEY RUIZ:
- 18 Q. And you -- I believe you've testified to this
- 19 before, but advertising isn't part of what you consider to be
- 20 the conspiracy, right?
- 21 A. No. That's not true. Advertising is part and not
- 22 part of the conspiracy. Obviously, each company is trying to
- 23 sell the most cigarettes. But on the other hand, within
- 24 advertising, what you could not say was governed by the
- 25 conspiracy. So, there's a -- there's a collaborative effort

- 1 that governs what could or could not be said about --
- 2 especially in the realm of health and safety. And that
- 3 definitely infects all of the advertising. So, in other
- 4 words, if concealment is part of the fraud, then what is not
- 5 said is part of the conspiracy, and that is true of
- 6 advertising as of other activities.
- 7 O. Liggett didn't conspire with anyone to convince
- 8 Martin Tully to smoke Marlboro cigarettes, right?
- 9 A. Strictly speaking, that would be true in that narrow
- 10 formulation.
- 11 Q. And I'll ask you some more questions for Verna
- 12 Geist. Do you know what Liggett brand cigarettes Verna Geist
- 13 ever smoked?
- 14 A. No.
- 15 Q. Okay. Are you familiar with a brand called Pyramid?
- 16 A. Yes.
- 17 Q. That brand of cigarettes didn't come out on the
- 18 market until 1988?
- 19 A. Right.
- 20 Q. Okay. Would you agree with me that Liggett didn't
- 21 advertise -- didn't conspire with anyone to convince Verna
- 22 Geist to smoke the non-Liggett brand cigarettes that she
- 23 smoked?
- 24 ATTORNEY REYES: Objection. Form.
- 25 A. I didn't really understand that question.

### 1 BY ATTORNEY RUIZ:

- Q. Would you agree with me that Liggett did not agree
- 3 with anyone to advertise to convince Verna Geist to smoke the
- 4 non-Liggett brand cigarettes that she smoked?
- 5 ATTORNEY REYES: Objection. Form.
- 6 A. In that odd formulation, that could be true.
- 7 It's -- it's hard to understand what you said, but perhaps --
- 8 what you said makes some sense, though it's oddly phrased.
- 9 BY ATTORNEY RUIZ:
- 10 Q. Okay. After 1997, the Pyramid cigarettes that Verna
- 11 Geist might have smoked had warning labels, correct?
- 12 A. Yes.
- 13 Q. And they had Liggett-specific warning labels that
- 14 were different from the labels that were on the other
- 15 cigarettes, right?
- 16 A. Eventually, Liggett does make a claim about
- 17 addiction which the other companies did not make.
- 18 Q. Liggett isn't making a claim about addiction on the
- 19 cigarettes. Liggett is specifically warning its users about
- 20 addiction, correct?
- 21 A. Yes. That's correct.
- Q. All right. You mentioned the CTR in your report,
- 23 right?
- 24 A. Yes.
- Q. And you've testified before about CTR special

- 1 projects?
- 2 A. Yes.
- 3 Q. I don't want to rehash that testimony. Liggett
- 4 resigned from the CTR in 1968, right?
- 5 A. Correct.
- 6 Q. You've also previously testified about meetings and
- 7 various representatives from other organizations made to
- 8 Arthur D. Little Laboratories; is that --
- 9 A. I think so, yeah -- yeah.
- 10 Q. Okay. American Cancer Society visited Arthur D.
- 11 Little Laboratories?
- 12 A. Yes.
- 13 Q. Okay. I'd like to show you a document, if I may.
- 14 Just give me a second to pull it up. Because I'm not as handy
- 15 as Ursula.
- 16 ATTORNEY HENNINGER: That's scary.
- 17 ATTORNEY RUIZ: It should scare us all.
- 18 BY ATTORNEY RUIZ:
- 19 Q. Can you see the document that I put on the screen,
- 20 Dr. Proctor?
- 21 A. Yes.
- Q. Okay. This is a 1956 document?
- 23 A. Yes.
- Q. Have you seen this document before?
- 25 A. Probably.

And it reflects that in 1956, Liggett authorized ADL 1 Q. 2 to give the Public Health Service representatives a tour of 3 the ADL Carlton Street laboratory and informed them of the status of the repeat mouse skin painting studies, right? 5 A. Yes. 6 Q. And this exhibit also makes clear that ADL and 7 Liggett were also coordinating with Dr. Winder regarding those studies, right? 8 9 Α. Yes. 10 Q. Have you reviewed Liggett witness testimony from the 11 Cipollone case? Probably, yeah. 12 Α. 13 Are you generally familiar with that testimony? Q. 14 Α. Yes. 15 ATTORNEY RUIZ: That's all I have. And for Lisa, do 16 you need the spelling of "Cipollone"? 17 CERTIFIED STENOGRAPHER: I was going to ask. 18 Thanks. ATTORNEY RUIZ: C-I-P-O-L-L-O-N-E. And I'm sure 19 others will correct me if I got that wrong. 20 CERTIFIED STENOGRAPHER: Thank you. 21 ATTORNEY RUIZ: Thank you, Dr. Proctor. I don't 22 23 have any other questions. 24 THE WITNESS: Thank you. 25 ATTORNEY REYES: Kim, do you have any questions?

	,
1	ATTORNEY WALD: I do not.
2	ATTORNEY REYES: I have a few questions,
3	Dr. Proctor.
4	THE WITNESS: Okay.
5	ATTORNEY HENNINGER: And same objection for one
6	ATTORNEY REYES: Yes.
7	ATTORNEY HENNINGER: Thank you.
8	ATTORNEY REYES: You want to put it on the record?
9	ATTORNEY HENNINGER: Yes. Objection for one
10	Defendant is good for all Defendants; is that correct?
11	ATTORNEY REYES: Yes, ma'am.
12	ATTORNEY HENNINGER: Thank you.
13	CROSS-EXAMINATION
14	BY ATTORNEY REYES:
15	Q. Dr. Proctor, you were asked a lot of questions
16	regarding polls dealing with smoking and health?
17	A. Regarding oh, polls. Yes.
18	Q. Dealing with smoking and health?
19	A. Yes.
20	Q. Does simply asking someone whether they believe
21	smoking can impact a person's health a good measure of a
22	person's understanding of the dangers of smoking?
23	ATTORNEY HENNINGER: Objection.
24	A. No. It's a very weak measure because just asking
25	whether something is good or bad for you doesn't tell you

- 1 anything, really.
- 2 BY ATTORNEY REYES:
- Q. Are there diseases that are caused by smoking in
- 4 which people have a poor understanding of?
- 5 A. Yes.
- 6 Q. What are some examples of diseases that cigarette
- 7 users do not contemplate or have a poor understanding of?
- 8 A. Well, that would be --
- 9 ATTORNEY HENNINGER: Objection. Are we talking --
- 10 THE WITNESS: Pardon me?
- 11 ATTORNEY HENNINGER: I'm sorry. Are we talking now?
- Time frame?
- 13 ATTORNEY REYES: Now.
- 14 ATTORNEY HENNINGER: Okay.
- 15 A. Yes. And both now and in the past, I think people
- 16 have a poor understanding of the nature and the magnitude and
- 17 the severity of various illnesses, things like Buerger's
- 18 disease, amputations. Very few smokers that I've ever met or
- 19 any of my students know that cigarettes are a leading cause of
- 20 amputations, that cigarettes cause birth defects, spontaneous
- 21 abortions, macular degeneration and, therefore, blindness. So
- 22 I think the variety of diseases and the severity of diseases
- 23 are even today poorly understood by -- especially by smokers
- 24 but also by nonsmokers.
- 25 BY ATTORNEY REYES:

- 1 Q. How does having a poor understanding of the diseases
- 2 you just mentioned caused by smoking affect a cigarette
- 3 consumer's expectations?
- 4 A. I think it --
- 5 ATTORNEY HENNINGER: Objection.
- 6 A. I think it create -- it means that the cigarettes
- 7 people are smoking now are creating false expectations. I
- 8 think people do not have accurate expectations. I think very
- 9 few people know that if you smoke for a long period of time,
- 10 most likely, your cigarettes will kill you. I think most
- 11 people don't understand the causal relationship between the
- 12 various diseases I mentioned, the blindness, the amputations,
- 13 the Buerger's -- Buerger disease, the spontaneous abortions.
- 14 And maybe most significantly, I think people have a poor
- 15 understanding of how different types of cigarettes create
- 16 disease. In other words, I think most people still have a
- 17 misunderstanding that a filtered cigarette would be safer.
- 18 BY ATTORNEY REYES:
- 19 Q. You were asked questions regarding polls dealing
- 20 with smoking causing lung cancer. Do you recall those?
- 21 A. Yes.
- Q. Based on your research, do cigarette users have a
- 23 poor understanding of the probabilities or likelihood of
- 24 developing lung cancer?
- 25 A. Yes --

- 1 ATTORNEY HENNINGER: Objection.
- 2 A. Yes. I think so. I think they -- as we've seen
- 3 from the Gallup polls, most people realize there's a
- 4 connection between smoking and lung cancer and that smoking
- 5 causes -- can cause lung cancer. But all the polls we saw
- 6 were simply asking is it one of the causes. And I think very
- 7 few smokers understand that almost all lung cancers are caused
- 8 by cigarettes. Especially when you think about the people
- 9 just beginning to smoke.
- 10 BY ATTORNEY REYES:
- 11 Q. Based on your research, do cigarette users have a
- 12 poor understanding of what it means to be diagnosed with stage
- 13 four lung cancer?
- 14 ATTORNEY HENNINGER: Objection.
- 15 A. I think most people would not understand what that
- 16 means. I think people would probably realize that's not a
- 17 good thing, but I don't think people have a good understanding
- 18 of how likely you are to die if you are diagnosed with stage
- 19 four lung cancer or any other type of lung cancer.
- 20 BY ATTORNEY REYES:
- 21 Q. You mentioned earlier the reasons why you believe
- 22 that cigarettes are defective --
- 23 A. Yes.
- Q. -- can you state that again?
- 25 A. Well, the main reason -- I mentioned that there are

- 1 principal defects and then subsidiary defects. The principal
- 2 defects would be inhalation or inhability, addiction and
- 3 combustion. Those are the -- those are the three principal
- 4 features of cigarettes -- design features of cigarettes,
- 5 defects of cigarettes, because they make cigarettes
- 6 unnecessarily hazardous, needlessly hazardous, avoidably
- 7 hazardous and, therefore, unreasonably hazardous. There are
- 8 also -- I mentioned subsidiary defects or minor defects which
- 9 include anything that's involved in a fraudulent
- 10 representation. So the fact that certain cigarettes are
- 11 called filtered, even though they don't filter, even though
- 12 historically certain cigarettes were called low tar, even
- 13 though they were not in fact low tar, the fact that certain
- 14 cigarettes were called lights, even though they were not
- 15 light, the fact that cigarettes were called natural or
- 16 additive-free, those are accurate in certain respects but
- 17 nonetheless fraudulent because they imply safety. So a lot of
- 18 people perceive an additive-free cigarette to be safer, even
- 19 though that is, in fact, not true. So there is a whole series
- 20 of subsidiary frauds that by virtue of leading to false
- 21 expectations are defective in that sense.
- Q. Based on your research, do ordinary cigarette
- 23 consumers have a poor understanding that cigarettes are
- 24 purposely designed to be inhalable?
- 25 ATTORNEY HENNINGER: Objection.

- 1 A. Well, I think that -- that, in a way, goes to
- 2 intent, do they understand the intent of the design. But I
- 3 think -- to answer your question, I think to what you're
- 4 really asking about, is I think most people don't realize that
- 5 cigarettes have been designed in such a way that they are --
- 6 that they cause more harm than necessary. So I think most
- 7 people are not well-acquainted with the fact that cigarettes
- 8 are -- are defective. I think that's not well understood by
- 9 most people. Even some people in the public health community
- 10 get this all screwed up, right?
- 11 BY ATTORNEY REYES:
- 12 Q. Based on your research, do ordinary cigarette
- 13 consumers have a poor understanding of the true addictive
- 14 nature of nicotine?
- 15 ATTORNEY HENNINGER: Objection.
- 16 A. I don't think most people know that nicotine is as
- 17 addictive as heroin or cocaine. I don't think most people
- 18 understand that if you have only a few cigarettes you are
- 19 likely to become a regular smoker. I don't think most people
- 20 understand how difficult cigarettes are to quit. Apart from
- 21 those people who have tried. In other words, my view is that
- 22 once people have tried, they -- they often do come to a kind
- 23 of expert understanding of how difficult it is to quit. So in
- 24 that sense, regular smokers who try to quit, I think they do
- 25 start learning, obviously, how difficult it is to quit. But

- 1 until people have tried to quit, I think very few people
- 2 understand how hard it would be. That's why I think -- that's
- 3 one reason I think it took so long for cigarettes to be
- 4 recognized as addictive because in the 1940s, and early 1950s,
- 5 they were very few people actually trying to quit. And,
- 6 therefore, very few people realizing how difficult it was to
- 7 quit.
- 8 BY ATTORNEY REYES:
- 9 Q. You were asked questions about newspaper articles
- 10 from The Baxter Bulletin, where there was mention that
- 11 cigarettes were causing harm. Do you recall some of those?
- 12 A. Yes.
- 13 Q. Did the tobacco cartel do anything to combat those
- 14 types of messages?
- 15 ATTORNEY HENNINGER: Objection.
- 16 A. Yes. The whole point of the conspiracy was to
- 17 dilute, oppose and distract from that news. So, if there had
- 18 not been articles such as those we've seen, there would have
- 19 been no need for a conspiracy from the industry's point of
- 20 view. The whole point of the conspiracy is to distract from
- 21 and counter those -- that information coming out into -- into
- 22 the public.
- 23 BY ATTORNEY REYES:
- Q. You were shown an article from 1960, titled,
- 25 "Teachers Told Warn Students of Smoking Cigarettes." Do you

- 1 recall that?
- 2 A. Yes.
- 3 Q. Did the tobacco cartel embrace these types of
- 4 messages or did they find new and creative ways to lure kids
- 5 to continue smoking?
- 6 A. Well, again --
- 7 ATTORNEY HENNINGER: Objection. Sorry.
- 8 A. -- that's the whole point of the conspiracy, is to
- 9 combat that growing scientific consensus and to find ways to
- 10 keep people smoking. That's the whole point of the denial
- 11 campaign. It's also the whole point of the reassurance
- 12 campaign through things like lights, low tars, filters. The
- 13 point in each instance is to keep people smoking in light of
- 14 this growing publicity of hazards.
- 15 BY ATTORNEY REYES:
- 16 Q. Can you talk a little bit about the Joe Camel
- 17 campaign? Is that an example of the tobacco cartel finding
- 18 creative ways to trap kids into a life of disease and
- 19 addiction?
- 20 ATTORNEY HENNINGER: Objection --
- 21 A. Well, the -- strictly speaking, the Camel campaign
- 22 is not a campaign by the industry. It's a campaign by one
- 23 company to attract as many people as they could to their
- 24 brand, in particular, by using that cartoon imagery to attract
- 25 underage people as well. And so I think if you qualify it,

- 1 that it's not really an example of the industry doing
- 2 something. In that particular case, it's an example of one
- 3 company trying to target kids.
- 4 BY ATTORNEY REYES:
- 5 Q. Was it successful, those types of marketing
- 6 techniques, of using cartoons? Were they successful in
- 7 targeting kids?
- 8 ATTORNEY HENNINGER: Objection --
- 9 A. The Joe Camel -- the Joe Camel campaign was
- 10 successful in capturing a sizable fraction of the teenage
- 11 market, which it had not had before. Camel was an aging
- 12 brand, a brand of old people, in the 1980s, and Joe Camel
- 13 helped propel that to a leading youth attract brand. It never
- 14 achieved the same youth marketing stature as Marlboro, but it
- 15 was basically tied with Newport as the -- one of the leading
- 16 underage target brands.
- 17 BY ATTORNEY REYES:
- 18 Q. I want you to assume that Verna Geist was 32 years
- 19 old in 1994.
- 20 A. Okay.
- 21 Q. Did the tobacco cartel get called to testify in
- 22 front of Congress in 1994, in that year?
- 23 ATTORNEY HENNINGER: Objection.
- 24 A. Yes.
- 25 BY ATTORNEY REYES:

- 1 Q. What was the tobacco cartel's position in that
- 2 hearing?
- 3 ATTORNEY HENNINGER: Objection --
- 4 A. Uniformly, the cigarette makers denied that
- 5 cigarettes cause cancer. They denied that nicotine was
- 6 addictive. They denied that there was any harm caused by
- 7 cigarettes.
- 8 BY ATTORNEY REYES:
- 9 Q. And what was the purpose of that hearing from the
- 10 government's standpoint? Were they trying to, you know, for
- 11 lack of a better term, just trying to save lives?
- 12 ATTORNEY HENNINGER: Objection.
- 13 A. I think the Waxman hearing was designed to get the
- 14 truth out and to have the industry go on record with the --
- 15 the denial campaign to sort of force a crisis in a way. In
- 16 light of the continued denial. You have to remember the
- 17 secret documents were coming out. The ingredients list was
- 18 coming out. So the manipulation of nicotine question was
- 19 heating up. The question of FDA, potential regulatory action
- 20 was coming up. It's the Clinton administration. So a lot of
- 21 things are heating up with the idea of really exposing the --
- 22 the denial campaign. That's what's really -- really going on,
- 23 getting it clearly outlined.
- 24 BY ATTORNEY REYES:
- 25 Q. After the 1994 congressional hearings, did tobacco

- 1 cartels continue to find new and creative ways to keep people
- 2 smoking?
- 3 ATTORNEY HENNINGER: Objection.
- 4 A. Yes. I mean, throughout that period, they are
- 5 adapting. They're adjusting their behavior.
- 6 BY ATTORNEY REYES:
- 7 Q. Can you explain what the Winston No Bull campaign
- 8 was about?
- 9 ATTORNEY HENNINGER: Objection.
- 10 A. That's Reynolds's effort to jump on the healthier
- 11 cigarette train with a new type of fraud, which was the no
- 12 additives fraud. Many of the companies had explored,
- 13 typically, on a smaller -- as a smaller-scale operation, a
- 14 so-called additive-free or an all-natural cigarette. And
- 15 Reynolds put more money into this than the other companies.
- 16 And the flagship brand for that effort was Winston, which, by
- 17 the late 1990s, was being advertised as an additive --
- 18 additive-free cigarette. And that was a deception because the
- 19 suggestion was made indirectly -- not directly, but
- 20 indirectly, that this would be a safer cigarette and -- when,
- 21 in fact, it was not a safer cigarette.
- 22 BY ATTORNEY REYES:
- Q. How did the Winston No Bull campaign affect the
- 24 cigarette consumer expectations regarding smoking and health?
- 25 ATTORNEY HENNINGER: Objection --

- 1 A. It created false expectations by suggesting that
- 2 this type of cigarette would be a safer cigarette when that
- 3 was not true.
- 4 BY ATTORNEY REYES:
- 5 Q. Was it successful in misleading cigarette consumers
- 6 into believing cigarettes were less dangerous than they
- 7 actually were?
- 8 ATTORNEY HENNINGER: Objection --
- 9 A. It was successful for a time, but eventually, due to
- 10 historical circumstances, other cigarettes were more
- 11 successful, namely American Spirit, notably, which indirectly
- 12 is eventually bought by Reynolds. But Winston drops out as
- 13 the flagship brand for the no-additive, natural direction, but
- 14 for a time, it was successful. It definitely sold many tens
- 15 of billions of cigarettes, but it was eventually eclipsed by
- 16 other so-called natural and additive-free cigarettes, like
- 17 American Spirit, but that's -- that's ten years later.
- 18 ATTORNEY REYES: Thank you, Dr. Proctor. I have no
- 19 further questions.
- 20 THE WITNESS: Thank you.
- 21 REDIRECT EXAMINATION
- 22 BY ATTORNEY HENNINGER:
- Q. I have just a couple follow-up questions,
- 24 Dr. Proctor, based on what Mr. Reyes asked you.
- 25 You answered a bunch of questions that he posed to

- 1 you about the general cigarette consumer, such as what was
- 2 the -- did they have a poor understanding of diseases caused
- 3 by smoking, did they have a poor understanding of addiction.
- 4 Do you remember those types of questions?
- 5 A. Yes.
- 6 Q. And you answered them as to cigarette smokers in
- 7 general, correct?
- 8 A. Yes.
- 9 Q. Just to reiterate, you do not have any information
- 10 specifically as to what Mrs. Verna Geist thought or believed
- 11 or knew about the dangers of smoking or their addictiveness of
- 12 smoking at any point in time, correct?
- 13 A. That's correct.
- 14 Q. And the same is true: You do not have any
- 15 information as to what Mr. Martin Tully knew or did not know
- 16 or heard or any of the information he had about the health
- 17 risks of smoking or the addictive nature of smoking, correct?
- 18 A. Well, I know what was not provided to him, but
- 19 you're correct that I don't know what he received. I don't
- 20 know what he thought.
- 21 Q. Fair enough. And --
- 22 A. You -- yeah. You put it as if -- as he had certain
- 23 information, but I think what you really meant is: Do I know
- 24 what he knew? And the answer is I do not.
- Q. And that's a very good point, so let me make sure I

- 1 have a clean question --
- 2 A. Yeah.
- 3 Q. -- for somebody maybe to use at trial.
- 4 You do not have any information as to what
- 5 Mr. Martin Tully specifically knew about the dangers of
- 6 smoking or believed about the dangers of smoking or their
- 7 addictiveness at any point in time, correct?
- 8 A. That's correct.
- 9 Q. And with regard to questions related to smokers
- 10 understanding what it means to be diagnosed with stage four
- 11 lung cancer, again, that is something you do not know whether
- 12 or not it applies to Mr. Geist or Mr. Tully -- Mrs. Geist or
- 13 Mr. Tully, correct?
- 14 A. Correct.
- 15 Q. Now, there was some questions you were asked about
- 16 Joe Camel earlier. Do you know whether or not any of the
- 17 individuals who smoked in these cases, Tully or Geist, were
- 18 smokers of Camel cigarettes?
- 19 A. No.
- 20 Q. Do you know if either of them reported even remotely
- 21 seeing a Joe Camel advertisement in their depositions or
- 22 Mr. Geist's deposition?
- 23 A. No.
- Q. You were asked a number of questions about the No
- 25 Bull campaign or the additive-free campaign that Winston

- 1 cigarettes ran at one point. Just to be clear, you do not
- 2 have any information specifically as to what Mrs. Geist may
- 3 have thought or -- about the No Bull or additive-free Winston
- 4 campaign, if she was even exposed to it, correct?
- 5 A. Correct. As to what she actually knew, I --
- 6 (Certified Stenographer clarification.)
- 7 THE WITNESS: That's correct.
- 8 I don't know what she actually knew or thought about
- 9 that.
- 10 BY ATTORNEY HENNINGER:
- 11 Q. Okay. And your -- you answered some questions for
- 12 Mr. Reyes about how consumers' expectations may have been
- 13 altered by various advertising campaigns that the cigarette
- 14 manufacturers had over times, but you are not testifying
- 15 specifically as to Mrs. Geist's consumer expectations or her
- 16 expectations, correct?
- 17 A. Yeah. The answers I was giving are with regard to
- 18 consumers in general.
- 19 Q. Okay. And that -- same for Mr. Tully, correct?
- 20 A. Yes.
- 21 ATTORNEY HENNINGER: Okay. I believe that I have
- 22 now no further follow-up questions, Dr. Proctor. Thank
- 23 you for your time.
- 24 THE WITNESS: Thank you.
- 25 ATTORNEY REYES: Thank you.

1	Madam Court Reporter, we're going to order just one
2	copy for me. I don't think Ms. Wald is going to order a
3	copy.
